REPORT

OF THE

SUPERINTENDENT AND TREASURER.

*To His Excellency the Governor, the Honorable Council, and
the Honorable Board of Trustees:*

GENTLEMEN,—We hereby respectfully submit the third biennial report of the State Industrial School for two years ending September 30, 1900:

Whole number committed to institution since its commencement	1,932
Number in school during year ending September 30, 1898	192
received during year ending September 30, 1898	34
in school October 1, 1898	134
discharged at expiration of sentence	32
discharged on probation	5
honorably discharged	3
escaped	1
died	1
in school October 1, 1899	126
received during year ending September 30, 1899	69
in school during year ending September 30, 1899	195
discharged at expiration of sentence	35
discharged on probation	5
honorably discharged	6
pardoned	1
escaped	1
in school September 30, 1900	147

PARENTAGE.

OFFENSE.

For stealing	59
breaking and entering	27
being stubborn, idle, disobedient	41
truancy	3
malicious mischief	1

For poisoning	1
lewdness	2
arson	3
assault	5

COMMITMENT.

Complaint may be made by parents, guardians, or any officer of transgression of some law, and after a fair trial in court, parties found guilty are sentenced by the court or trial justice having proper jurisdiction. No others are taken. The town or county from which they are sentenced pays \$1.50 per week for care, clothing, and education.

Most of the children come to us with very little education. All are transgressors of some law—idle, disobedient, truants from school or convicted of some of the lesser crimes, one of the common causes of which is that children are allowed on our streets nights, where they soon become acquainted and associate with the idle and dissolute. A contemporary report says: "The hours after 9 o'clock at night are responsible for the ruin of more little girls than any hour preceding, and during those hours boys are educated to become thieves and burglars." If children have no home to care for them what can we expect?

The term of commitment varies. Some are sentenced for only a year. In our opinion, all should have a minority sentence. We send them to school, educate and teach them to work, and a short sentence like a year is not enough to improve the child and have him show sufficient evidence of reform and strength of character to resist temptation.

As the trustees have the power to put on probation or discharge any boy or girl at any time when convinced of their reformation, no objections can be offered to a minority sentence.

All the inmates are furnished a new suit of clothes at reception and discharge, and we invariably find homes or situations for those that need and deserve them at expiration of sentence or honorable discharge, with free transportation to the home or situation, and the girls are accompanied to the

place of destination by the matron or a proper person delegated for that purpose.

Our institution is not intended for a prison, but a place for reformation. We aim to develop manhood and womanhood, educate and prepare the children to go out into the world and make an honest living and become useful members of society. Although we cannot expect to reform them all, a large majority of those that leave our school are well able to support themselves.

The maintenance of the institution includes salaries, wages, food, clothing, farm machinery, buildings, horses, cattle, and everything pertaining, and great care is needed in all its expenditures. We now have all our supplies in charge of a storekeeper and it has proved a saving. We try to exercise the most rigid economy consistent with the welfare of our inmates.

APPROPRIATION.

By the legislature of 1898-99 we were given a special appropriation of nine thousand and four hundred dollars, which has been received and expended as stated elsewhere.

HEALTH.

Our sanitary conditions are all that could be desired. The health of the inmates for the past two years has been generally good. One boy who had lain in jail for several weeks before commitment arrived here sick with a complication of diseases, and died after having been here a short time though given the best of medical aid and professional care. His body was taken in charge by his parents.

MORAL IMPROVEMENT.

The morning and evening devotions are held as usual. Every Sunday forenoon Bible lessons are given to both boys and girls. The religious services in the afternoon are in charge of the Young Men's Christian Association, to whom we pay the sum of one hundred and fifty dollars annually. The clergymen of the city preach in turn gratuitously for the

benefit of the children. Rev. Fathers Scott, Brennan, and Delaney still continue to look after the religious welfare of those of the Catholic faith.

SCHOOL.

All the inmates of our institution are required to attend our school, in which are taught all the common English branches, and considerable attention is now given to music. Our school will compare favorably with many of the best common schools in the progress of the scholars and quality of work by the teachers.

In our teachers we have been fortunate. Miss Belle F. Scoville, who has been principal teacher for many years, is still with us, and we think it would be hard to find her equal in that capacity. Miss Mary Cotter and Miss Phila H. Hall, a graduate of the Connecticut Normal School (the latter succeeding Miss Ina S. Nichols, who resigned to complete her education at Bridgewater), are giving the best of satisfaction.

Number scholars in first grade	26
scholars in second grade	21
scholars in third grade	27
scholars in fourth grade	30
scholars in fifth grade	15
scholars in sixth grade	12
scholars in eighth grade	16

A good knowledge of housekeeping and sewing is an essential part of a girl's education. Our girls cut and make all their own garments, and repair and mend the boys' clothing. Our laundry department is also operated by the girls. All these branches and also fancy work are taught them in a thorough manner by Miss Emma L. Gutterson and Mrs. Ida C. Davenport, whose success in these departments is well known.

The boys when not at school are engaged in the hosiery, upon the farm, assisting in carpenter work, and the various duties required about the institution.

RECREATION.

All the inmates have plenty of time for amusement. In the summer the girls find pleasure and exercise with croquet and other games upon the lawn, while in the boys' playground the boys are doing their best at baseball and other athletic games. In these, as well as in other places, the smaller boys are kept away from the larger ones as much as possible. Recreation is always under the charge of the matron and overseer.

ANNUAL EXAMINATION.

We have an examination of our school annually, to which the public are invited and given the opportunity of inspection. Declamations, reading, music, and singing, exhibition of art work by the pupils, remarks by the president, trustees, and others, presents to the meritorious, and the honorable discharge of such boys and girls as are found deserving, form most of the exercises. Considerable interest is taken by the public in this examination, and the attendance is usually large.

THE FARM.

The farm has been very successful the past two seasons, and we give herewith a list of the products and their value for the season of 1899:

50 tons hay at \$18	\$900.00
13 tons oat fodder at \$12	156.00
150 tons ensilage	500.00
20 tons cabbage at \$10	200.00
2 tons melons	10.00
32 bushels green peas	32.00
34 bushels string beans	34.00
129 bushels shelled beans	129.00
600 bushels sweet corn	300.00
113 bushels onions	62.15
160 bushels turnips	80.00
80 bushels beets	40.00

45 bushels parsnips	\$22.50
58 bushels tomatoes	43.50
75 bushels cucumbers	75.00
220 bushels carrots	110.00
815 bushels potatoes	489.00
1,076 bushels corn on cob	269.00
125 bushels mangels	31.25
35½ bushels beans, thrashed	75.00
9,000 pounds squashes	90.00
4,000 pounds pumpkins	15.00
900 heads lettuce	45.00
150 bunches celery	8.00
150 quarts milk per day at 4 cents	2,190.00
Hogs and veals	262.80

\$6,169.20

The following is the list of products for 1900:

40 tons hay	\$18.00	\$720.00
15 tons oat fodder	12.00	180.00
7 tons Hungarian grass	14.00	98.00
11 tons rye fodder	15.00	165.00
175 tons ensilage		550.00
8 tons mangels	18.00	140.00
7 tons cabbages, trimmed	15.00	105.00
2 tons melons		10.00
35 bushels green peas	1.00	35.00
50 bushels string beans	1.00	50.00
145 bushels shelled beans	1.00	145.00
700 bushels sweet corn	0.50	350.00
120 bushels onions	0.50	60.00
140 bushels turnips	0.50	70.00
204 bushels beets	0.50	102.00
51 bushels parsnips	0.50	25.50
103 bushels tomatoes	0.60	61.80
70 bushels cucumbers	1.00	70.00
95 bushels carrots	0.50	47.50
1,001 bushels potatoes	0.50	500.50
850 bushels corn on cob	0.25	212.50

15 bushels beans, thrashed . . .	\$3.00	\$45.00
3,000 pounds squashes . . .	0.01½	45.00
1,000 heads lettuce . . .	0.05	50.00
120 barrels apples . . .		100.00
600 gallons cider . . .	0.07	42.00
155 quarts milk per day . . .	0.04	2,263.31
Hogs and veals . . .		529.31
		<hr/>
		\$6,776.11
Value of farm products, season of 1899 . .		\$6,169.20
Value of farm products, season of 1900 . .		6,776.11
		<hr/>
		\$12,945.31

Farm stock consists of 1 bull, 19 cows, and 7 horses.

We continue to make our own butter and find it profitable, and have wintered a number of horses for outside parties, for which we have received over \$500.

BUILDINGS.

The buildings are the same as heretofore with the exception of an addition of fifty feet to the barn.

IMPROVEMENTS.

New closets and bathrooms have been built. New roofs on the towers have been supplied. The coving of the building being found decayed it was completely renewed. All the chimneys have been repaired, some built over new, and others re-topped. The slate roof was repaired and new skylights made.

With our own help we built a contagious ward, a store-room, new closets for girls' clothing, and new bread closet; also, have painted and papered twenty rooms, and have laid new cement floors in boys' kitchen and laundry and new brick flooring in the corridor. The old locks have been taken off and replaced by new, and we have whitewashed and kalsomined where needed.

By an advantageous contract with the Union Electric Company of this city we have replaced our steam power with elec-

tricity by putting in two electric motors, one of ten and one of fifteen horse power, which will effect quite a saving in expense. We shall retain the steam engine at present for use in case of emergency.

An extension of fifty feet has been added to the barn at a cost of about seventeen hundred dollars. With our own help we have repainted the barn, raised up the old part and repaired the underpinning, and at the brook have built a new dam of nearly one hundred and twenty-five feet in length, and made many minor repairs too numerous to mention.

We have bought four new farm harnesses, a new potato planter, and various other farming tools.

OFFICERS AND GIRLS' KITCHEN.

This department is under the management of Mrs. D. B. Bailey, who has had much experience in institutions like ours. Most of the cooking is done by the girls under her supervision.

THE BOYS' KITCHEN.

Under the able management of Steward Henry W. Brown this has been thoroughly remodeled. The cooking is done by the boys under his direction.

Our kitchens are models of neatness. By not purchasing expensive luxuries and expending the amount thus saved to increase the quantity and quality of necessities, no one can complain of our table.

LIBRARY.

We have a well selected library, consisting of encyclopedias, works on natural history, travels, the standard authors, and also story books of good moral tendency suitable for the various ages and capacities of the readers, to which we are constantly making additions.

LEGACIES.

The following legacies have been received by the institution since its commencement:

From Miss Louise Penhallow of Portsmouth . . .	\$1,000
The annual income to be expended in additions to the library.	
From James McK. Wilkins of Manchester . . .	8,000
The annual income to be expended for the good of the institution.	
From Moody Kent of Pembroke	3,000
The annual income to be used in fitting out good boys and girls when leaving the institution.	
From ex-Gov. Frederick Smyth of Manchester . .	400
In memory of Mrs. Emily Smyth. The annual income to be expended in additions to the library.	
From ex-Gov. Frederick Smyth of Manchester . .	2,000

Items from the will of the late ex-Governor Smyth:

"XVI. I give and bequeath to the trustees of the New Hampshire State Industrial School the sum of two thousand dollars in trust, to be denominated the "Smyth Fund," and I direct that the same shall be invested in the bonds of some one or more of the New England states or cities thereof, and the income of such fund to be applied annually in the purchase of useful and proper books to be given to the most meritorious scholars at the annual examination under the direction of the trustees of said institution.

"XXVI. In any case where provision is herein made that funds shall be invested in bonds of some one or more of the New England states or cities thereof, my will is that the funds shall be so invested, unless by application to the highest court of New Hampshire for the time being the trustees shall be authorized to invest in other securities."

The above have been invested as directed or deposited in our savings banks and the income used as requested.

ACKNOWLEDGMENTS.

During the past two years we have received the following donations:

From the executor of his estate, the sum of two thousand dollars bequeathed to us by the late ex-Gov. Frederick

Smyth, who as one of the commissioners to locate and build this institution, as its first treasurer, as governor of the state, and as a private citizen took great interest in the school, and was always a warm friend of the unfortunate.

From Hon. Charles H. Manning, a gift of twenty-five dollars to expend for books. With this sum we have purchased a complete set of John L. Stoddard's books of travel.

Valuable contributions of books and magazines have been received from Mrs. Olive Rand Clarke, Hon. Wm. C. Clarke, Mrs. John B. Varick, Mr. Remsen Varick, Mrs. Isaac W. Smith, Mrs. George Kendall, Mrs. Sarah J. Rowley, Mrs. Arthur E. Clarke, Mrs. Ann E. Bailey, Miss Sawyer, and the Salmon Club.

From Miss Dora Comstock we have received the "Youth's Companion" for two years.

Mrs. Armenia White of Concord has sent us a large box of candies and oranges.

We have also received regularly from the publishers "The Dover Enquirer," "Cheshire Republican," "New Hampshire People and Patriot," "Portsmouth Journal," "Morning Star," "Our Dumb Animals," "Lyman School Enterprise," "Glen Mills Daily," "The Whittier Boys' Industrial School Journal," "Reformatory Record," "The Dawn," "The Advance," "Christian Herald," and "Every Other Sunday," which give us pleasure and profit.

In behalf of our boys and girls we desire to thank all these donors for their generous gifts.

We also desire to extend our thanks to our teachers and overseers for their faithful services and assistance.

To the honorable board of trustees, who, as usual, have been ever ready with their advice, encouragement, and support, we are grateful, and hope to show our appreciation of their many kindnesses.

TOM W. ROBINSON,
Superintendent.

EIGHTH REPORT
(THIRD BIENNIAL)

OF THE

BOARD OF COMMISSIONERS OF LUNACY

FOR THE

STATE OF NEW HAMPSHIRE

FOR THE

TWO FISCAL YEARS ENDING SEPTEMBER 30, 1900.

VOLUME II . . PART III

MANCHESTER
ARTHUR E. CLARKE, PUBLIC PRINTER.
1901.

STATE OF NEW HAMPSHIRE.

OFFICE OF THE COMMISSIONERS OF LUNACY,

STATE HOUSE, October 1, 1900.

To His Excellency the Governor and the Honorable Council:

In conformity to the laws of the state of New Hampshire, I have the honor to present herewith the seventh report of the Board of Commissioners of Lunacy, for the two fiscal years ending September 30, 1900.

Respectfully submitted.

Irving A. Watson

Secretary.

MEMBERS OF THE BOARD.

Gov. FRANK W. ROLLINS	Concord.
Att'y-Gen. E. G. EASTMAN	Exeter.
ROBERT FLETCHER, C. E.	Hanover
G. P. CONN, M. D., <i>President</i>	Concord.
C. S. COLLINS, M. D.	Nashua.
IRVING A. WATSON, M. D., <i>Secretary</i>	Concord.

REPORT.

Herewith is presented the eighth report of the Board of Commissioners of Lunacy, the same being the third biennial return, for the fiscal years 1899 and 1900.

The following tables are appended:

Table 1.—Commitments to the several institutions for the year 1899.

Table 2.—Commitments to the several institutions for the year 1900.

Table 3.—Discharges for the year 1899.

Table 4.—Discharges for the year 1900.

Table 5.—Deaths for the year 1899.

Table 6.—Deaths for the year 1900.

Table 7.—Persons committed to the New Hampshire Asylum for the Insane by order of the commissioners of lunacy, for remedial treatment, not including those whose complete record is given in former reports.

Table 8.—General statement of conditions and results.

Table 9.—Number and condition of those discharged from remedial treatment.

Tables 10 and 11.—Recapitulation of the number of commitments, discharges, and deaths at the institutions named, during the two years ending September 30, 1900, also the number of inmates remaining at the latter date, as shown by the returns made to the board.

Table 12.—Number of inmates at each asylum in the state on September 30 of each year.

Table No. 12 has not appeared in former reports of this board. It shows the number of inmates at New Hampshire Asylum for the Insane and at the several county asylums at the end of each fiscal year, from 1884 to 1900, inclusive.

This table is of particular interest in showing the general gradual increase of insanity in the state, notwithstanding that forty-one inmates of the Strafford county asylum lost their lives by fire in 1893.

It will be seen by reference to Table No. 8 that the total number of patients receiving remedial treatment at the New Hampshire Asylum for the Insane on September 30, 1900, by order of this board, was eighty-three.

Of the whole number committed and discharged during the two years ending September 30, 1900, by order of this board, 23.08 per cent were discharged recovered, 8.65 per cent improved, 7.69 per cent unimproved, and 4.81 per cent died.

Combining the number committed during the two years above mentioned with those previously committed and still maintained at the state asylum, the percentages were as follows: Discharged recovered, 17.44 per cent; improved, 7.56 per cent; unimproved, 18.60 per cent; died, 8.14 per cent.

Since the Board of Commissioners of Lunacy was organized in 1889, it has committed to the New Hampshire Asylum for the Insane, for remedial treatment, 579 persons. Of this number, 164, or approximately 29 per cent, have been discharged cured; 162, or about 18 per cent, improved; 168 have been discharged as incurable; 50 have died; and the remainder are still receiving remedial treatment at the expense of the state. These figures certainly prove the wisdom of the law. Not only have a large number of the patients been restored to useful citizenship, and many others sufficiently improved to be more or less self-supporting under the care of friends or relatives, but the operation of the law itself has been an inestimable boon to many poor families who were unable to provide for their unfortunate member or members.

In the first report of this board, in 1890, we said: "The board has construed the term 'remedial treatment' in its broadest sense. If by a transfer to the state asylum the patient could be improved, although recovery was not probable, the board has felt justified in making the change. Even the watchful care and restraining influences afforded homicidal

cases at the state asylum should be recognized as 'remedial,' although the patient may, perhaps, be hopelessly afflicted. This interpretation would not be warranted, perhaps, in any county that provided positive safeguards against murder by those homicidally inclined, but in one of the best appointed county asylums in the state a murder occurred during the past year, on account of a lack of that constant watchfulness which is essential in all cases having a homicidal tendency. Thus in our commitments to the state asylum we have endeavored to comply with the spirit of the law, and in instances of doubt have always taken the course which was deemed best for the patient."

The experience of ten years has proven the correctness of this position, and has also developed another feature which was not considered at that time, to wit: There are a few patients insane to an extent that precludes their being cared for at home, who are exceedingly comfortable and tractable at the New Hampshire Asylum for the Insane, and who are there capable of doing more or less work—yet they are probably incurable. These patients thoroughly, and perhaps super-sensitively, recognize the difference between the New Hampshire Asylum for the Insane and the county almshouse asylums. The dread of the latter is such that their transfer thereto would induce a state of excitement resulting probably in permanent injury, with, perhaps, suicidal, homicidal, or destructive tendencies. Such patients, very few in number, the board has deemed it best to keep at the state asylum, which we believe we are justified in doing for the reason that they are keenly sensitive to their environments and are clearly benefited by remedial treatment.

The amount now annually appropriated for the remedial treatment of the indigent insane, who may be committed to the New Hampshire Asylum for the Insane by order of the Board of Commissioners of Lunacy, is \$16,000. The gradual increase in the number of applicants for remedial treatment makes it improbable that this sum will much longer be sufficient; indeed, at the present time, in order to keep within the

appropriation, we are obliged to discharge patients earlier than is advisable. It is not improbable that in the very near future a larger appropriation will be required if justice is to be done those who are entitled to remedial treatment under the law.

COMMITMENTS.

TABLE NO. 1.—COMMITMENTS.

Persons committed to the New Hampshire Asylum for the Insane during the year ending September 30, 1899.

* In 1893 the Strafford County Asylum was burned, and forty-one inmates lost their lives. Since that date the county has maintained its insane at the New Hampshire Asylum for the Insane, except a few mild cases that are now supported at the county almshouse.

REPORT
OF THE
FISH AND GAME COMMISSIONERS
OF
NEW HAMPSHIRE
TO THE
GOVERNOR AND COUNCIL

DECEMBER, 1900.

VOLUME III. PART II.

MANCHESTER, N. H.
ARTHUR E. CLARKE, PUBLIC PRINTER
1901.

FISH AND GAME COMMISSIONERS' REPORT.

To His Excellency the Governor and the Honorable Council:

The Commissioners of Fish and Game herewith submit their third biennial report for the two years ending December 1, 1900:

So far as relates to the propagation of food fish, and particularly those that furnish the best sport for the rod and reel, namely, the brook trout and land-locked salmon, we have had as great a degree of success as we could have asked for under the circumstances. Both of the two summers last passed have been seasons of unparalleled drouth, and trout streams all over the state, which had never before been known to fail, went entirely dry. The north part of the state, where the streams have their rise among the hills and mountains, and their head-waters fairly well protected by a growth of timber, suffered far less than the central and southern portions. Probably many thousands of trout perished for want of living water, and in some of the brooks which did not run dry the fish were all driven into a very few pools, and became an easy prey to the boy or man who saw fit to drop them a line. Trappers say that mink never were so fat and slick as they have been this fall, which is easily accounted for by the condition of the streams, which were so nearly dried as to render every fish left alive in them by the drouth an easy prey to this most voracious little animal. The mink is the only fish eater (four-footed) that will take more fish than he needs. He will fish industriously all day, eating what fish his stomach will hold, and dragging away and hiding the balance. And he never was known to go near the dead ones he has deposited around under various logs and stones, but repeats today his work of yesterday. So that given such a season as the two

last passed, and the number of fish destroyed by mink throughout the state is incalculable. There would, in our opinion, be much greater sense shown in establishing a fair bounty on that most thorough little poacher than in keeping it on bears and wolves. Notwithstanding the reverses we have met with by reason of the drouth, we have had no disposition to abandon those streams which have in times past furnished so much good trout fishing. Last spring we restocked them with more fry than we had ever before put into them, and we propose to keep at them, hoping that the summers to come may not be so disastrous to our work as the two last passed. As to our labors in restocking the lakes and ponds in the state, no one could reasonably ask for better results for the amount of money expended. Take, for example, Winnepesaukee; it is teeming with its native trout. The army of fishermen who have fished its waters during the last two years will each and all testify that never before, within the recollection of the oldest among them, was it possible to take so many trout there as at present. Land-locked salmon are also showing up in that lake in very gratifying numbers, and will soon bear testimony of their presence by furnishing more sport in the early season. Many white fish are taken each winter in Winnisquam, while occasionally a fine square-tail shows up in each of those lakes. Bass fishing in some of the bays of the great lake is in its season superb, and probably furnishes first-class sport to as great a number of fishermen as does the taking of any variety of fish in our waters. The catches of the various kinds of fish in Sunapee lake last season, especially early in the season, were unparalleled in the annals of fishing in those or any other waters. Land-locked salmon and aureolus, or white trout, were taken in marvelous quantities in the early season, and later on bass and speckled trout were taken in large numbers. In fact, the bass have become so numerous in Sunapee lake as to satisfy *us* that *part*, if not *all*, protection should be taken from them for a time, in those waters, and fishermen should be allowed to take them at all times, and of any size, until their numbers are so far reduced as to secure the comparative

safety of other fish from their ravages. A year ago last August, Commissioners Wentworth and Shurtleff spent two days at Sunapee experimenting on bass, and during the time we caught in deep water eight or ten bass, from the stomachs of which we took aureolus, or white trout, and brook trout, which was to us an easy solution of the question which had been often asked, "Why are there no more small brook trout in Sunapee?" Newfound lake has also contributed its share toward making the fishermen glad; in fact, every lake and pond in the state which has been stocked by us from year to year bears the same testimony. The Diamond ponds, ten miles east of Colebrook, have become a perfect Mecca for trout fishermen, and tons of speckled beauties are taken from them each season, and it is only a few years since a fisherman camped on their banks would have starved to death had he depended on trout from their waters for a living.

The large numbers of deer which are so frequently seen in all parts of the state bear witness that they are fairly well protected and rapidly increasing. Our last two winters were exceptionally severe on them. The snows were so deep, and held on so late in the spring, that many deer starved to death in their yards, and quite a few on the frontier were slaughtered by poachers. Notwithstanding all these unfavorable surroundings they are so plenty in the north part of the state that they fairly swarm, and some of the farmers each year complain of their injuring the crops.

Feathered game has been as well protected as possible during the last two years, and if there is any scarcity of game birds it must be attributed to some other cause than neglect on the part of the commission. At the last session of our legislature we procured the enactment of a law which gives us all fines and forfeitures accruing from prosecutions for violation of the fish and game laws, to be used as a detective fund, and it has been a material help to the commission. With our meager two hundred and fifty dollars a year detective fund we have ever felt our almost utter helplessness, so far as enforcing the fish and game laws of the state depended upon detection ser-

vice, and have been obliged to be content with what we could accomplish by our individual efforts; but the law above spoken of has added several hundred dollars to our detective fund during the last two years, and we have had good results from its use. We believe that an era of prosperity is about to dawn upon the fish and game interests of our state; in fact, we believe that we can see the "dawning of the morning" of a bright day for our commission. For many years it has seemed to be the policy of each state administration to allow our commission to expend in its labors just as much as was allowed by its immediate predecessor and no more; but the present administration has been of an investigating turn of mind, and has shown a disposition to try and ascertain what the best interests of the state demanded should be done for our commission, and has cheerfully done it. Under the present administration we have erected several screens that will be of incalculable benefit to the state, and have been able to inaugurate several reforms which we hope to be able to carry into effect in the near future. For instance: ever since the two oldest members of the board have been on the commission, the question has been repeatedly asked, "Why don't you raise your trout and salmon to fingerlings before you put them out; would it not be better?" Of course our reply has always been, "Yes, it would be infinitely better, but who will pay the bills?" Lack of funds has prevented us from doing what we well knew ought to be done. To attempt the establishment of suitable parent plants for the purpose, and to undertake to raise therein fingerlings for distribution in the state, with the amount of money which has in the past been placed at our disposal, would have proved just about as effectual as it would to undertake to bore a two-inch auger hole with a nail gimlet. But our present governor is in hearty sympathy with that needed reform, and has repeatedly said that he considered the money expended by our commission judiciously and profitably expended, and that in his opinion the commission should have placed at its disposal twenty-five or thirty thousand dollars each year instead of seven thousand—the sum to which we have heretofore been limited.

Our worthy state treasurer, a few nights ago, at the banquet of the Merrimack County Fish and Game League, took occasion to say that in his opinion no money was expended for the state more economically, honestly, judiciously, and with better results to the state than that expended by our commission; that his opinion was based on the fact that all our accounts had been carefully scanned by him, and all the money paid out for and by our commission had passed through his hands.

We have at present eleven hatcheries in the state, a number, in our opinion, entirely out of proportion to the needs of the commission. In fact, we have not made use of all of them for some time past, being well satisfied that we could produce better results by confining our labors to a less number, and save money to the state. What we most desire to do in the near future is to establish two or three large and suitable parent plants, properly located for the purpose, and to almost entirely, if not quite, abandon the practice of putting out fry, keeping and feeding our fry until they are well grown fingerlings before putting them into the streams and lakes. As we have repeatedly said, we are well aware that this will involve the expenditure of a considerably larger sum each year than we have heretofore expended; but we can safely say that we know from actual experimental knowledge that the benefits resulting to the state from this reform will be well worth the extra cost.

We hope to be able to inaugurate this reform the coming season, so that next spring shall be the last of our putting out fry. We think we need but little legislation the coming session of the legislature. Perhaps some dead-letter laws had best be stricken from the code, and some of our salutary laws strengthened. We are decidedly of the opinion that a stringent law should be passed prohibiting the sale of game in the state. Many of our sister states have enacted such a law, and we think we should follow their lead. In fact, it is, in our judgment, time that we followed the lead of our sister states in many respects so far as regards the propagation of fish and protection of fish and game. It may not be generally known, yet it is true, that the first fish artificially hatched in the

United States were hatched in a little spring brook opposite the city of Concord, by Dr. Fletcher, who was afterwards the first active fish and game commissioner of New Hampshire. And the first hatchery ever built in the United States was built at Meredith, near where the present hatchery stands, and Dr. Fletcher for years carried on the work of propagating brook trout there and distributing fry in the waters in that vicinity. Other states soon took up the work, and while our state fell into a rut in which it has since stuck (except that it at one time woke up and in a space of about four years built more than three times as many hatcheries as the commission could make any reasonable use of), many other states have far outstripped us in the very work that we inaugurated. Take, for example, the state of Maine. It has been for years expending thirty to forty thousand dollars yearly in this line, while we have been expending seven thousand. And every dollar they have expended has been returned to the state many fold by the thousands of fishermen and sportsmen who have from year to year been attracted thereto by its abundance of fish and game. No state can show better results for the amount of money spent than can our state; and if it is of profit to the state to spend yearly what we have spent, it seems to us it would be correspondingly profitable for us to expend more in the same direction, especially as it will enable us to do our work along more profitable lines. Let us hope that the efforts of all true sportsmen and others friendly to the commission in the state in aid of our own efforts and desires in that direction will succeed in bringing about all needed reforms in our work.

As in our last report, we omit a financial report, as the state treasurer's books contain a true account of every cent of our expenditures from year to year.

In conclusion, we wish to express our sincere and heartfelt thanks to you for your uniform kindness and generosity to us, and we also wish to heartily thank the various railroads in the state for a continuation of their favors. Neither do we wish to forget to express our gratitude to the various fish and game leagues in the state, and to all true sportsmen and the citi-

zens who have so kindly aided us in the work of protecting our fish and game from the devastations of pot-hunters and poachers.

At the request of many sportsmen in the state, we submit the following roster of this commission from its inception to the present time:

Under the act of 1865, the governor and council were authorized to appoint two commissioners.

August 12, 1865, Henry A. Bellows of Concord and Winslow A. Sanborn of Wolfeborough were appointed, term unlimited; but the terms ended by the act of 1866, which authorized a commission of two; and under this act the governor and council,—

August 31, 1866, appointed the same men, Bellows and Sanborn, term unlimited; but the act of 1869 authorized the governor and council to appoint a new board of three.

September 2, 1869, Winslow A. Sanborn of Wolfeborough, William W. Fletcher of Concord, and Thomas E. Hatch of Keene were appointed.

Under this appointment of 1869 Hatch at one time resigned, but was soon reappointed, and they continued as a board of commissioners until the Democratic administration of 1874, when all three were removed, and in their places,—

August 10, 1874, Oliver H. Noyes of Henniker, John S. Wadleigh of Laconia, and Andrew C. Fifield of Enfield were appointed.

In the legislature of 1875 neither party had full control; but 1876 found the Republicans in full power, and Noyes, Wadleigh, and Fifield were removed, and in their places,—

July 22, 1876, Luther Hayes of Milton, Samuel Webber of Manchester, and Albina H. Powers of Grantham were appointed.

The appointments from 1876 to date have been as follows:

The term is now five years. Luther Hayes, to succeed himself, July 28, 1881. Albina H. Powers, to succeed himself, July 28, 1881. Edward Spalding, Nashua, to succeed Samuel Webber, July 28, 1881. George W. Riddle, Manchester, to

succeed Edward Spalding, resigned, December 6, 1882. Elliott B. Hodge, Plymouth, to succeed Albina H. Powers, resigned, June 6, 1883. John H. Kimball, Marlborough, to succeed Luther Hayes, was appointed July 8, 1886. George W. Riddle, to succeed himself, November 15, 1887. Elliott B. Hodge, to succeed himself, June 1, 1888. Willard H. Griffin, to succeed John H. Kimball, June 23, 1891; Nathaniel Wentworth, to succeed George W. Riddle, December 2, 1892. William H. Shurtleff, to succeed E. B. Hodge, July 12, 1893. Frank L. Hughes, to succeed Griffin, resigned, February 11, 1896. Nathaniel Wentworth, to succeed himself, October 7, 1897. W. H. Shurtleff, to succeed himself, June 14, 1898.

FREE PUBLIC LIBRARIES

FIFTH BIENNIAL REPORT

OF THE

BOARD OF LIBRARY COMMISSIONERS

OF

NEW HAMPSHIRE

DECEMBER 1, 1900.

MANCHESTER, N. H.

ARTHUR E. CLARKE, PUBLIC PRINTER

1901

BOARD OF LIBRARY COMMISSIONERS.

EDWARD H. GILMAN, <i>Chairman</i>	Exeter.
GEORGE T. CRUFT	Bethlehem
HOSEA W. PARKER	Claremont
JAMES F. BRENNAN	Peterborough
ARTHUR H. CHASE, <i>ex officio Secretary</i>	Concord

REPORT OF THE BOARD OF LIBRARY COMMISSIONERS.

CONCORD, December 1, 1900.

The board of library commissioners herewith submit their report for the two years ending December 1, 1900:

PUBLIC LIBRARIES.

At the date of the last report one hundred and thirty-eight libraries had been established under the library law of the state and each had received one hundred dollars' worth of books from the state. During the last biennial period three libraries have been established and received books, *i. e.*, in the towns of Chichester, Ossipee, and Wolfeborough, so that the total number of towns now benefited by the library law is one hundred and forty-one.

This leaves sixty-five towns in which there are libraries already established without state aid, fifteen towns not having as yet taken advantage of the library law except in the accumulation of a library fund, and twelve towns having no free library and voting "inexpedient to establish."

LIBRARY STATISTICS.

A table of statistics of the libraries of the state has been heretofore printed in our report. We find upon examination that these statistics have been very largely a repetition of those printed in preceding reports. After a careful comparison of the statistics which we have received covering the past two years with those for previous periods we believe that their value does not warrant their being printed. We have therefore omitted them from this report and printed instead, as an appendix hereto, a list of the libraries of the state with the

names of their librarians. We have had many calls for such a list during the past two years, and we therefore feel sure that it will prove valuable.

Full statistics for the last biennial period have been collected, and the results will be bound into a volume and permanently preserved in the state library, where they will be at all times available to those who desire to make a study of the library movement in our state.

THE BULLETIN.

At a meeting of the library commission held early in the present year it was decided that much aid could be given to libraries in New Hampshire by the regular publication of the bulletin authorized by the act of 1895. The secretary was therefore directed to begin at once the issuing of a quarterly bulletin, each number to contain papers upon practical library questions apt to arise in the small libraries. Three numbers of this bulletin have thus far been issued, and from the favorable way in which it has been received the commission feel that its value is felt and its permanent success assured. Requests to be placed upon the mailing list have come from libraries all over the United States, and already the copies remaining of the earlier numbers are small. Several of the articles originally appearing in its pages have been reprinted in other periodicals. Altogether the outlook is very encouraging and the trustees feel that they were justified in incurring the expense necessary to publish it.

It is the intention in the future to limit the matter in the biennial report to what is strictly necessary to be brought to the attention of the legislature and to reserve all other matters for the bulletin.

TRAVELING LIBRARIES.

The commission believe that the time has now come in this state for the beginning of a traveling library system. The original object for which the library law was passed, *i. e.*, the establishment of free public libraries in all our towns has now been practically accomplished. We must not stop here. We

must carry the movement constantly forward to get the best results. The libraries having been established, the next step is to stimulate the patrons to the desire for better reading. As a rule, little help in this direction will be rendered by the libraries themselves. They will buy the books for which there is a demand, and this demand will be principally in the line of fiction.

To bring the patrons of the library to read better books, these books must be placed within their reach, even must be urged upon them, and this can best be done through the traveling library. Let such a library, made up of a few books on history, some on science, and a half dozen on questions of the day, all accurate but written in a simple and interesting style, be placed in one of our small public libraries and the result, will be, first, that the people will be curious, then that they will read, and finally that they will ask for more. Thus at the end of six months it will be found that the traveling library has produced a change in the demand, that the people are asking for other books on history and science while the demand for fiction is lessening. The change will be slow but, once started, it will be sure and the impetus given by the traveling library will in a comparatively brief period change the whole character of the reading in a town.

The commission, therefore, recommend that a law be enacted authorizing them to establish twenty small libraries, containing books upon history, science, and social problems, and to loan them to the town libraries for such length of time and under such conditions as to them seem best.

The traveling library idea is not a new one. It has been successfully tried and is now permanently established in many of the states, and certainly should prove as successful here as elsewhere.

LIBRARY ASSOCIATION MEETINGS.

The meetings of the New Hampshire Library Association have in the past been of material aid to librarians. For financial reasons the association is not able to hold meetings so often or to make them as complete as is desirable. The com-

mission recommend the passage of an act authorizing the payment by the state of the expense attending the holding of these meetings with the understanding that there shall be four meetings held each year in different sections of the state, and that at least one prominent library worker from outside the state shall be obtained as a speaker at each meeting. The expense to be borne by the state under such an arrangement will not exceed five hundred dollars, while the good that will accrue to the library movement will be very large.

LIBRARY MONEY.

It has been brought to the attention of the commission that there exists in some of the towns of the state two or more free libraries, situated in different villages in the same town. When such is the case, it is just and reasonable that the money appropriated by the town for libraries should be divided between them. The commission suggest that they be given authority in such cases to make an equitable division of the money upon application of one of the libraries.

LIBRARY CONTROVERSIES.

In some of the towns the library becomes a bone of contention between different localities or factions. If such controversies are allowed to go on they lead to very serious results and are necessarily disastrous to the life and growth of the library itself. The commission suggest for the consideration of the legislature the giving to the board authority to hold hearings upon and decide such controversies upon application of parties in interest.

WORK OF THE FUTURE.

There is still much work to be done in the library field in this state. The movement is of equal importance with the public school movement. Its administration should and eventually will be broadened until it becomes a department resembling the department of public instruction. There will be a permanent head to the department who will devote his entire time to going about among the libraries, aiding them

in every way possible. Library institutes will be held in the different sections of the state at which librarians may learn much of practical value with reference to the administration of a library. The appointment of librarians will become dependent upon their knowledge of library work. The contents of libraries will be supervised and improved.

Whether the time is now ripe for such changes we submit to the careful consideration of the legislature.

JOSIAH HERBERT WHITTIER.

BORN APRIL 26, 1860. DIED SEPTEMBER 13, 1899.

The board of library commissioners announce with deep regret the death of Josiah H. Whittier, a member of the commission and its secretary from its inception in 1892 to the time of his death. Mr. Whittier was an earnest and untiring worker in the library cause in this state. During the time he was secretary, one hundred thirty-eight free libraries were established in the state, and books were furnished to them by the library commissioners of the value of \$13,800.

All of the administrative work attending the establishment of these libraries and the selection and distribution of the books to them was done by Mr. Whittier with ability and success. He was the moving spirit of the movement, and to his willing sacrifice of time and labor belongs the credit for the results that were obtained.

His death is a serious loss to the library field in this state and to the commission.

MESSAGE

OF

HIS EXCELLENCY

CHESTER B. JORDAN

GOVERNOR OF NEW HAMPSHIRE

TO THE

TWO BRANCHES OF THE LEGISLATURE

JANUARY SESSION, 1901

MANCHESTER, N. H.

ARTHUR E. CLARKE, PUBLIC PRINTER

1901

MESSAGE.

MEMBERS OF THE LEGISLATURE:

In your presence I have now taken the oath prescribed by our constitution, to bear faith and true allegiance to the state, and further, that I will impartially discharge and perform all the duties incumbent on me as the state's Chief Executive. Yesterday, in your respective official capacities, you each took upon yourselves like oaths. Before this we have been under great obligation to the state for what it has done for us and ours. That obligation is now heightened and solemnized in this formal way, in the presence of God and men, as we enter upon the performance of the duties to which our fellow-citizens have so graciously called us. The constitution we have sworn to support, we shall have with us, and it will not, I presume, be time wholly misspent should we study it and become better acquainted with its spirit, teachings, and requirements.

Our Bill of Rights wisely lays down the rule that the legislature shall assemble for the redress of public grievances and for the making of such laws as the public good may require. And more: that when men enter into a state of society they surrender some of their natural rights to that so-

ciety in order to insure the better protection others. We can find no better statement of what we are here for.

We have assembled on the very threshold of a century that promises beyond what we can think or ask. Prosperity is on every hand. There is less of want and poverty throughout the country than at any other time in our history. Our relations with the rest of the world are of the kindest and best, save where a few thousand insurgents, led by desperate and designing men, menace good people and decent government. The man who was at the head of New Hampshire's affairs, and who so ably represented her people and interests when this trouble began, has recently gone to a reward greater and more lasting, we trust, than even his grateful people could give him.

In our own state there is little of which the most exacting citizen can complain. A system of wise economy, in the main, characterizes the workings of all departments and the disbursement of all public funds. Defalcations, wild extravagance, jobbery, and robbery find no abiding place in New Hampshire. We have constantly reduced our indebtedness until now it is but little over one million dollars. The reduction was more than two hundred thousand dollars the last fiscal year, and yet we have not been niggardly. While we have not voted money for all the projects brought forward, we have appropriated all that was neces-

sary. The state tax has been reduced to \$425,000, so that it bears not hard upon any. The railroad tax is \$382,855.34, of which \$148,772.28 remains in the treasury to meet state expenses; the balance being distributed to the towns. The telephone, telegraph, and insurance companies pay about \$41,000 more, so that nearly half the state tax is paid by these corporations. We see no occasion for increasing it, and trust none may arise.

While I now call your attention to many of what seem to me to be the more important matters to come before you, I shall not endeavor to treat upon them fully, but refer you to the reports that will soon be laid before you, bearing more specifically and minutely upon these subjects.

FINANCIAL.

We find from the treasurer's report for the year ending May 31, 1900, the following statement of the healthy condition of our finances:

ABSTRACT OF RECEIPTS AND DISBURSEMENTS.

Receipts.

Cash and cash items		
on hand, June 1,		
1899	\$341,586.88	
Total receipts during		
the year	1,285,684.10	
	<hr/>	
		\$1,627,270.98

Disbursements.

Total disbursements	
during the year	. \$1,170,743.66
Cash and cash items	
on hand June 1, 1900	456,527.32
	<hr/>
	\$1,627,270.98

Debt.

Liabilities June 1, 1899	\$2,026,021.38
Assets June 1, 1899	. 690,953.33
	<hr/>
Net indebtedness June 1, 1899	. \$1,335,068.05
Liabilities June 1, 1900	\$1,912,792.99
Assets June 1, 1900	. 793,994.05
	<hr/>
Net indebtedness June 1, 1900	. 1,118,798.94
	<hr/>
Reduction of debt during the	
year \$216,269.11

REVENUE AND EXPENSES.

The following statement exhibits the sources of our revenue for the year 1899-1900:

State tax \$425,000.00
Railroad tax 148,772.28
Insurance tax 32,284.90
Interest on deposits 3,840.77
License fees (fertilizers) 1,200.00
Telegraph tax 3,540.40
Telephone tax 5,505.99
Charter fees 450.00

Fees (insurance department)	\$12,204.10	
Benjamin Thompson estate, income for year ending January 30, 1900 . . .	22,551.84	
Fees (secretary of state) . .	4,729.65	
Fines and forfeitures . . .	458.40	
Spanish war (the U. S. in part)	28,443.15	
Town liquor agents	54.30	
Escheated estates	99.05	
Fines, National Guard . . .	9.00	
Sales public property	86.36	
Refund cost of prose- cution, insurance de- partment	31.80	
Refund American Express Co., overcharge	2.20	
	<hr/>	
Total revenue		\$689,264.19

Expenses.

Ordinary expenses	\$277,912.90	
Extraordinary expenses . .	94,896.05	
Interest	100,186.13	
	<hr/>	
Total expenses		\$472,995.08

The expenses are classed ordinary and extraordinary. The one includes salaries and expenses authorized by general laws and which are of annual or biennial occurrence,—the other, those authorized by special acts of the legislature. Under the latter head you will be called upon to provide for a constitutional convention. The voters at the

late election registered their desire and demand for one. Twenty-five thousand dollars were appropriated for each of the last two, and this sum was found to be ample. While we may regret the necessity for and expense of a convention, we shall feel fully compensated for time and money expended if the result shall be a half-reduction of the membership of this house and a corresponding saving of future expense.

The cost of the last legislature, exclusive of appropriations, was \$113,173.07.

You will be confronted at the very beginning of your work with the question whether it will be best for the state that you do away with all standing appropriations and legislate as each interest and emergency may demand, or go on in the old way.

Each system has its advocates and defenders. It is for you to determine which, in your judgment, is the better one.

FORESTRY.

My life-long residence in the North Country has filled me with a love for our beautiful hills which the passage of the years has only made the stronger; and I cannot look with unconcern upon the devastation which is being wrought upon them.

The steps already taken in the direction of forest preservation in New Hampshire are good so far as they have gone, but they have been very inadequate to the necessity. The present forestry

commission, without appropriations with which to prosecute research, and with no power to enforce rational methods of forest utilization, has confined its efforts to the work of stimulating public sentiment to the importance of the subject and of pointing to the obvious means to check the despoilment which is yearly growing more and more apparent. Their labors in this direction have been of benefit. In my judgment the time has now come not only to agitate the public mind and crystallize public sentiment, but also to take some positive and effective steps to assure to our state for future generations those magnificent gems of mountain scenery which have won for our commonwealth the unique title of "The Switzerland of America."

Under private ownership our forests are fast being despoiled, their scenic beauties marred and destroyed, the public health endangered, our water powers put in jeopardy, our summer boarding business made to suffer, agriculture harassed and much injured by unnecessary seasons of freshet and drouth, and our lumber industry with all its kindred interests threatened with extinction. The enormous demands made upon our forest resources, and the methods practiced in meeting those demands, are resulting in the absolute denudation of our mountain forests, leaving them a ready prey to the elements and divesting them not only of scenic beauty but of future value. Unless some

steps shall soon be taken to check what is now going on among our wooded areas, it is easy to foresee the extinction of our primeval forest and the consequent disaster to all the interests I have enumerated. Such a condition, gentlemen of the legislature, it is our plain duty under our oaths to prevent.

The most immediately effective method of securing the essential benefits of forest preservation, is for the state, by exercise of its power of eminent domain, to take to itself once more the ownership of its most desirable forest lands. It is claimed for such a course, that the beneficent conditions which would result from forest preservation in due season, by means of proper utilization of the forest product, would not only pay for the original cost and interest charges but would also give a constantly increasing revenue to the state treasury. Yet we must bear in mind the fact that these lands cannot be taken from their owners except for an adequate compensation. The lumber interests are great, and the greater they are, under present methods of operation, the worse it is for the state. The number of lumber plants is 831; capital, \$12,329,843; total wages, \$2,519,609; average number employees, 8,932; value of annual product, \$10,907,438.

But there is still another method of securing the main features of forest preservation, which may commend itself to your minds as equally effective

and which is not open to objection on the ground of expense. It lies in the restriction of the operations of private landowners in respect to the manner in which they shall utilize the forest product. The direct economic objection to the stripping of our forests is that the most desirable commercial species, the evergreens, do not perpetuate themselves, but are followed by the scrubs and deciduous species which have little or no marketable value and which do not hold snow and rains and moisture until needed throughout the summer months. It is known, however, that a limitation of the cutting of the highly prized evergreens to those trees which are appreciably mature, ensures the perpetuation of the species together with unmistakable improvement in quality. Through the diligent arguments of the forestry commission, and others, many of the lumber operators of the state have come voluntarily to adopt such a restriction in their operations, thus ensuring to themselves an endless supply of raw material for their business and benefiting the public by the perpetuation of the forest cover. A further earnest effort should be made in this direction perhaps, for, if the lumbermen would get together and agree among themselves that they would confine their cuttings to trees one foot in diameter at the stump, the result would be more effective and profitable than any legislation can be. By far the greater number of the lumbermen of the state are

still at work under the old methods, which entail disaster to posterity, to the beauty of our hills and mountains, to the public health, and to our summer boarding business.

Such an intervention I believe to be a proper function of the state through the exercise of its power of sovereign police, which is co-extensive with public health, morals, social order, and property rights. "The interests of the public as distinguished from those of a class," the supreme court of the United States has held to be the paramount consideration when the police power of the state is invoked, and I can conceive of no larger public interests to be subserved than those of the public health and the future economic welfare of the State, which are clearly involved in the present methods of harvesting the timber crop. I commend this phase of the subject to your earnest attention, indulging the hope that your wisdom will guide to the proper action. For myself, I consider no consideration paramount to that of putting an end to the existing conditions which obtain in our forest properties.

Germany began the work of forest preservation and tree-planting 800 years ago. France followed, then came Austria, Switzerland, and Italy, so that now nearly all the great countries have forestry schools. The time is ripe for New Hampshire to act. Air, water, and forests are the richest of the natural resources of man. We should take good

care that the first be not vitiated, the next polluted, nor the last destroyed.

We are told that more than \$7,000,000 are annually paid in New Hampshire by those in quest of pleasure, sight-seeing, health, and recreation. At least one half of this is disbursed in and about the White Mountain region. We shall not expect these people long to visit treeless hills, barren mountains, springs which fail to sparkle, and brooks without fish or water.

Valuable to our state as is our water power, our mountain scenery and summer attractions can be made more valuable, and for all time. Whatever helps to keep the latter strengthens the former.

GOOD ROADS.

New Hampshire interests, New Hampshire revenues, are enhanced by good roads. It is not expected that we will embark on any extravagant scheme involving the outlay of millions, but it is important that we insist on a reasonable, sensible outlay of the moneys appropriated for building and repairing highways. A large amount of money is derived from taxing the unincorporated lands whereon are located many of our mountain hotels. To these thinly-settled, sparsely-populated places, aid has to be given to keep roads in suitable repair. It is only bringing back its own when necessary funds are appropriated from the treasury to keep up the roads in such regions. The better

the highway leading to and around these mountain resorts, the more visitors will use them and the greater the amount of money paid to trickle down through the state to help all our people. We do not believe in a paternal government in the family, town, or state. Too frequent exercise of its bounty is weakening and baneful. But liberal appropriations for our mountain roads and seaside resorts, well and honestly expended, will bring good returns. Highways in towns well-to-do and able to maintain their own roads should not receive aid at your hands.

I shall hope that all measures for help on our roads will come to me singly for approval. The plan sometimes adopted, of yoking the meritorious with that without merit, should fail with you.

RAILROADS.

The steam railroads of our state are in excellent condition and are being constantly and rapidly improved. During the stress of hard times they were not allowed to deteriorate and since the revival of business, which has increased their earnings, large amounts have been expended for permanent betterments. They are serving the people in a satisfactory manner with reasonable charges for transportation. Under consolidation and the Fitchburg lease all the road mileage in the state, except about 150 miles, is under the operation of the Boston & Maine corporation. This makes

possible a lower ratio of operative expenses, better accommodations, better connections, and better returns to stockholders. The great advantage to the interests of our state this arrangement gives over that formerly afforded by a dozen or less weakly, sickly roads is almost incalculable. It has brought the markets of the whole country to our very doors. Everything we have to sell can readily and reasonably be transported to the farthest point of our vast domain.

The past year has witnessed a rapid development in street railway construction. Such new roads, under our present law, can be made and operated wherever there is the need, and money to build.

While upon this subject, I call your attention to section 7, chapter 155, Public Statutes. By its provisions the salaries and expenses of the railroad commissioners have to be borne by the railroad corporations. This course seems open to objection. The railroads pay into the state treasury all the taxes assessed against them. There is no reason for paying the commissioners that does not hold as to secretary of state, attorney-general, or other state officials.

This way is not just to the commissioners who thus far under the law creating such a board have been good men, performing their duties honestly. It affords an opportunity for any one, so minded, to discount the value of the commissioners'

services, their investigations and reports in railway cases, by saying they are under pay from the railroads. Nor is it a dignified attitude for the state.

DARTMOUTH COLLEGE.

Dartmouth College was planted in the wilderness one hundred and thirty-one years ago. For the first fifty years its existence was precarious. It had to contend against poverty, prejudice, and caprice. As education throughout the state and country came to be more generally diffused among the masses and the advantages of college training to be better understood, the college began to gain in confidence, strength, numbers, and usefulness. It has done—is doing—a great work for New Hampshire and our country. Notwithstanding its recent rapid growth, it is comparatively a small college yet. It has accomplished results out of all proportion to its size and means. Nine thousand eight hundred and eight have entered its academic, medical, and engineering departments. Eight thousand one hundred and seventy four of them graduated. Four years ago only \$5,000 a year was granted by the state,—two years ago, \$10,000 a year. This pays only one half the expense of educating New Hampshire students, over and above tuitions. It costs the college \$20,000 a year to educate the students from New Hampshire, above all moneys paid by them or in their behalf to the college. The total number of

students now in attendance is 741,—from New Hampshire, 207. The college expenses are about \$100,000 annually. New Hampshire boys' proportion would be about \$33,000. The college receives from New Hampshire boys about \$13,000. This does not seem exactly fair. Though not rich, we may well consider whether we ought not to pay bills incurred in so worthy a cause.

The college is constantly broadening its work and making greater its efficiency. It is touching the schools, institutes, and conventions in our own state and in many other states whence come so large a proportion of its students. Most states, whose colleges and universities are not already sufficiently endowed, make liberal annual appropriations for the higher training of both boys and girls.

The next commencement will be the 100th anniversary of the graduation of the college's most distinguished alumnus and New Hampshire's most famous man. If the state shall give to the college what she needs it will have done no more for Dartmouth than Dartmouth has done for the state.

THE NEW HAMPSHIRE COLLEGE OF AGRICULTURE,
AND THE MECHANIC ARTS,

During the seven years since it was established in Durham, has steadily grown in importance and in efficiency, and is now in no sense inferior to the institutions of the same order in other states. It

has won the confidence of the people, and has justified that confidence by the quality of its work and by its devotion to the industrial and educational interests of the state.

The college is supported mainly by the government of the United States. The state of New Hampshire, in receiving these moneys from the national government, virtually pledges itself to the liberal maintenance of the college. This obligation should not be disregarded, but should be faithfully discharged in the future as it has been in the past.

It is recommended that a careful study be made of the needs of the college, and that action be taken to satisfy those needs in the way most consistent with a true economy on the one hand, and with a broad educational policy on the other. This being peculiarly a state institution, controlled by the legislature of the state, it may reasonably expect of that legislature an active interest in its welfare.

The farmers who are anxious that their sons may have a practical education, a little in advance of the lines pursued by themselves, can here have their ambitions realized. The 25,000 grangers—good men and women who have done so much for themselves and therefore for the state, and who have become such a potent factor in the agricultural, social, and educational life of the commonwealth—will, we trust, here find a field for interest and effort.

THE BOARD OF AGRICULTURE.

From small beginnings the board has gradually expanded until it encompasses in its labors and influence most of the great interests of the state. It has established farmers' institutes in every county; field meeting in August; good roads institute in May; winter meeting in December. It controls the licensing, the sale, and inspection of commercial fertilizers; is active in advertising the advantage for summer homes in New Hampshire; the enforcement of the oleomargarine law and that relating to contagious diseases of animals; and is prominent in promoting Old Home Week and agricultural fairs.

The cause of agriculture has taken on new stimulus and dignity. The New Hampshire farmer who raises his own wheat, potatoes, corn, and meat, drives his own team, supports his own church and school, has nothing to fear from trusts and combinations of capital. We have more owners of real estate than there are in all England. Our production per acre of grains and vegetables is not exceeded by that of any state in the Union. Our vital statistics show a high degree of cleanliness and great advance in sanitary measures among the masses.

HEALTH.

The State Board of Health has been in existence almost twenty years. Since its organization

under the laws of 1881, it has taken on much work that has from time to time become necessary through additional legislation and a proper attention to sanitary matters. In 1889 it was made a Board of Commissioners of Lunacy, with powers and duties as to the insane. It has also had charge of the vital statistics which have become of great value to prove births, marriages, deaths, and as to property rights, pension purposes, and as a basis for public health work. It has power over the proper ventilation of schoolhouses and almshouses; to establish rules for the protection of public water supplies; to regulate the practice of embalming, and the transportation of the dead. It has been mainly instrumental through its own efforts and local boards in greatly improving the sanitary arrangements throughout the state, by reason of which there has been a large reduction in the death rate from pulmonary tuberculosis, typhoid and scarlet fever, diphtheria and other diseases always invited by unsanitary conditions. Its efforts among our places and houses of summer resort have been of value to life and property.

Its office is in need of a chemical and bacteriological laboratory. It has been found that such a laboratory is essential to the proper investigation and diagnosis of diseases that spring from bacteria; to analyze water; to examine food to prevent a spurious and adulterated article from being put

upon our New Hampshire market where it is now found in great abundance.

The last legislature had the matter under consideration, but failed to pass the bill then favorably reported.

SCHOOLS.

The law of last session recognized to some extent the responsibility of the state for public education. It is based on the theory that education is properly for the state to provide. The drift of population to large places had so changed the old conditions existing when wealth and population were more equally distributed as to seem to make the law necessary. It had become burdensome to maintain schools in the rural sections. The recent enactment aimed to equalize school privileges and the financial burden affording the same; to give the boys and girls on the farm opportunities as good as those enjoyed in the cities and villages. It may need amending at your hands. You ought to provide that no town receiving its share of the \$25,000 raised by the state shall appropriate any less sum for school purposes than it had been raising before the existence of the present law. The average length of terms of schooling has been increased three weeks. You will again, doubtless, have to meet the idea that it is best to raise all school money by state tax, and have it disbursed by the state treasurer; and also to meet the ques-

tion, now so much discussed, of equalizing high school privileges.

The laws relative to the employment of children in manufacturing establishments are a dead letter in many parts of the state. They are enforced better in cities than in the towns. Perhaps you can strengthen them where they have proved weak. You may deem it necessary to look into the operation of our school system far enough to ascertain whether it is not more or less faulty in some localities in that it crowds the children too fast; puts so many studies upon them in their tender years that they break down, their nervous forces get prematurely exhausted, and they become physically wrecked. For a child between seven and fifteen years, six hours of close application often proves too great a strain, to say nothing of the studying many have to do at home to keep up with their classes. Too many pale children, wearing glasses, are seen in our schools. Less study and more play is demanded for children under fifteen. Parents and guardians must not intrust the education, the health, of their children and wards, wholly to the rigid rules of school teachers and school boards. Better a fair amount of learning and good health, than much education and no health.

There seems to be no need of present legislation concerning the State Normal School. Matters there have recently been reorganized, the building

put into comfortable condition, the principal changed, and the number of students largely increased. We can but hope that the work of training teachers will be thorough, better understood over the state, and yield larger returns for the great outlay that has there been made. At this day no district or town wants teachers who have not had the benefit of good normal training.

The Industrial School is a credit to the state. It has saved many a boy or girl from vagrancy, vice, and crime. The last legislature appropriated \$9,400 to be used for steam heating, plumbing, and needed repairs. Seventy-five hundred dollars of it has been expended and the steam heat is not in. To effect this about \$2,000 more will be required.

The trustees say a gymnasium or play-room is much needed, as under the present arrangement the schoolroom is the only place that can be utilized for sports on rainy days and in cold winter weather.

THE ASYLUM FOR THE INSANE.

September 30, 1900, there were 425 unfortunates in this institution. It has a good board of trustees, one of whom has most ably filled the position for fifty-three years. Under less faithfulness and watchfulness there may come a need of some change in methods, officers, and bookkeeping.

The capacity of the asylum is not infrequently severely taxed. You may feel called upon through

your appropriate committee, and as a whole, to consider whether the imbeciles, the demented, the hopelessly insane, the incurables, should not be separated from those amenable to treatment; whether greater progress towards sanity and health would not be made by the curables if the sad, sickening, depressing spectacle afforded them by the first class was not kept constantly before them.

These people have been touched by the finger of fate, destiny, or misfortune, and if they have no friends or relatives to care for them the state must assume the responsibility. What is necessary to their proper support and maintenance no one will feel like refusing,—only that the sums raised shall be wisely and economically expended, the people have a right to expect and to demand.

The last legislature appropriated \$50,000 to cover the expense of fourteen wants and necessities. The last was a farmer's house. The funds were exhausted before this was reached. The trustees think they will need at your hands about \$15,000 to build the house, furnish fire-proof food elevators, repair old laundry, make ovens, lay new floors and ceilings, and for plumbing.

The attorney-general, one judiciary committee, and the supreme court have declared that the title to this property is in the state. Thus it appears to be valid so long as no one is found to claim to the contrary.

FISH AND GAME.

About \$7,000 are annually expended by this commission. Eleven hatcheries are maintained. Two hundred and fifty dollars is the usual appropriation for detective work. The law of the past session, regarding the fines and forfeits resulting from prosecutions for illegally killing fish and game, creates an addition to the fund of about \$1,000. Discreetly expended this sum accomplishes much. Game, and fish, too, in ponds and lakes, and in brooks that do not get dry, have not been as plenty in New Hampshire as now in the last twenty-five years.

Eleven hatcheries are too many. Three, one in the northern, one in the southern, and one in the central section of the state, would seem to be sufficient. Somewhere among these should be provision for keeping trout and salmon till they become fingerlings before distributing them to care for themselves. Put out among other fish when very small they become easy prey, and but a small percentage remain for the angler. Properly protected our fish and game will continue to be of great value. Aside from the element of pleasure and of food, the money invested, in my judgment, yields good return. It becomes your duty to carefully look over the mass of fish and game laws we now have and see if they cannot be simplified, codified, and made more intelligible.

The first Connecticut lake has recently been

screened to prevent salmon from escaping to other waters. The structure is about 700 feet long and 27 feet deep.

SOLDIERS' HOME.

The New Hampshire Soldiers' Home has been in operation now for upwards of ten years, and has, I believe, fully justified the patriotic motives and expectations of its founders. The institution has been conducted with skill and economy, and is in all respects in first-class condition. From the first the home has been under the charge of an intelligent, interested, and wise board of managers, and has been the means of affording much-needed relief to hundreds of our veteran soldiers of the war for the Union, whose advanced age and increasing infirmities have rendered them eminently fit objects of public charity. No body of citizens are more conspicuously entitled to regard and veneration than these wards of the state.

I invoke for the home a most full consideration, and such appropriations as may be necessary for its proper maintenance and improvement during the ensuing two years.

ORPHANS' HOME.

This home seems to be a model. It is a state institution only in the sense that no child can be taken into it outside of New Hampshire, unless one of its parents has been a resident of the state. The state has never been asked for an appropriation

and probably never will be, unless future legislation shall make it the home for its dependent children. It is doing a good work, however, and is most excellently managed. It has been fortunate in its superintendent and other officers.

The fund is now \$120,000, the income from which, with the generous contributions from a most liberal and charitable public, has thus far been sufficient to care for a great number of homeless waifs.

I have known this home and been familiar with its operations from its inception, and can confidently recommend its work and needs to a philanthropic public.

SAVINGS BANKS.

Our savings banks have recovered from the depression of a few years ago, and from the shrinkage in value of their western investments. There are still some banks that were recently forced into liquidation which have not yet been able to convert all their assets into cash for the depositors. Yet in most instances reasonable and satisfactory progress has been made, and those banks have on an average paid about 70 per cent to this time.

The aggregate resources of the savings banks and trust companies June 30, 1900, amounted to \$62,063,071; due depositors, \$53,896,710, leaving a surplus in the form of guaranty fund, premiums, and undivided interest of \$8,166,361. The increase

in the deposits in the savings banks for the year ending June 1, 1900, was \$2,735,878. The accumulation of money here and elsewhere has been so marked that difficulty is encountered to find safe and conservative investments that will produce income sufficient to meet expenses, state tax, and to pay even 3 per cent dividends. Our interest rates are lower than those of any other country. Foreign nations are fast becoming borrowers. You may think legislation necessary to regulate this new feature of banking.

In 1895 the tax was reduced one quarter of one per cent. This leaves a tax larger than is imposed by any of our neighboring states, and were it not for the law that enables our banks to make local mortgage loans with deduction for the state tax it would be impossible to pay expenses and even a 3 per cent dividend.

You may think a further reduction necessary.

INSURANCE.

The majority of our people, I presume, know as little of insurance, insurance laws and matters, as they do of any subject which so vitally concerns them. It is thought that chapter 86, Laws of 1895, relating to fraternal associations, should be so amended that the insurance commissioner may have the same discretion in dealing with these associations that is given him as to all kinds of insurance companies. He has none whatever now.

There is no reason, there can be no good reason, for this discrimination. The interests of the state, fair dealing with the life and fire companies doing a great volume of business within our borders, demand that these fraternal associations be put on the same footing with other insurance companies.

The statistics show a great increase in the insurance department for the last ten years. In 1891 the number of companies authorized to do business in the state was 107; January 1, 1900, there were 195, besides 32 fraternal associations.

The amount of risks written on property and lives in 1890 was \$85,571,461; in 1899, \$133,681,667. The amount of assessments and premiums received in 1890 was \$1,645,357; in 1899, \$3,066,322. The total amount of losses and claims paid in 1890 was \$693,969; in 1899, \$1,750,101.

The entire fire risks written in the state by authorized companies for the ten years ending Dec. 31, 1899, was \$855,929,843.22; the amount paid in premiums and assessments for the same period was \$10,922,460.22, and the amount received for losses and claims was \$5,294,394.98.

The amount of life risks for the same time was \$38,276,419.75; premiums paid on same, \$8,477,350.35; paid for losses and claims, \$3,866,700.98.

The income to the state from all authorized companies in 1890 was \$27,452.23; in 1899, \$56,746.00.

The figures, though instructive, cannot be here further followed.

THE SUPREME COURT.

This is the court of last resort for our people who have differences to adjust, wrongs to redress, and rights to establish. From the early history of the state's jurisprudence to the present moment we have had honest, incorruptible, and fairly able courts. Much of the time we have had judges upon the bench whose fitness, learning, and industry have borne them to the very front rank of the great jurists of the country. All the time we have had judges who have earned more than they have received. The dignity of this high tribunal, the measure of ability and integrity, and work required of our judges, demand that they shall be better paid. In this age when bright, strong men are eagerly sought out, and their services well paid for, by the great interests of the land, we cannot expect to be so fortunate as we have been in the past in obtaining first-class men at second-class prices. The time is near at hand when men in every calling will ask and receive something near the worth of their services.

There may be a move at this session to substitute for this court a dual court. Possibly you may conclude that it is the part of wisdom, justice, and economy to better pay the court we have than to create others.

THE NATIONAL GUARD.

All who are at all conversant with our military affairs bear testimony that the reorganization of

our three eight-company regiments into two regiments of twelve companies each, by my immediate predecessor, was a step in the right direction; that it has increased the efficiency of the force and is less expensive. The morale of the brigade was never better. The adjutant-general will probably lay before you for adjustment a claim of about \$4,000. It came as follows:

When the state troops were mustered for the Spanish war, they were equipped in part from the annual appropriations for the support of the Guard. Some men in each of the companies ordered into camp for muster into the United States service were rejected, but were paid for the time they were in camp also out of this appropriation. These disbursements amounting to \$3,971.97 were paid by the general government back into our state treasury. Unless you shall authorize this sum to be paid over to the National Guard it would seem to be crippled to that extent.

BUREAU OF LABOR.

From the interesting report of the commissioner we learn, among other things, that the number of industries in our state is 1,331; amount of capital invested, \$86,632,297; value of product, \$103,429,553; cost of material used, \$58,404,515; number of males and females employed as wage-earners, 73,485; total wages paid, \$26,144,340; number of salaried clerks and officials, 1,653, with salaries of \$1,979,802.

These figures demonstrate that New Hampshire, in manufacturing industries, is well up with the other New England States.

The commissioner recommends that you enact a law making it compulsory upon manufacturers to make returns to the bureau. You will have his report with you, and, within its limit of 300 pages or more, will find much that will interest every intelligent citizen of the state.

STATE LIBRARY.

Our people some time ago became convinced of the utility of a state library, else they would not have constructed and equipped so good and convenient a library building as we now possess.

As an educator it is doing all its most enthusiastic advocates predicted. June 1, 1900, it had 62,059 bound and 31,794 unbound volumes, besides 11,671 unbound periodicals. These books range the whole field of useful, practical literature, and embrace law, history, medicine, religion, biography, miscellany, newspapers, pamphlets, etc.

The efforts of the managers of the institution have been of late specially and, in my judgment, worthily directed to the construction and publication of an adequate catalogue of this great collection, and it may be expected in the near future that the public, by this aid, will find the usefulness of the library greatly augmented.

The expenditures and disbursements the past two years have been kept well within the appro-

priation. The librarian is of the opinion that the walls of the library room should be tinted to better protect the eyes, and to give the room a more cleanly appearance.

GOVERNOR'S HOME.

It is about time in our history that we were thinking of providing a home for the governor during his term of office. While the state is not rich, it is well enough off to have what it needs. Our debt is being gradually extinguished and in a few more years of economic administration of our affairs it will be gone. In this view it has occurred to me that it would be wise and proper to begin to make plans here in the capital city for a modest home in keeping with the modes of living existing among our people,—the whole to cost somewhere from \$10,000 to \$20,000,—in which the governor can live during his term, or such part of it as he desires, and where the people of the state, the legislators and their families, and others so disposed, can meet the chief executive and his family and get better acquainted.

If the suggestion finds lodgment with you perhaps the outcome may be that a committee will be appointed to consider the matter and report to the next session.

STATE PRISON.

The average daily inmates for the past year have numbered 140,—a lower average than usually ob-

tains. The decrease in prison population is probably owing to the tendency of our courts to commit convicts for lesser offences to county institutions. Generally the prison has been self-sustaining. It was not quite so last year. The excess of expenses was about \$2,000. The officials think this is due to the small number of inmates, as the current expenses do not decrease in proportion to the prison population. We see no reason on that score for encouraging crime.

The prison is well managed. The convicts are now laboring under a seven years' contract. Every building is neat and in fair repair; the discipline is firm yet humane, the food good and sufficient, and the convicts for the most part are appreciative of the law commuting quite a share of the sentence because of good behavior.

You will be asked for a comparatively light appropriation for plumbing, a porch, and a few other minor but necessary matters.

If not now, ere long, the question of indeterminate sentence will have to be met and solved.

STATE BOARD OF CHARITIES AND CORRECTION.

This board has done a good work and much of it, and all without recompense save what comes to those who, from philanthropic, humanitarian motives, the love of letting light and even sunshine into dark places, strive to make the world better. New Hampshire is one of the twenty-four states

having such boards. Only fourteen states allow children to be kept in almshouses. The board has systematized its work and got it well in hand. It has looked after 600 children and located over 500 of them in private asylums. It has been greatly handicapped for lack of funds, and will doubtless ask of you that appropriation be made to enable them to have a paid secretary and a paid agent to look after the children. Such a request seems not unreasonable. Sooner or later our state will have to meet the problem of a home and schools for its feeble-minded children.

TEMPERANCE.

The substance of the present temperance law has existed in our state for forty-five years. There have been changes in methods of procedure but not many in the fundamentals. While it has not accomplished all that the most ardent friends of prohibition hoped and claimed it would do, the majority of the people of the state have not seen fit to disturb it. There has been— there is still— complaint that it is not more vigorously enforced, yet it is an open question whether it is not as well observed as most other laws which relate to the tastes, appetites, and passions of the people.

You may, under the light of recent events in some counties in our state, consider that chapter 87, section 2, Laws of 1895, should be amended so that in cases where the county solicitor shall be in

doubt as to the necessity or expediency of prosecuting, discretionary power may rest with the attorney-general.

HARRIET P. DAME.

Last April this noble woman died. She had served in the hospitals and with the army almost five years. Her first work was in opening her house to the sick boys of the First New Hampshire, here in Concord. Early in June, 1861, she was enrolled as matron of the Second New Hampshire at six dollars a month.

Without enumerating her good deeds or recounting her great sacrifices, I will say that till the war was closed she was an angel of mercy among our sick and wounded boys. She was called to responsible and hazardous posts by our generals, in the performance of her humanitarian labors. After the battle of Fredericksburg our General Marston affirmed that she was the bravest woman he ever saw. For nineteen years before her death she was elected president of the National Army Nurses' Association.

Her life was long, useful, and eventful, full of grace, beauty, and sacrifice. Would it not be well for the state to recognize the worth of this woman by causing her portrait to be hung in some one of these historic halls? By so doing we shall not only pay fitting tribute to her memory, but likewise a deserved compliment to the pure and self-sacrificing womanhood of our state.

FRANKLIN PIERCE.

You may also be called upon to take action with reference to a memorial to the late President Franklin Pierce. He was a brave officer in the Mexican war, and New Hampshire's only president. His administration was in the midst of the nation's troublous times, when party spirit ran high on the important questions then agitating the public mind. Time and events have very much softened political asperities.

THE PAN-AMERICAN EXPOSITION,

which is to take place at Buffalo, may likewise require notice by you. One of the commissioners for New Hampshire and one of the vice-presidents are also members of this legislature, and can doubtless enlighten your minds upon the subject.

THE KEARSARGE AND ALABAMA.

The house of representatives of 1899 adopted a resolution asking the governor to appoint a committee of citizens of the state to procure and present for the use of the new battleship *Kearsarge* a worthy testimonial which should bear with it "the affectionate love of the people of New Hampshire for this noble ship, which, because of the name it bears, must become of all ships New Hampshire's special pride."

In accordance with this request, Governor Rollins appointed a committee of ten representative citizens, who entered heartily upon the work in-

trusted to them. The sum of five thousand dollars was raised by popular subscription, and this was sufficient to purchase handsome bronze tablets for the *Kearsarge* and her sister battleship, the *Alabama*, and to meet the expenses of their fitting presentation at Portsmouth in August last. The people of that city contributed an amount very nearly, if not quite, as large to meet the expense of decorations, etc., for one of the most interesting occasions in the state's history. A large number of distinguished citizens of other states, including high officials of the army and navy, and present and former members of the president's cabinet, having signified their intention of being present on the occasion of the presentation and of taking part in the exercises, it seemed fitting that the state should show due courtesy to her guests, notwithstanding the fact that no legislative appropriation was available for the purpose. Acting upon the suggestion, and at the urgent request of many prominent citizens, Governor Rollins arranged for the presence of the National Guard at Portsmouth on that occasion. A banquet was tendered the guests at the close of the exercises, and the visitors from the South were shown such courtesies as seemed fitting in view of the widespread interest which the presentation had created.

I recommend that the legislature appropriate such a sum of money as may be needed to meet the expenses thus incurred.

I would respectfully call your attention to a few changes in the statutes in addition to those already suggested.

1. Should not our homestead exemption be enlarged? The present limit of \$500 was fixed years ago when that sum had twice the purchasing power towards getting a home it now has. Five hundred dollars will not buy much of a home for the wife and little ones. Seven hundred and fifty dollars would be better.

2. Should not the laborer's wages be wholly exempt from the operation of the trustee process? Because they are not, oftentimes the laborer loses the job or the work, on the completion of which the family depends for sustenance, — the necessities of life. It is not infrequently the case that a man's wages are tied up to compel an unjust settlement. We need not fear that we shall legislate too liberally in favor of this large class of our respectable men and women. Capital will usually take care of itself.

3. You may conclude that a minor practicing any profession or engaging in any business with the consent or knowledge of his parents or guardians shall be made liable on all contracts he may make in connection with such business or profession.

4. You may also consider that the caucus law of 1897 should be amended. There were charges and countercharges as to misconduct of men and

candidates in the last campaign, in the caucuses of some towns and cities. These accusations need not have been wholly true to convince you that something should be done to prevent like occurrences in the future.

5. A large saving can be effected to the various towns in the state by proper amendments to chapter 32, Public Statutes. Too many days are allowed in the larger towns for the regulation of check-lists in any election except the biennial. The supervisors must be on hand, and will charge for all the days prescribed by the law. The law should be changed. One day is ample in all special or annual town elections. It should be amended not only as above set forth, but also so that the board cannot of itself change its whole construction. Now, either party can nominate and (if in a majority) elect a board of first-class men, and they can, by resigning one after the other and allowing the remaining members to fill the vacancy, create a board of a very different character to pass upon one of the dearest rights of an American citizen.

6. Better protection should be afforded insectivorous birds. Duty and interest alike demand it

7. You may perhaps see fit to consider the advisability of providing for minority representation on the boards of all our important commissions, bureaus, and trustees.

Were I to be allowed a word as to the order in

which you proceed with your duties, it would be that you first take up and pass the great appropriation bills necessary to the proper administration of the state's affairs, leaving for the last the more questionable matters. In this way less money will be raised than if you let in and pass measures of doubtful expediency and necessity first, for the others must come any way, no matter how much you may have appropriated for the less important matters. Those appearing before your committees asking money for doubtful schemes and projects understand this full well, and will be very persistent early in the session. My suggestion is to let them wait.

And here I will strongly urge that early in the session you pass a law making it the duty of the attorney-general, on behalf of the state, to appear before any of your committees at every hearing where money is sought from the state; that all such hearings shall be on notice to the attorney-general, and that his present salary be sufficiently increased to recompense him for this additional work.

It often happens, as some of you well know, that great interests are represented by great lawyers before legislative committees, not a member of which ever had any legal training or can successfully answer the advocate's plausible theories and assumed law, or assign good grounds for refusing his request. It is not for the welfare of the state that this condition of things longer continue.

Your committee on rules may deem it useful to have a committee on bills, whose duty it shall be to closely scan every bill at some stage before its passage, and so be able to prevent crude and imperfect legislation.

Without much further prolonging my message to you, I will suggest that you look carefully into the operation of our commissions, boards, and bureaus, and if you find any that are not needed, abolish them. If you find others that are spending more money than they should, curtail. If still others that would be of greater benefit to the state, could they have more to do with, appropriate. In other words, make efficient what are necessary, and lop off the unnecessary. Be careful about taking on more. Other states, greater and richer than ours, with more varied interests, dependencies, and resources, may feel it their duty to multiply commissions. I am certain we should not do it. We should keep close to the ground floor, to the principles, the simplicity, of the fathers.

New Hampshire has got along pretty well with its own system of government. It is one of the very few forty-five states that pay as they go. I know how easy it is for the legislature to grant a request for a room for one thing or another; the next one will be asked for a clerk, etc., and soon an expense of \$5,000 to \$6,000 is annually incurred. When you vote away money, always bear in mind that these dollars must be earned in some way.

I will not say to you that your duties here will be important, for you already realize it. You will at times find it as necessary to prevent as to promote legislation. Not one bill in four introduced will or should become law. We are in greater danger from too many rather than too few changes. Make the laws, as far as practicable and possible, general, not special. Exercise a wise distrust of, and discrimination against, pet schemes and private enterprises.

By observing these few simple, honest rules in what we do, we will find favor with our own consciences, the people whom we serve, and the God who watched over our fathers, and who, we have faith to believe, has been with their children even to this hour in all their efforts to preserve and hand down to still other generations and peoples the blessings of Christian civilization and the priceless heritage of good government.

SEVENTEENTH REPORT

(THIRD BIENNIAL)

RELATING TO THE

REGISTRATION AND RETURN

OF

BIRTHS, MARRIAGES, DIVORCES, AND DEATHS

IN NEW HAMPSHIRE

FOR THE YEARS 1898 AND 1899.

VOLUME XIV . . . NEW SERIES

MANCHESTER, N. H.

ARTHUR E. CLARKE, PUBLIC PRINTER

1900

STATE OF NEW HAMPSHIRE.

OFFICE OF THE REGISTRAR OF VITAL STATISTICS.

CONCORD, October 1, 1900.

To His Excellency the Governor and the Honorable Council:

I have the honor to submit herewith, in accordance with the laws of the state of New Hampshire, the seventeenth report relating to the registration of births, marriages, divorces, and deaths in this state for the years ending December 31, 1898, and December 31, 1899.

The number of births reported in the state for the year 1898 was 8,321, or 138 less than was reported in 1897; the number of marriages was 3,193, or 17 more than was returned in 1897; the number of deaths was 6,743, or 284 less than in 1897.

The number of births reported in the state for the year 1899 was 8,118, or 203 less than was reported in 1898; the number of marriages was 3,741, or 52 less than returned in 1898; the number of deaths was 7,045, or 302 more than was returned in 1898.

The population of the state, calculated upon census returns, was 404,322 in 1898 and 407,938 in 1899, and the proportion of births, marriages, and deaths to each one thousand of the population is as follows:

For the year 1898, birth rate, 20.58; marriage rate, 9.38 (couples); divorce rate, 1.10; death rate, 16.68.

For the year 1899, birth rate, 19.90; marriage rate, 9.16 (couples); divorce rate, 1.06; death rate, 17.27.

The tables have been arranged substantially as in the last registration report.

Reference should be had to the index at the end of this volume for any subject included in this report.

Respectfully submitted.

Irving A. Watson

Registrar of Vital Statistics.

TABLE No. I.
Showing number of Births from 1880 to 1899 inclusive, by years.

SUMMARY OF VITAL STATISTICS.

TABLE No. 1.

Population of Counties in 1880, 1890, and 1900.

COUNTIES.	1880.	1890.	1900.
Rockingham	49,064	49,650	51,118
Strafford.....	35,558	38,442	39,337
Belknap	17,948	20,321	20,321
Carroll	18,224	18,124	16,895
Merrimack.....	46,300	49,435	52,430
Hillsborough	75,634	93,247	112,640
Cheshire	28,734	29,579	31,321
Sullivan	18,161	17,304	18,009
Grafton.....	38,788	37,217	40,844
Coos	18,580	23,211	29,468
Total	346,991	376,530	411,588

Table No. 1 shows the population by counties according to the United States census of 1880, 1890, and 1900. It is from these tables that our deductions as to the population for each year are arrived at.

TABLE No. 2.

Population of New Hampshire for each year from 1880 to 1900, inclusive.

YEARS.	Population.	YEARS.	Population.
1880.....	346,991	1891.....	379,896
1881.....	349,952	1892.....	383,292
1882.....	352,913	1893.....	386,719
1883.....	355,874	1894.....	390,177
1884.....	358,845	1895.....	393,665
1885.....	361,806	1896.....	397,185
1886.....	364,767	1897.....	400,737
1887.....	367,728	1898.....	404,322
1888.....	370,689	1899.. ..	407,938
1889.....	373,650	1900.....	411,588
1890.....	376,530		

Table No. 2 represents the population of New Hampshire for each year from 1880 to 1900, inclusive, and is calculated from the census returns of 1880, 1890, and 1900. In this table the population for each year, except the census years, is calculated, and is believed to be approximately correct. The figures in the table mentioned are estimated upon the basis that there has been a steady increase in the population in the same ratio as was shown between the census returns of the years named.

TABLE No. 3.

Births, Marriages, and Deaths, with the Population and Rates, for
1884 to 1899, inclusive.

YEARS.	Population.	Births.	Marriages.	Deaths.	Birth rate per 1,000.	Persons mar- ried to 1,000.	Death rate per 1,000.
1884	358,845	6,247	3,292	6,194	17.40	18.34	17.26
1885	361,806	6,319	3,180	6,201	17.46	17.56	17.13
1886	364,767	6,657	3,324	6,426	18.24	18.22	17.61
1887	367,728	6,910	3,495	6,479	18.78	19.00	17.61
1888	370,689	6,443	3,379	6,854	17.38	18.22	18.48
1889	373,650	6,912	3,621	6,696	18.49	19.36	17.91
1890	376,530	6,946	3,621	7,368	18.44	19.22	19.56
1891	379,896	7,510	3,904	7,310	19.77	20.55	19.24
1892	383,292	7,746	4,074	7,988	20.21	21.26	20.84
1893	386,719	8,348	4,090	7,663	21.58	21.15	19.81
1894	390,177	7,860	3,881	6,898	20.14	19.89	17.68
1895	393,665	8,252	4,015	6,929	20.96	20.39	17.60
1896	397,185	8,434	4,032	6,791	21.23	20.30	17.09
1897	400,737	8,459	3,776	7,027	21.11	18.86	17.53
1898	404,322	8,321	3,793	6,743	20.58	18.76	16.68
1899	407,938	8,118	3,741	7,045	19.90	18.33	17.27

Table No. 3 shows the estimated population, number of births, marriages, deaths, with the birth rate, marriage rate, and death rate, to each 1,000 of the population, for the years 1884 to 1899, inclusive.

BIRTHS.

TABLE No. 4.

Births in Cities for 1898 and 1899, with rate per 1,000.

CITIES.	Estimated popula- tion.	1898.		1899.	
		Births.	Birth rate per 1,000.	Births.	Birth rate per 1,000.
Portsmouth	10,500	196	18.66	187	17.81
Dover	13,000	295	22.69	283	21.77
Concord	19,000	361	19.00	386	20.31
Manchester	56,500	1,382	24.46	1,205	21.33
Nashua	23,500	664	28.25	601	25.57
Keene	9,000	142	15.78	168	18.67
Rochester.....	8,300	233	28.07	188	22.65
Laconia	8,000	164	20.50	144	18.00
Somersworth	7,000	212	30.28	221	31.57
Franklin.....	5,700	137	24.03	111	19.47
Berlin	8,000	313	39.12	350	43.75

Table No. 4 gives the population, number of births, and the birth rate per 1,000 of the population, for the several cities of the state, based upon the estimated population. The latter, it will be observed, differs somewhat from that given in previous reports, because the census returns of population for 1900 are available, and the figures given for each city are revised in accordance with official returns.

TABLE No. 5.

Percentage of American and Foreign Births, by Counties, 1898.

COUNTIES.	PARENTS.			Births with percentage not stated.

1890.....	3,621	19.22	382	1 to 9.48
1891.. ..	3,904	20.72	412	1 to 9.47
1892.....	4,074	21.30	347	1 to 11.74
1893.....	4,090	21.22	398	1 to 10.27
1894.....	3,881	19.98	398	1 to 9.75
1895.....	4,015	20.52	407	1 to 9.86
1896.....	4,032	20.45	406	1 to 9.93
1897.....	3,776	19.01	429	1 to 8.80
1898.....	3,793	18.95	445	1 to 8.52
1899.....	3,741	18.53	435	1 to 8.60

Table No. 16 gives the number of divorces decreed from 1882 to 1899, inclusive; also the ratio of divorces to marriages for the same period. Tables relating to the alleged causes of divorces may be found elsewhere in this report.

TABLE No. 17.

Ratio of Divorces to Marriages, by Counties, for 1898.

COUNTIES.	Number of marriages.	Number of divorces.	Ratio of divorces to marriages.
Rockingham	489	57	1 to 8.58
Strafford	426	40	1 to 10.65
Belknap	168	23	1 to 7.26
Carroll	170	17	1 to 10.00
Merrimack	457	65	1 to 7.03
Hillsborough	1,022	120	1 to 8.52
Cheshire	255	34	1 to 7.50
Sullivan	155	23	1 to 6.74
Grafton	385	40	1 to 9.62
Coos	266	26	1 to 10.23
Total	3,793	445	1 to 8.52

TABLE No. 18.

Ratio of Divorces to Marriages, by Counties, for 1899.

COUNTIES.	Number of marriages.	Number of divorces.	Ratio of divorces to marriages.
Rockingham	512	52	1 to 9.84
Strafford	439	32	1 to 13.72
Belknap	176	35	1 to 5.03
Carroll	162	16	1 to 10.12
Merrimack	419	51	1 to 8.21
Hillsborough	957	108	1 to 8.86
Cheshire	270	28	1 to 9.64
Sullivan	149	28	1 to 5.32
Grafton	380	56	1 to 6.78
Coos	277	29	1 to 9.55
Total	3,741	435	1 to 8.60

DEATHS.

TABLE No. 19.

Deaths and Death Rates from 1884 to 1899, inclusive.

YEARS.	Deaths registered.	Deaths to 1,000 of population.*	Population.*

1897.....	3,461	3,550	97.49	18.55	18.69
1898.....	3,403	3,335	102.04	18.24	17.55
1899.....	3,532	3,509	100.64	18.93	18.47
Average	3,412	3,454	98.70	19.03	18.75

Table No. 22 shows a comparison of male and female decedents for each year since 1884 to 1899, inclusive, together with percentages and death rates for each to each 1,000 of the population. The average annual mortality for the twelve years embraced in the table was, males, 3,412; females, 3,454.

TABLE No. 23.

Deaths at Age Periods, by Percentages, from 1883 to 1899, inclusive.*

YEARS.	Under 1.	1 to 5.	5 to 10.	10 to 20.	20 to 30.	30 to 40.	40 to 50.	50 to 60.	Over 60.
1883	14.33	7.58	2.56	5.55	8.58	6.73	6.22	7.64	37.93
1884	16.22	7.36	2.61	5.30	7.93	6.26	6.33	7.75	38.38
1885	15.98	7.14	2.11	4.42	7.50	6.71	6.71	7.76	40.09
1886	16.89	7.70	2.86	4.82	7.73	6.55	6.12	7.47	38.86
1887	17.64	7.26	2.05	4.89	6.96	6.25	6.56	7.72	39.70
1888	19.23	7.63	2.04	4.93	7.07	6.00	5.53	7.57	38.72
1889	19.44	7.71	2.66	4.64	6.56	6.15	5.93	7.63	38.40
1890	16.23	6.67	1.99	4.28	7.04	7.42	6.62	9.17	40.49
1891	18.30	7.08	2.55	4.40	6.95	6.01	6.29	8.15	40.25
1892	16.17	6.64	2.18	4.39	6.70	6.63	6.60	8.76	41.77
1893	17.83	7.13	1.93	4.32	7.20	6.62	6.94	8.10	39.86
1894	17.52	7.31	2.47	3.89	7.06	7.03	6.35	8.54	39.78
1895	17.10	7.06	2.09	4.21	6.99	5.82	6.66	8.18	41.88
1896	18.08	7.90	2.03	4.31	7.10	6.49	6.14	8.49	39.46
1897	17.01	7.21	2.58	3.76	7.12	7.02	6.12	8.45	40.73
1898	17.93	7.37	1.83	3.32	6.84	6.69	6.24	8.78	41.00
1899	17.54	7.61	1.99	3.58	6.44	5.62	6.72	8.39	42.11

* Not including those with age not stated, premature and still births.

The remarkable uniformity in the death rate by age periods is a noticeable feature in the above table.

TABLE No. 24.

Deaths at Different Periods, compared with the number Living at the Same Period, 1898.*

	1898.	Persons living at same ages, census of 1890.	Death rate per 1,000.
Under 1 year	1,193	6,347	194.26
Under 5 years.....	1,683	30,321	55.67
20 to 30 years.....	455	68,672	6.62
All others.....	4,605	277,537	16.59
All ages	6,743	376,530	17.91

TABLE No. 25.

Deaths at Different Periods, compared with the number Living at the Same Period, 1899.

	1899.	Persons living at same ages, census of 1890.	Death rate per 1,000.
Under 1 year	1,220	6,347	192.22
Under 5 years.....	1,749	30,321	57.68
20 to 30 years.....	448	68,672	6.52
All others	4,848	277,537	17.47
All ages.....	7,045	376,530	18.71

* Excluding still births and premature births

*Including fever, bilious, intermittent, malarial, and typho-malarial fevers.

Table No. 41 exhibits the number of deaths from the more prominent so-called zymotic diseases, 1884-1899, inclusive. This table presents an interesting study in showing the fluctuations in these diseases from year to year. It will be seen that of all the diseases in this class, cholera infantum causes the greatest number of deaths, while typhoid fever holds the second place, and diphtheria the third.

TABLE No. 42.

Mortality from Principal Constitutional Diseases, from 1884 to 1899, inclusive.

YEARS.	DISEASES.

Average ..	56	35	243	27	28	15	12	728	21	21

* Not classed separately.

Table No. 42 gives the number of deaths from the chief constitutional diseases from 1884 to 1899, inclusive. The apparent diminution in the number of deaths reported under dropsy is probably due to a more proper and scientific return of the cause of death by the attending physician,—dropsy itself representing a symptom only. The comparatively steady ratio of deaths from cancer is very noticeable. The most striking characteristic of this table is the large decrease in the number of deaths from consumption.

TABLE No. 43.

Mortality from Principal Local Diseases, from 1884 to 1899, inclusive.

												2,745

* Meningitis and cerebritis included.

The number of deaths from the principal local diseases from 1884 to 1899, inclusive, is given in Table 43. The average number of deaths in this class of diseases for the period given is 2,745, while the total for the year 1899 is 3,216. It will be noticed that there has been a relative increase in the period named of the number of deaths under apoplexy, pneumonia, and Bright's disease particularly.

TABLE No. 44.

Mortality from Principal Developmental Diseases, from 1884 to 1899, inclusive.

YEARS.	DISEASES.

† Meningitis and cerebritis included.

Table No. 45 gives the mortality from twenty prominent causes of death from 1884 to 1899, inclusive, together with the respective position held by each for the years given. It will be seen that consumption ever ranked first as a cause of death in each of the years named excepting in 1892, 1898, and 1899. The dropping of this disease to the fourth position in the latter year is a matter of interest. The total number of deaths from consumption in the year 1899 was 583, a number considerably less than was ever returned in a single year.

TABLE No. 46.

Mortality from Consumption from 1884 to 1899, inclusive.*

YEARS.	Deaths.	Percentages of deaths to deaths from all causes.	Death rate per 10,000 living population.
1884	865	14.01	24.18
1885	857	13.82	23.68
1886	809	12.58	22.17
1887	766	11.82	20.82
1888	742	10.82	20.01
1889	651	9.72	17.42

Table No. 56 shows the mortality from pneumonia by age periods, from 1883 to 1899, inclusive. It will be seen that it is a disease chiefly of infancy and old age. The increase in the total mortality is noticeable; that of 1899, with a single exception, being larger than was ever before returned in a single year; the heavy death rate in those two years being due largely to influenza, the latter disease having a greater mortality in these years than in any other of the returns.

TABLE No. 62.

Mortality from Cholera Infantum, by Ages, from 1884 to 1899,
inclusive.

[illegible]

CANCER.

TABLE No. 63.

Mortality from Cancer, with rates to estimated Population and to total Mortality, from 1884 to 1899, inclusive.

YEARS.	Deaths.	Death rates per 10,000 of estimated population.	Ratio to total mortality per 1,000.
1884	213	5.93	34.39
1885	212	5.85	34.19
1886	206	5.64	32.06
1887	218	5.92	33.65
1888	203	5.47	29.62
1889	213	5.70	31.81
1890	276	7.33	37.45
1891	213	5.61	30.32
1892	235	6.14	29.41
1893	283	7.34	30.67
1894	230	5.92	33.34
1895	266	6.79	38.39
1896	275	6.97	40.49
1897	265	6.67	37.71
1898	305	7.62	45.23
1899	279	6.91	39.60

Table No. 63 gives the annual mortality from cancer for the past sixteen years. The small fluctuation in the number of deaths in this disease from year to year is very marked. No other disease representing so large a number of decedents annually shows such an equitable and steady death rate.

DIPHTHERIA.

TABLE No. 64.

Mortality from Diphtheria, from 1884 to 1899, inclusive, by Ages.

YEARS.	Under 1.	1 to 5.	5 to 10.	10 to 15.	15 to 20.	20 to 30.	30 to 40.	40 to 50.	50 to 60.	60 to 70.	70 to 80.	Over 80.	Unknown.	Total.

It will be seen by the above table that in 1899 the number of deaths from diphtheria was less than ever before returned in a single year. A reduced death rate from this disease since 1893 is shown by a glance at the column of totals. It will be interesting to know to what extent this reduction is due to the use of anti-toxine.

TABLE No. 65.

Diphtheria, by Ages, Sex, and Months, particularly showing number of Decedents in the Cities and Towns returning the greatest Mortality from this Disease, 1898.

1899.....	92	1.31	2.28
Total	2,120
Average.....	132	1.94	3.49

Number of deaths from typhoid fever for the past 16 years, together with percentages and death rates, is given in Table No. 69. The number of deaths from this disease returned in 1899, to wit, 92, is exactly as was returned in 1897, the figures for those two years being lower than any other given for a single year.

REPORT
OF THE
SUPERINTENDENT
OF
PUBLIC INSTRUCTION,

BEING THE
FIFTY-FIRST REPORT UPON THE PUBLIC
SCHOOLS OF NEW HAMPSHIRE.

MANCHESTER, N. H.
ARTHUR E. CLARKE, PUBLIC PRINTER
1900.

REPORT.

OFFICE OF SUPERINTENDENT OF PUBLIC INSTRUCTION,

CONCORD, N. H., October 1, 1900.

To His Excellency Frank W. Rollins, Governor of New Hampshire:

SIR,—I have the honor to transmit through you to the general court of New Hampshire the fifty-first report upon the schools of the state, being the third biennial report, and the thirtieth report since the establishment of this office.

The report includes:

1. Report of the trustees of the State Normal School.
2. Report of the proceedings of the State Teachers' Association for 1899.
3. Regulations governing state examination and certification of teachers.
4. Questions submitted at teachers' examinations in 1899 and 1900.
5. Appointments of superintendent for 1899 and 1900.
6. Institute statistics.
7. List of school officers.
8. List of institutions of a higher grade.
9. Statistics of the public schools for 1899 and 1900.
10. Recommendations, suggestions, etc.
11. Report of the regent of the state boards of medical examiners.

REPORT OF THE TRUSTEES OF THE NORMAL SCHOOL.

To the Senate and House of Representatives:

The Trustees of the State Normal School respectfully submit the following report for the year closing August 31, 1900:

New Hampshire looks to the State Normal School for its teachers,—teachers not simply to conduct its schools, but to be representative of what is best in education to all those who have schools in charge. The work of the graduates of our Normal School should be a constant object lesson to those who are interested in school matters.

In order to justify its existence the Normal School must make its influence felt for the betterment of the teaching in the common schools. In other words, we should look first of all to the quality of the graduates rather than to the quantity. "A little leaven leaveneth the whole lump," but it is of importance that that little should be of the best.

To establish and maintain an excellent standard of scholarship and efficiency requires that the personnel of the instructors shall be of the highest order. A teacher who is to instruct teachers must, from the very nature of his position, be of the first rank. While this fact would appear to be self-evident the principle underlying the statement is not so clearly understood, namely, that if we are to have good instructors and retain them they must be paid in proportion to the services performed. Skilled labor is always expensive, and in no field of labor is this truer than in educational work.

New Hampshire has but one normal school. She has innumerable country towns which ought to be benefited by the influence of her normal graduates. That this influence may

be most efficient the instruction rendered at the Normal School must be of the highest order. To obtain the best instructors adequate compensation must be offered. As the Normal School is at present conducted the trustees are able, through careful management and good judgment in the selection, to employ strong teachers; but after these teachers have served a year or more, and when their services have become of most value to the institution, they resign to take similar positions elsewhere for larger salaries. The trustees are powerless to help themselves, owing to lack of money. The trustees would strongly urge that greater liberality be shown in your appropriation for the State Normal School.

During the past year Mr. A. H. Campbell has severed his connection with the Normal School, and Mr. James E. Klock, who was superintendent of the schools in Helena, Montana, was made his successor.

In electing a new principal to take charge of the State Normal School the trustees made every effort to have the selection a wise one. A large number of candidates presented themselves, and their qualifications were in each instance carefully examined by the committee on teachers. Mr. Klock has a long and honorable career in educational work to his credit. His first teaching was as principal of a village school in Lyon county, Kansas. Having served in this position four years, he was elected, in 1880, principal of the high school at Emporia, Kansas. Two years later he was made superintendent of public instruction in Lyon county, Kansas. In 1884, at the urgent request of the board of education, Mr. Klock returned to Emporia to act as superintendent of the city schools, which position he held until 1890. At this time he was elected city superintendent at Leavenworth, Kansas. In 1896, he resigned the superintendency of Leavenworth to accept a similar position in Helena, Montana. He was acting as superintendent of schools at Helena when he resigned to take charge of the New Hampshire State Normal School.

The trustees are confident that under Mr. Klock's management the school will be able to maintain an excellent standing, and will offer to the young men and women of the state,

who wish to become teachers, exceptional opportunities to perfect themselves in their profession.

The new heating and ventilating plant seems to perform its work efficiently and well, but at a much greater expense for janitor service and coal than under the old system. Judging from the coal consumed last winter, it will necessitate a supply from one third to one half greater than formerly.

A more extended account of the present heating system and of other matters pertaining to the schools will be found in the reports of the treasurer and principal.

JAMES H. FASSETT,

For the Trustees.

REPORTS OF THE TREASURER OF THE NORMAL SCHOOL.

To the Trustees of the New Hampshire State Normal School:

GENTLEMEN,—I herewith submit my report as treasurer for the year ending August 31, 1899:

RECEIPTS.

Cash on hand September 1, 1898	.	\$2,253.12	
Received of state treasurer	.	10,000.00	
of Plymouth school district		3,299.70	
for incidental fees, and tuitions in model schools	.	514.50	
for fuel at Normal Hall	.	385.85	
			\$16,453.17

DISBURSEMENTS.

Paid for salaries	.	\$10,632.25	
repairs	.	114.20	
text-books and supplies	.	1,025.47	
advertising and printing	.	100.65	
lighting and water	.	195.70	
heating	.	1,032.82	
furniture and apparatus	.	462.13	
miscellaneous expenses	.	396.88	
Cash in treasurer's hands	.	2,493.07	
			\$16,453.17

GEORGE H. ADAMS,
Treasurer.

JANUARY 19, 1900.

I have examined the above account and find the items properly vouched and the account correctly cast.

JAMES C. SIMPSON,
Auditor.

To the Trustees of the New Hampshire State Normal School:

GENTLEMEN,—I herewith submit my report as treasurer for the year ending August 31, 1900:

RECEIPTS.

Cash on hand September 1, 1899	.	\$2,493.07
Received of state treasurer	.	10,000.00
of Plymouth school district		3,630.40
for incidental fees and tuitions in model schools	.	950.00
for fuel for Normal Hall	.	401.00
of A. H. Campbell, balance of Normal Hall account		21.70
		————— \$17,496.17

DISBURSEMENTS.

Paid for salaries	\$10,965.00
repairs	312.25
text-books and supplies	.				937.72
lighting and water	.				261.11
advertising and printing	.				40.15
furniture and apparatus	.				280.94
fuel	1,991.19
insurance	450.00
miscellaneous expenses	.				964.84
Cash in treasurer's hands	1,292.97
					————— \$17,496.17

GEORGE H. ADAMS,
Treasurer.

PLYMOUTH, October 10, 1900.

I have this day examined the above account and find the items properly vouched and the account correctly cast.

JAMES C. SIMPSON,
Auditor.

REPORT OF THE PRINCIPAL OF THE NORMAL
SCHOOL.

PLYMOUTH, N. H., June 30, 1900.

To the Trustees of the New Hampshire Normal School:

GENTLEMEN,—I herewith transmit to you my second biennial report as principal of the Normal School.

The past two years have been a period of continued prosperity and progress in the school. Advance has been made along every line. The students have been more mature and of higher scholarship at entrance, a larger proportion of them being high school or academy graduates, and nearly all having had experience in teaching. Several college graduates have entered the school and completed the course. These conditions have been utilized by raising the standard of scholarship for graduation. The amount of professional instruction and practice in the training schools has also been increased, so that graduates have gone out fully equipped for successful work in the public schools. The satisfactory results reported by the many school boards employing the graduates show the advantage of this thorough preparation.

There have been some changes in the personnel of the faculty during the period covered by this report. A. J. Grout, Ph. D. (Columbia University), teacher of science, was elected to a like position in the Brooklyn, N. Y., high school at a much larger salary, and resigned his position in the Normal School in January, 1899. Thomas H. Clark, Ph. D. (Clark University), was chosen to succeed Dr. Grout. Miss Viola G. Burr, in charge of first primary room in training department, resigned her position in June, 1899, to accept a much more lucrative position in the training department of the Lowell Normal School. Miss Martha Smith, a graduate of the Lowell Normal School and a teacher of several years' experience in primary work, succeeded her. Miss Emma L. Hacker, A. B. (Bryn Mawr), teacher of biology, resigned in June, 1899, and was succeeded by Miss Annah P. Hazen, A. B. (Smith College). Miss Mary F. Goddard, A. B. (Tufts

College), teacher of music and high school mathematics, was succeeded by Miss Ella P. Merrill, A. B. (Smith College), in the fall of 1899. At the same time Miss Oriola E. Martin, A. B. (Wellesley College), was added to the faculty as teacher of classics in high school department and instructor of reading and physical culture in the Normal.

The work of the high school has been advanced so that certificates of graduation have been accepted for entrance alike in the classical, literary, and scientific departments by all colleges for which there were candidates, and students have thus entered Dartmouth, Wesleyan, and Mount Holyoke colleges.

The Normal School now works in harmony with all other educational forces of the state. The principals of secondary schools and superintendents recommend it to such of their graduates as design to become teachers. The school boards of many towns will not consider other applicants so long as our Normal School graduates can be secured.

Students are attracted to the school from all parts of the state, every county at present being represented. The largest county, Hillsborough, sends the largest number, twenty-one; then in order, Merrimack, Belknap, Grafton, and Coös, the central counties naturally sending more than those on the border, to which normal schools in other states are more accessible. Sixty-two towns and cities of New Hampshire have students in the school, while twelve come from towns outside our state.

The increase of attendance is as follows: In 1897-98, the first full year of my administration, there were enrolled the first term less than sixty students, and during the year only seventy-seven, with an average for each term of sixty-one. Twenty were graduated. The next year registered one hundred and three, with an average of eighty-two. Twenty-one were graduated. During the present year there have been enrolled one hundred and eighteen, with an average for each term of ninety-four, the largest number doing regular normal work recorded for the school. A class of thirteen graduated in January, a number exceeding all previous winter classes,

while twenty-four graduated in June, making thirty-seven for the year.

I found the chemical laboratory equipped for individual work. As early as possible the physical laboratory was fitted up in like manner for work in physics. In the fall of 1899 the natural history room was supplied with material for a like purpose in the study of biology. Many zoölogical and geological specimens have been provided. These improvements have to a large extent increased the interest and rendered the work much more effective in all branches of science.

By means of a special appropriation of \$8,000 from the state steam heat was provided in the fall of 1899 for the school building and ladies' hall, which has given good satisfaction. For the convenience and comfort resulting from this favor the thanks of the school are extended to the legislative body last convened in New Hampshire.

A. H. CAMPBELL,
Principal.

CALENDAR.

SCHOOL YEAR, 1900-1901.

First term begins . . . Tuesday, September 4, 1900.

Recess . . . Nov. 24 to Dec. 3.

First term ends . . . Friday, January 18, 1901.

VACATION TWO WEEKS.

Second term begins . . . Tuesday, February 5, 1901.

Recess . . . April 13-22.

Second term ends . . . Friday, June 21, 1901.

SUMMER VACATION.

NEW HAMPSHIRE STATE TEACHERS' ASSOCIATION.

FORTY-SIXTH ANNUAL MEETING.

BY NELLIE MERRICK, SECRETARY.

The forty-sixth annual meeting of the New Hampshire State Teachers' Association was held Friday and Saturday in the opera house, Laconia, October 20 and 21, 1899, President George Winch of Manchester in the chair.

The opening exercises consisted of prayer by Rev. Mr. Rice of Laconia, and singing by the Laconia High School pupils under the direction of Professor Osgood.

Voted, That the reading of the records of the preceding meeting be omitted.

Voted, That the association engage an orchestra for the reception Friday evening.

After stating the purpose of the convention, the president introduced Albert Somes of the Manchester High School, who opened the discussion, "Mental Qualities and Powers expected for first year's work in High Schools." The speaker stated that the pupils should be robust in body, keen in intellect, with true manliness. He gave a brief outline of the studies which he thought pupils should pursue before entering a secondary school.

The discussion was closed by M. C. Smart, of the Claremont High School, who had been assigned "Reasoning Power." He said that teachers in the lower grades should not be too anxious to develop this power, but should let the children store their minds with material to be used when the reasoning age is reached.

Rev. Lorin Webster of the Holderness School for Boys very ably treated the subject "Teaching of English in Secondary Schools." He spoke of the importance of English, and criticised the usual English course as being too ambitious. "Soaking" is his method—teaching very few authors, and devoting much time to them, requiring the pupils to learn many selections and to read aloud often.

FRIDAY AFTERNOON.

At the opening of the session Friday afternoon, President Winch appointed the following committees:

On Nomination.—C. L. Wallace, Lisbon; J. H. Blaisdell, Laconia; Ellen McKean, Manchester.

On Resolutions.—T. W. Harris, Keene; W. N. Cragin, Rochester; Clara Upton, Nashua.

Dr. Emerson E. White of Columbus, Ohio, was the first speaker. He held the closest attention of the large audience while he talked for an hour about "Oral Instruction and Book Study." At the close of his address, Rev. Lorin Webster voiced the feeling of all present when he said he wished to express to Dr. White his gratitude for the words just spoken.

"Professional Training of Teachers" was the subject assigned Supt. Charles R. Skinner of New York. He advocated the uniform system of examinations, and told of the forward march of New York schools since the system was adopted there. He rejoiced over the fact that, in his state, the three-dollar-a-week teacher cannot be found.

Prof. Isaac Stout, superintendent of New York institute work, spoke for a few minutes at the close of Superintendent Skinner's lecture.

After a short recess, S. W. Robertson of Woodsville, secretary of the Educational Council, made the following report:

REPORT OF SECRETARY OF COUNCIL.

At the annual meeting of the State Teachers' Association in 1896, a committee was appointed on the 'Unification of the educational organizations of the state.'

At the annual meeting for the year 1897, the committee reported through its chairman, Hon. Fred Gowing, at that time State Superintendent of Public Instruction, and recommended the "formation of a select body to be known as the Educational Council of New Hampshire, whose function shall be the investigation of the educational and pedagogical problems pertaining to the state of New Hampshire." Its membership was to include representatives of all the educational organizations of the state.

In accordance with this report and its recommendations, representatives were elected by the state association, by nearly all the county organizations, the academy association, Dartmouth College, the Normal School, and the State College, so that, at present, nearly every organization is affiliated with the Council, and doubtless the few remaining county organizations will ere long elect representatives.

The meeting for organization was held on October 11, 1898, when a committee on constitution and by-laws was appointed. At a meeting held at the office of superintendent of public instruction on April 28, 1898, a constitution and by-laws drawn up in accordance with the recommendations of the committee of this association were adopted, and officers were chosen as follows:

President, Channing Folsom; vice-president, M. C. Smart; secretary and treasurer, S. W. Robertson; executive committee, W. N. Cragin, Lily P. Shepard, F. P. Emery, Channing Folsom.

By this permanent organization the Council was put in condition to enter properly upon the work assigned it.

By a provision of the constitution, failure on the part of its members to attend the annual meeting forfeits the membership of the negligent member. In this way, it is thought that only such will become members as can take an active interest in the work and make the Council a successful means of improving the educational conditions of the state.

The annual meeting for the present year was held in Concord on the 23d of September, when all the officers were present, and the Council took up its work in good earnest. Several hours were spent in the discussion of the educational interests of the state, and especially of the questions which had been submitted by the executive committee, a part of which are to be brought to your attention today by members of the Council.

To a special committee, of which Principal Bickford of Manchester is chairman, was assigned the task of investigating

the question of the feasibility of a practically uniform course of study for the public schools of New Hampshire. This committee, doubtless, would be pleased to receive suggestions from any who are interested in the question.

We believe that the Council is now in a position to do a good work for the educational interests of the state. Problems of much importance are constantly arising with the ever increasing interest in public education, and the Council will, we believe, be better able than any other organization to consider these problems, and bring them before the teachers and the public.

With the hearty co-operation of all the educational interests and organizations of the state, we look forward with earnest expectations to better things for our old Granite State.

S. W. ROBERTSON,

Secretary.

After the report came the questions of educational interest proposed by the Council.

J. C. Simpson, Portsmouth, opened Discussion I: "Resolved, that all private schools in the state should be required by statute to make statistical returns of the same character as those demanded of the public school authorities."

Discussion II: "Resolved, that the state should furnish school registers to all private schools admitting pupils of compulsory school age; should require those registers to be used in keeping attendance records; and such registers should be open to the inspection of local school boards at all times." This discussion was opened by C. L. Wallace, Lisbon.

Discussion III: "Resolved, that the state should demand of all private schools admitting pupils of compulsory school age, citizens of this state, a minimum standard of efficiency for such resident pupils, and provide some form of supervision to enforce such efficiency." Principal C. W. Bickford, Manchester, opened this discussion.

Several members of the association made remarks on these three resolutions, especially concerning the matter of inserting "citizens of this state," in the first two, when referring to the pupils of private schools.

Voted, That the first three resolutions be adopted by the association.

S. W. Robertson, Woodsville, opened Discussion IV: "Resolved, that the state should require secondary instruction to be furnished by every town, by the payment by the town of the cost of tuition in high schools of other towns, in case the town does not maintain a high school." After a general discussion, the association voted that Resolution IV be adopted.

M. C. Smart, Claremont, opened Discussion V: "Resolved, that the function of certifying the qualifications of teachers in the state, properly belongs to the state rather than to the distinct school boards."

An animated discussion followed.

Voted, That Resolution V be adopted by the association.

FRIDAY EVENING.

Friday evening an appreciative audience filled the opera house to listen to Dr. E. E. White's lecture, "The Duty of the Hour." At the close of the lecture, a reception was given to the prominent educators present.

SATURDAY MORNING.

An unusually large number assembled at the opening of the session, Saturday morning.

The committee on resolutions presented the following report:

REPORT OF COMMITTEE.

Resolved, That in recognition of the success and profit of the present meeting of the New Hampshire State Teachers' Association, the thanks of the association be extended to the officers for their zealous efforts toward its material prosperity; to the several speakers of this meeting for their valuable addresses; to the members of the local committee for the devotion with which they have provided for its comfort; to the citizens of Laconia for their hospitality, and to the management of the Boston & Maine Railroad for the courtesy with which they have facilitated the attendance at this meeting.

Resolved, That the association hereby express its appreciation of the work of the legislative committee, and especially

of the state superintendent, as shown in their success in securing improved school legislation for this state.

T. W. HARRIS,
W. N. CRAGIN,
CLARA UPTON,
Committee.

Voted, That these resolutions be accepted and adopted.

The nominating committee made the following report:

REPORT OF COMMITTEE.

For President, S. W. Robertson, Woodsville; vice-president, Fred L. V. Spaulding, Manchester; secretary, Mary L. Mudgett, Lisbon; treasurer, Channing Folsom, Dover.

Executive Committee.—Supt. Henry C. Morrison, Portsmouth; Principal E. E. Hulse, Tilton.

Educational Council.—One year, Nellie Merrick, Somersworth; for three years, M. C. Smart, Claremont, Clara Upton, Nashua.

Legislative Committee.—J. C. Simpson, Portsmouth; George Winch, Manchester; J. H. Fassett, Nashua; A. H. Campbell, Plymouth; Frank H. Pease, Dover.

C. L. WALLACE,
J. H. BLAISDELL,
ELLEN McKEAN,
Committee.

Report accepted.

Voted, That the secretary cast one vote for the election of the persons named.

The president then declared the officers and committees mentioned unanimously elected for 1900.

The treasurer reported a membership of four hundred and nine, and receipts amounting to \$242.50.

Voted, That the treasurer's report be accepted.

The committee on legislation read the following:

REPORT OF COMMITTEE.

The legislative committee of the New Hampshire State Teachers' Association beg leave to submit the following report of their activity for the past year:

At the instance and invitation of the state superintendent of public instruction, a meeting was held in his office between

your committee and the educational committee of the New Hampshire State Grange.

It was agreed jointly to indorse and support the principles embodied afterwards in two bills entitled respectively, "An act to equalize the school privileges of the cities and towns of the state," and "An act to amend certain sections in chapter 92 of the Public Statutes relating to truant officers."

Later, your committee appeared before the educational committee of the legislature in support of these bills. Both bills were passed, and are now a part of the organic law of the state.

Your committee deem that it marks an important educational advance, that legislative recognition has been given to the principle that the state has a direct and participating function in the management and support of her schools, and trusts that the extension of this principle in other directions may not be far distant.

J. C. SIMPSON,
L. J. RUNDLETT,
J. H. FASSETT,
A. H. CAMPBELL,
F. H. PEASE,

Committee.

Voted, That the report of the legislative committee be accepted.

After the business of the morning, the subject "Principles of Education" was discussed, President W. J. Tucker of Dartmouth speaking upon "Ethical Principles." He urged that in the public schools we reduce to a minimum discrimination against persons, but emphasize with tremendous emphasis discrimination against things. He quoted, "Bolt the doors fast against superstition, profanity, and uncleanness." He called attention to personal influence, and to the authority that is positive, asserting itself continuously, and closed his address with the beautiful lesson drawn from the statue of the Indian chief and boy.

President C. S. Murkland of the New Hampshire College of Agriculture and the Mechanic Arts followed, taking for his subject "Intellectual Principles." He said that no sharp lines ought to be drawn between ethical and intellectual principles, and dwelt particularly upon concentration, discrimination, and authority.

"Physical Principles" was the part of the discussion left for Dr. A. H. Campbell of Plymouth. He urged the importance of physical training, for that which aids the efficiency of the body aids the efficiency of the mind.

The closing address was given by Superintendent Skinner of New York, who spoke of the "Impressions of Educational Conditions in Cuba and Porto Rico." The audience followed him closely in the description of the schools he visited, and supplemented his wish that our government may send money to build schoolhouses and to pay for the books and teachers needed in these islands.

This convention of 1899 was one of the most successful in the history of the association, not only in the excellent program presented, but in the large and attentive audiences that greeted the speakers. About six hundred were present.

REGULATIONS

GOVERNING THE EXAMINATION AND CERTIFICATION OF SCHOOL TEACHERS.

SCHOLASTIC REQUIREMENTS.

(Books mentioned or syllabi given indicate the minimum requirement.)

Candidates for certificates shall pass satisfactory examinations in the following scholastic subjects:

Algebra, to Quadratics.

American History.

Arithmetic, oral and written, including simple accounts, the metric system, and mensuration.

Civics, the equivalent of Dole's American Citizen.

Current Topics.

Drawing, including Geometric Construction.

English Grammar and Composition.

Geography.

Music.

Penmanship.

Physiology and Hygiene, including the effects of Stimulants and Narcotics.

Reading, including American Literature.

Spelling.

Any *one* of the three sciences, at the option of the person examined, Botany, Zoölogy, Physics.

PROFESSIONAL SUBJECTS.

Candidates for certificates shall pass satisfactory examinations in the following professional subjects:

METHODS, in connection with each scholastic subject.

HISTORY OF EDUCATION, the equivalent of Painter's History of Education, published by D. Appleton & Co.

SCHOOL MANAGEMENT, the equivalent of White's School Management, published by The American Book Co., or Tompkins's School Management, published by Ginn & Co.

PEDAGOGY, the equivalent of White's Elements of Pedagogy, published by the American Book Co., Page's Theory and Practice, published by the Werner Co., Fitch's Lectures on Teaching, published by Willard Small, Boston.

PSYCHOLOGY, the equivalent of Sully's Teachers' Handbook of Psychology, published by D. Appleton & Co., or James's Psychology, briefer course, published by Henry Holt & Co.

SCHOOL LAWS OF NEW HAMPSHIRE, especially those relating to raising school funds, powers and duties of school boards, attendance of scholars and truancy.

CERTIFICATES.

To secure *permanent certificates* candidates must secure in the examination an average of not less than eighty (80) per cent in all the required subjects, scholastic and professional, and must not fall below seventy (70) per cent in any subject.

Candidates will be allowed two successive years for completing the examinations.

PROBATIONARY CERTIFICATES, valid for one year from the date thereof, will be granted to such candidates as attain an average standing of not less than seventy (70) per cent in all the required subjects, scholastic and professional, and do not fall below sixty (60) per cent in any subject, but candidates for such certificates may omit the examination in Botany, Physics, Zoölogy, Algebra, Geometry, Music, History of Education, and Psychology.

MINIMUM AGE. No certificate will be issued to any person under eighteen years of age.

PRELIMINARY PAPERS.

Each candidate will, on a blank furnished for the purpose, make such statements regarding name, residence, education,

experience in teaching, and other matters, as may be required.

Candidates, if they wish, may, previously to the day of examination, procure the proper blanks from the superintendent of public instruction and fill them out.

Each candidate will also have in readiness for the examiner a letter from some reputable person containing a statement as to the character of the candidate, and the addresses of two reputable persons who know the candidate, these persons to be readily accessible to the superintendent of public instruction.

HONORS.

An average mark of ninety (90) per cent or higher, with no mark in any subject below eighty (80) per cent, will entitle the candidate to the words "with credit" in the certificate.

An average mark of ninety-five (95) per cent or higher, with no mark in any subject below ninety (90) per cent, will entitle the candidate to the words "with honor" in the certificate.

NORMAL SCHOOL.

The superintendent of public instruction, upon the written recommendation of the principal of the State Normal School, and after the blank statements are properly filled and returned, will grant permanent certificates to graduates of the State Normal School.

MISCELLANEOUS ITEMS.

The superintendent of public instruction may, for reasons satisfactory to himself and in the interests of the state, refuse to grant a certificate to any candidate deemed unworthy.

Candidates whose standing in the examination will not warrant the granting of a permanent certificate will be granted a probationary certificate, if the standing of such candidate is sufficiently high.

STATIONERY. Blanks and necessary paper will be furnished by the examiner.

UNIFORMITY. The examinations will be uniform and simultaneous throughout the state.

NOTICE. Candidates are requested, but not required, to give notice to the superintendent of public instruction of intention to take the examinations and the probable places of taking them.

CHOICE OF PLACE. Candidates are expected to take examinations at places nearest their residences.

INFORMATION. Information regarding the examinations will be cheerfully given by the superintendent of public instruction or any of the examiners.

GENERAL DIRECTIONS.

1. The printed questions will be sent to the examiners in sealed envelopes, and these will be first opened in the presence of the candidates at the time indicated on the program for the examination in each subject.

2. Marks will be on a scale of one hundred (100), and the number of credits to be allowed to each question will be indicated on the examination paper.

3. Candidates will be careful to write upon one side of the paper only, not to fold sheets, to number sheets for each subject consecutively, to write name of subject and name of candidate at the top of each separate sheet. The questions are to be returned to the examiner with the answers. Answers are to be numbered to correspond with the questions. There must be a margin at the left of each paper.

4. Examiners will take into account the general appearance, neatness, legibility, and clearness of papers.

5. Penmanship will be judged from all papers presented.

6. Spelling will be judged by the papers on all subjects.

7. In the solution of problems, processes should be indicated. The simple answer will not suffice.

8. All statements and answers must be written in ink.

9. Collusion between candidates or dishonesty will wholly invalidate the examination.

10. For information at the examination, candidates must apply to the examiner only. No books, papers, or notes shall be used at the examinations, except such as are required by the examiner. Candidates must furnish their own rulers, compasses, pens, and pencils.

11. The examination in each subject is restricted to the half-day designated in the program.

12. Examiners are not allowed to modify materially or change any examinations.

13. Examiners will collect papers at the close of each half-day.

14. Questions must not be copied.

15. Results of examinations will be forwarded to candidates as soon as practicable.

16. Candidates must make themselves thoroughly familiar with the requirements and regulations of the examinations.

These regulations apply to examinations to be held in 1900 and 1901.

Candidates will be advised of any necessary changes or emendations. Modifications may be made for following years.

SAMPLES OF EXAMINATION PAPERS.

PEDAGOGY.

Answer four questions.

TWENTY-FIVE CREDITS EACH.

1. What is the primary object of education, and what three results does it seek to produce in the pupil?
2. Give examples of "information studies," and "disciplinary studies." What are the uses of each of these classes of studies?
3. State the objections to basing promotion in graded schools on written examinations. What are the proper objects of written examinations?
4. Every class exercise should include teaching, drill, and testing. In what order should these three parts of the exercise usually be arranged, and why?
5. State briefly the proper method of using a text-book in arithmetic; in geography; in reading.
6. State a good method of preparing to give a lesson in grammar.
7. Discuss the educational uses of *drawing* as a subject of school study.

-
1. In what ways is psychology an aid to the teacher?
 2. What shall be the work of the child the first day in school?
 3. What exercises can be used in school for training the imagination?
 4. What can the teacher do to cultivate in her pupils a taste for good literature?

5. What are the objects sought by the teacher in conducting a recitation?
 6. Illustrate and describe your method of teaching division of a fraction by a fraction.
 7. Different ways of teaching beginners to read; advantages and disadvantages of each method.
 8. What is the best way to teach morals in school, by regular lessons or indirectly? Why?
-

1. What uses can be made of pictures in the schoolroom?
 2. What incentives for study and good conduct should the teacher use? Name them in order from the highest.
 3. Use of prizes as incentives; advantages, abuses.
 4. When will you use drill work in school? Advantages; disadvantages.
 5. Difference between a lesson and a recitation. Objects of each.
 6. The place of oral instruction in teaching.
 7. Give three fundamental principles in teaching, derived from psychology.
 8. Outline your plan for teaching morals and manners in the schoolroom.
-

PSYCHOLOGY.

Select any four questions.

TWENTY-FIVE CREDITS EACH.

1. Of what use is the localization of brain functions to psychology?
2. Explain what James means when he calls habit "the enormous flywheel of society."
3. What is necessary for continued attention to an object?
4. What would you do to strengthen the attention of children who are studying a subject for which they care nothing?

5. Upon what does the excellence of memory of an individual depend?
 6. Describe the mental process when we will to do anything.
-

1. Different ways of studying psychology; advantages of each.
 2. Physiological psychology, what? Interdependence of the mind and nervous system how shown?
 3. Describe the process of perception.
 4. How is the memory abused? Means of training the memory in school.
 5. Distinguish between inductive and deductive teaching. Illustrate.
 6. Instinct in man and other animals, compare. Of what use?
 7. Habit, what? How acquired? Advantages and disadvantages of forming habits.
 8. Emotions, what? What training of emotions is necessary in school?
-

1. Office of the nerves in mental activities.
2. Reflex action,—explain nervous mechanism and process; advantage of reflex action to mental development; illustrate.
3. Attention,—voluntary and involuntary. How train the attention? Necessity of training?
4. Perceptions, original and acquired, given by each sense. How show a perception to be an acquired one? Illustrate.
5. How train the memory in primary children? How is the memory abused by children? How by adults?
6. Apperception, what? Its relation to perception.
7. In what ways may the teacher train the emotions in children?
8. How train the will in children? Importance of will training.

HISTORY OF EDUCATION.

Select any four questions.

TWENTY-FIVE CREDITS EACH.

1. Compare the contributions of the Asiatic nations to the cause of education with the contributions of Greece and Rome.
 2. What is meant by the "renaissance," and how was it influenced by the invention of printing?
 3. What practical aim had Locke in view in his educational system?
 4. What is the specific purpose of the kindergarten?
 5. What is the character and purpose of the National Bureau of Education?
 6. What is New Hampshire doing toward bettering the educational conditions within its borders?
-

1. What were the social and religious characteristics of the Hindoos, and what their effect on intellectual development?
 2. What were the Catechetical schools, and what their method of teaching?
 3. What was the educational value of the Crusades?
 4. What was Montaigne's theory of education, and what its defects?
 5. What gave Horace Mann his prominence as an educator?
 6. What is Spencer's theory of discipline or punishment as set forth in "Education," and to what extent do you consider it practical?
-

1. What is the Socratic method of teaching? Its special advantage; possible disadvantage.
2. Give the characteristics and results of early Israelitish education.
3. What was Rabelais's criticism of contemporary educational ideas, and what was his idea?

4. Contrast early Protestant educational ideas with those of the Roman church of the same times.
 5. Trace out briefly the development of the public secondary schools of the United States.
 6. What are some of the important lessons to be derived from a study of the educational developments of the French Revolution?
-

1. Review briefly the system of education among the Egyptians, and show what effect it had on national progress.
 2. Contrast the Athenian and Spartan ideas of education and their results.
 3. What was the principal aim of such education as existed during the Middle Ages, and what its effect?
 4. "The Reformation was a breaking with authorities in matters of religion." Why did it give such an impulse to popular education?
 5. What was Rousseau's idea of child development? Its fault; its value.
 6.
 - a. Who was the founder of the kindergarten?
 - b. Its purpose?
 - c. Its value?
 7.
 - a. Where did public schools originate?
 - b. Wherein have they been of special value to America?
 8. How do you account for the prominence given to popular education at the present time?
-

SCHOOL MANAGEMENT.

Select any three questions.

THIRTY-THREE AND ONE THIRD CREDITS EACH.

1. Arrange a daily program for a seventh-grade school, indicating the order in which you would place the studies, the time devoted to study and to recitation in each subject.

Subjects to be pursued: Reading, Spelling, Writing, Arithmetic, Language, Geography, History, Music, Nature Work. Length of school day, five hours.

2. In the absence of any special regulation, what means may a teacher employ to secure prompt and regular attendance on the part of her pupils?
 3. What duties has a teacher to her pupils outside of the schoolroom and out of school hours?
 4. Discuss the question of schoolroom decoration, as relating to discipline and moral training.
-

1. Discuss the question of school discipline, using the following outline:
 - a. Its purpose.
 - b. The fundamental principles.
 - c. Motives to which teachers may appeal. Their comparative value.
 - d. Qualities of the teacher which go to make a good disciplinarian.
 2. Write a careful outline of the work that you would do (and your preparation for that work) the first half day in a new school.
 (The candidate should state whether the school which she has in mind is a primary, grammar, or ungraded one.)
 3. State at least three objections that may be urged to the practice of giving prizes or granting special privileges to pupils as rewards for good work done in school. Can you give any valid argument in support of the practice of giving such prizes or privileges?
-

1. What would you consider the three most important qualifications on the part of a successful teacher? Why would you consider them of most importance?

2. Discuss the importance of proper heating and ventilation in schoolroom work. What means may a teacher employ to secure favorable conditions where the only heater is a stove and the only ventilators are doors and windows?
 3. What do you understand by good order in a schoolroom; and what are the strongest motives on the part of the pupils towards that end?
 4. To what motives should the teacher appeal, chiefly, in attempting to secure good discipline? faithful study?
 5. State, in your opinion, how moral instruction may best be given by the teacher.
-

1. Discuss in detail the relations that should exist between teachers, school officials, parents, and pupils, and what the teacher can do to promote such relations.
 2. State and discuss briefly some of the important conditions of school government.
 3. Which of the school incentives are especially worthy of cultivation; and which should be discouraged?
 4. What is the purpose of punishment; and what considerations should determine its kind and amount?
 5. What supervision should a teacher exercise over her pupils outside of the schoolroom?
 6. What is the purpose of the recitation; and what are the essentials of a good recitation (*a*) on the part of the teacher, (*b*) on the part of the pupil?
-

SCHOOL LAWS.

Select any three questions.

THIRTY-THREE AND ONE THIRD CREDITS EACH.

1. Is it necessary that teachers hold certificates of qualification? Give all the provisions of New Hampshire law relative to teachers' certificates.

2. What is a school district? In what town or city do you live? How many school districts are there in your town?
 3. How would you find the average membership of a school for the school year? The per cent of attendance daily?
 4. How much money for school purposes is raised in the town in which you live? How is the amount decided? Is any particular amount required by law? If so, how is the amount fixed?
-

1. Name at least three sources of money for school purposes, which the state laws designate.
 2. How does the state law provide for the relief of the weaker towns, in the matter of taxation for school purposes?
 3. Explain the laws relative to the employment of superintendents of schools.
 4. What is a school district? How many school districts in the town in which you live? (Name the town.)
 5. Explain the restrictions imposed by state law on employment of children.
-

1. What is a school district? How many school districts in the town in which you live? (Name the town.)
2. What provision is made by law for conveying children to and from school? Does the law provide any limit as to distance of conveyance? Who decides as to conveyance?
3. What constitutes a legal school day? A school week? A school month?
4. Name three powers or duties of a school district; three of a school board.
5. State fully all provisions or requirements of state law as to teachers' certificates of qualification.

1. What is a school district? How many school districts in the town in which you live? (Name the town.)
2. How much money for school purposes is raised in the town in which you live? How is the amount decided? Is any particular amount required by law? If so, how is the amount fixed?
3. State the provisions of the employment laws relating to the education of children.
4. What are the officers of a school district? How are they chosen? How are vacancies filled?
5. Name five duties of school boards.

ALGEBRA.

Select any four questions.

TWENTY-FIVE CREDITS EACH.

1. Divide $12a^{5n-3} - a^{4n-2} - 20a^{3n-1} + 19a^{2n} - 10a^{n+1}$ by $4a^{2n} - 3a^{n+1} + 2a^2$.
2. A is twice as old as B and six years younger than C. The sum of the ages of A, B, and C is 96 years. What is the age of B?
3. Resolve into factors—
 - a. $x^3y^3 - 512z^3$.
 - b. $x^3 - x^2 + 3x + 5$.
4. A and B together can do a piece of work in $1\frac{1}{2}$ days; A and C, together, in $1\frac{1}{4}$ days; and B and C, together, in $1\frac{7}{8}$ days. How many days will it take each alone to do the work?
5. Find the square root of $1 + 10x^2 + 25x^4 + 16x^6 - 24x^5 - 20x^3 - 4x$.
6. Solve the following:

$$\sqrt{9+2x} - \sqrt{2x} = \frac{5}{\sqrt{9+2x}}$$

7. In a mile race A gives B a start of three seconds, and is beaten by $12\frac{4}{7}$ yards. In the second trial A gives B a start of ten yards and the race is a tie. Find the number of yards each runs a second.

1. Divide $m^6 - 6m^4n^2 + 9m^2n^4 - 4n^6$ by $(m+n)(m-n)(m+2n)$.
2. a. Divide 71 into two parts such that one shall be 4 times as much below 55 as the other exceeds 37.
b. In 7 years A will be 3 times as old as B, and 8 years ago he was 6 times as old. What are their ages?
3. Factor the following:
a. $1+x-72x^2$.
b. $27x^3-8y^3$.
c. $(x+y)^3-(x-y)^3$.
 a^2-ab-b^2
4. Reduce $a-b-\frac{\quad}{a+b}$ to a fractional form.
5. The sum of the three digits of a number is 13. If the number, decreased by 8, be divided by the sum of its second and third digits, the quotient is 25; and if 99 be added to the number, the digits will be inverted. Find the number.
6. A crew row up stream 26 miles and down stream 35 miles in 9 hours. They then row up stream 32 miles and down stream 28 miles in 10 hours. Find the rate in miles an hour of the current, and of the crew in still water.

1. Divide $a^3-8b^3-1-6ab$ by $a-2b-1$.
2. a. The difference in the squares of two consecutive numbers is 19. Find the numbers.
b. If $2x-8$ stands for 20, for what number will $4-x$ stand?
3. Resolve into factors:
a. x^3-x^2+3x+5 .
b. $4a^4-9a^2+6a-1$.
c. $6a^2-a-77$.
4. A and B together can do a piece of work in $1\frac{1}{2}$ days, A and C together in $1\frac{3}{4}$ days, and B and C together in $1\frac{1}{2}$ days. How many days will it take each alone to do the work?

5. A train traveling 30 miles an hour takes 21 minutes longer to go from A to B than a train which travels 36 miles an hour. Find the distance from A to B.
 6. A number is expressed by two digits. If the number is divided by the last digit, the quotient is 15. Find the number.
-

1. Either of the two following:
 - a. $6m^4 - 19m^3 + 22m + 5$ divided by $3m - 5$.
 - b. $6a^5 - 6ab^4$ divided by $-3b + 3a$.
2. Either of the two following:
 - a. A sum of money, amounting to \$24.90, consists entirely of two-dollar bills, fifty-cent pieces, and dimes; there are five more fifty-cent pieces than two-dollar bills, and three times as many dimes as two-dollar bills. How many are there of each kind?
 - b. Find two consecutive numbers such that the difference of their squares, plus 5 times the greater number, exceeds 4 times the less number by 27.
3. Factor any two of the three following:
 - a. $(1+n^2)^2 - 4n^2$.
 - b. $x^4 - (x+2)^2$.
 - c. $(x^2-4)^2 - (x+2)^2$.
4. Either one of the following:
 - a. A fox is pursued by a hound, and has a start of 63 of her own leaps. The fox makes four leaps while the hound makes 3; but the hound in 5 leaps goes as far as the fox in 9. How many leaps does each make before the hound catches the fox?
 - b. A merchant increases his capital annually by one third of it, and at the end of each year sets aside \$2,700 for expenses. At the end of three years, after deducting the sum for expenses, he has $1\frac{5}{8}$ of his original capital. Find his original capital.
5. a. In beginning the subject of algebra would you prefer to teach the class the application of the equation

to the solution of easy problems or would you prefer to wait until the subject had been more fully developed? State the reasons for your preference.

- b. How would you develop to a class the use of the minus sign in algebra?

ARITHMETIC.

Select any five questions.

TWENTY CREDITS EACH.

1. By selling a horse for \$150 a dealer gained 20%. Would he have gained or lost had he sold him for \$120? What %?
2. At \$4.50 a cord, what is the value of a pile of wood 60 feet long, 6 feet high, and 4 feet wide?
3. What is the cost of building a railroad 3 m. 37 rd. 2 yd. long, at \$11,000 a mile?
4. If five men can dig 20 rods of ditch in a day, how many men will be required to dig 80 rods in $\frac{4}{5}$ of a day?
5. John and Charles can do a certain piece of work in 5 days, working together; John and James, in 4 days; Charles and James, in 6 days. How long will it take the three, working together, to perform the same work?
6. What is the annual interest of \$450 for 5 yr. 6 mo. 15 da. at $4\frac{1}{2}$ %?
7. How far from the house must the foot of a 25-foot ladder be placed to reach the eaves, 23 feet from the ground?

-
1. a. What number multiplied by $\frac{1}{4}$ of itself equals $6\frac{1}{4}$?
b. A meter is equal to 3 28-100 feet, nearly. Express one foot as the fraction of a meter.
 2. What part of $4\frac{3}{5}$ is $\frac{3.5}{12\frac{8}{9}} \times \frac{6\frac{2}{3} - 4\frac{1}{4}}{\frac{1}{2} \times 4\frac{5}{6}}$?
 3. How much cheaper would it be to pave a street one fourth of a mile long and sixty feet wide with asphalt at twenty-two cents per square foot than to pave it with granite blocks at three dollars and ten cents per square yard?

4. For what sum must a cargo of goods valued at \$12,360 be insured at $1\frac{3}{4}\%$ to cover both property and premium in case of loss?
 5. What is the distance from the lower corner of a room twenty-four feet long, eighteen feet wide, and twelve feet high to the upper opposite corner?
 6. What is the rate per cent per annum when \$712 in three years and four months earns \$142.40?
-

1. The sum of two fractions is $1\frac{1}{2}$, and their difference is $\frac{7}{8}$. Find the fractions.
 2. A person deposits in two banks \$750 and \$1,200, respectively, at the same rate. The latter sum draws \$18 more interest per year than the former. What is the rate per cent?
 3. Make and solve a problem illustrating the application of square root in finding the side of a right-angled triangle.
 4. How many acres of land, in the form of a square, may be inclosed by 160 rods of fence?
 5. What will it cost to plaster the walls and ceiling of a room 18 ft. long, 12 ft. wide, and 9 ft. high, at 40 cents per square yard? How many cords of wood would the above room hold if completely filled?
 6. What sum will amount to \$1,607.39 in 2 years, 5 months, 11 days, at $4\frac{3}{4}\%$, simple interest?
-

1. a. Simplify $\frac{2\frac{3}{4} \text{ of } 5\frac{1}{6}}{7\frac{1}{2}} + \frac{3\frac{1}{2}}{4} \div \frac{1}{2}$.

b. What is the value of $\left(\frac{12-0.6}{2} + \frac{16-0.8}{4} - \frac{17}{2}\right) \div 18\frac{1}{4}$?

2. Any two of the following:
 - a. A man owned a pile of wood containing 40 cords. If it was 4 ft. wide and 8 ft. high, what was its length?
 - b. How many bars of iron, each weighing 41 lb. $10\frac{3}{4}$ oz., will it take to weigh a ton?

- c. How many times will a wheel 12 ft. 4 in. in circumference revolve in going 10 miles?
3. Either of the two following:
 - a. A man bought a house and paid $\frac{1}{3}$ of the price in cash at the time of the purchase. A year afterwards he paid $\frac{1}{3}$ of what then remained unpaid, and the two payments amounted to \$5,260. How much did he pay for the house?
 - b. A boat whose rate of sailing in still water is 14 miles an hour was accelerated $3\frac{1}{2}$ miles per hour in going down stream, and retarded the same distance per hour in coming up. It was five hours longer in coming up a certain distance than in going down. What was the distance?
4. Either of the two following:
 - a. Find the cost of a carpet 27 inches wide, at \$1.60 per lineal yard, for a room 15 ft. long and $13\frac{1}{2}$ feet wide, if the strips run lengthwise. Find the cost if the strips run across the room.
 - b. I sold $\frac{2}{3}$ of my property at a gain of $33\frac{1}{3}\%$, and the rest for $\frac{2}{3}$ of the cost of the whole, receiving in payment a note due in three months, without interest, which I got discounted at a bank, at 6%. What was my gain per cent, if my property was worth \$24,000?
5. a. Supposing a class of pupils to be well grounded in the principles underlying the use of common fractions, state in detail how you would teach such a class percentage.
 - b. Of how much importance do you consider the memorizing of rules in arithmetic by the pupils? Give your reasons.

-
1. Divide the product of 9 times $\frac{2\frac{2}{3}}{2\frac{2}{9}}$ and $\frac{1}{4}$ of $\frac{1}{5}$ by $\frac{4\frac{3}{7}}{5\frac{1}{8}}$
 2. a. A stove manufacturer purchases old iron at \$18.30 per hundred pounds, and makes out of it stoves weighing

125 pounds each, which he sells at $\$15\frac{1}{2}$ apiece. How much does he gain on each 100 pounds of old iron?
Or—

- b.* A carpenter alone can build a shop in 18 days and with the help of his son he can build it in 12 days. In how many days can the son alone build the shop?
3. *a.* A pile of wood 63 feet long, 4 feet wide, and 8 feet high was sold at $\$4.75$ per cord. For how much was it sold? Or—
- b.* How much will it cost to excavate a cellar 35 feet long, 28 feet wide, and 6 feet deep, at $\$0.45$ per cubic yard?
4. A dealer bought flour for $\$900$ cash and sold it immediately for $\$1,080$ on 6 months credit, for which he received a note. If he should get the note discounted at a bank at 6 %, what would be the gain on the flour?
5. Two rafters, each 24 feet long, meet at the ridge of a roof 12 feet above the body of the house. How wide is the house?

ORAL ARITHMETIC.

TWENTY CREDITS EACH.

1. Divide 75 cents among 3 persons, giving the first 9 cents more than each of the others.
2. How many square rods in $\frac{5}{8}$ of an acre?
3. Three eighths of my money taken from $\frac{1}{2}$ of it leaves $\$12$. How much money have I?
4. One third is what per cent of $\frac{1}{2}$?
5. If I pay 30 cents a dozen for oranges, for how much shall I sell them apiece in order to gain 60 per cent?

1. How many square feet are there in the surface of a cube whose dimensions are 3 inches?
2. One third of a certain number is 12 more than $\frac{1}{4}$ of it. What is the number?

3. A and B hired a pasture for \$30. A put in 4 horses for 5 weeks and B 5 horses for 6 weeks. How much ought each to pay?
4. If 3 men or 5 boys can do a piece of work in 20 days, how long will it take 4 men and 10 boys to do it?
5. If goods are sold so that $\frac{5}{7}$ of the cost is received for half the quantity of goods, what is the gain per cent?

DRAWING.

Select three questions, one under each head.

THIRTY-THREE AND ONE THIRD CREDITS EACH.

MECHANICAL.

1. Working drawing of a spool.
2. Development of a cone.

GEOMETRICAL.

1. Construct an ellipse having major and minor axes given.
2. Construct a regular polygon of any number of sides.

FREEHAND (from object).

1. Appearance drawing of a waste basket.
2. Appearance drawing of a chair.

MECHANICAL.

Use rule and compasses.

1. Draw a perpendicular to a given line from the end of that line.
2. Working drawing of chalk box, two views.

FREEHAND.

3. Draw cylinder in two positions: (1) Standing on one of its bases; (2) resting on one of its elements.
4. Draw cube in two positions: (1) When only two faces are seen; (2) when three faces are seen.

MECHANICAL.

Use rule and compasses.

GEOMETRICAL.

1. Inscribe an octagon within a square.

WORKING DRAWING.

2. Draw two views of a spool dimensioned.

APPEARANCE DRAWING—FREEHAND.

3. Draw tumbler half filled with water (from memory).
4. Draw some chair in the room (from object).

GEOMETRICAL.

Use rule and compasses.

1. Construct square.
2. Construct equilateral triangle and inscribe circle within same.

WORKING DRAWINGS.

Use rule and compasses.

1. Two views of hollow cylinder dimensioned.
2. Two views of blackboard eraser dimensioned.

FREEHAND (Memory sketches).

1. Draw two parallel doorways: in one, door opening towards you; in the other, door opening from you.
2. Draw appearance of box with cover partly open.

1. Make drawing of left-hand corner of room.
2. Make working drawing from measurements of the wooden part of your desk—two inches to the foot.
3. *a.* Let fall a perpendicular from any point outside of a straight line, upon that line: or
b. Bisect a given angle.

4. Prove by geometrical construction that the square upon the hypotenuse is equal to the sum of the squares upon the other two sides. Take for the sides of the right-angled triangle, 3 inches, 4 inches, 5 inches.
-

AMERICAN LITERATURE AND COMPOSITION.

Take question 1 and two others.

SIXTEEN AND TWO THIRDS CREDITS EACH.

FIFTY CREDITS FOR COMPOSITION.

1. Outline your plan of presenting Longfellow and his works to children of grammar grades. Indicate what poems you would select, and why, and discuss what profit the children might be expected to receive from this study.
 2. Who wrote "The Chambered Nautilus"? Give the substance of the poem, and point out the moral it conveys. What are some of the author's other works?
 3. Tell the story of "The Great Stone Face." Who is its author? What of his work was done with special reference to children?
 4. Of what kind of life and times does Whittier write? Give quotations or describe any portions of his poems that illustrate this fact.
 5. Give an account of the life portrayed in "The Legend of Sleepy Hollow," with a short account of its author.
 6. Describe the occasion and give the substance, with quotations if possible, of Lincoln's Gettysburg speech.
-

Take question 1 and four others.

TEN CREDITS EACH.

FIFTY CREDITS ON COMPOSITION.

1. What is the educational value of Literature in the common school? Mention some suitable authors and selections for grammar grades. Describe your plan of taking up "Evangeline" with children fourteen years old.

2. Give the general outline of the "Vision of Sir Launfal."
What is the moral lesson to be derived from the poem?
 3. Of what times is Whittier's "Snow Bound" a reproduction? Give sketches of two scenes and two persons in the poem.
 4. Reproduce briefly some selection from the "Sketch Book," noting points that might interest children of grammar grades.
 5. Who wrote "The Chambered Nautilus"? Give the thought of the poem briefly. Tell about the author and his work.
 6. Whom do you consider the greatest American writer of prose? Mention some of his works and describe one.
 7. Give your account of Thoreau's experience with the "Frozen Thawed Apple."
-

ENGLISH GRAMMAR.

Take question 1 and three others.

TWENTY-FIVE CREDITS EACH.

1. Take either *a* or *b*.
 - a*. Prepare an outline of one or more lessons for teaching nouns and their distinctions to a class ten or twelve years old.
 - b*. Discuss briefly what power or advantage the study of grammar is supposed to give.
2. Make sentences containing—
 - a*. An adjective phrase.
 - b*. An adverbial clause of time.
 - c*. An infinitive used as the subject.
 - d*. An adverb modifying another adverb.
 - e*. A co-ordinate and a subordinate conjunction.
3. Name the different classes of pronouns, giving an illustration of each.
4. *Whenever Macbeth threatened to do mischief to anyone, he was sure to keep his word.*
Analyze the above sentence.

5. In the above sentence parse *threatened*, *sure*, *anyone*, *his*.
6. Inflect the future indicative passive of the verb *bring*.
Decline the third personal pronoun.
7. Give rules for the correct use of *shall* and *will*.
8. Make sentences containing—*walk* as a noun, as a verb;
iron as a noun, as an adjective; *fast* as an adjective, as
an adverb.

Take question 6 and three others.

- (1) "For when the noble Cæsar saw him stab
 - (2) Ingratitude, more strong than traitor's arms,
 - (3) Quite vanquished him; then burst his mighty heart,
 - (4) And in his mantle muffling up his face,
 - (5) Even at the base of Pompey's statue,
 - (6) Which all the while ran blood, great Cæsar fell."
1. Analyze, without diagram, from "then burst" to the end
of the selection.
 2. Parse the following words: Line 1, *stab*; line 2, *traitor's*;
line 3, *quite*, *heart*; line 6, *ran*, *blood*.
 3. In the above selection find (a) a temporal clause, (b) an
adjective clause, (c) an adjective phrase, (d) an adverb-
ial phrase. Tell the construction of each.
 4. Give your definition of an adverb, a preposition, and a
conjunction, and show by examples the difference be-
tween each of them and the others.
 5. State the various kinds of subordinate sentences. Why
are they so called, and how are they distinguished?
 6. Discuss the theory of the relation of grammar to spoken
and written language. What is the function or aim
of grammar in the school course?

Answer any four questions.

- (1) This is the ship of pearl, which, poets feign,
- (2) Sails the unshadowed main,—

- (3) The venturous bark that flings
- (4) On the sweet summer wind its purpled wings
- (5) In gulfs enchanted, where the siren sings,
- (6) And the coral reefs lie bare,
- (7) Where the cold sea-maids rise to sun their streaming hair.

—*Oliver Wendell Holmes.*

1. Classify the following clauses: (a) *Which sails* (line 1); (b) *that flings* (line 3); (c) *reefs lie bare* (line 6); (d) *where sea-maids rise* (line 7).
2. Give three modifiers for *flings* (line 3) and two modifiers for *reefs* (line 6).
3. Select (a) three verbs in indicative mood; (b) an infinitive; (c) a participle.
4. Select (a) a relative pronoun; (b) a personal pronoun; (c) an adjective pronoun.
5. Give the syntax of (a) *ship* (line 1); (b) *which* (line 1); (c) *wings* (line 4).
6. a. Write a sentence whose verb is in the active voice.
b. Express the same thought having the verb in the passive voice.
7. Give an example of a sentence whose subject is (a) a clause; (b) an infinitive; (c) a participle.

CIVIL GOVERNMENT.

Answer any five questions.

TWENTY CREDITS EACH.

1. Give the title of the chief executive (a) of the state, (b) of a city.
2. Name two qualifications desirable for a competent office-holder.
3. What vote is required in the United States senate to ratify a treaty?
4. Give the distinction between civil and political rights.
5. What is our greatest safeguard of liberty?
6. What is the prime object of all laws?

7. Name some of the purposes for which money is raised to carry on the government.
 8. How much claim upon an office-holder should a voter have?
 9. State clearly the difference between anarchy and liberty.
 10. How is the office of justice of the Supreme Court of New Hampshire filled? For how long?
-

1. The rise of political parties:
 - a. Principal parties in 1790.
 - b. Differences, and leaders in each.
 - c. Trace principal parties that followed.
 2. United States representatives:
 - a. How elected, number from each state, term?
 - b. What does the Constitution say of the house of representatives in regard to bills for raising revenue, election of president, impeachments?
 3. How may new states be admitted?
 4. Name eight executive officers of the state of New Hampshire.
 5. Do the state legislatures or the congress have power to coin money, to prohibit the sale of liquors, to establish postoffices, to pass laws relative to the education of the youth in any state?
-

1. The city:
 - a. Explain what is meant by its charter.
 - b. Principal officers.
 - c. Give two reasons why a city is divided into wards.
 - d. How is money appropriated for paying a city's expenses?
2. The state of New Hampshire:
 - a. Name five state institutions.
 - b. Term of governor; of legislature.
 - c. By whom are state senators elected? Representatives?

- d.* How many compose the governor's council? How elected? Duties?
 - 3. If the electors fail to elect a president, how is one chosen? Name those who have been so elected.
 - 4. The new Republican party:
 - a.* Its origin and growth.
 - b.* Its first president; five others.
 - c.* Its attitude towards the tariff; the suppression of slavery in the states; Chinese immigration; civil service; the free coinage of silver.
 - 5. What department of our government has power to declare war; to try the impeachment of a governor; to call a special meeting of a legislature; to grant copyrights; to grant titles of nobility?
 - 6. How would you teach local civil government? Would one time be as suitable as another? Explain.
-

- 1. What was the fundamental weakness of the Articles of Confederation?
Who framed the Constitution? When and where?
Name two of the principal compromises of the Constitution.
- 2. What are the constitutional qualifications for a president?
Name three of his powers.
How are treaties made?
- 3. How is a United States senator chosen?
If the electors make no choice for vice-president, how is he chosen?
Name the United States senators from New Hampshire.
- 4. What are the principal duties of a town clerk?
Give a brief account of the business transacted in a New Hampshire town meeting.
What is the difference between a town government and a city government?
- 5. What are two reasons for the existence of the New England county?
How does the county raise money to defray its expenses?

What county officers (*a*) settle estates; (*b*) care for the poor; (*c*) have charge of the county buildings?

HISTORY.

Select five questions.

TWENTY CREDITS EACH.

1. Write briefly on the "Stamp Act."
 2. The battle of Bunker Hill; where; when; its effect.
 3. Sam Adams, John Adams, John Quincy Adams. Write about them.
 4. Name the thirteen original colonies.
 5. Tell what you know about John Paul Jones.
 6. Robert E. Lee, "Stonewall" Jackson, Philip H. Sheridan. Write briefly on each.
-

Answer question 6 and four others.

1. Give a brief sketch of the life of Ulysses S. Grant.
 2. Why was the period from 1783 to 1789 called the critical period in our history?
 3. Why was the doctrine of "state rights" prevalent in the South?
 4. Give the causes of the Revolutionary War.
 5. How, in your opinion, may the condition of the negro be best improved?
 6. Of what ideas were the following men exponents: John C. Calhoun, Daniel Webster, William Lloyd Garrison, Horace Mann?
-

1. The thirteen English colonies:
 - a. Name them.
 - b. Give a brief account of the settlements by the Pilgrims and the Puritans.

- c.* With the settlement of which colonies do you associate the names of Roger Williams, James Oglethorpe, John Winthrop, John Mason?
 2. Give an account of the Lincoln-Douglass debate; name three questions of national importance discussed.
 3. Give a brief sketch of the life and services of Daniel Webster.
 4. Name four great American inventions between 1840 and 1860.
 5. What is the most important object to be obtained by the study of history?
-

1. Andrew Jackson:
 - a.* His career as a general.
 - b.* His election to the presidency.
 - c.* His connection with the "spoils system."
 - d.* His attitude towards nullification and the Bank of the United States.
2. Louisiana:
 - a.* Its extent as claimed by La Salle.
 - b.* Ceded to what nations?
 - c.* Purchase by the United States; extent.
 - d.* Six states within its boundaries.
3. The Civil War:
 - a.* Causes.
 - b.* Relative strength of the North and the South.
 - c.* Explain the "Alabama claims."
 - d.* Results of the war.
4. With what important work do you associate the names of John Ericsson; Marcus Whitman; Louis Agassiz; Harriet Beecher Stowe; Samuel F. B. Morse?
5. Class work in history:
 - a.* How would you direct a class to prepare a lesson in history?
 - b.* How would you conduct a recitation?
 - c.* The comparative value of oral and written work in the study of history.

Select two questions.

FIFTY CREDITS EACH.

1. Slavery in America:
 - a.* Enslaving of the natives.
 - b.* Introduction of negro slavery.
 - c.* Extent and growth before the adoption of the constitution.
 - d.* Growth under the constitution.
 - e.* Discussion and compromises relative to this subject in the constitutional convention.
 - f.* Views of leading statesmen of that time.
 - g.* Slavery legislation.
 - h.* Abolition of slavery in the United States, how? when?
2. Territorial expansion of the United States:
 - a.* Extent and boundaries at the close of the Revolution.
 - b.* Acquisitions of territory since, with the manner and reason of each.
 - c.* Explain the influence of territorial acquisition on the history of slavery, if any.
3. Explain what you understand by the terms "Protection" and "Free Trade"; connection with political and economic history of the United States; what is claimed by the partisans of the opposing theories, as to their advantages?

Name the different statesmen who have advocated these doctrines.

CURRENT TOPICS.

Omit any two questions.

THIRTY-THREE AND ONE THIRD CREDITS EACH.

1. The objects of the federal census.
2. The present condition of export trade of the United States.
3. The labor troubles in some of our large cities.
4. Gold production of the world.
5. Progress of the war in South Africa.

1. The educational policy of the United States in Cuba and Porto Rico.
 2. The war in South Africa.
 3. The present tendency of the drama.
 4. Wireless telegraphy.
 5. The Indian famine.
-

1. The nature of the reciprocity treaties lately made by the United States with some foreign countries.
 2. Results of the international peace conference.
 3. The present status of our war in the Philippines.
 4. Old Home Week.
 5. The Alaskan boundary dispute.
-

1. Present condition of affairs in the Philippine islands.
 2. Some important events lately transpired in Europe.
 3. Act in the interest of education lately passed by the New Hampshire legislature.
 4. The present condition of affairs in the West Indies.
 5. The administration of the commissary department in the Spanish-American War.
-

1. Events and heroic figures in the Spanish-American War.
2. Present status of peace negotiations between United States and Spain.
3. The part taken in the late war by (a) local, by (b) national philanthropic associations.
4. The lives, character, and work of two European statesmen, lately deceased.
5. Discuss two topics of current interest with which you are familiar, other than those mentioned.

PHYSIOLOGY.

Answer any three of the first six, and the last.

TWENTY-FIVE CREDITS EACH.

1. State clearly the difference between the two modes of living, "Artificial" and "Natural." Give additional reasons why the former is necessary.
2.
 - a. Spinal cord, functions?
 - b. Ganglia, what are they? Office?
3. The heart.
 - a. External structure.
 - b. Internal structure.
 - c. Work and rest of the heart.
4. Breathing.
 - a. Give three ways in which the nasal passages are peculiarly fitted for introducing air into the lungs.
 - b. How can respiration be controlled?
5. The skin.
 - a. Functions, five in all.
 - b. Ways of giving off heat, four in all.
6. Food.
 - a. Name six kinds of food stuffs.
 - b. What are proteids? Uses?
 - c. What are fats? Uses?
7. Ventilation, dust, heating.
 - a. Draw a diagram showing the direction of warmed pure air when properly admitted to a room and properly exhausted.
 - b. Explain the difference between *direct* and *indirect* heating.
 - c. Name some sources of dust.
 - d. Relative value of dusting with a cloth and a duster.

Answer any six questions.

SIXTEEN AND TWO THIRDS CREDITS EACH.

1. What method would you employ to illustrate the working of the lungs? Explain carefully.

2. Draw a diagram of the windpipe and bronchial tubes.
 3. What is the purpose of breathing?
 4. What evils result from the inordinate use of coffee and tea?
 5. Describe the effects of alcohol upon the nervous system.
 6. Write briefly concerning the spread of contagious diseases on the "germ" theory.
 7. What tests would you make of the eyesight of your pupils so as to feel competent to instruct the parents regarding it?
 8. Draw a diagram of the eye, showing its different parts clearly.
 9. Show by diagram the cause of nearsightedness and farsightedness.
 10. State six cautions regarding the general preservation of health.
-

1. *a.* Name four things to be considered in selecting food for a person.
b. Name four health cautions in regard to eating.
2. *a.* Explain how carbonic acid is freed from the blood by means of breathing.
b. What are tissues? Give examples.
3. *a.* How is digestion aided (three ways)?
b. Give five cautions in regard to preserving the general health.
4. *a.* Draw a diagram of a tooth, showing its different parts.
b. What are ganglia? Nerve fibers?
5. *a.* Draw a diagram of the heart, showing its different parts.
b. Name five things that impair the power of the brain.
6. *a.* Of what is a bone composed?
b. Give the use of the bones.
7. *a.* Draw a diagram of the ear, showing its different parts.
b. Name two kinds of nerves.

8. *a.* Name the organs of the nervous system.
b. Name the agents by which blood is purified.
-
1. Name the divisions of the ear.
Name the two principal divisions of the middle ear.
What is the function of the outer ear?
Name three things that have an injurious effect upon the
outer ear.
How does the air move into and out of the drum of the
ear?
 2. Name the four parts of the eye through which the light
passes.
Name the *coats* of the eye.
Describe the *cornea*.
 3. Write briefly about the effects of worry upon the nerves.
Write briefly about the effects of regular hours of rising
and retiring upon the nerves.
 4. Name the parts of the skin.
Name four uses of the skin.
Give two reasons why the skin should be kept clean.
What should be the temperature of a bath in degrees?
 5. Name five rules which should govern the exercising of
the muscles.
Name two classes of muscles.
How would you proceed to stop a wound from bleeding?
 6. How large is the heart?
Name the chambers or divisions of the heart.
What organs carry the blood from the heart?
What organs carry the blood to the heart?
Name the two parts of the blood.
What are corpuscles?
-

GEOGRAPHY.

Omit any one of the first three questions.

TWENTY CREDITS EACH.

1. Give the latitude of the Tropic of Capricorn and of the
Arctic Circle, and tell how the location of each is
determined.

2. Locate the following cities and tell for what each is noted:
(a) Lyons, (b) Minneapolis, (c) Para, (d) Nome City,
(e) Pretoria, (f) Melbourne.
 3. What are geysers? Locate two important geyser regions.
 4. Draw an outline map of New Hampshire and locate on it the Merrimack river, the White Mountains, and its five chief cities.
 5. Do you consider a "sand table" a desirable thing in teaching geography? If so, what use would you make of it?
 6. What means would you take to make clear to a class the meaning of "water-shed" and "river-basin"?
-

Answer questions 9 and 10 and four others.

SIXTEEN AND TWO THIRDS CREDITS EACH.

1. Name the cities of New Hampshire and the county in which each is situated.
2. Name the largest five cities of the United States; the state in which each is situated; give reasons for the growth of each.
3. In what state does the Mississippi river rise? What the difference in climate and products at its source and mouth?
4. Where is Nicaragua, and what gives it such prominence geographically?
5. What nation has the largest territory, and what is being done for its development?
6. Where are the Aleutian islands; to what country do they belong, and for what are they valuable?
7. What is the largest city of Germany? Its most noted river? Its chief seaport?
8. A ship sails from Liverpool to a South American port, thence to Philadelphia, thence back to Liverpool; what would be its probable cargoes between the several ports?
9. What is the object of the study of geography, and how is that object best attained?

10. To what extent would you make use of map drawing, and what do you consider the special value of such work?
-

Answer questions 7 and 8 and four others.

1. How are the positions of the equator, tropics, and Arctic circle determined?
 2. Compare the Philippine and West India islands as to location with respect to the equator, climate, products, and people.
 3. Name consecutively the bodies of water which one would pass over in going from New York to Manila, sailing eastward.
 4. Give the capital and the largest city of each of the New England states.
 5. Locate the following islands: Madagascar, St. Helena, Nova Zembla, Falkland, and Vancouver.
 6. What country is noted for (a) coffee; (b) tea; (c) spices; (d) cotton; (e) wool; (f) tobacco?
 7. Outline a lesson on the Merrimack river, and show how you would make it interesting to a class.
 8. Mention three topics which can best be taught by the use of a globe, and describe a method of presenting one such topic.
-

Answer questions 4 and 5 and two others.

TWENTY-FIVE CREDITS EACH.

1. Explain fully the causes of the changes of seasons.
2. (Answer two questions):
 - a. What factors determine the adaptability of a country to civilization? Give examples to illustrate.
 - b. Describe the physical features of Africa.
 - c. State the principal types of plains, according to their method of formation.
3. (Answer two questions):

- a. Draw a sketch map of New Hampshire.
 - b. In which part of the United States is the most manufacturing carried on, and why?
 - c. Give an account of the people, government, and productions of France.
4. Give an outline, quite fully, of a series of lessons on the geography of your town.
 5. Discuss the function of geography in a school course of study, and state how, in your opinion, this function can best be attained.
-

PHYSICS.

Answer four questions, including 5 or 6.

TWENTY-FIVE CREDITS EACH.

1. Define density, adhesion, potential energy, dew-point, calory.
 2. State as many physical principles as you can think of which are illustrated in the construction of the bicycle.
 3. Why is an ice-pitcher in warm weather covered with drops of water? When those drops are very large and abundant, what sort of weather is likely to ensue, and why?
 4. A plank 12 feet long, and weighing 24 pounds, is supported by two trestles, one 3 feet from one end and the other 1 foot from the other end. How much weight rests on each trestle?
 5. What preparation should be made in the work of the previous grades for the proper study of physics in the high school?
 6. Give an outline of a lesson (with experiments to be performed by the pupil) on the thermometer.
-

THIRTY-THREE AND ONE THIRD CREDITS EACH.

1. Omit one of the following lettered questions:
 - a. State the best argument that you can think of for the molecular theory of the constitution of matter.

- b.* Give the formulas for the acceleration and the distance of a falling body, and calculate the height of a perpendicular cliff down which a stone, if dropped, will fall in three seconds.
 - c.* Why does a heated body cool when placed in a vacuum? Will it cool faster or slower when placed in air than when in a vacuum, and why? In water?
 - d.* In supplying water to towns, it is now very common to pump the water up from its source to a small reservoir or standpipe on the top of some hill, whence it is distributed through the mains to the users. Explain the reason for this.
 - 2. Select some object in view in the examination room which illustrates the operation of one or more physical principles, and explain those principles as so illustrated.
 - 3. At what stage should the study of physics be introduced into the school work? Should all pupils pursue this study, and why? How should it be taught at this stage?
-

Answer four questions including 5 or 6.

TWENTY-FIVE CREDITS EACH.

- 1. Explain, according to the molecular theory of the constitution of matter, why the evaporation of a liquid lowers its temperature.
- 2. Tell what you can of the new invention, liquid air, and its uses.
- 3.
 - a.* Why does a pendulum continue to swing against gravity after the bob has reached its lowest point?
 - b.* Why is mercury generally used in the construction of the thermometer?
- 4.
 - a.* A bucket of water weighing 40 pounds is to be raised from a well by means of a rope coiling about a drum which ~~is~~ worked by a crank. The diameter of the drum is 6 inches; the length of the crank, 15 inches. What force will be required to raise the bucket?

- b.* A piece of glass weighs 24 grams in air, and 16 grams in water. Find its volume and specific gravity.
 5. Write an outline of a class lesson on the three states of water.
 6. Your pupils come to school in a pouring rain. State the precautions that you will take on behalf of their health and comfort, and the physical principles that underlie those precautions.
-

1. Explain the molecular difference between the three states of matter.
 2.
 - a.* Why does a person carrying a heavy pail of water throw out the opposite arm?
 - b.* A body at the earth's surface weighs 200 pounds. What would it weigh at a point in space 8,000 miles from the earth's surface?
 3. What physical principles are illustrated by a person riding a bicycle?
 4.
 - a.* Why does a blacksmith heat a wagon tire before putting it on a wheel?
 - b.* Mention three circumstances affecting rapidity of evaporation.
 5. A schoolroom has no means of ventilation except that afforded by its door and windows, and is heated by a wood stove. What inexpensive means could you suggest of improving the ventilation, without producing draughts from door or windows, and at the same time of maintaining an even distribution of heat in the room? Illustrate your answer with diagrams.
 6. Write, very fully, an outline of a class lesson on levers.
-

BOTANY.

THIRTY-THREE AND ONE THIRD CREDITS EACH.

1. (Answer three):
 - a.* Write an outline classification of the vegetable kingdom.

- b. Describe in detail the parts of a leaf and their uses.
- c. In what forms, and in what organs, do plants store food?
- d. Explain in what ways insects are useful to plants.
2. Analyze, sketch, and describe the specimen given you for that purpose.
3. Write an outline of a class lesson on roots.

MUSIC.

TWENTY CREDITS EACH.

1. Give the pitch or letter names, and the Italian syllables of the following exercises:

2. State briefly why vocal music should be taught in the public schools.
3. In what keys are the above exercises written? Why are they so named?
4. Insert the proper rests in this exercise:

5. How would you teach pupils to sing in an ungraded school?

Answer six questions.

SIXTEEN AND TWO THIRDS CREDITS EACH.

1. What effect upon a tone has a sharp? a flat? a natural?
2. Explain what is meant by the meter or time signature $\frac{3}{4}$.
3. From what fact does a key take its name? How would you teach pupils to distinguish the different keys?
4. Using the key signature one flat, draw a staff and write the scale.

5. In what grades should rote singing be used? Why?
6. In teaching vocal music in the upper grades, how much would you use the piano? Give reasons.
7. Compare vocal music with drawing as a means of training to habits of attention.

-
1.
 - a. How would you make good tone production habitual with children? What part should voice culture play in a course of school music?
 - b. What is the advantage of the rote song? What constitutes a good one?
 - c. What are the essentials in good part singing? What governs you in selecting voices to sing a part?
 2. (Select *a* or *b*):
 - a. Write in the treble clef and again in the bass clef the signatures of the following major keys, and state for what minor keys they stand: G, B flat, C, A, E flat. (Select two.)
 - b. Write in the treble clef one octave of the major scales of F and A, placing the necessary sharps or flats before the notes, and *not* as a signature.
 3. (Select *a* or *b*):
 - a. Add one rest at the end to complete each of the following:

- b. Write under each of the following rests its equivalent note:

APPOINTMENTS OF SUPERINTENDENT, 1899.

Friday, January 6. Dunbarton, "Rural School Problem."

Saturday, January 7. Boston, American Institute, meeting of directors.

Thursday, January 12. Concord, Normal School trustees, forenoon; Canterbury, "Educational Problem of New Hampshire," evening.

Thursday, January 19. Committees on education visit the Normal School.

Friday, January 20. Normal School graduation, Plymouth.

Wednesday, January 25. Address to members of the legislature, evening.

Saturday, January 28. Office of Board of Agriculture, talk to grange deputies, "Pending Educational Legislation."

Monday, January 30. Dover, Mr. Abbott and Dr. Gordon of Maine regarding summer schools.

Tuesday, January 31. Agricultural College, committee on education.

Friday, February 3. Ashland, institute, evening lecture, "The Citizens and the Schools."

Saturday, February 4. Dover Grange, evening, "How to Equalize School Privileges."

Monday, February 6. Franklin Falls, Merrimack County Pomona Grange, "Means of Equalizing School Privileges."

Tuesday, February 7. Manchester, Amoskeag Grange, "Means of Equalizing School Privileges."

Thursday, February 9. North Conway, Farmers' Institute, "Educational Problem in New Hampshire."

Friday, February 10. Dover, Strafford County Teachers' Association, "Pending Educational Legislation"; evening, Somersworth Grange, "An Act to Equalize School Privileges."

Saturday, February 11. Concord, Merrimack Valley Teachers' Association, "Proposed Educational Legislation."

Thursday, February 23. Lancaster, Coös County Association.

Friday, February 24. Lancaster, Coös County Association.

Saturday, February 25. Winnepesaukee Teachers' Association, forenoon, "Proposed Educational Legislation."

Tuesday, February 28. Mont Vernon, "The Rural School Problem."

Friday, March 10. Littleton, West Grafton Association.

Friday, March 31. State examination, Concord.

Saturday, April 1. Concord, state teachers' examination; evening, Dover Grange, "Mission of the Grange."

Tuesday, April 4. Normal School trustees.

Wednesday, April 5. Milford, "New Hampshire's Educational Problem."

Friday, April 14. Portsmouth, Rockingham County Teachers' Association.

Saturday, April 15. Newmarket, school meeting.

Thursday, April 20. Warner, Teachers' Institute, evening lecture.

Friday, April 21. Warner, Teachers' Institute.

Monday, April 24. Dover Relief Corps, evening, "The Citizen and the School."

Wednesday, April 26. Meredith, Teachers' Institute.

Friday, April 28. Concord, High School Teachers' Institute.

Saturday, April 29. Concord, High School Teachers' Institute.

Tuesday, May 2. Enfield, Teachers' Institute.

Wednesday, May 3. Enfield, Teachers' Institute.

Thursday, May 4. Plymouth, Normal School.

Friday, May 5. Connecticut Valley Teachers' Association, "The Ungraded Schools," Newport.

Saturday, May 6. Nashua, Merrimack Valley Teachers' Association.

Monday, May 8. Strafford County Association and Institute, Salmon Falls.

Tuesday, May 9. Acworth, evening, "Our Educational Condition."

Wednesday, May 10. Acworth, institute.

Friday, May 12. Association of principals of academies, "The Relation of Public to Private Instruction."

Monday, May 15. Sandwich, evening lecture.

Tuesday, May 16. Sandwich, Teachers' Institute.

Wednesday, May 17. Wolfeborough, Teachers' Institute.

Wednesday, May 17. Wolfeborough, evening lecture, "Educational Conditions in New Hampshire."

Thursday, May 18. Marlborough, Teachers' Institute, evening lecture.

Friday, May 19. Marlborough, Teachers' Institute.

Tuesday, May 23. Winnepesaukee Teachers' Association, Laconia.

Wednesday, May 24. Henniker, Teachers' Association.

Friday, May 26. Colebrook, address, evening, "What Shall the State do for Its Schools?"

Tuesday, June 13. Plymouth, committee on teachers, Normal School.

Wednesday, June 14. Plymouth, Normal School.

Thursday, June 15. Boston, to consider plans for Normal School.

Friday, June 16. Francestown.

Tuesday, June 20. Medical examination.

Wednesday, June 21. Medical examination.

Physiology in the Schools: Prof. LaRoy Griffin, one period.

Influence of Parents on the Schools: Prin. F. W. Burrill, one period.

Moral Effect of an Attractive School Building: Dr. A. H. Campbell, one period.

EVENING LECTURES.

The State and the Public Schools: Superintendent Folsom, one period.

Duty of the State to Public Education, Superintendent Folsom, two periods.

The Citizen and the Schools: Superintendent Folsom, one period.

Equal Education in New England: Secretary W. Scott, one period.

Our Educational Condition: Superintendent Folsom, seven periods.

Our Educational Problem and Its Solution: Superintendent Folsom, one period.

The Common School and the Community, State Supt. W. W. Stetson of Maine, one period.

HIGH SCHOOL TEACHERS' INSTITUTE, HELD AT HIGH SCHOOL BUILDING, CONCORD.

Friday and Saturday, April 28 and 29, 1899.

PROGRAM.

Friday Morning.

- 11.00. "Manual Training in High Schools." Superintendent Charles H. Morss, Medford, Mass.

Afternoon.

- 1.45. "Commercial Course in High Schools—Its Value." Principal Robert M. Brown, Portsmouth.

"What Kind of a Commercial Course is of Most Value?" Superintendent William N. Cragin, Rochester.

"Experience with Commercial Course." Principal Hoyt H. Tucker, Laconia.

Discussion opened by Principal Alfred C Faye, Dover.

- 2.45. "Should our Small High Schools attempt to prepare Pupils for College?" Professor Charles D Adams, Dartmouth College.

Discussion.

- 3.30. "Duty as a Motive to Study." Principal Lemuel S. Hastings, Nashua.
- 4.15. "Study of History in High Schools and the New College Entrance Requirements." Professor Herbert D. Foster, Dartmouth College.
- 8.00. Evening lecture in Representatives' Hall, state house.
"Correlation of Physical Training and Public Education."
W. Scott, secretary New England Education League.
- 9.00. Meeting of Educational Council of New Hampshire.

Saturday Morning.

- 9.00. "College Entrance Requirements in English." Professor Fred P. Emery, Dartmouth College.
- 10.00. "The Library as an aid to High School Work." Hiller C. Wellman, Brookline, Mass.
- 11.00. "Secondary Education as Applied to Vocations." James P. Munroe, Esq., Boston.

The following topics were proposed for consideration, and a general discussion of all topics on the program was invited:

- One or two sessions daily for high school.
- Sight reading in Latin.
- Do too many pupils attend the high school?
- Place of the stereopticon in high school instruction.
- To what extent should mathematics be required?
- The province of punishments in high school discipline.
- Does the high school give the right preparation for a business life?
- To what extent should the grammar school course be "enriched" by introducing studies from the high school?

GENERAL SUGGESTIONS.

STATISTICS.

The carelessness of school boards in compiling the annual statistics has for many years rendered some items of the state report very unreliable. The law of 1899 remedied the trouble to some degree by inflicting an immediate penalty for failure to make the proper returns.

CHAPTER 77 OF LAWS OF 1899.

“SECT. 7. No town shall receive any benefit under this act, nor any portion of the literary fund unless its returns have been made to the superintendent of public instruction as required by chapter 92, section 13, of the Public Statutes.”

This provision has enabled the superintendent to insist upon apparent accuracy.

No report has been accepted unless the questions asked on the blank were all answered, nor unless the answers were consistent with each other.

It may safely be asserted that the statistics contained in this report approximate more closely to truth than any that this department has heretofore presented.

In 1899 Somersworth failed to comply with the provisions of the law, and received no share of the literary fund.

It has been necessary to obtain corrections or amendments to the reports of one hundred thirty-six (136) towns, this number bearing evidence of incorrectness on their face. The corrected reports were not all received till September 27.

Under these conditions the difficulty experienced by the superintendent of public instruction in complying with the law which requires him to have his report in the hands of the state printer October 1 will be readily understood.

A study of the following table of statistics, as reported during the last ten years, will convince one of the probability of inaccurate reports at some time.

SCHOOL REGISTERS.

It is a common thing for school boards to shift the blame for inaccurate or incomplete returns upon the teachers by claiming that the school registers are not properly kept. No doubt this is true. Teachers *do* keep their registers at home instead of in the schoolroom, their proper place; they *do* make them up at the close of the term instead of daily as they should; they *do* neglect to fill many of the blanks; they *do* carry the registers out of town with them or lose them, and the school board never sees them; they *do* draw their full pay regardless of the condition of the registers. All these complaints are made by school boards, and I have full confidence that they all are well founded.

But the supervision of the schools is in the hands of the school boards, and carelessly kept registers are an indication of careless supervision. The law requires school boards to distribute the registers at the beginning of the school year, and to take charge of them at the end of every term.

The following extracts from the Public Statutes are plain and explicit:

CHAPTER 98, PUBLIC STATUTES.

"SECT. 10. They [the school board] shall furnish to every teacher one of the blank registers provided by the superintendent of public instruction, and shall visit and examine each school in their district at least twice in each term, once near the beginning, and once near the close thereof.

"SECT. 11. Every teacher shall make the entries in the register required by the superintendent of public instruction, and at the close of the term shall return the register to the school board. Twenty dollars of the wages of every teacher shall be withheld until he has made such return.

"SECT. 13. School boards shall, on or before the first day of August in each year, send to the superintendent of public instruction copies of their annual reports and answers to the questions proposed by him, relating to the schools in their district; the school year shall begin with the fall term.

"SECT. 14. Any member of a school board who shall neglect or refuse to comply with the provisions of the preceding section shall be fined not exceeding fifty dollars."

CHAPTER 77, SESSION LAWS OF 1899.

"SECT. 7. No town shall receive any benefit under this act nor any portion of the literary fund unless its returns have been made to the superintendent of public instruction as required by chapter 92, section 13, of the Public Statutes, nor unless its schools have been maintained at least twenty weeks during the school year next preceding; *provided, however*, that the requirement of twenty weeks of school shall not operate for the school year ending August, 1899."

The statute requires a visit from the board to every school twice during each term. If, at every one of these official visits, the visitor would insist upon seeing the register, make a careful inspection of it, require all blanks to be filled at the proper time, and refuse to pay the teacher at the end of the term unless the register was returned properly made out, the complaints about poorly kept registers would soon cease. School boards have the remedy in their own hands. **Let** them apply it.

PRIVATE SCHOOL REGISTRATION.

The parochial schools and many of the academies receive pupils of school age. No returns from private institutions are required by the state. The figures given in the statistical tables are generally based upon estimates made by the local public school officials. Inasmuch as the state requires a certain attendance of every child during the year, it seems that legislation should be enacted requiring all private institutions receiving New Hampshire pupils under sixteen years of age, to keep the attendance of such pupils in the public school register, and to make returns to the state annually.

EQUALIZATION OF SCHOOL PRIVILEGES.

The law of 1885, establishing the town system of schools in place of the district, had for its primary object the equalization

of school privileges within the limits of each town. Under the district plan, it was not unusual for the village district of a town to maintain its schools from thirty to thirty-six weeks during the year, while within the limits of the same town, some rural district maintained its schools but ten or twelve weeks; the village district, with its accumulated wealth and compact population, pointing with pride to a well-appointed, well-equipped, well-built schoolhouse, while the educational headquarters in the rural district would compare unfavorably with the farmer's stables.

The town system was intended to remedy this inequality of school privileges existing between the rural and village sections of the same town.

Chapter 89, section 1, of the Public Statutes provides that,—

“Each town shall constitute a single school district for school purposes; *provided, however*, that districts organized under special acts of the legislature may retain their present organization.”

The provision in regard to special districts defeats the purpose of the law in twenty-seven towns and cities. This exemption is contrary to the spirit of the law and results to the injury of the rural sections of the towns affected.

The special district is an inconsistency that should no longer be allowed to exist. If a majority of the towns find it best for their educational interests to support all the schools within their respective limits, the small minority now excepted by law would presumably find it equally well to do likewise.

Horace Mann said, “I consider the law of 1789, authorizing towns to divide themselves into districts, the most unfortunate law on the subject of common schools ever enacted in the state.” —Tenth report of the secretary of the Board of Education for Massachusetts, page 130.

There are a few towns whose school boards do not appear to be able to understand and apply the spirit of the law.

PUBLIC STATUTES, CHAPTER 92.

“SECT. 1. The school board of every district shall provide schools at such places within the district, and at such times

in each year, as will best subserve the interests of education, and will give to all scholars of the district as nearly equal advantages as may be practicable. They may use a portion of the school money, not exceeding twenty-five per cent, for the purpose of conveying scholars to and from schools."

It is a violation of the spirit and the letter of the law to maintain village schools one third longer during the year than rural schools. Nor is it a defense of the practice to assert that the rural schools are smaller. Ten children are entitled to as good instruction, as good equipment, as long school as are twenty or thirty children. A denial of these is not giving to all "scholars of the district as nearly equal advantages as may be practicable." School boards should remember that the responsibility is upon them to see that justice is done to the rural sections of their several towns, and that the excess of taxable property in one portion of the town does not entitle its inhabitants to any greater school privileges at public expense than are enjoyed by the less wealthy portions of the town.

This brings us naturally to a consideration of the question of conveying scholars to and from schools at public expense. The school board is a court of last resort in deciding what schoolhouses shall be used for school purposes. If this power is used arbitrarily it may do more injury than the best schools can counteract; if used tactfully, if pains be taken, before discontinuing the use of a schoolhouse, to show the parents that the children will be benefited by the proposed course, the prompt closing of a large number of schoolhouses and the conveyance of the children to other buildings would undoubtedly result to the educational advantage of the state.

It is unquestionably true that children can be better taught in schools of medium size than in extremely small ones. It is poor economy, both educationally and financially, to conduct a school of four or five pupils, when another school exists within two or three miles to which the children may be conveyed. The only exception to be admitted in applying this principle should be caused by the inconvenience of sending very young children of different families away for the entire day,

when there are no older members of their respective families to care for them during the noon intermission.

The law requires that children of all parts of the district shall be furnished with "equal school privileges, as far as practicable." It is manifestly impossible under any system that all should live at equal distance from a schoolhouse. The framers and enactors of the law provided against a too long walk for children by allowing the school board to expend twenty-five per cent of the appropriation for schools in transportation. The district has no right to vote that no money shall be expended for this purpose, and such a vote in the district meeting has absolutely no binding force upon the school board. The law commits the matter entirely to its discretion, and the district may not give instructions.

The objections usually urged by the residents of rural sections against public conveyance in lieu of a local school are,—

1. That the closing of the local school tends to the depreciation of farm property.

The public school was not established, nor is it demanded, by our state laws for the purpose of enhancing the value of property in the vicinity of the schoolhouse.

As evidence of this alleged fact the objectors point to the abandoned farms and cite the small number of children in many towns where the system of conveyance prevails. Such people are disingenuous or ignorant. A study of conditions for the last fifty years would show the confusion of cause and effect. A schoolhouse on every farm would not repopulate the rural sections of our state. If this repopulation ever comes, it will be due to different influences than those of the small rural school.

Much of the opposition based upon this objection is probably really due to the conservatism of our rural population manifesting itself in opposing the full fruition of the town system.

When it is shown, however, that transportation has in many sections tended to build up the rural sections of the town; that under this plan the number of families sending children to school and the number of children attending school have steadily increased since transportation has been substituted for the

local school, this objection loses what little weight it ever had as an argument.

2. It is said that a ride of several miles every day to and from school is too hard for children.

In reply to this it may be said that it is easier for child or adult to ride three miles than to walk one, and that, in stormy or cold weather, the ride entails less discomfort and subjects the rider to less exposure than falls to the lot of the pedestrian.

Records show that punctuality and regularity of attendance have been materially increased by a well-appointed system of transportation. An actual comparison of school registers proves that some children have attended school twice as much during a school year when carried in a comfortable conveyance to a distant school as the same children did when attending their local school.

If a contract for conveyance is made by the school board with some person other than the parent of the children, the responsibility rests with the board to see to the proper character of the driver, the team, and the vehicle.

3. It is objected, generally by people living in close proximity to the local schoolhouse, that children, particularly very young ones, should not be sent away from parental care for the entire day.

This is the objection of the most weight among those usually urged against conveyance. Care should be taken by school boards to guard against evils that may arise under this head. When children of the rural sections are gathered in the village schools, a matron should be employed by the board to take charge during the teacher's absence at the noon intermission. This is demanded by the welfare of the school and protection of school property, as well as for the care of the children. Pupils remaining at noon should be as absolutely in charge of the matron during the intermission as they are in charge of the teacher during the school; their moral and physical well-being demand this. They should not be allowed to roam about the streets at will, but should be required to remain upon the school premises unless a written request is received from their parents for different treatment.

When this course is not practicable, teachers must be impressed with their responsibility for a proper control during the noon hour.

The advantages to be obtained from discontinuing small schools and conveying children at the expense of the district are,—

1. Economy.

Transportation can be performed, usually, at less expense than a *good* teacher can be employed, and the money thus saved may be applied to making the enlarged school better in furnishings, in equipment, in teaching.

2. Better teachers and equipment.

The best teachers cannot be induced to accept positions in the three-scholar or the five-scholar schools, even when public sentiment allows the school board to seek for them with the offer of sufficient salary. The doctrine prevails that "anybody can teach" the small school. This theory places the small rural school in charge of untrained, inexperienced teachers, many of them of small scholastic acquirement and no professional ambition, who "keep school" until it is "the turn" of some other local favorite of the same kind. Consolidation enables the board to pay better wages and hence to employ better teachers.

3. Better supervision.

Consolidation, by lessening the number of schools to be visited, enables the supervisor, school board, or superintendent, to make more frequent visits and to get into closer touch with pupil and teacher.

4. Regularity of pupils' attendance.

With a comfortable and regular conveyance, the weather, temperature, and bad roads cease to be important factors in causing absenteeism.

5. Better educational spirit.

The pupil of the small school lacks that emulation and competition so essentially necessary to progress, which will be afforded by contact with a larger number of children. This is true even when the teachers are equally competent. It has

double weight when we consider that the better teachers are almost uniformly in charge of the larger schools.

In March, 1900, a letter of inquiry containing the following questions was sent to every school board in the state:

1. What per cent of money appropriated for schools is used for conveying scholars to and from schools, under authority granted by chapter 92, section 1, of the Public Statutes?
2. What is the least distance that any scholar is conveyed at public expense in your town?
3. The greatest distance?
4. Have you any rule or regulation governing amount to be paid or distance of conveyance; or do you deal with individual cases according to circumstances? State your regulation, if any.
5. How does the cost, to the district, of conveyance compare with that of maintaining local schools?
6. What are the advantages of conveyance?
7. Advantages of the local schools?
8. In your opinion, would a more general adoption of public conveyance result to the educational advantage of the state?
9. How do the people of your town generally view the matter?

The answers to questions 1, 2, 3, 4, 5, 8, and 9 are here tabulated:

The following verbatim extracts from answers to questions 4, 5, 6, 7, 8, and 9 are made to show the trend of opinion among members of school boards and communities:

Question 4. Have you any rule or regulation governing amount to be paid or distance of conveyance; or do you deal with individual cases according to circumstances?

"We pay five cents a mile each way for distance over one and one half miles."

"Six cents per mile for all distances over one and one half miles and less than two miles; eight cents per mile for two miles and less than two and one half miles; ten cents per mile for two and one half and less than three miles; twelve and one half cents per mile for three miles and over, for each scholar conveyed to and from school, the attendance to be shown and settlement made by the school register at close of term."

"We recognize no demand for carriage if distance is less than two miles, but the rule is not arbitrary."

"The Cheshire County Convention of School Boards thought five cents per mile in excess of two miles was fair pay, and we shall probably pay at that rate if we are called upon for payment, but we have no scholars to convey now unless we can consolidate the schools, which ought to be done."

"Two and one half cents per mile each way, based upon actual attendance, and in some cases special arrangement. No iron-clad rule."

"We pay ten cents a mile."

"Do not usually pay for transporting under two miles. A few special cases."

"Our custom for the last few years has been to pay five cents per mile each way for each scholar living at any distance over one and one half miles from the school, and they furnish their own conveyance. In some cases it is advisable to pay a little more than named."

"Usually about twenty-five cents per day has been allowed to the parents for conveyance."

"The scholars are carried by the lowest bidder."

"The town decided the rate of mileage, which is four cents, going and coming to school; so the scholar that lives three miles from school is paid six cents in coming and six cents on returning, making twelve cents per day."

"Have heretofore paid fifty cents per scholar per week. The town voted at the last annual meeting to pay four cents a mile for distance over one and one half miles, distance reckoned both ways."

"We tried a mileage system, allowing three cents per mile each way for distance traveled beyond one and one half miles, but found we could not follow it in all cases, so we follow it in part, and for the rest we make the best trade for conveyance we can, according to circumstances."

Question 5. How does the cost, to the district, of conveyance compare with that of maintaining local schools?

"It costs about $33\frac{1}{3}$ per cent of the expense of maintaining those schools which are discontinued on account of such conveyance."

"There are several old school districts in this town where there are only two or three scholars in each. We find it much cheaper to carry those scholars to the adjoining school."

"It costs about \$170 a year to maintain a school in the outside districts. We have conveyed from three to five scholars at an expense of \$69 for the year."

"As far as we have gone, the cost of conveyance has not been more than one third that of maintaining a school."

"It costs about one half as much to convey."

"Much less, being about one half."

"Conveyance in nearly all cases costs less than half the expense of maintaining schools."

"It costs not quite one half as much to convey the scholars as it would to maintain a school."

"From one third to one fourth the cost of a school."

"Should say as a rule it would be less than one half. Some years ago we consolidated two schools for a term, carrying the scholars of one school at an expense of about 40 per cent of cost of running a school."

Question 6. What are the advantages of conveyance?

"Pupils in small ungraded schools are placed in competition with pupils in graded classes of from thirty to forty-five pupils, thus stimulating them to greater effort."

"Economy in expenditure, more interesting schools, enlarging and extending the general knowledge of the child by association with more children, from whom they learn as readily as from their elders."

"Better schools, better teachers, greater inspiration for the scholars."

"The scholars get benefits of graded schools."

"Better interest, improved methods and facilities, more experienced and better teaching force."

"Less cost, better interest on the part of the pupils than in very small schools, more money to lengthen schools."

"It assembles more scholars together, thus causing more competition in scholarship; costs less, when there are but few scholars; can give them better instructors; more weeks of schooling generally."

"In our case, better school privileges. In general, one school of twenty-five scholars is better than three of eight or two of twelve."

"It gives more weeks of schooling. Two of our schools are quite small, there being only one pupil in many of the classes. We think they do not have the ambition to try to advance as they do in larger schools."

"Many of our schools, if we did not close them, would have only one or two scholars, consequently conveyance saves money and gives us more weeks of school."

"Better teachers, more interesting schools, less money expended for wood and repairs on schoolhouse."

"Larger schools and more interest."

"More interest in larger classes in the combined schools. Scholars benefited by contact with larger number of their fellows."

"Have larger and better graded schools and a higher grade of teachers better paid. A school of six pupils and a five-dollar teacher is no school."

"Better schools, better teachers, more interest taken by the pupils."

"It gives us thirty weeks of school each year, for the past four years, against nineteen when they were not conveyed, and better instruction in the school to which they are sent."

"We have some local schools with only two, three, or five scholars in them. The advantage is in making larger schools and more interest with better teachers, consequently a better education."

"The child has more incentive to work in larger schools, takes less fuel, saves janitors' fees, provides a small salary to some needy farmer for carrying, and the child will attend more regularly."

"Scholars can have better advantages for acquiring an education in schools that are graded than they can in the ungraded district school."

"We get better attendance."

"Putting the scholar who has been alone in his classes in with a class rouses his ambition, awakens his interest, and is a stimulus in many ways."

"It gives the scholar better advantages than to have so many small schools."

"Less expense; better schools for those conveyed. Combining schools aids in grading schools. Longer school year for all pupils. Better school supervision."

"Better schools and better teachers."

"Graded schools; better teachers; better appliances."

Question 7. Advantages of the local schools?

"None, where transportation is feasible."

"Better average attendance."

"Scholars are nearer home. Parents claim they 'Do not have to dress them so well.' Local school holds up price of real estate."

"Community pride. Don't want to see the schools going away from them."

"Easier for small children."

"We avoid criticism and friction."

"The teacher can give each pupil more time."

"The children are not so much exposed in all kinds of weather, and unless we build new schoolhouses are better accommodated."

"No advantages. These schools are so small that experienced teachers will not engage them."

"Convenience for people in the vicinity."

"None, as compared with the larger schools."

"Only to gratify those who want schools near home."

"More convenient and satisfactory to parents, and generally greater improvement by scholars."

"The school work is more personal."

"Pupils live nearer local schools, and parents usually have more oversight of children."

"None that I know of."

"None in particular."

"None except to very small children."

"Better instruction and more regular attendance."

"Short terms and few pupils; some schools as small as two or three scholars, and not much interest taken."

"Better in winter months."

"When the scholars are very young and small, it is better for them to be nearer home and not have to ride a long distance in cold and stormy weather."

"Local schools satisfy the people, build up local pride in their schools, help to build up personal responsibility, thus making strong needed citizens."

"There are none, unless the cost of conveyance amounts to much more than the cost of maintaining a school, and not then if the number of pupils is less than ten."

"I see none."

"Only to satisfy prejudices of parents."

"There seem to be none."

"Don't learn so much mischief."

"I think the local school system for the country towns is all right. What we need is more money."

"When there are a number of small scholars and the distance is great, possibly it might be advantageous to run local schools."

"Keeps peace between the parents and the school board."

"I do not know of any."

"Little advantage, owing to small number of pupils; small classes; difficult to arouse enthusiasm or interest."

"More individual attention from teacher; interest that always centers in a local institution."

"The child can do many little things to help the parents and learn habits of usefulness that will be of great value to it in life; the teacher can direct the individuality of the child more. There are many things of more importance to a child than mere book learning; there is too much time between the teacher and the parents, too little time to work, when the child is carried to school, to form habits of industry."

"The teacher has more time to give the scholars in small schools. The residents think that to close a school in a given district results in a depreciation of real estate."

Question 8. In your opinion, would a more general adoption of public conveyance result to the educational advantage of the state?

"Possibly, as it would bring on a better system of grading in country schools."

"I think it would. Advanced scholars should be conveyed to a central high school in every town."

"Yes; it would give scholars now attending small district schools better opportunities for acquiring an education."

"Be of a very great advantage. This town ought to support only four schools instead of eight."

"Yes. Generally a school with less than ten pupils is necessarily less interesting than one that is larger."

"In our town I would like to see all the seven schools united in two schools, and think the advantages would be much better."

"Yes; our schools would be from two to three weeks longer if the scholars were conveyed where they ought to be, with the same money."

"Yes; most decidedly, from the very fact that our ungraded schools cannot keep pace with our graded schools."

"I am most decidedly of the opinion that it would be."

"I am in favor of having the scholars come to the center of the town, and have a graded school with only two teachers. There are only about seventy-five or eighty scholars in town of school age."

Question 9. How do the people of your town generally view the matter?

"Favorably. This is being tried in our town this term for the first time, and seems to be the only thing to be done, and the prospect is that the results will justify the course we have taken."

"Some families object to conveyance, while others appreciate it as an advantage to the children. Others say it lessens the value of real estate to have the local schools closed. Opinion is divided, but it seems to grow in favor of transportation."

"In the case tried, and the one to be tried, the parents are well pleased."

"They had rather have a school with three pupils in the woods somewhere, and hire a teacher for them, than to pay one dollar a week to have them carried to a larger school."

"A good many would like pay for carrying scholars to and from school. The school board have to put up a big fight with some of the parents."

"There is a divided opinion. Some are very anxious to have scholars conveyed to another school and others oppose it."

"The people who reside in divisions where small schools are maintained are very much opposed to closing such schools and object to having small children carried a distance from home. At the present time we have four schools in town which, in my opinion, should be closed. We cannot afford good teachers for these schools. The people, generally, have several times expressed themselves on this matter in favor of the school board doing as they deemed best for these schools. The school board have not closed these schools because the people would not like it, and they would gain ill will, etc., etc."

"Every scholar in town should have the advantage of our town graded schools."

"About one third of the town want one graded school. The rest wish to maintain good local schools."

"Those living near the large schools have no sympathy whatever with those living farther away."

"The townspeople think that every child old enough to become a scholar should be sent to school. If the parents cannot convey them, or the distance is too great for them to travel, they should be carried at public expense."

"The people generally do not like the idea of conveying children out of the home districts."

"Only as they can see pecuniary gain to themselves."

"We think the method of conveyance should be systematized, and a regular mileage paid to all scholars (not tardy) according to distance traveled per term, and made uniform throughout the state."

"They are very rebellious. But by perseverance we have converted some. They are willing to admit, after a fair trial, that their children improve rapidly. In all instances we convey our scholars to the village schools."

"They do not favor the idea. To express it as one of the parents did to me when I was trying to unite two schools of five or six scholars each: 'If you convey the scholars, you will have to take the parents with them.'"

"A good many think the children might walk the same as they used to do."

"I think the general view is for larger schools and better teachers."

"The more intelligent people of the town believe that something should be done in this matter."

"We think there are more in favor of conveyance than otherwise."

"The majority believe in general adoption of public conveyance."

"The districts that have been willing to adopt it see the advantage, I think; other parts where it ought to be adopted object. I think the people generally favor it."

"We think there is quite a difference of opinion. However, we think a large majority favor conveying scholars in prefer-

ence to maintaining local schools where there are but a small number of scholars."

"Believe in having schoolhouses within lawful distance, and in furnishing funds to support them."

"The people in the back districts stick for their schools. Remove the schools from these districts and property decreases in value. For instance, if a man is buying a home he won't pay nearly as much for one with school miles away, if he buys it at all. It would be better for the towns and better for the state to build up the rural districts than to break them down."

"Their opinion or view is generally based on what they regard as their individual interest, local pride, and a desire to preserve the old landmarks."

"They are not in favor of having their children carted for miles and being exposed to the weather."

"Divided, but the feeling is growing for establishing a graded school. We live in hopes of better days."

"I think our people are generally opposed to the matter, because we have not given it a fair trial. We shall reduce our schools by one this year to try it."

"I think they are in favor of having schools united and conveying scholars."

"They want the scholars conveyed."

"Most of them approve of our course in conveying children."

"The better element favors transportation, but a few families are found in nearly all divisions that are so intensely jealous of and spiteful toward the village that any attempt to consolidate is productive of a great deal of friction."

"Village people and those not interested in education vote and talk against paying fair prices for conveyance."

"We get rid of conveying pupils in various ways. We shut up schoolhouses and have small schools in private houses. We have hired mothers to teach their children at home, and sent children to near schools in another town. We believe that in every instance of this kind we have done the best thing for the children, and we have saved the town many dollars."

"It does meet with favor."

"Not very favorably at first, but after a while thought better of it."

"The parents in outlying districts generally favor transporting. Others do not seem to care."

"It seems to be the general opinion that fewer and better schools would be for the interest of the towns and the pupils."

"Not favorably. If our parents could see the advantage of uniting some of our schools it would be the best plan we could adopt."

"Getting fairly contented with the children being carried, especially along the line of the electric road where children are picked up at the door and left within an eighth of a mile of the schoolhouse. Of course there are some who object strongly to carrying the children."

"In different ways, as is the case in all country towns, but the majority of thinking people would come to favor the consolidation of the schools."

"Majority in favor of conveyance."

"Most of them heartily sympathize with it. A few cases are obstinately offended, but only a very few. We closed up three schools, and ought to two more."

"They are conservative. But I have been doing personal work with the people of one of my small districts, and nearly all have of their own accord sent their children to the graded schools some two miles away, so it is only a question of a short time when we shall have no pupils left going to the district school. I advocate transportation in my annual report."

"Public opinion has changed very much in the last few years in regard to the matter in this town. The people are more willing to let their children come to the village to school than formerly."

"They insist on having a school in every district, and will not put the schools together until the state legislates on the subject."

"Many with disfavor. As many prefer to do just as they did forty years ago."

"If an annual appropriation from the state could be had, I think our people would be well pleased with one school at the

center of the town, with three grades, three teachers, and convey all children there."

"Probably the majority of the people in the rural districts would be opposed to the system of conveyance; but there is a considerable number in its favor, and that number is increasing."

"With a death grip on their pockets and a jealous eye on any one supposed to have a little advantage in distance or other privileges. We ought to have two graded schools in town and bring all pupils to them."

"They are in favor of having schools in every schoolhouse in town. Only in individual cases, where they are getting good prices for conveying, are they pleased. This business of conveying scholars is more trying to the disposition of the people than all other things."

"On the part of most where they have had the local school they are opposed to closing it, fearing it will lessen the value of property, and because of the small children. Where the transporting has become a regular thing, and comfortable and safe transport, the objection grows less."

LAW OF 1899.

The legislature of 1899 enacted a law which in my opinion is destined to exercise the most beneficent influence upon education in the state.

AN ACT to equalize the school privileges of the cities and towns of the state.

SECTION 1. Two or more town or special districts, or their school boards when duly authorized by their respective districts, may, by vote of each, form a supervisory district for the purpose of employing a superintendent of the public schools therein, who shall perform in each town the duties prescribed by law and by the regulations of the school boards, giving thereto his entire time.

SECT. 2. The school boards of the several districts forming the supervisory district shall constitute a joint committee which for all purposes of this act shall be the agent of each

district therein represented. Said committee shall meet between April 1 and August 1 of each year, as may be agreed upon by the chairmen of the several boards, and organize by the choice of a chairman, a secretary, and a treasurer. It shall elect a superintendent for such supervisory district, determine the character and value of his services, and apportion the same among the several districts, certifying such apportionment to their respective treasurers.

SECT. 3. Any town or special district whose equalized valuation does not exceed \$2,000,000, which shall unite with one or more districts to form a supervisory district, which shall employ as superintendent, at an annual salary, a person holding a permanent state teacher's certificate, and shall certify through its chairman and secretary such facts to the state treasurer, shall be entitled to one half its apportioned share of said salary, said sum to be paid by him in December of each year to the town treasurer of each town in said supervisory district, upon sworn statement of the state superintendent of public instruction certifying as to what amount each town is entitled.

SECT. 4. Supervisory districts formed under this act shall employ not fewer than twenty nor more than sixty teachers.

SECT. 5. Every school district in the state shall maintain its schools at least twenty weeks during every school year.

SECT. 6. The sum of twenty-five thousand dollars (\$25,000) shall be appropriated annually from the state treasury for the purposes of this act. Twenty-five per cent of the entire appropriation shall be set apart each year to carry into effect section three of this act. Any portion of the sum so set apart, and not expended as aforesaid, shall remain in the state treasury, to be used in any subsequent year, if needed, to carry out the purposes of said section. The remainder shall be paid by the state treasurer in December of each year to all the towns of the state in which the equalized valuation is less than three thousand dollars (\$3,000) for each child of the average attendance in the public schools of such towns during the school year next preceding, and such other towns as may be added as hereinafter provided on the sworn statement of the superin-

tendent of public instruction certifying as to what amount each town is entitled, in direct proportion to said average attendance, and in inverse proportion to the equalized valuation per child, and shall be used exclusively for the support of the public schools. The governor and council may, upon recommendation of the superintendent of public instruction, add to the class of towns specified above in this paragraph such other towns as may seem from their peculiar conditions to need relief from too great a burden of school taxation.

SECT. 7. No town shall receive any benefit under this act nor any portion of the literary fund unless its returns have been made to the superintendent of public instruction as required by chapter 92, section 13, of the Public Statutes, nor unless its schools have been maintained at least twenty weeks during the school year next preceding; *provided, however*, that the requirement of twenty weeks of school shall not operate for the school year ending August, 1899.

SECT. 8. All acts and parts of acts inconsistent with this act are hereby repealed, and this act shall take effect on its passage.

[Approved March 11, 1899.]

There are three important features in the law, viz.:

1. Permissive district supervision.
2. A minimum school year of twenty weeks.
3. A state appropriation to be distributed among the weaker towns.

The enactment of this law came so late in the session that it was not possible to get it before the people until the school meetings of March, 1900. At that time a deep interest in the supervisory feature was manifested throughout the state.

An article relative to this matter was inserted in many of the school warrants; twenty-seven (27) towns or special districts voted favorably to the system, but owing to their isolation many of them have been unable to form districts.

Three districts, however, have been formed, as follows:

1. Marlborough, Troy, Fitzwilliam.
2. Newmarket, Durham, Alton.

3. Salem, Hampstead, Fremont.

The following towns were reported to this office as having authorized their several school boards to unite with other towns for the purpose of forming a "supervisory district" under the provisions of chapter 77 of the Session Laws of 1899:

Alstead, Alton, Antrim, Ashland, Bartlett (special district), Chesterfield, Clarksville, Dublin, Durham, Fitzwilliam, Fremont, Hampstead, Hooksett, Jefferson, Marlborough, Marlow, Newmarket, Pembroke, Salem, Sandown, Stratford, Sunapee, Tilton (union district), Troy, Weare, Whitefield, Woodstock.

From an educational standpoint, this is the most important and far-reaching portion of the law. Expert supervision will secure better teachers, will improve the teaching, will be a source of economy, will take better care of buildings and other school property, will educate the public to appreciate good schools and to understand the difference between good schools and poor schools.

The provision for a minimum school year of twenty weeks is already felt. All the towns but one appear to have fulfilled the requirement. The average length of our school year has been increased nearly three weeks over 1899. This is the greatest increase in any single year since the record has been kept. The following shows the variation from year to year during the last twenty years:

1881, 19.42 weeks; 1882, 19.25 weeks; 1883, 19.63 weeks; 1884, 19.91 weeks; 1885, 19.95 weeks; 1886, 20.37 weeks; 1887, 22.39 weeks; 1888, 22.90 weeks; 1889, 22.78 weeks; 1890, 23.55 weeks; 1891, 23.74 weeks; 1892, 24.32 weeks; 1893, 26.04 weeks; 1894, 24.95 weeks; 1895, 25.71 weeks; 1896, 26.13 weeks; 1897, 26.91 weeks; 1898, 27.06 weeks; 1899, 26.62 weeks; 1900, 29.53 weeks.

The third provision of the law appropriates \$25,000, twenty-five per cent to be set apart for carrying into effect the supervisory section, the balance to be divided among those towns in which the equalized valuation is less than \$3,000 for each pupil of the average attendance in all the schools of the town, in direct proportion to such average attendance, and in inverse proportion to the equalized valuation per pupil. The governor

and council are empowered, upon recommendation of the superintendent of public instruction, to add other towns to the list. Experts in school legislation pronounce this method of distribution the best that has yet been devised, inasmuch as it is calculated to give assistance where it is most needed, also to encourage a larger average attendance. The distribution of the literary fund might be made upon a similar plan to advantage. The appropriation was distributed in December, 1899, as follows:

DISTRIBUTION OF THE APPROPRIATION.

No.	TOWNS.	Equalized valuation.	Average attendance.	Equalized valuation per pupil of average attendance.	Paid by state for support of schools under law of 1899.
1	Dorchester	\$105,060.00	84	\$1,260.00	\$383.57
2	Eaton	123,114.00	88	1,399.00	362.20

QUALIFICATIONS OF TEACHERS.

Existing laws of the state are inadequate to insure the employment of competent teachers. The provisions of chapter 92 of the Public Statutes fall far short of a sufficient requirement for scholastic attainment:

"SECT. 6. . . . School boards shall, annually, in the month of June or July, and at such other times as they deem best, hold an examination of candidates for certificates of qualification to teach in the public schools. Candidates shall be examined in the studies prescribed by law, or by the school board in accordance with law. Such candidates as pass an examination satisfactory to the school board, and present satisfactory evidence of good moral character and capacity for government, shall receive certificates of qualification signed by the school board, to continue in force not more than one year from the date thereof."

Section 2 of the same chapter requires school boards to employ teachers "holding certificates as provided by law." No penalty, however, is prescribed for violation of either requirement, and the law is too often a dead letter.

Education is properly a state duty, relegated to towns and districts for convenience. Teachers are employed for the general welfare of the state, and entrance into their ranks should be as carefully guarded as entrance into the professions.

In this state, no scholastic acquirements, special training, or even a high order of intelligence is required by law of a teacher. I see no adequate remedy for this unfortunate condition except for the state to assume the function of issuing all certificates of qualification to teachers, and to make the employment of any person as teacher illegal without such certificate.

It seems absurd that no person may practice medicine and surgery in this state without a license from the superintendent of public instruction, *ex officio* regent, while an untrained, uneducated school girl may be placed in charge of the education of our children, provided she has sufficient influence at court.

The New Hampshire State Teachers' Association, at its

annual meeting held October 20 and 21, 1899, adopted the following:

“Resolved, that the function of certifying the qualifications of teachers in the state properly belongs to the state rather than to the district school boards.”

This was the deliberate conclusion of the leading educators of New Hampshire. I cannot doubt that a majority of our successful, thoughtful teachers would indorse this after an investigation of our conditions.

A step in the direction of the state's assumption of the duty of issuing all certificates of qualification to teach was made by the legislature of 1895, in the enactment of the following:

CHAPTER 49, SESSION LAWS OF 1895.

[As amended at the Session of 1899.]

AN ACT to provide for the examination and certification of school teachers by the superintendent of public instruction.

SECTION 1. The superintendent of public instruction shall cause to be held at such convenient times and places as he may from time to time designate, public examinations of candidates for the position of teacher in the public schools of the state. Such examinations shall test the professional as well as the scholastic abilities of candidates, and shall be conducted by such persons and in such manner as the superintendent of public instruction may from time to time designate. Due notice of the time, place, and other conditions of the examinations shall be given in such public manner as the superintendent of public instruction may determine.

SECT. 2. A certificate of qualification shall be given to all candidates who pass satisfactory examinations in such branches as are required by law to be taught, and who in other respects fulfill the requirements of the superintendent; such certificate shall be either probationary or permanent, and shall indicate the grade of school for which the person named in the certificate is qualified to teach.

SECT. 3. A list of approved candidates shall be kept in the office of the department of public instruction and copies of the

same, with such information as may be desired, shall be sent to school committees upon their request.

SECT. 4. The certificates issued under the provisions of this act shall be accepted by school committees in lieu of the personal examination required by section 6 of chapter 92 of the Public Statutes.

SECT. 5. A sum not exceeding three hundred dollars may be annually expended from the income of institute fund for the necessary and contingent expenses of carrying out the provisions of this act.

SECT. 6. This act shall take effect upon its passage.

[Approved March 19, 1895.]

Under the provisions of the above law, permanent certificates of qualification to teach in any public school in the state, below the grade of high school, have been issued to 172 persons, as follows:

LIST OF TEACHERS HOLDING PERMANENT STATE TEACHERS' CERTIFICATES.

In my judgment, there is a growing sentiment among teachers, school boards, and legislators that the time has come when the duty of issuing certificates should be taken from school boards, and the employment of a teacher in any grade of public school who does not hold a certificate of qualification from the state should be made illegal.

COMPULSORY ATTENDANCE.

The laws relative to compulsory attendance need amendment. Chapter 93, section 14, of the Public Statutes provides that,—

“SECT. 14. Every person having the custody and control of a child between the ages of eight and sixteen years, residing in a school district in which a public school is annually taught, shall cause such child to attend the public school for twelve weeks at least in every year, six weeks at least of which shall be consecutive, unless the child shall be excused by the school board of the district because his physical or mental condition is such as to prevent his attendance at school for the period required, or because he was instructed in a private school for at least twelve weeks during the year in the common English branches, or, having acquired those branches, in other more advanced studies.”

The attendance demanded, twelve weeks, six of which are to be consecutive, is absurdly small. No method of enforcing the attendance is provided. The following section inflicts a penalty upon the parent after the failure in attendance, but as the fine must be collected in a civil action, it is a practical nullity. “An ounce of prevention is worth a pound of cure.”

Section 6 of the same chapter allows districts to make by-laws relative to attendance. If districts would take advantage of this law, make simple by-laws, *and enforce them*, the situation would be bettered.

"SECT. 6. Districts may make by-laws, not repugnant to law, concerning habitual truants and children between the ages of six and sixteen years not attending school and not having a regular and lawful occupation, and to compel the attendance of such children at school, and may annex penalties for the breach thereof not exceeding ten dollars for each offense."

But the by-law could not be made to affect a large class of children who should be required to attend school.

The twelve weeks' requirement has been in our statutes since 1871, practically in its present form. It is time that the legislature should harmonize this law with modern conditions.

The legislature of 1899 placed an efficient instrument in the hands of school boards by enlarging the scope of the truant officer's authority, making it that official's duty, when authorized by the school board, to visit manufacturing establishments for the purpose of enforcing the employment laws. If boards wish to enforce these laws, they now have ample power to do it. Many of the towns, however, appear to consider obedience to law a matter of local option, and pay no attention whatsoever to the legal demand for certificates of school attendance as a pre-requisite to employment in manufacturing establishments. As manufacturers, their agents, superintendents, and overseers, are usually influential citizens in their respective towns, it is evident that the interests of the children, the town, and the state will not prevail against the selfish interests of local magnates, and that state authority must be exercised if universal education is to be assured.

I earnestly recommend that a state inspector or agent be provided for by law, whose duty shall be to see to it that the employment laws are impartially observed in every town and city of the state.

SCHOOL MONEY.

I have referred in another section of this report to the discrepancy between the amounts which the statute requires the several towns to raise and the amounts reported by the school boards. It seems a simple matter to calculate this sum, but as less than half of the towns report it correctly, in the interests

of accurate computation it seems appropriate to quote the statutes bearing upon this subject:

CHAPTER 88.

"SECTION 1. The selectmen in each town shall assess annually, upon the polls and ratable estate taxable therein, a sum to be computed at the rate of five hundred dollars for every dollar of the public taxes apportioned to such town, and so for a greater or less sum.

"SECT. 2. The town may raise a sum exceeding the amount aforesaid, which shall be assessed in the same manner."

CHAPTER 14.

"SECTION 1. An apportionment of public taxes, according to the valuations of the polls and ratable estates in the several towns, shall be made by the legislature at its January session, 1895, and in every fourth year thereafter."

This method of deciding the minimum amount of money that may be raised for school purposes has remained unchanged throughout New Hampshire's history. In 1789 it was enacted that £5 be raised for every £1 of the proportion of public taxes, "to be appropriated for the sole purpose of keeping an English school . . . for teaching the sounds and powers of the letters in the English language, reading, writing, English grammar, arithmetic, geography, and such other branches of education as it may be necessary to teach in an English school."

In 1791 the proportion was made £7 10s. to £1; in 1799, \$35 to \$1; in 1804, \$45 to \$1; in 1807, \$70 to \$1; in 1818, \$90 to \$1; in 1840, \$100 to \$1; in 1848, \$120 to \$1; in 1852, \$135 to \$1; in 1853, \$150 to \$1; in 1854, \$175 to \$1; in 1855, \$200 to \$1; in 1867, \$250 to \$1; in 1870, \$350 to \$1; in 1893, \$400 to \$1; in 1895, \$500 to \$1.

MEMBERS OF SCHOOL BOARDS AS TEACHERS.

A frequent question asked of this department is, "Can a school board legally employ one of its members as teacher?" The impropriety of a member of a school board participating in his own election to position of responsibility under the board,

assisting in making rules for his own guidance, and supervising his own work, is manifest. The digest of New Hampshire school laws, published in 1886, contains the following:

"The school board are the trustees of the district, and as such hold its funds, and cannot hire themselves to teach, or otherwise contract with themselves."

That the question of the legality of such employment might be determined to the satisfaction of all interested, I have submitted certain questions to the attorney-general, Hon. E. G. Eastman. I append questions and answers for information:

Question 1. May the school board of a district employ one of its own members as teacher?

Answer. No.

Q. 2. May the school board of a district elect one of its members as superintendent of schools?

A. No.

Q. 3. In case of the formation of a supervisory district, under authority of chapter 77 of the Session Laws of 1899, is a member of one of the school boards forming the joint committee of such supervisory district eligible to the office of superintendent of schools of such district?

A. No. The foregoing questions are all governed by the legal maxim that trustees cannot contract with themselves. The school board are trustees of the district, and as such hold its funds, and cannot employ themselves in any position remuneration for which comes from the school money.

Q. 4. May a school board delegate to individual members the duty of hiring teachers and transacting other business which the statutes impose upon the board?

A. No. The action, to be effectual, must be joint.

Q. 5. Should the board keep a record of its proceedings?

A. The board should keep a record. The record has nothing to do with the validity or effect of the hiring, but the hiring is not legal unless ratified by the joint board. The record is *prima facie* evidence of the board's action in this regard.

Q. 6. If teachers are employed by individual members of

the board, no record being made of their election, are they legally employed?

A. If a teacher were hired by one member, and the others knew of the hiring and made no objection, a ratification would probably be presumed. Such employment would be valid without a record, but it would simplify the proof, in case of a dispute, to have the evidence contained in the record.

INTERSTATE COMPARISON.

The following tables are reproduced from the report of the committee of the American Institute of Instruction upon "New England School Legislation," made to that association in 1899.

ABSTRACT OF SCHOOL

TABLE No. I.

ABSTRACT OF ATTENDANCE AND TRUANCY

Limits of age of compulsory attendance.	Time of required attendance.	Minimum time schools must keep.	Penalties for non-attendance.	
			Upon parent or care-taker.	Upon child.
Seven to sixteen. [From seventh birthday to sixteenth.]	Entire time schools keep in public or approved private schools.	Twenty weeks annually.	Forfeit not more than \$25 or imprisonment thirty days. For truancy of child, forfeit \$20 or imprisonment thirty days.	Truant, if boy, may be sent to state reform school; if girl, to state industrial school. Six or more absences in a term without reasonable excuse constitute habitual truancy.

LAWS AND STATISTICS.

— MAINE.

LAWS IN THE SEVERAL STATES.

Means of enforcing laws for compulsory attendance.

Officers.	Schools.	Restrictions upon employment of children at labor.	Incidental means.	
			Private schools.	Census.
Truant: towns elect one or more. Compensation fixed by municipal officers. Officers must be directed by school committee or superintendent of schools in writing.	State reform at Portland. State industrial at Hallowell.	No law restricting employment of children at labor.	Private schools, if aided by state, to make returns to state superintendent of schools.	Census of persons between four and twenty-one taken April 1 or each year by town sch'l superintendent.

TABLE No. I.—*Continued.*

Limits of age of compulsory attendance.	Time of required attendance.	Minimum time schools must keep.	Penalties for non-attendance.	
			Upon parent or care-taker.	Upon child.
Six to sixteen under district by-laws.	Requirement for attendance is twelve weeks, six of which shall be consecutive, from eight to sixteen. Attendance at approved private schools accepted. Districts may make by-laws to compel the attendance at school of children between six and sixteen.	Twenty weeks annually.	Forfeit \$10 for first offense, \$20 for every subsequent offense.	Penalty not exceeding \$10 may be incurred by truant child or he may be sent to the state industrial school for one year. Under district by-laws boys and girls may both be sent to the industrial school. Imprisonment provided for in by-laws is considered unconstitutional.

—NEW HAMPSHIRE.

Means of enforcing laws for compulsory attendance.

Officers.	Schools.	Restrictions upon employment of children at labor.	Incidental means.	
			Private schools.	Census.
Truant officers appointed by school boards, who fix salaries. To enforce compulsory and truant laws under direction of school board. Officers have authority to take to school without a warrant. Laws are in force requiring truant officers to prosecute for illegal employment of children.	State industrial school at Manchester.	No child under sixteen years old, who cannot read and write, to be employed in any manufacturing establishment while public schools are in session. Certificate of attendance registered as per times of compulsory attendance. Certificate for attendants upon private schools conditioned upon the schools having the approval of the school committee and keeping their approved register. Graduates of approved grammar schools excepted. No child under ten years can be employed in manufacturing establishments.		Census is taken in the month of April of children between five and sixteen y'rs of age.

TABLE No. I.—*Continued.*

Limits of age of compulsory attendance.	Time of required at- tendance.	Minimum time schools must keep.	Penalties for non-attendance.	
			Upon parent or care-taker.	Upon child.
Eight to fif- teen.	Twenty-eight weeks from beginning of school year, which is April 1.	Twenty-eight weeks, six hours a day, five days a w'k. Twenty school days equal one month.	Fined not more than \$20 nor less than \$5.	Truant or child willful and con- tinually disobe- dient to rules may be sentenced to Vermont In- dustrial School for not more than twenty-six w'ks.

— VERMONT.

Means of enforcing laws for compulsory attendance.

Officers.	Schools.	Restrictions upon employment of children at labor.	Incidental means.	
			Private schools.	Census.
Truant officers: selectmen in towns appoint two; in cities, the mayor appoints. Officers take to school without warrant. Truant officer, school director, or anyone allowed to make arrests, shall arrest on application of three citizens. Teachers to give notice to truant officers of delinquents.	Vermont Industrial School at Vergennes.	No child under fourteen years of age who cannot read and write to be employed in mill or factory while school keeps. No child under fifteen years of age so employed, unless he has attended sch'l twenty-eight weeks and deposits with owner or overseer a certificate signed by teacher. Penalty not more than \$25 nor less than \$5.	Incorporated academies required to make return to superintendent of education.	Census taken by clerk of schoolboard (four cents per child) on or before February 1, annually.

TABLE No. I.—*Continued.*

Limits of age of compulsory attendance.	Time of required attendance.	Minimum time schools must keep.	Penalties for non-attendance.	
			Upon parent or care-taker.	Upon child.
Seven to fourteen.	Entire time the public schools are kept, either in public or approved private schools.	Elementary schools thirty-two weeks, high schools forty weeks annually.	Fined not exceeding \$20, if a person having under his control a child seven to fourteen years old fails, without satisfactory reason, for five days or ten half days in any period of six months, to keep the child in school.	Truant, absentee, school offender, if a boy, may be sentenced for two years to a county truant school; if a girl, to the state industrial school, or may be placed on probation under a truant officer. Children may be paroled or discharged on good behavior. On complaint and conviction, a child may be transferred from the truant school to the Lyman or industrial school, and, if a boy, to the reformatory at Concord.

— MASSACHUSETTS.

Means of enforcing laws for compulsory attendance.

Officers.	Schools.	Labor: restricted employment.	Incidental means.	
			Private schools.	Census.
Truant: one or more may be appointed by the school committee. Compensation fixed by the committee. The same officers may serve several towns. Officers make complaints. May bring to school without a warrant and act as probation officers. Under general rules of school committee execute laws without specific direction of sch'l committee.	State schools: Lyman School for Boys at Westboro, State Industrial School for Girls at Lancaster. County truant schools required to be maintained by counties jointly or severally. Locations: Lawrence, North Chelmsford, Boston (Parrental School), Walpole, W'st Boylston, Springfield, Goshen.	No child under fourteen years old can be employed in a workshop, manufacturing or mercantile establishment, nor anywhere for wages while schools are in session (hr's). Employers to keep two lists of persons under sixteen years of age employed, and to send to superintendent of schools or school committee names of all minors so employed who cannot read and wrte. Such minors cannot be employed while an evening scho'l is maintained in the place of residence unless he attends regularly such school or a day school.	Returns of private schools to be made to secretary of state board of education by school committee; also, names of schools and their principals. Details for keeping public school registers are prescribed.	Census taken annually under the direction of the school committee for September 1, to be completed by October 1 of children from five to fifteen, and of all minors over fourteen who cannot read at sight and write legibly simple sentences in the English language. The state b'rd of education to prescribe the form and furnish blanks for the census.

TABLE No. I.— *Continued.*

Limits of age of compulsory attendance.	Time of required attendance.	Minimum time schools must keep.	Penalties for non-attendance.	
			Upon parent or care-taker.	Upon child.
Seven to fifteen.	Constantly for eighty days. If not employed at home or elsewhere, all the days and h'rs the schools are kept.	One or more to be kept for six months in each district as condition for receiving state money appropriated to schools.	Fined not more than \$20. In case parent is charged with neglect in causing child to attend school, the parent must disprove the charge.	Truant or absentee may be committed to place provided by council for not exceeding two years. May be discharged by the court that committed.

— RHODE ISLAND.

Means of enforcing laws for compulsory attendance.

Officers.	Schools.	Labor: restricted employment.	Incidental means.	
			Private schools.	Census.
Town council in towns and aldermen in cities appoint special constables to act as truant officers and fix compensation. Town or city council make ordinances governing attendance. Truant officers act when directed by school committee.	Town and city councils to make needful provisions concerning habitual truants, etc., and designate or provide suitable places for truants and absentees. Providence has two disciplinary day schools, to which children irregular in attendance are sent. State schools: reform for boys, industrial for girls.	No child under twelve years of age shall be employed in any factory, manufacturing or mercantile establishment. Firms or corporations employing children must keep a register of names, etc. No child between twelve and fifteen years of age can be so employed unless he has attended school eighty days of the year next preceding or has acquired the elementary branches taught in the public schools or shall have been excused by the school committee.	Private schools must be registered at the office of the state board of education. Registry must show location, name, officers, etc. The board of education must provide registers for such schools.	Census of children from five to fifteen, inclusive, to be taken under direction of aldermen of cities or by town council in January. School commissioner to furnish blanks.

TABLE No. 1,— *Continued.*

Limits of age of compulsory attendance.	Time of required attendance.	Minimum time schools must keep.	Penalties for non-attendance.	
			Upon parent or care-taker.	Upon child.
Seven to fourteen.	Entire time schools keep. Children may be instructed in private schools in same days and hours as public schools are kept. Attendance extends to sixteen years unless the parent or care-taker can show that the child is elsewhere receiving instruct'n regularly or is legally employed at home or elsewhere.	Thirty-six weeks annually.	\$5 a week and costs. A misdemeanor is committed if the child is absent one half-day. A parent is liable to be haled into court for this offense, and must show cause for the absence or pay the fine.	The truant, if a boy, may be sent to the reform school; if a girl, to the industrial school. These are seldom resort'd to by the state agents. The law is enforced by fines imposed upon parents.

—CONNECTICUT.

Means of enforcing laws for compulsory attendance.

Officers.	Special schools.	Labor: restricted employment.	Incidental means.	
			Private schools.	Census.
Agents appointed by the state board of education. Teachers report monthly to agent; the agent notifies parents, then visits, and, if necessary, prosecutes. Agents visit manufacturing and other establishments. There are local truant officers in some of the cities, appoint'd to arrest truants under by-laws.	Reform school for boys at Meriden; industrial sch'l for girls at Middletown. In s'me t'wns a'd cities truants and sch'l offenders are assigned to special town or city scho'ls for discipline and instruction. There are no town or county truant schools.	No child under fourteen years of age can be employed in any mechanical, mercantile, or manufacturing establishment. Penalty upon employer and upon parent, \$20 for each week.	Private schools must keep registers and have them open to inspect'n. Non-compliance with law makes all who attend such schools truants.	Census is taken of children from four to sixteen years of age, in October, by local officers.

TABLE
SHOWING WHAT STATE MONEYS
SCHOOLS AND THE BASIS

NEW ENGLAND STATES.	State revenues (for schools.)
<p><i>Maine.</i> Estimated population 1897, 657,300. Wealth: "True valuation," \$489,134,128; "assessed valuation," \$309,129,101. U. S. census 1890.</p>	<p>A permanent fund, a savings-bank tax, a mill tax (one mill to the dollar) on all taxable property assessed and collected as other state taxes for common schools. \$65,000 annually for "free high schools."</p>
<p><i>New Hampshire.</i> Estimated population 1897, 398,700. Wealth, 1890: "True valuation," U. S. census, \$325,128,740; "assessed valuation," U. S. census, \$263,059,798.</p>	<p>A so-called "literary fund," derived from a bank tax. This amounted in 1898 to \$41,000. It amounted in 1893 to \$77,000. A permanent fund of \$57,000 supports teachers' institutes. By act of March 11, 1899, \$25,000 is to be appropriated annually, to be distributed to weaker towns.</p>
<p><i>Vermont.</i> Population 1890, 332,422. Wealth, 1890: "True valuation," U. S. census, \$265,567,323; "assessed valuation," U. S. census, \$162,098,513.</p>	<p>Interest on "United States deposit money," \$40,145 in 1898 This is for the most part a merely nominal resource Interest on "Huntington fund," \$12,667 in 1898. A half-mill tax on all property of state, \$87,195 in 1898.</p>

No. II.

ARE DISTRIBUTED TO TOWNS FOR
OF SUCH DISTRIBUTION.

Annual amount.	On what basis distributed.
<p>\$520,000 for common schools.</p> <p>\$65,000 for maintenance of free high schools.</p>	<p>On basis of school population, between ages four and twenty-one. Aid to high schools (need not teach ancient or modern languages), \$250 to each school <i>for instruction</i>.</p> <p>Expert superintendents of groups of towns (not less than twenty-five or more than fifty schools) receive from state one half their salary up to \$750.</p>
\$65,000 to \$100,000.	<p>"Literary fund" (\$40,000 to \$60,000 annually) is distributed to towns on basis of school attendance. "All scholars not less than five years of age who appear to have attended the public schools not less than two weeks" are to be reckoned.</p> <p>\$25,000: \$6,250 to be distributed to "grouped towns" employing professional superintendents; \$18,750 to towns whose valuation is less than \$3,000 per child of the average attendance in public schools of such towns the preceding year, in direct proportion to average attendance and inverse proportion to valuation per child.</p>
About \$140,000.	<p>The half-mill tax, on basis of number of legal schools maintained the preceding year. A town having twenty schools receives twice as much as a town having ten schools.</p> <p>The income of the Huntington fund, and also that of the United States deposit money (merely nominal), is distributed on the basis of population (total, not school).</p>

TABLE No.

NEW ENGLAND STATES.	State revenues (for schools).
<p><i>Massachusetts.</i> Population, by state census 1895, 2,500,183. Wealth, 1890: "True valuation," U. S. census, \$2,803,645,447; "assessed valuation," U. S. census, \$2,154,134,626.</p>	<p>Permanent fund, \$4,171,548.14 in 1899. There must be added from the general revenues \$100,000 annually, until the fund amounts to \$5,000,000.</p>
<p><i>Rhode Island.</i> Estimated population, 1897, 395,700. Wealth, 1890: "True valuation," U. S. census, \$504,162,352; "assessed valuation," U. S. census, \$321,764,503.</p>	<p>A permanent fund, \$293,262 in 1898. Annual appropriation such as will, with the income of the permanent fund, amount to \$120,000.</p>
<p><i>Connecticut.</i> Estimated population, 1897, 840,100. Wealth, 1890: "True valuation," U. S. census, \$835,120,219; "assessed valuation," U. S. census, \$358,913,956.</p>	<p>Permanent fund, amount in 1898, \$2,014,680. The state makes an annual grant of \$2.25 per capita of the school census (ages four to sixteen), part to come from the permanent fund and the remainder from the general revenues of the state.</p>

II.—Continued.

Annual amount.	On what basis distributed.
Income of fund for 1898, \$204,612.61. One half to be used as stated in the next column, the rest to be used for district superintendence, etc.	Distributed only to the weaker towns. Towns whose valuation is over \$3,000,000 receive nothing. Towns whose valuation is between \$3,000,000 and \$2,000,000, \$50 each. Towns whose valuation is between \$2,000,000 and \$1,000,000, \$100 each. Towns whose valuation is between \$1,000,000 and \$500,000, \$200 each. Towns whose valuation is not greater than \$500,000, \$300 each. Towns last named, if rate of taxation is \$18 or more on \$1,000, \$50 extra. The same towns receive, in addition to the above, varying amounts graduated according to the ratio of their school tax to their total municipal tax. One half of income of fund to be distributed as above.
\$120,000 is annually distributed to the towns. For this the income of the "fund" is taken and whatever may be necessary from general revenues. \$10,000 to \$20,000 distributed to high schools.	Distributed to towns as follows: \$100 for each school to the number of 15, the remainder of the \$120,000 to be divided on the basis of their school population from five to fifteen years of age. Money thus received must be expended for teachers' wages. To encourage consolidation and grading, \$100 is paid to each <i>department</i> of a graded school, if said school shall have been formed by consolidation of three or more ungraded schools, while the town suffers no reduction in amount drawn from the state on the number of schools.
In 1898, \$414,276.	To be apportioned among the several towns on the basis of their school population between the ages of four and sixteen. The income of the "school fund" must be applied to paying teachers' wages.

TABLE

SOME OTHER FACTS BEARING ON EQUAL-

NEW ENGLAND STATES.	Minimum school year.	High schools required.
Maine.	Twenty weeks. Penalty, forfeiture of state aid.	No requirement. Encourages the maintenance of by paying one half expense of instruction up to \$250 per school. Ancient or modern languages not required.
New Hampshire....	Twenty weeks. Penalty, forfeiture of state aid.	No requirement. No state aid.
Vermont.....	Twenty-eight weeks, thirty-three weeks for high schools. Penalty, forfeiture of state tax and Huntington fund.	Every town containing 2,500 inhabitants must maintain a high school. Instruction in Latin, Greek, and modern languages <i>permitted</i> , not required. English literature, higher mathematics, the sciences, etc., required.
Massachusetts.....	Thirty-two weeks, forty weeks for high schools. Penalty, forfeiture of the town's share in the income of the school fund.	Required in towns of 500 families or householders. Latin must be taught. Towns not maintaining a high school must provide for similar instruction in another town.
Rhode Island.....	No minimum fixed by the state.	No requirement. State aid is given to towns maintaining a high school or providing tuition in other towns. \$20 per pupil for first 25 pupils, \$10 for second 25.
Connecticut.....	Thirty-six weeks. Penalty, forfeiture of state aid.	No requirement. Towns not maintaining a high school shall pay tuition of their children in other towns. State will pay two thirds of the tuition if valuation is less than \$900,000.

No. III.

IZATION OF SCHOOL PRIVILEGES.

Varying rate of municipal tax for schools.	Schools of fifteen, or less, scholars.	State aid for superintendence.
No data.	No data.	Yes.
From 1.1 mills to 9.8 mills to the dollar.	Whole number of schools, 2,104; with 12 or less, 545; with 6 or less, 107.	Yes.
From 1.1 mills to 9.8 mills to the dollar.	Whole number of schools, 2,375; with 12 or less, 455.	Yes.
From about 1 mill to about 8 mills to the dollar.	Whole number of public schools in 1898, 9,863. Amount expended in conveying children to school in 1898, \$123,000.	Yes, for district superintendence.
From about 1 mill to about 5 mills to the dollar.	Whole number of schools, 1,386; having less than ten pupils each, in 1897, 53; in 1898, 47.	No.
Varies from about 1 mill to 10 mills to the dollar. Average rate for the state in 1898, 3.02 mills.	Whole number of schools, 1,554; with eight or less scholars, in 1897, 176; in 1898, 162.	No.

PHYSIOLOGY AND HYGIENE.

An amendment to section 6 of chapter 92 of the Public Statutes requires the school board to "prescribe in all mixed schools, and in all graded schools above primary, the studies of physiology and hygiene, having special reference to the effects of alcoholic stimulants and of narcotics upon the human system, and to see that the studies so prescribed are thoroughly taught in said schools and that well approved text-books upon these subjects are furnished to teachers and scholars," under penalty of a forfeit of two hundred dollars.

Section 2 of chapter 94 provides that the "superintendent of public instruction shall investigate the condition and efficiency of the system of popular education in the state, especially in relation to the amount and character of the instruction given to the study of physiology and hygiene, having special reference to the effects of alcoholic stimulants and of narcotics upon the human system, and shall recommend to school boards what he considers the best text-books upon those subjects and suggest to them the best mode of teaching them, and shall pursue such a course for the purpose of awakening and guiding public sentiment in relation thereto as may seem to him best . . . "

From the annual reports of the school boards, it appears that this subject is taught in the schools of all but five of the towns in the state. These five towns contain twenty-four schools.

Of the 2,198 schools below the grade of high school, 2,174 are reported as complying with the law.

Schools in which text-books are used for instruction	1,395
Schools in which instruction is oral	957
Towns not using text-books	15
Towns not using oral instruction	71
Towns having neither form	5

The following list of text-books is given in compliance with law:

PHYSIOLOGIES—REFERENCE AND ADVANCED.

1. Anatomy, Physiology, and Hygiene. Jerome Walker, M. D. Allyn & Bacon.
2. The Human Body and the Effects of Narcotics. H. Newell Martin, D. Sc. Henry Holt & Co.
The Human Body. H. Newell Martin, D. Sc. Henry Holt & Co.
The Human Body (Elem.). H. Newell Martin, D. Sc. Henry Holt & Co.
3. Hygienic Physiology. D. F. Lincoln, M. D. Ginn & Co.

Waller's Human Physiology. Longmans & Co.

The courses of study and pamphlets of F. F. Murdock, Mrs. Ella B. Hallock, the publications under the charge of the Woman's Christian Temperance Union, and other similar works, are most stimulating and helpful.

Respectfully submitted.

CHANNING FOLSOM,

Superintendent of Public Instruction.

APPENDIX.

APPENDIX.

The following report of a committee to the Educational Council of New Hampshire was transmitted by the council to the State Teachers' Association at its forty-seventh annual session, October 20, 1900:

To the Educational Council of the state of New Hampshire:

Your committee, appointed to consider the question of the enforced payment of high school tuitions to other schools by towns not containing a high school, beg leave to present the following report:

First. The following conditions in regard to high schools exist in the state of New Hampshire: In the state there are 235 towns; 58 of these towns support high schools of some grade or other; in 10 towns are academies where tuition is free to the pupils of the town; in 8 other towns where there are no high schools, academies are situated where high school privileges can be obtained by the payment of tuition, making in all 76 towns offering high school privileges. Of the 65 towns offering public high school privileges, 38 do college preparatory work. Under the present conditions all high school privileges are purely voluntary on the part of towns and cities. Any high school in existence may be discontinued by vote of the town or city where it is situated. According to the latest report of the state superintendent of public instruction, there are enrolled in the state of New Hampshire 64,207 pupils in the public schools. Of these 43,238 are in towns having high schools or academies, and 20,969 in towns having no such advantages; that is, almost exactly one third of the pupils in the state are without high school privileges. It should be noted further that the per cent of children with-

out high school privileges varies greatly in the different counties. For example, Strafford county has 5,845 pupils, of whom 5,197 have access to high schools or academies in the town in which they live, while Carroll county has only one high school for 3,283 pupils.

By counties the statistics are as follows:

Counties.	Number enrolled.	Number with high school privileges.	Per cent.
Belknap	3,368	2,373	70.4
Carroll	3,283	373	11.3
Cheshire	5,743	3,604	62.7
Coös	4,905	3,056	62.3
Grafton	7,648	4,287	56.0
Hillsborough	14,337	12,538	87.4
Merrimack	8,106	5,336	65.8
Rockingham	8,111	4,977	61.3
Strafford	5,845	5,197	88.9
Sullivan	2,861	1,497	52.3

Your committee has sent a letter of inquiry to the principals of all the schools in the state, and has received replies from 48 schools. Thirty-five schools report pupils paying tuition in attendance from other schools; 13 schools report no tuition pupils. In the 35 schools containing tuition pupils, 419 are reported. The tuition in these schools averages \$19 per year. The estimated actual cost of tuition is considerably higher. Forty-five of these principals give an unqualified affirmative to the question whether the state should enact a law compelling towns not supporting a high school to pay the tuition of their pupils in adjoining high schools. Three give no opinion on this question.

A circular letter of inquiry was addressed to a number of towns selected at random over the state, which, by the report of the superintendent of public instruction, supported no high school. Replies were received from 55 of these towns. To the question, "Is there any demand for a high school in your town?" 14 answered "Yes," 35 "No," and 6 failed to answer.

These 55 towns reported 282 pupils attending high schools in other towns. The general opinion was that there were others who would attend such schools if tuition and text-books were free. To the question whether the person answering (in most cases the chairman of the school board) would approve a movement to secure the suggested legislation of this report, 38 gave an affirmative answer, 10 a negative, 3 were doubtful, and 3 gave no answer.

To the question as to the attitude of the citizens of the town towards such a proposition, the following replies were made: Favorable, 18; unfavorable, 24; no answer or doubtful, 12.

Second. Herewith is given a synopsis of the state law of New Hampshire, chapter 89 of Public Statutes, regarding the above point. It will be noticed that the payment of tuition is now permissive, and that adjoining towns may contract for the maintenance of a joint high school:

"SECT. 10. Two or more adjoining districts in the same or different towns may make contracts with each other for establishing and maintaining jointly a high or other public school for the benefit of their scholars, and may raise and appropriate money to carry the contracts into effect; and their school boards, acting jointly or otherwise, shall have such authority and perform such duties in relation to schools so maintained as may be provided for in the contracts.

"SECT. 11. Any school district may contract with an academy, seminary, or other literary institution located within its limits or in its immediate vicinity, for furnishing instruction to its scholars; and the school money may be used to carry the contract into effect."

Third. Herewith is presented a synopsis of the state law of Massachusetts regarding the maintenance of high schools and the payment of tuition therein by towns not maintaining high schools:

LEGAL REQUIREMENTS IN THE CASE OF HIGH SCHOOLS.

The attention of towns and cities is called to the following provisions of chapter 496, Acts of 1898, relating to high schools:

1. Every town and city in the state must provide free high school tuition.

2. Every city and every town of five hundred families or householders must maintain a high school.

3. Any town of less than five hundred families or householders in which a public high school or school of corresponding grade is not maintained shall pay for the tuition of its properly qualified children who attend the high school of another town.

4. The law recognizes but one kind or grade of high school. This high school, to comply with the statute, must conform to the following standard:

a. It must be adequately equipped.

b. It must be taught by a principal and such assistants as may be needed, of competent ability and good morals.

c. It must give instruction in such statutory subjects as it may be deemed expedient to teach, and in such additional subjects as may be required for general culture or for admission to normal schools, technical schools, and colleges.

d. It must maintain one or more courses at least four years in length.

e. It must be kept forty weeks, exclusive of vacations.

5. A town may meet a portion of the foregoing requirements in its own high school, provided it meets the rest in outside high schools.

The law, it should be noticed, is mandatory and sweeping. Its intent is to give every properly qualified child in the commonwealth a legal right not only to free high school tuition but to such high school tuition as will qualify him, should he so elect, for admission to the normal school or the college or the polytechnic. Provisions for high school instruction that restrict pupils to a course for three years only, that do not fill out the period of forty weeks, or that fail to connect with higher institutions beyond, are, therefore, legally inadequate.

Fourth. Herewith are presented resolutions of the state grange of Massachusetts, passed at its session at Lowell, December 12, 1899:

RESOLUTIONS OF THE MASSACHUSETTS STATE GRANGE.

The Massachusetts State Grange, at its annual meeting, held in Lowell, December 12, 13, and 14, adopted the following resolutions:

WHEREAS, The residents of rural communities desire for their children better educational opportunities than can now be afforded, and believe them to be entitled to as good advantages as are enjoyed by children in any part of the commonwealth; and,

WHEREAS, Many excellent citizens are annually lost to such communities by reason of their removal for the purpose of securing the desired educational advantages for their children; and,

WHEREAS, These communities are not able by local taxation to support good high schools, or to retain able and well-qualified teachers in their common schools, or to provide the skilled supervision necessary for the successful direction of the schools; and,

WHEREAS, We recognize with gratitude that the state has done much to overcome these difficulties and advance the cause of education in the country towns by state aid to towns uniting to employ superintendents, by state help to towns of less than \$350,000 valuation in the payment of salaries to teachers of exceptional ability, by the state's payment of the high school tuition of the children of towns having less than \$500,000 valuation, and by the distribution of the income of the school fund; therefore, be it

Resolved, That legislation should be enacted by the next general court, extending and strengthening these wise laws which have proven so beneficial in practice, by making permanent,—

1. Skilled supervision of schools throughout the state.
2. Sufficient state aid to enable needy rural towns to secure teachers not inferior in ability and qualifications to those employed in large towns and cities.
3. High schools sufficient in number, and so located that, without too great hardship, the children of rural communities shall be within reach of their advantages.*

Resolved, That, for the accomplishment of this much needed legislation, we request all subordinate granges to urge members

*High school tuition is paid by the state for towns of valuation less than \$500,000.

of the legislature to support a bill framed to secure superintendence, aid to teachers, and extension of high school privileges specified in the foregoing resolution.

Fifth. Your committee believes that the time has come for the state of New Hampshire to take the position that its boys and girls are entitled, as of right, to a secondary education fitting for college. Accordingly, it recommends that suitable measures be taken to present to the incoming legislature suitably drawn bills,—

1. To compel towns not maintaining a high school to pay the tuition of pupils desiring to attend high school in neighboring towns, or academies.

2. To formulate a legal definition of a high school.

Your committee further recommends that the Educational Council and State Teachers' Association, with the county associations and affiliated organizations, be urged to bring this matter before the people of their respective sections during this coming season. Your committee further recommends that the state grange, in view of its interest in educational matters, and especially in those pertaining to the rural districts, be invited to co-operate in securing this legislation.

Respectfully submitted.

JAMES C. SIMPSON.

CLARA E. UPTON.

M. C. SMART.

In accepting the foregoing report, the association unanimously adopted the following resolution:

Resolved, That the state should require, and give financial aid in securing, free high school advantages to every pupil in the state.

SCHOOLHOUSE AT PIKE STATION, HAVERHILL, 1900.

DESCRIPTION OF PUBLIC SCHOOL BUILDING AT PIKE'S STATION, HAVERHILL.

This is a one-story building; size on ground 30x48 feet, with a projection for vestibule 8x13 feet.

Height of rooms, 10 feet in clear.

Size of rooms: Primary, 19 feet 8 inches by 29 feet; intermediate, 20x29 feet; recitation room, 7x9 feet.

The rest of the room is taken up by vestibule, lavatory, and teachers' wardrobe and supply cupboards. The vestibule is amply provided with wardrobe hooks to accommodate eighty pupils, partitions 6 feet high and 8 feet long being built in the length of it, dividing the vestibule into three walks. The building is heated by a hot-air furnace, a cold-air duct leading from vestibule to the furnace pit. A cold-air duct is also provided to take cold air from the outside. The ventilation is accomplished by means of a ventilating pipe located in each schoolroom, running into its respective flue in the chimney. No air which has been breathed once is used over again but it is taken off through the ventilating shafts.

The toilet appointments in the building consist of two Hyde's automatic closets and a slate urinal, which are located in the basement. The basement is divided into three parts—furnace and fuel room and a room each for the boys and girls, the last mentioned rooms being entirely separate from each other from the beginning at the head of the stairs. The door to the furnace and fuel room opens from the boys' play room. The washbowl and drinking faucet are located in an alcove by the chimney in the recitation room.

The tower on the building is so located that the bell rope comes into the vestibule near the outside door. Each room is

provided with 86 square feet best Pennsylvania black slate boards.

The interior finish is of white pine finished in natural wood. The floors are of hard pine. The ceilings and side walls are frescoed in easy tints which blend with the finish of the woodwork. Each room is equipped with the Grand Rapids seat and desk, those in the primary room being single seats and desks.

The furnace and fuel room has concrete floor. The play rooms have mill shavings for floor, making a clean and noiseless floor.

REPORT OF REGENT
OF
STATE MEDICAL EXAMINERS.

REPORT OF THE REGENT OF THE STATE BOARDS OF MEDICAL EXAMINERS.

THE LAW.

AN ACT to regulate the licensing and registration of physicians and surgeons.

Be it enacted by the senate and house of representatives in general court convened:

SECTION 1. No person shall hold himself out to the public as a physician and surgeon, or advertise as such, or use the title of M. D. or Dr. (or any title which shall show or tend to show that the person using the same is a practitioner of any of the branches of medicine) in New Hampshire after September 1, 1897, unless previously registered and authorized, or unless licensed and registered as required by this chapter; nor shall any person practice medicine and surgery whose authority to practice is suspended or revoked by the agent of a state board.

SECT. 2. Within sixty days after the passage of this act, the governor and council shall appoint three separate state boards of medical examiners, of five members each, so appointed that the term of office of one member shall expire each year, and the members thereafter appointed shall hold office five years, or until their successors are appointed and qualified. One board shall represent the New Hampshire Medical Society, one the New Hampshire Homeopathic Medical Society, and one the New Hampshire Eclectic Society. Each of these three societies shall nominate, annually, twice the number of examiners to be appointed in that year on the board representing it. The names of such nominees shall be annually transmitted, under seal, by the president and secretary, to the governor and coun-

cil, who shall appoint from such lists the examiners required to form the boards and to fill any vacancy that may occur from expiration of office or otherwise. Each nominee, before appointment, shall furnish to the governor and council satisfactory proof that he has received the degree of doctor of medicine from some registered medical school, and that he has legally practiced medicine in this state for at least five years. If no nominees are presented from a society to the governor and council, they may appoint from members in good standing in such society without restriction. The governor and council, upon recommendation of the board, may remove any examiner for misconduct, incapacity, or neglect of duty.

SECT. 3. Every medical examiner shall receive a commission of appointment from the state, and before beginning his term of office shall file with the secretary of state the constitutional oath of office. Each board, or any member thereof, may take testimony and proofs concerning all matters within its jurisdiction. Each board may make any by-laws and rules, not inconsistent with law, necessary in performing its duties.

SECT. 4. The superintendent of public instruction, *ex officio*, shall be the regent of the state boards of medical examiners, and shall perform such duties as are herein specified.

SECT. 5. From the fees provided by this act, the regent may pay all proper expenses incurred by its provisions, except compensation to medical examiners; and any surplus at the end of any year shall be apportioned equally among the three boards; and the state shall not pay the expenses of said boards, or either of them, or compensate them, or either of them, for services rendered under their commissions.

SECT. 6. Each board shall annually elect from its members a president and a secretary for the year, and shall hold one or more meetings each year, pursuant to call of the regent, who may also call joint meetings of the three boards or of their officers. At any meeting a majority shall constitute a quorum, but questions prepared by the boards may be grouped and edited, or answer papers of candidates may be examined and marked, by committees duly authorized by the boards.

SECT. 7. The regent shall admit to examination any candidate who pays a fee of \$10 and submits satisfactory evidence, verified by oath, if required, that he,—

1. Is more than twenty-one years of age.
2. Is of good moral character.
3. Has graduated from a registered college; or satisfactorily completed a full course in a registered academy or high school; or had a preliminary education considered and accepted by the regent as fully equivalent.
4. Has studied medicine not less than four full school years, of at least nine months each, including four satisfactory courses, of at least six months each, in four different calendar years, in a medical college registered as maintaining at the time a satisfactory standard. The regent shall accept, as the equivalent for any part of the third and fourth requirements, evidence of five or more years' reputable practice, provided that such substitution be specified in the license.
5. Has either received the degree of bachelor or doctor of medicine from some registered medical school, or a diploma or license conferring full right to practice medicine in some foreign country.

Students who matriculate in a New Hampshire medical school before January 1, 1898, on the prescribed study of medicine, shall be exempt from this preliminary education requirement.

SECT. 8. Each board shall submit to the regent, as required, lists of suitable questions for thorough examinations in anatomy, physiology and hygiene, chemistry, surgery, obstetrics, pathology and diagnosis, and therapeutics, including practice and materia medica. From these lists the regent shall prepare question papers for all these subjects, which at any examination shall be the same for all candidates, except that in therapeutics, practice, and materia medica all the questions submitted to any candidate shall be chosen from those prepared by the board selected by that candidate and shall be in harmony with the tenets of that school, as determined by its state board of medical examiners.

SECT. 9. Examinations for license shall be given at Concord, in this state, and at least twice annually, and shall be exclusively in writing and in English. Each examination shall be conducted by the regent, or a competent examiner appointed by him, who shall not be one of the medical examiners. At the close of each examination the regent or examiner in charge shall deliver the questions and answer papers to the board selected by each candidate, or to its duly authorized committee, and such board, without unnecessary delay, shall examine and mark the answers and transmit to the regent an official report, signed by its president and secretary, stating the standing of each candidate in each branch, his general average, and whether the board recommends that a license be granted. Such report shall include the questions and answers and shall be filed in the public records of the regent. If a candidate fails on first examination, he may, after not less than six months' further study, have a second examination without fee. If the failure is from illness, or other cause satisfactory to the boards, they may waive the required six months' study.

SECT. 10. On receiving from a state board an official report that an applicant has successfully passed the examinations and is recommended for license, the regent shall issue to him a license to practice medicine. Every license shall be issued by the regent under seal, and shall be signed by each acting medical examiner of the board selected, and by the regent, and shall state that the licensee has given satisfactory evidence of fitness as to age, character, preliminary and medical education, and all other matters required by law, and that after full examination he has been found properly qualified to practice. Applicants examined and licensed by other state examining boards registered by the regent as maintaining standards not lower than those provided by this chapter, and applicants who matriculate in a New Hampshire medical school before January 1, 1898, and who receive the degree M. D. January 1, 1903, may, without further examination, on payment of five dollars to the regent and on submitting such evidence as may be required, receive an indorsement of their licenses or diplomas conferring

all rights and privileges of a regent license issued after examination.

Before any license is issued it shall be numbered and recorded in a book kept in the regent's office, and its number shall be noted in the license. This record shall be open to public inspection, and in all legal proceedings shall have the same weight as evidence that is given to a record of conveyance of land.

SECT. 11. This chapter shall not be construed to affect commissioned medical officers serving in the United States army, navy, or marine hospital service, while so commissioned; or any one while actually serving on the resident medical staff of any legally incorporated hospital; or any legally registered dentist exclusively engaged in practicing dentistry; or any manufacturer of artificial eyes, limbs, or orthopedic instruments or trusses in fitting such instruments on persons in need thereof; or any lawfully qualified physician in other states or countries meeting legally registered physicians in this state in consultation; or any physician residing on a border of a neighboring state and duly authorized under the laws thereof to practice medicine therein, whose practice extends into this state, and who does not open an office or appoint a place to meet patients or receive calls within this state; or to the regular or family physicians of persons not residents of this state, when called to attend them during a temporary stay in the state, or to the hotel physician regularly employed by the landlord of the summer hotel in the care of his guests or employees; neither shall the provisions of this act apply to clairvoyants, or to persons practicing hypnotism, magnetic healing, mind cure, massage, Christian science, so called, or any other method of healing if no drugs are employed or surgical operations are performed; *provided*, such persons do not violate any of the provisions of this act in relation to the use of M. D. or the title of doctor or physician.

SECT. 12. Any person who, not being then lawfully authorized to practice medicine within this state and so registered according to law, shall hold himself out to the public as a phy-

sician and surgeon, or advertise as such, within this state, without lawful registration or in violation of any provision of this chapter; and any person who shall buy, sell, or fraudulently obtain any medical diploma, license, record, or registration, or who shall aid or abet such buying, selling, or fraudulently obtaining, or who shall practice medicine under cover of any medical diploma, license, record, or registration illegally obtained, or signed, or issued unlawfully, or under fraudulent representations or mistake of fact in a material regard; and any person who shall append the letters M. D. to his or her name; or shall assume or advertise the title of doctor (or any title which shall show or tend to show that the person assuming or advertising the same is a practitioner of any of the branches of medicine) in such a manner as to convey the impression that he or she is a legal practitioner of medicine, or of any of its branches, without having legally received the medical degree, or without having received a license which constituted at the time an authority to practice medicine under the laws of this state then in force, shall be guilty of a misdemeanor, and on conviction thereof shall be punished by a fine of not more than one hundred dollars or imprisonment for three months for the first offense; and on the conviction of any subsequent offense, by a fine of not more than two hundred and fifty dollars or imprisonment for not less than six months, or by both fine and imprisonment.

SECT. 13. Every person who is a practitioner of medicine and surgery in this state prior to the passage of this act shall be, upon satisfactory proof thereof to the regent and upon the payment of a fee of one dollar, entitled to registration; and the said regent shall issue to him a certificate signed by himself and the chairman and secretary of such board of medical examiners as the applicant may elect; and said certificate shall state the facts and the cause of said registration, and shall entitle the said person to practice medicine legally in the state of New Hampshire.

SECT. 14. The first meeting of the boards may be called by any one of the members by a notice in writing, stating the time

and place of meeting, sent by mail to each of the other members at least one week prior thereto.

SECT. 15. This act shall take effect on its passage.

[Approved March 16, 1897.]

The examining boards appointed by the governor and council in accordance with the law are as follows:

From the New Hampshire Medical Society:

James T. Greeley, M. D., Nashua, term expires 1900.

Arthur C. Heffinger, M. D., Portsmouth, term expires 1901.

George Cook, M. D., Concord, term expires 1902.

George H. Shedd, M. D., North Conway, term expires 1903.

John F. Robinson, M. D., Manchester, term expires 1904.

President, Dr. Cook; secretary, Dr. Greeley.

From the New Hampshire Homeopathic Medical Society:

Robert V. Sweet, M. D., Rochester, term expires 1900.

Arthur J. Todd, M. D., Manchester, term expires 1901.

George W. Flagg, M. D., Keene, term expires 1902.

Robert H. Hazelton, M. D., Lebanon, term expires 1903.

George H. Morrison, M. D., Whitefield, term expires 1904.

President, Dr. Flagg; secretary, Dr. Hazelton.

From the New Hampshire Eclectic Society:

Wilbur F. Templeton, M. D., Manchester, term expires 1900.

Walter H. True, M. D., Laconia, term expires 1901.

Francis L. Gerald, M. D., Belmont, term expires 1902.

Ezra C. Chase, M. D., Orford, term expires 1903.

Enos Huckins, M. D., Plymouth, term expires 1904.

President, Dr. True; secretary, Dr. Gerald.

The registered practitioners licensed between January 1, 1899, and January 1, 1901, are classified as follows:

A	In practice prior to the enactment of the law.....	11
B	Admitted by examination.....	58
C	Admitted by indorsement of diploma.....	31
Total		100

During the two years one license has been revoked on the ground of misrepresentation.

Total number of licenses issued since the enactment of the law, eight hundred and seventy-nine; of these five have been revoked.

Since the report last made, four examinations have been held, viz.: June 20-21, 1899; December 14-15, 1899; June 19-20, 1900; December 11-12, 1900, with results shown in the following table:

MEDICAL EXAMINATIONS.

EXAMINATION.	Date.	Men.	Women.	Regular.	Homeopathic.	Electic.	Whole number examined.	Licensed.	Rejected.
Fifth	June, 1899	13	11	2	13	10	3
Sixth	Dec., 1899	15	13	1	1	15	12	3
Seventh	June, 1900	19	14	5	19	18	1
Eighth	Dec., 1900	18	1	18	1	19	18	1
		65	1	56	9	1	66	58	8

By vote of the joint boards, a candidate to be entitled to a recommendation for a license must obtain an average of seventy (70) per cent upon all subjects, and must not fall below fifty-five (55) in any one subject.

The questions used in the several examinations are here presented.

FIFTH EXAMINATION.

JUNE 20 AND 21, 1899.

Pathology and Diagnosis.

1. What sediment would you expect to find in a case of stone in the kidneys?
2. What is aneurism and its causes?
3. Differentiate appendicitis from neuralgia of the ovaries.
4. Give symptoms and pathology of cerebro-spinal meningitis and mention the diseases in which it may occur as a complication.
5. Give symptoms and diagnosis of acute gastritis.
6. Describe a case of smallpox and mention the possible complications.
7. Mention the causes of hæmaturia and the diseases in which it may be found as a complication.
8. Give the pathology of diphtheria. How would you differentiate it from membranous croup?
9. Give pathology of most common valvular affection of the heart.
10. How would you diagnose pleurisy from pneumonia?

Obstetrics.

1. Give the symptoms of puerperal septicæmia.
2. What objections are there to the use of ergot during labor?
3. Outline completely your course of procedure in attending normal confinement, including an enumeration of the contents of your obstetrical bag.
4. Describe the treatment of a recent laceration of the perinæum into the rectum.
5. Give the etiology, diagnosis, prognosis, and treatment of tubal pregnancy.
6. What is the pelvis?

7. What are the first signs of labor?
8. What are the symptoms of abortion? Also the dangers?
9. Describe the foetal circulation.
10. What is extra-uterine pregnancy, and how does it terminate?

Physiology and Hygiene.

1. Give functions of spinal nerves.
2. Give structure of the brain.
3. What do you understand by excretion and secretion?
4. What nerves preside over respiration?
5. What is the function of the lymphatic system?
6. Define nervous reflex action. Give an example.
7. What period of isolation is necessary in variola, scarlatina, and rubeola?
8. How should schoolrooms be ventilated?
9. How would you keep the skin in a healthy state?
10. Give hygienic treatment of all septic diseases.

Surgery.

1. Define asepsis and sepsis, and enumerate the septic cocci.
2. Name some causes of ectropion, and describe an operation for a severe case.
3. Make a differential diagnosis between intracapsular fracture, and dislocation of the hip-joint.
4. Describe diagnosis and treatment of fracture of clavicle.
5. Describe treatment for nasal polypus.
6. What is the differential diagnosis between concussion and compression?
7. Describe each step in preparation and application of a plaster of Paris bandage, with precautions to be observed in its use.
8. Describe American operation for rectal fistula, and fully detail after-treatment.
9. What is morbus coxarius? Give the symptoms from its incipency to its full development, and the treatment.
10. Differentiate between a complete inguinal hernia and a hydrocele. Give radical treatment for each.

Anatomy.

1. Place and describe the femur, and give its articulations.
2. Describe the anterior tibial artery, giving its origin, termination, relations, and branches.
3. Locate, describe, and give the articulations of the superior maxillary bone.
4. Describe the external carotid artery, giving its relations and enumerating its branches.
5. Enumerate and describe the coats of the eye.
6. What is meant by origin and insertion of muscles.
7. What are the principal organs of excretion?
8. Describe the ribs.
9. What are the membranes of the brain?
10. Describe the alimentary canal together with the accessory organs of digestion?

Chemistry.

1. What is the difference between a physical and a chemical change? Illustrate.
2. What is nitrous oxide and how prepared?
3. Describe arsenic; how obtained? Name an antidote; what is the chemical action of the latter on the arsenic?
4. What is the difference between putrefaction and fermentation?
5. What is the difference in the chemical composition of sulphuric and sulphurous acid?
6. Chloroform: its composition and properties?
7. A well-water, suspected of contamination from the sink drain, is found to contain a high percentage of sodium chloride:
 - a. What would this indicate?
 - b. Give an easy and quick method for determining the presence of sodium chloride in solution.
8. How would you distinguish a blood stain from iron rust on clothing?
9. In analyzing a sample of milk, how would you determine the percentage of fat; ash, proteids, sugar; total solids, and water?

10. How would you determine the percentage of carbonic acid gas in an overcrowded and badly-ventilated schoolroom?

Therapeutics and Materia Medica (Regular).

1. Name the simple bitters. When are they indicated and when contraindicated?

2. Give the symptoms and treatment of chronic lead poisoning.

3. What pathological conditions may produce hematemesis?

4. What are alkalies? Name the principal remedies of this class, and give therapeutics.

5. Describe variola and outline general treatment.

6. Name the vegetable astringents, and give therapeutics.

7. Describe the eruption characteristic of each of five different drugs.

8. Describe rōtheln. Differentiate from rubeola.

9. Give the preparations of the mineral acids and their therapeutics.

10. What is pernicious anæmia? How diagnosed?

Therapeutics and Materia Medica (Homeopathic).

1. What is meant by succussion and potentizing?

2. Why is it possible to obtain a mother tincture of phosphorus, and not the second decimal dilution?

3. Is the strength of an equal quantity of arsenic, say a drop of the mother tincture, and a grain of the 2 x trituration the same?

4. What is meant by the mother tincture of an acid?

5. Give the characteristic throat symptoms of lachesis?

6. Give five characteristics of sepia?

7. How do we prepare spongia tost?

8. Give diarrhea of phosphoric acid.

9. What are the indications for the use of arsenic in dysentery?

10. What is the diarrhea of Sul.?

Therapeutics and Materia Medica (Eclectic).

1. Give diagnosis and treatment of measles.
2. Describe hemophilia and the treatment used.
3. Describe the most prominent symptoms calling forgelsemium and belladonna.
4. Give a few of the most prominent symptoms of lithæmia and treatment.
5. What are the symptoms calling for apis mel. and apocynum can.?
6. Name three special sedatives and the indications for each.
7. Name the different diseases calling for large and small doses of collinsonia can.
8. Give the symptoms calling for alkalies and acids in acute diseases.
9. Give the symptoms of poisoning from arsenic and treatment.
10. Name the remedies you would use if called to a severe case of convulsions in childhood.

SIXTH EXAMINATION.

DECEMBER 14 AND 15, 1899.

Pathology and Diagnosis.

1. Give diagnosis and pathology of pneumonia.
2. Give diagnosis and pathology of typhoid fever.
3. Give diagnosis and pathology of diphtheria.
4. Give diagnosis and pathology of lupus vulgaris.
5. Give diagnosis and pathology of chronic bronchitis.
6. Give diagnosis of simple continued fever.
7. Describe the three different stages of acquired syphilis.
8. Describe the symptoms of rabies.
9. Give the symptoms and pathology of facial erysipelas.
10. Describe a typical case of influenza, and mention the possible complications.

Obstetrics.

1. What relation, if any, does menstruation bear to ovulation?
2. At what month can pregnancy be positively diagnosed, and by what sign or signs?
3. Under what circumstances would a physician be justified in advising the induction of premature labor?
4. Give cause and treatment of extra-uterine pregnancy?
5. What is accidental hemorrhage? Give symptoms and treatment.
6. Give treatment of incomplete abortion.
7. Give indications for the use of ergot.
8. Give differential diagnosis between ovarian cysts and pregnancy.
9. When may an anæsthetic be used in normal labor?
10. Give etiology of after-pains.

Physiology and Hygiene.

1. What are the functions of the heart?
2. What are the functions of the spinal cord?
3. What points should be considered in dealing with the question of ventilation?
4. What is the cause of the origin and spread of diphtheria?
5. Define metabolism.
6. What is meant by nerve force? How put in motion? Its rapidity?
7. What is the daily average of solids and liquids for normal diet?
8. Describe your method of disinfecting a room after scarlatina; agents used, quantity, and time.
9. Give hygienic treatment in phthisis.
10. What is the best ventilation in the sick room?

Surgery.

1. Describe, in detail, the operation for strangulated hernia, naming each structure with which you would have to deal.
2. What would lead you to suspect a uterine polypus? How would you confirm your suspicion, and what would be your treatment?
3. Name three anæsthetics. Which is safest in the vast majority of cases? Why? When might you choose either of the others?
4. Give the first symptoms and detailed treatment, from its incipency, of hip-joint disease.
5. Give treatment of umbilical fistula.
6. Give treatment of rupture of urethra.
7. Give treatment of stone in bladder.
8. Enumerate causes of acute intestinal obstruction and give symptoms and treatment.
9. Describe steps for amputation through middle third of forearm.
10. Describe surgical shock, and give treatment.

Anatomy.

1. Describe the brachial artery.
2. Describe thoracic and right lymphatic ducts.
3. Enumerate coats of eye and describe crystalline lens.
4. Describe the uterus and its appendages.
5. Give action of diaphragm.
6. What is the office of the inferior vena cava?
7. Describe the peritoneum.
8. Give relations of the spleen.
9. Name the fissures, lobes, ligaments, and vessels of the liver.
10. Name the branches of the abdominal aorta.

Chemistry.

1. Name a pharmacopoeal preparation of arsenic, its toxic dose, and treatment for the latter.
2. Give three tests for albumen in urine. Does its presence always indicate renal disease?
3. What is morphine? Its toxic dose, with symptoms and treatment of same.
4. What is chloral hydrate? How is it prepared, and how does it act as a poison?
5. What is the difference between an atom and a molecule?
6. Give a good test for a supposed blood stain.
7. Name the several secretions of the human body, giving the chemical reaction of each.
8. How does temperature affect the specific gravity of liquids? Explain the floating of ice.
9. How would you decide whether a certain public building were well ventilated or not?
10. What is "laughing gas," and how does it produce anæsthesia?

Therapeutics (Regular).

1. Give the officinal preparations of opium with dosage and therapy.

2. Give the symptoms of opium poisoning with appropriate treatment.
3. Name three conditions from which profound opium narcosis is with difficulty distinguished.
4. Describe acute laryngitis and give treatment.
5. Give symptoms and treatment of chronic lead poisoning.
6. Given a case of diphtheria of the upper air passages, what would be your treatment?
7. Name the antipyretics in the order of their usefulness.
8. Describe variola and give treatment.
9. Describe pleuro-pneumonia and outline treatment.
10. What drugs stimulate hepatic secretion?

Therapeutics (Homeopathic).

1. What is a pathognomonic symptom?
2. What are generic symptoms?
3. What is a subjective and what is an objective symptom?
4. What is the difference between symptomatology in the "Materia Medica Pura" and that of "Chronic Disease"?
5. Mention some palliatives that are in harmony with homeopathic medication.
6. What was the highest potency used by Hahnemann?
7. How does aconite differ from veratrum viride in fevers?
8. What is the general action of cannabes indica?
9. Describe the debility calling for phosphoric acid.
10. Give ten characteristics of Sul.

Therapeutics (Eclectic).

1. Give characteristic symptoms calling for gelsemium.
2. Differentiate between rhus tox and bryonia alba.
3. Give diagnosis and treatment for pneumonia.
4. Give properties and uses of echinacea augustifolia.
5. Give the physiological action of veratrum viride.
6. What are the symptoms calling for adonis vernalis?
7. Give characteristic symptoms calling for muriatic acid and baptisia, also the dose of each.

8. Give symptoms upon which you would prescribe *pulsatilla nigra*.

9. What would be your treatment in a case of diabetes mellitus?

10. Would you give quinine when there is high temperature, skin is hot and dry, and sordes collect upon sides of the mouth and teeth?

SEVENTH EXAMINATION.

JUNE 19 AND 20, 1900.

Pathology and Diagnosis.

1. Give diagnosis and pathology of simple ulcers.
2. Give diagnosis and pathology of scabies.
3. Give diagnosis and pathology of measles.
4. Give diagnosis and pathology of herpes.
5. Give differential diagnosis between smallpox and chicken-pox.
6. Give the symptoms of pericarditis with effusion.
7. Describe the pathological changes in mitral stenosis.
8. Give differential diagnosis between gout and articular rheumatism.
9. Give symptoms and pathology of the bubonic plague.
10. Describe typical case of whooping cough, and mention the possible complications.

Obstetrics.

1. Describe the pelvis and the bones of which it is composed.
2. Give treatment of post-partum hemorrhage.
3. What is symphyseotomy and how performed?
4. Describe Sylvester's method of restoring an asphyxiated child.
5. Describe normal labor by stages.
6. Under what circumstances would you use the forceps?
7. How many kinds of version, and what indications for their employment?
8. How treat a case of puerperal convulsions?
9. What is to be done in a case of placenta previa?
10. After the delivery of the child what are the duties of the obstetrician?

Physiology and Hygiene.

1. What is the difference between nervous reflex action in health and disease?
2. Give the physiology of normal hearing.
3. How many kinds of muscular tissue are found in the human body? Give their physiological distinction.
4. How many cubic feet of air space is required per patient in a general hospital?
5. What precautions should be taken in the use of water?
6. Give hygienic treatment of wounds.
7. Describe the process of coagulation or clotting of the blood.
8. What is the function of the cerebellum?
9. What is the function of a ganglion?
10. What are the ingredients of the gastric juice?

Surgery,

1. Give indications for operative interference in appendicitis.
2. What are the constitutional effects of hemorrhage?
3. Give symptoms and treatment of strangulated hernia.
4. Give sterilizing technic for instruments and hands preparatory to operation.
5. Where and how would you amputate for atheromatous gangrene of foot?
6. Give symptoms of biliary colic, and describe operation for relief of gall stone.
7. Give differential diagnosis between hydrocele and hernia.
8. Dislocation of head of radius and treatment.
9. Ulceration of bladder, diagnosis and treatment.
10. Concussion of brain, diagnosis and treatment.

Anatomy.

1. Name the coverings of a femoral hernia.
2. Give relations of the pancreas.

3. Describe the sacral plexus of nerves.
4. In what part of the cerebral cortex are located the motor cells for the arms and legs?
5. Give the relations of the ascending colon.
6. Name the glands of the body.
7. Describe the seventh pair of cranial nerves.
8. Describe the utero-ovarian circulation.
9. Describe the prostate gland and prostatic urethra.
10. Enumerate the parts of the ear, and give the order of the ossicles from without inward.

Chemistry.

1. Mention the chief properties of glycerine.
2. Explain the construction and mode of action of a mercurial barometer.
3. State the source of litmus.
4. Mention the common source of carbonic oxide in household. What is the product of its combustion?
5. Describe the precautions necessary to be observed in making phosphoric acid.
6. What is Haine's test for sugar in urine?
7. What is the difference between nitrous and nitric acid?
8. When does albumen in urine indicate renal lesion?
9. What is meant by double decomposition?
10. What is hydrogen dioxide?

Therapeutics (Regular).

1. Name the preparations of alum in common use and give therapy.
2. How would you manage a case of pulmonary tuberculosis in the second and third stages?
3. Write a prescription, without abbreviating, which shall contain an expectorant, a diaphoretic, and a pulmonary anodyne, giving directions for use.
4. Give symptoms of chronic lead poisoning with appropriate treatment.

5. What is an oxytocic? Name two remedies of this class, giving indications and contraindications for use.
6. Describe a case of tubercular meningitis.
7. Give dose and therapy of bromoform.
8. Give diagnostic signs and the treatment of empyema.
9. Describe a case of acute laryngitis and write a prescription in full for its treatment
10. Give symptoms of acute carbolic acid poisoning, with the appropriate treatment.

Therapeutics (Homeopathic).

1. Give symptoms calling for aconite, bell., and verat. v.
2. Give the symptoms of apis in erysipelas.
3. Give some of the chief palliatives employed very generally.
4. Mention some palliatives that are in harmony with homeopathic medication.
5. Give five reasons why the alternation of remedies is a reprehensible practice.
6. Mention some remedies that should not be prescribed below the 2x potency, and only then with great care.
7. What caution is to be observed in keeping homeopathic medicines?
8. Give seven grand characteristics of arsenicum.
9. Give ten characteristics of sulphur.
10. Give symptoms indicating carbo vegetabilis in state of collapse.

Therapeutics (Eclectic).

1. Give specific symptomatology of sticta pulmonaria.
2. Give therapy of convallaria majalis.
3. Give symptoms calling for dioscorea villosa.
4. Give symptomatology of apocynum cannabinum.
5. Differentiate between cactus and digitalis.
6. Give symptoms calling for drosera rotundifolia.
7. Give symptoms calling for collinsonia canadensis.
8. Give symptomatology of pilocarpus jaborandi.
9. Give therapy of lithium benzoate.
10. Give symptoms calling for stigmata maidis.

EIGHTH EXAMINATION.

DECEMBER 11 AND 12, 1900.

Pathology and Diagnosis.

1. Give diagnosis and pathology of cholera infantum.
2. Give diagnosis and pathology of cirrhosis of liver.
3. Give diagnosis and pathology of cerebro-spinal meningitis.
4. Give diagnosis and pathology of acute articular rheumatism.
5. Give diagnosis and pathology of gastric ulcer.
6. Describe the formation of varicose veins.
7. Give the physical signs of cardiac hypertrophy.
8. Give the symptoms and pathology of general paresis.
9. Describe the formation of renal calculus and mention the symptoms.
10. Mention the causes and symptoms of gangrene of the lung.

Obstetrics.

1. What would be your treatment of prolonged passive hemorrhage after supposed complete evacuation of the uterus in abortion?
2. What is the most common variety of extra-uterine pregnancy?
3. What would you do with vulvar and vaginal lacerations resulting from labor?
4. What is symphyseotomy, and to what cases is it applicable?
5. How would you determine if an abortion had taken place in the second month?
6. Distinguish between a fibroid tumor and true pregnancy.

7. Under what circumstances should the cervix be artificially dilated and the foetus removed?

8. Does the maternal blood enter the circulation of the child?

9. Give mechanism and disposition of breech presentation.

10. When does phlegmatia dolens appear, and what are its symptoms?

Physiology and Hygiene.

1. Where is mucous membrane found and what is its general function?

2. What is the office of the optic nerve? What nerves produce sensation in the tissues of the eye?

3. Describe the mechanism of vomiting.

4. Define zymotic. Mention three diseases classed under this head.

5. What is the function of the blood corpuscles?

6. What is the function of the saliva?

7. What is the average time that food remains in the stomach after an ordinary meal?

8. What means would you take to prevent the spread of consumption?

9. Should fluids be taken with the food, and if so, what?

10. How often should baths be taken by a healthy person?

Surgery.

1. How do you administer ether?

2. Give general principles of antiseptic treatment.

3. Describe operative treatment of internal hemorrhoids.

4. Give treatment for senile gangrene.

5. Give treatment for accidents from lightning.

6. Give treatment for depressed bone in fracture of skull.

7. Describe amputation at shoulder joint.

8. Enumerate varieties of hip dislocations, and give technique of reduction.

9. Give technique of opening and closing the abdomen.

10. Diagnose and treat a pelvic abscess.

Anatomy.

1. Describe the special cervical vertebræ.
2. Enumerate the muscles of the tongue.
3. Place and describe the kidney.
4. Draw a diagram of the base of the brain, naming the parts seen on its surface.
5. Name the bones of the head and the different kinds of joints or articulations represented.
6. Describe the ear in detail.
7. Name the valves of the heart, and give the opening guarded by each.
8. What is the name, function, and distribution of the fifth cranial nerve?
9. What is anastomosis?
10. Name organs of excretion and secretion.

Chemistry.

1. What effect have inhalations of ozone on animals?
2. Give chemical antidotes for arsenic and iodine.
3. Define electrolysis.
4. What is a reagent?
5. What is the appearance of arsenic?
6. What constituent is common to *all* acids?
7. Define vapor, density, and specific gravity, giving examples of each.
8. Of what is the atmosphere composed, and what is its greatest impurity?
9. What is an amorphous body?
10. Give immediate treatment for poisoning by Paris green.

Materia Medica and Therapeutics (Regular).

1. Describe traumatic tetanus.
 - a. Give period of incubation.
 - b. Give treatment.
2. Give the preparations of strychnia, with the dose of each.
 - a. Give general therapy.

3. Give symptoms and treatment of strychnia poisoning.
4. Give differential diagnosis between tetanus and strychnia poisoning.
5. Is iodide of potassium contraindicated in incipient pulmonary tuberculosis, and if so, why?
6. Give the preparations of iodine, including dosage and therapy.
7. When is opium indicated in appendicitis?
8. Name the saline cathartics, giving the dose of each and the indications for their use.
9. Give symptoms and treatment of poisoning by carbolic acid.
10. Differentiate lobar pneumonia from an empyema in a child.

Therapeutics and Materia Medica (Homeopathic).

1. What is the general homeopathic applicability of arsenicum?
2. Give seven grand characteristics of arsenicum.
3. Give six characteristic symptoms of phosphorus.
4. What are the mental symptoms of sulphur?
5. What preparations of mercury do we use in our Materia Medica?
6. Mention three characteristics of graphites.
7. What is the relation of decimal and centesimal potencies?
8. What is proving, and what is meant by the proving of drugs?
9. What is a clinical symptom?
10. What is psora as Hahnemann understood it?

REGISTERED PHYSICIANS.

The entire number of practitioners of medicine and surgery registered at this date (January 1, 1901) is eight hundred and seventy-four. A complete list is here given.

"A" is used to designate those who were in practice prior to the passage of the law; "B," those who have passed the examination; "C," those graduates of a New Hampshire medical school whose diplomas have been indorsed.

PETITION.

In August, 1899, Thomas H. E. Hart of Nashua petitioned the supreme court to issue a writ of mandamus to compel the regent to register him as a physician, and to issue a certificate under section 13 of the law. By agreement of counsel the facts were admitted, a case was drawn, and the question submitted to the full bench for its determination. At the adjourned law term held in Concord in March, 1900, the court rendered the following decision:

Hillsborough,)
December Term, 1899. }

THOMAS H. E. HART *v.* CHANNING FOLSOM.

Petition for mandamus to compel registration and the issuance of a certificate entitling the plaintiff to practice medicine in this state. The agreed facts are stated in the opinion.

William J. McKay, for the plaintiff.

Edwin G. Eastman, attorney-general, for the defendant.

Pike, J. "No person shall hold himself out to the public as a physician and surgeon, or advertise as such, or use the title of M. D. or Dr. (or any title which shall show or tend to show that the person using the same is a practitioner of any of the branches of medicine) in New Hampshire, after September 1, 1897, unless previously registered and authorized, or unless licensed and registered as required by this chapter." Laws 1897, c. 63, s. 1. Section 2 of the chapter provides for the appointment, by the governor and council, of boards to examine applicants for a license; and section 4 provides that the superintendent of public instruction shall be, *ex officio*, the regent of the boards. By section 7, the regent is required to admit to examination any candidate who pays a fee of ten dollars, and submits satisfactory evidence, under oath if required, that he is twenty-one years of age and of good moral character; that he is a college graduate, or has completed a course of study in an academy or high school or an equivalent course; that he has studied medicine not less than nine months

in each of four years, including a course of at least six months in each year in a medical college of satisfactory standing; and that he has received the degree of bachelor or doctor of medicine from a medical school, or a diploma or license conferring the right to practice medicine in some foreign country. Section 8 requires the boards to furnish to the regent questions for thorough examinations in anatomy, physiology, hygiene, chemistry, surgery, obstetrics, pathology, diagnosis, and therapeutics, including practice and materia medica, from which the regent is to prepare questions to be submitted to candidates. Section 9 requires that the answers to the questions shall be in writing, and that they shall be marked by one of the boards and returned to the regent with a recommendation by the board whether a license shall be granted to the candidate. Section 10 requires the regent to issue a license to the candidate if he successfully passes the examination and is recommended for a license. Section 13 provides that "Every person who is a practitioner of medicine and surgery in this state prior to the passage of this act shall be, upon satisfactory proof thereof to the regent and upon the payment of a fee of one dollar, entitled to registration," and a certificate of the facts which shall entitle him to practice medicine. Section 12 makes a person who holds himself out as a physician and surgeon, but is not authorized to do so as required by the act, liable to punishment.

The defendant is regent. June 14, 1899, the plaintiff applied to him for registration and a certificate, and tendered the prescribed fee. He furnished statements of three residents to the effect that he attended them as a physician prior to the passage of the act, and a certificate of the city clerk of Manchester that the plaintiff certified to a death in 1896. His application was denied because he did not comply with a rule of the regent requiring the applicant to furnish certificates of a member of one of the medical societies mentioned in the act, and of two well known citizens, that he was a practitioner of medicine and surgery.

A practitioner of medicine and surgery is a physician and

surgeon who habitually holds himself out for the practice of the profession. *State v. Bryan*, 98 N. C. 644. The provision that "every person who is a practitioner . . . in this state prior to the passage of this act shall be . . . entitled to registration," raises the question whether it is enough for the applicant to show that he had been such a practitioner at some time in the past, or whether he must show that he was one when the act was passed. The language seems to refer to the present time,—“every person who is a practitioner.” Although these words are qualified by the expression “prior to the passage of this act,” they cannot reasonably be held to refer to persons who had been practitioners, but had ceased to be such when the act was passed. A fair construction of the language is that only those physicians and surgeons who were in practice in this state when the act was passed are entitled to registration under the section. This view is strengthened when it is considered that the purpose of the act was to prevent ignorant persons from administering drugs and trifling with the public health. The act prohibits a person from practicing medicine in this state without a license, and requires applicants—not already physicians—to show that they have passed a prescribed course of training and possess the requisite degree of skill. But the fact that an applicant is a physician and surgeon in practice at the time, seems to have been deemed by the legislature as sufficient evidence that he had pursued the requisite course of training and possessed a reasonable degree of skill in the profession.

It is the duty of the regent to issue a license to each applicant who comes within the provisions of the act. Whenever application is made under section 13, the regent must determine (1) whether the applicant is a physician and surgeon, and (2) whether he was engaged in practice when the act was passed. In performing this duty he acts in a judicial capacity, and is bound to receive and consider all evidence that legally bears upon the questions. If for any reason the applicant is unable to furnish such a certificate as the regent may require, the fact does not conclusively show that the applicant does

not possess the necessary qualifications. The regent should consider all competent evidence offered; and if he is satisfied that the applicant comes within the provisions of the section, should issue to him a license.

The constitutionality of the act has not been considered, for the plaintiff has attempted to avail himself of its provisions and is therefore not in a position to question its validity.

Mandamus lies to compel a ministerial officer to perform a particular duty (*Butler v. Selectmen*, 19 N. H. 553; *Ballou v. Smith*, 29 N. H. 530; *School District v. Carr*, 63 N. H. 201; *Boody v. Watson*, 63 N. H. 320; *School District v. Greenfield*, 64 N. H. 84; *Boody v. Watson*, 64 N. H. 162), and to set inferior courts in motion if they refuse to hear a case which is properly before them (*Smith*, N. H., 482), but not to compel them to find in a particular way. *Spell. Ex. Rel.*, s. 1384; *United States v. Seaman*, 17 How. 225; *United States v. Commissioner*, 5 Wall. 563; *Farwell's Petition*, 2 N. H. 123; *Gage v. Censors*, 63 N. H. 92, 95; *Mansfield v. Fassett*, 63 N. H. 573.

The regent should give the petitioner a hearing, and admit all competent evidence bearing upon the questions at issue. If the evidence submitted amounts to satisfactory proof that the plaintiff was a physician and surgeon in practice in this state at the time of the passage of the act, he should be registered, and a certificate should be issued to him; if not, his application should be denied.

Case discharged.

All concurred.

This decision, in the main, supports the regent in his interpretation and administration of the law. It settles the disputed points beyond discussion.

The law, however, will not enforce itself. Whether it is to be effective or not will depend upon the attitude of the registered physicians. Report says that there are some physicians in the state who have never registered, though entitled to registration upon application accompanied by the fee of one dollar; that others continue to advertise as physicians after

their applications for registration have been denied. Unless the law is to be amended so that it may become the duty of somebody to enforce it, its effectiveness will depend upon the sense of personal responsibility among those already registered.

Respectfully submitted.

CHANNING FOLSOM,

Regent.

Savings-bank deposits taxable.....	41,873.204
Insurance capital....	1,475,000
	<u>\$251,429.049</u>
Taxes assessed upon property inventoried.....	\$3,971,901.80
Taxes assessed upon savings-bank deposits.....	316,685.41
Taxes assessed upon insurance capital.....	14,750.00
	<u>\$4,303,337.21</u>

In the county of Coös there is an additional valuation on unincorporated places of \$1,590,000. Taxes assessed upon same amount to \$7,060.25.

In 1898, when last tabulation was made:

Total of inventories amounted to.....	\$204,734,731	Taxes, \$3,813,808.20
Deposits in savings-banks.....	46,280,344	" 350,460.74
Insurance capital....	1,475,000	" 14,750.00
	<u>\$252,490,075</u>	<u>\$4,179,018.94</u>
Increase of inventory valuation in 1900 over 1898.....		\$3,346,114
Decrease in savings-bank deposits same period.....		4,407,140

Tables are subjoined giving the assessment of taxes for the current year upon the railroad, telegraph, and telephone companies of the state.

A deduction has been made from the valuations of all sums assessed in towns and paid by the railroads upon their property not required for general use in the running of the roads. The amount thus obtained has been

assessed at the average rate of property taxation throughout the state, to wit: \$1.70 upon each \$100 of taxable property. This rate has been gradually increasing. The rate in 1899 was \$1.67; in 1898, \$1.65; in 1897, \$1.64; in 1896, \$1.60; in 1895, \$1.52; in 1894, \$1.50. In 1887, thirteen years ago, it was \$1.38.

Several valuations were increased, to wit: Boston & Maine, \$200,000; Concord & Montreal, \$560,000; Connecticut River, \$100,000; Mount Washington, \$25,000; Sullivan County, \$50,000; Wilton, \$50,000; Concord Street, \$5,000; Laconia Street, \$15,000; Nashua Street, \$50,000; and the valuation of Manchester Street was decreased \$25,000; making total increase over last year, \$1,030,000.

The railroad tax is \$382,855.34, against \$358,878.22 for 1899; telegraph, \$3,094.00, against \$3,540.40; telephone, \$5,910.90, against \$5,664.64; total, \$391,860.24, against \$368,083.26; increase, \$23,776.98.

The railroad tax is paid by the corporations to the state treasurer, and divided as follows: one entire fourth part to towns through which the roads pass, for right of way and buildings, proportioned to expenditure for the same; the other three fourths to each town in the state, such portion thereof as the number of shares owned in said town bears to the whole number of shares in the corporation; and the balance of the said three fourths (non-resident) directly to the state, and is a part of its revenue.

The telegraph and telephone tax is paid to the state treasurer and not divided, but held by the state as part of its revenue.

The expense of the railroad commission is met by a tax levied on the gross receipts of the railroads. Its amount is \$7,333.97, against \$7,430.19 for 1899.

The amount of tax assessed upon the railroad, telegraph, and telephone properties in this state since the

formation of the board of equalization has been annually as follows: 1879, \$215,094.72; 1880, \$176,192.44; 1881, \$185,109.85; 1882, \$170,871.58; 1883, \$194,757.97; 1884, \$206,688.69; 1885, \$194,358.47; 1886, \$213,337.27; 1887, \$220,538.70; 1888, \$242,994.79; 1889, \$246,186.32; 1890, \$272,500.20; 1891, \$287,849.31; 1892, \$306,661.30; 1893, \$312,920.15; 1894, \$315,313.91; 1895, \$320,382.38; 1896, \$338,359.11; 1897, \$357,926.51; 1898, \$360,666.69; 1899, \$368,083.26; 1900, \$391,860.24.

JOHN M. MITCHELL, From July 27, 1895, to Dec. 22, 1896. EDWARD J. BURNHAM, From Nov. 15, 1899, to Oct. 5, 1900.
 GEORGE G. DAVIS, From Dec. 31, 1896, to Sept. 29, 1897. JAMES F. BRENNAN, From Nov. 21, 1900, to ———
 JOHN KIVEL, From Sept. 29, 1897, to Oct. 9, 1899.

SECRETARIES.

JULIA R. CARPENTER, From July 27, 1895, to March 9, 1896. LILLIAN C. STREETER, From November 21, 1900, to ———
 OLIVER J. M. GILMAN, From March 9, 1896, to Nov. 21, 1900.

SUMMARY OF RECOMMENDATIONS

OF THE

STATE BOARD OF CHARITIES AND CORRECTION TO THE LEGISLATURE.

1. Amend present law, chapter 116, Laws of 1895, as follows: Provide that the board be authorized to appoint a secretary from outside its membership to give his entire time to the duties of the board, collect statistics, attend to correspondence, act as visiting agent to the placed-out children, and supervisor of volunteer visitors, and perform such other duties as may rightfully belong to his office, upon a salary not to exceed two thousand dollars per annum. (See pages 28, 29.)

2. Provide that all town and city overseers of the poor shall keep an exact record of all paupers fully supported, all persons partially supported or relieved, all vagrant lodgers at their expense, together with the amount paid by them for such support or relief, and make an annual return of the number of such persons supported and relieved and the cost of such support and relief to the State Board of Charities on or before the 1st day of October in each year. (See pages 18, 19, 28, 31, and 32.)

3. Amend section 1, chapter 27, Public Statutes, relating to the reports of county commissioners, and provide that the reports of the ten counties in the state be prepared in a uniform manner alike in each county, so that accurate statistics can be compiled from them,—giving the cost of maintaining the county farm, amount of outdoor relief given, number of paupers maintained at farm, number of people helped outside the farm, exact cost per capita per week at county farms

computed under the same method in each county, number of insane, number of feeble-minded, number of prisoners,—and return statistics to State Board of Charities regularly on or before the 1st day of October in each year on blanks furnished by the board, suggestions for which will be found on pages 20 and 21.

4. The board unanimously recommends the adoption of a probation law and provision for an indeterminate sentence in accordance with the ideas expressed by Governor Rollins in his paper upon "The Indeterminate Sentence," annexed to this report. (See pages 75 and 102.)

5. The State Board of Charities unanimously recommends that the recommendations of the committee appointed in 1893 to investigate the cause of fire at the Strafford county almshouse, by which forty or more persons were burned to death, reported by them to the legislature of 1893, be adopted by the legislature of 1901, as follows:*

"First. That the state assume entire support, control, and management of the insane, and that county asylums for the insane be abolished.

"Second. That all buildings hereafter constructed to be occupied as almshouses, asylums for the insane, jails, and orphans' homes shall be built of brick, iron, or stone, with partitions of fireproof or slow-burning material, the plans and specifications to be first approved by the state board of health, or such other authority as the legislature may direct.

"Third. That the state board of health (or some other state authority) shall make at least annual inspections of such institutions, and shall have mandatory powers in all matters relating to the protection against fire, drainage, and sewerage, ventilation of buildings, and other matters pertaining to the health and safety of the inmates, and all orders upon these matters shall be executed or carried into effect by the county commissioners or other legal authorities in charge.

* Page 26, Preliminary Report of the Investigation conducted by the state board of health under the direction of a concurrent resolution passed at the January session of the legislature, 1893, relating to the burning of the Strafford County Asylum for the Insane, and other facts pertaining to the care of the pauper insane in New Hampshire, with conclusions and recommendations.

Fourth. That we believe it to be for the best interests of all county institutions that the law should be so amended that one county commissioner be elected biennially, so that all members of the board shall not go out of office simultaneously, as often does occur under the present law.

"We believe the foregoing recommendations to be for the best interests of the state, and we are prepared to support them, and to give our reasons therefor, before any legislative committee.

"JOHN B. SMITH,

"E. G. EASTMAN,

"JAMES A. WESTON,

"G. P. CONN,

"JOHN J. BERRY,

"IRVING A. WATSON,

"State Board of Health.

"MARCH 8, 1893."

6. The board unanimously recommends that the legislature appropriate a sum of money sufficient to establish and maintain a state home for the feeble-minded. (See pages 50-52.)

LAWS RELATING TO STATE BOARD OF CHARITIES AND CORRECTION.

(Laws of 1895, Ch. 116, Sect. 4.) The governor and council shall appoint five persons to serve as a state board of charities and correction, whose duty it shall be to see that the provisions of this act are faithfully carried out, and that said minor children receive suitable education, training, and support. They shall first be appointed for one, two, three, four, and five years, and afterwards for five years as vacancies arise, and shall receive no compensation except expenses incurred.

(Laws of 1895, Ch. 116, Sect. 5.) Any overseer of the poor or county commissioner who shall unreasonably neglect to comply with the requirements of this act shall be removed from office by the supreme court, or a justice thereof, upon the petition of the State Board of Charities, upon proof thereof being made, and after hearing upon said petition.

(Laws of 1895, Ch. 116, Sect. 6.) Overseers of the poor and county commissioners shall report to the State Board of Charities all minors cared for by them under this act, with copies of the contracts made, and such other information as may be required by such board; and such Board of Charities shall report annually to the governor and council to such an extent as may be required.

(Laws of 1895, Ch. 116, Sect. 7.) The reasonable expenses of said State Board of Charities shall be paid by the governor and council out of any funds in the treasury not otherwise appropriated.

(Laws of 1895, Ch. 116, Sect. 8.) It shall be the duty of the board to inspect all state and county charitable or correctional institutions, except the state prison and the asylum for insane at Concord, and report to the governor and coun-

cil and legislature biennially the result of their inspection, with a recommendation for such changes in existing laws as in their judgment the public good requires; and shall, on making such inspection, report and recommend to the county commissioners, or such other county or state officers as have the control and management of such institutions, the changes, if any, that said boards find on such inspection should be made in said institutions.

(Laws of 1895, Ch. 116, Sect. 9.) The secretary of the state board of health shall be, *ex-officio*, member of the State Board of Charities and Correction; and shall, when requested by the board, give advice and perform service without additional compensation except expenses incurred.

(Laws of 1895, Ch. 116, Sect. 10.) They may give any minor under their care to any suitable person, to be adopted by such person, whenever such adoption is for the best interests of said minor, providing it shall appear, upon a hearing upon the petition of such person to the probate court for leave to adopt such child, that its parents have abandoned the same, or that they are unknown, and in such case notice of the proceedings may be given by publication, and no consent of the parents or others shall be required in order to legally adopt said child.

SUPPORT OF DEPENDENT MINOR CHILDREN.

(Laws of 1895, Ch. 116, Sect. 1.) No minor between the ages of three and fifteen years shall be supported at any county almshouse in this state for more than sixty days, unless the consent of the Board of Charities shall have been obtained, excepting such as are under serious physical disability or are mentally incapacitated for education, or are under sentence for crime; and it shall be the duty of the commissioners of the various counties to find suitable homes for such minor children within said period of sixty days. On and after the expiration of said sixty days, if suitable homes have not been provided said minors, other than said county almshouse, the State Board of Charities shall have full control over said minor children, and shall be charged with the duty of procur-

ing permanent homes for said minors, as a board or through such agent as said board may appoint, whenever it shall appear to them that the welfare of the minor will be promoted thereby, at the expense of the county to which such minor is chargeable, the compensation to be the same as is allowed the county commissioners.*

(Laws of 1895, Ch. 116, Sect. 2.) It shall be the duty of the overseers of the poor of towns and cities liable for the support of such minors, and of the county commissioners of counties liable for such support, to procure such minors supported at some orphan asylum or home or with some private family or families of good repute.

(Laws of 1895, Ch. 116, Sect. 3.) It shall be the duty of overseers of the poor and county commissioners, as soon as practicable, to find permanent homes for all such orphan minors, and make contracts for their education and support during minority, and all such contracts shall be subject to rescission by the State Board of Charities, whenever the interest of such minors shall make it necessary, and said Board of Charities shall have the same authority, in respect to the control of all children for whom they provide permanent homes, as is now vested in overseers of the poor and county commissioners.

(Laws of 1893, Ch. 61, Sect. 1.) The overseers of the poor in any town, or the county commissioners of any county, may send to the New Hampshire Orphans' Home or to any orphans' home in this state, or other institution devoted to or suitable for the care, protection, and education of children, upon such terms as may be agreed upon, all children residing in their respective towns or counties who are not employed in some lawful business, and whose parents are unable or neglect to maintain them; but, in the selection of such home or institution, said overseers and commissioners shall give the preference to that home or institution that is conducted by or under the auspices of the church or religious denomination of which that child or the child's parents are members; and said home

* Substituted for original section by the Laws of 1897, chapter 91.

or institution shall thereupon have the same authority in respect to such children as is now vested in overseers of the poor and county commissioners.

STATE AID TO INDIGENT DEAF AND DUMB, BLIND, AND
FEEBLE-MINDED PERSONS.

(Public Statutes of 1891, Ch. 86, Sect. 1.) Sums of money are annually appropriated for the support and education of indigent deaf and dumb and blind persons, and indigent feeble-minded children of this state, as follows: Five thousand dollars for indigent deaf and dumb persons, four thousand dollars for the indigent blind persons, and one thousand dollars for indigent feeble-minded children.

(Public Statutes of 1891, Ch. 86, Sect. 2.) Upon the recommendation of the State Board of Charities and Correction* assistance shall be furnished to such persons, in such amounts, and at such asylums, schools, or other institutions designed for the purpose, as the governor and council shall direct.

(Public Statutes of 1891, Ch. 86, Sect. 3.) The furnishing of such assistance shall not affect the settlement of any person nor his right to vote.

* The first eleven words of this section were added by the Laws of 1899, chapter 99.

INFORMATION ABOUT STATE BOARD OF CHARITIES.

COMPOSITION AND DUTIES.

The State Board of Charities and Correction of New Hampshire was authorized by an act of the legislature, passed in March, 1895, a copy of which is prefixed, and consists of five members, three men and two women, appointed by the governor and council. The first members were appointed in July, 1895, for terms of one, two, three, four, and five years each. Since that time, as vacancies arise, members are appointed for terms of five years each. They serve without compensation except for expenses incurred.

Since March, 1900, the board has had an office in the state library building, where the work of the board is carried on, and where all its records, books, and papers are preserved. Previous to that time it had no office, but met by courtesy in the adjutant-general's office in the state house, and its records, papers, and books were kept in Alton, N. H., at the house of the secretary.

The by-laws of the board, adopted in September, 1899, provide for meetings on the third Wednesdays of alternate months, and for special meetings at the call of the president, secretary, or any three members of the board.

Analyzing the statute under which the Board of Charities and Correction works, we find that section 1 states that "No minor between the ages of three and fifteen years shall be supported at any county almshouse in this state for more than sixty days, unless the consent of the Board of Charities shall have been obtained, excepting such as are under serious physical disability, or are mentally incapacitated for educa-

tion, or are under sentence for crime." Section 3 provides that overseers of the poor and county commissioners shall find permanent homes for such orphan minors, and make contracts for their education and support during minority, subject to rescission by the State Board of Charities whenever the interests of such minors shall make it necessary, and further states that "said Board of Charities shall have the same authority in respect to the control of all children for whom they provide permanent homes as is now vested in overseers of the poor and county commissioners." Section 4 provides for the appointment, by the governor and council, of five persons to serve as a State Board of Charities and Correction, "whose duty it shall be to see that the provisions of this act are faithfully carried out, and that said minor children receive suitable education, training, and support." The care of the dependent children of the state is thus the main duty of the board. But under section 8 it is also expected "to inspect all state and county charitable or correctional institutions, except the state prison and the asylum for insane at Concord, and report to the governor and council and legislature biennially the result of their inspection, with a recommendation for such changes in existing laws as in their judgment the public good requires; and shall, on making such inspection, report and recommend to the county commissioners, or such other county or state officers as have the control and management of such institutions, the changes, if any, that said boards find on such inspection should be made in said institutions."

The board is therefore seen to be chiefly supervisory and advisory, with very little absolute power. The dependent children of the state are primarily under the direct care of the county commissioners (thirty in number, three for each of the ten counties in the state), or of the overseers of the poor of the towns or cities where they have their settlement. It is the duty of these county commissioners and overseers of the poor to remove the children from the almshouses, and place them in homes, or place them directly in homes without previous detention in almshouses, if need be; and it is the

duty of the State Board of Charities to see that this is done, and that the homes provided are suitable.

Under section 5, if the overseers of the poor or county commissioners "shall unreasonably neglect to comply with the requirements of this act, they shall be removed from office by the supreme court or a justice thereof, upon the petition of the State Board of Charities, upon proof thereof being made and after hearing upon said petition."

The only legislation enacted for the benefit of children in New Hampshire, previous to this law of 1895,* was in 1879, when a law was passed appropriating \$10,000 annually for the support in schools outside of the state of indigent deaf and dumb, blind, and feeble-minded children, apportioned as follows: \$5,000 for the deaf and dumb, \$4,000 for the blind, and \$1,000 for the feeble-minded. There is no provision within the state for the education of any of these defectives. The children are appointed to these schools by the governor and council, and since 1899, the appointments are made only upon recommendation of the State Board of Charities. It is also the duty of the board to visit these state beneficiaries and report upon them to the governor and council. Previous to 1899, they were under no supervision.

Though the number of visits to be made to the state and county institutions is not prescribed by the statute, the effort is made to visit them at least once each year, and it is the opinion of the present board that they should be visited much oftener.

In May of the present year, blanks were prepared by the present secretary, for use in visiting the county farms and jails, thus securing uniform information and statistics from each institution which we hope will eventually prove to be of some value. These reports are all filed in this office after being submitted to the board.

* Except that two years previous to the passage of this law of 1895, a law was passed *permitting* the county commissioners or overseers of the poor to remove the children from almshouses, and put them in orphans' homes or families, but as this action was not made obligatory, no notice was taken of it, and the law was practically inoperative.

In April, 1900, it was voted that members should present all bills for their expenses regularly at the January and July meetings of each year, to be recorded by the secretary, before being presented to the state treasurer. Until this time no record had been kept of the expenses of the board, and the present table was compiled by the state treasurer from his records.

This year visits have been made to all the institutions outside the state where the deaf, dumb, blind, and feeble-minded beneficiaries of the state are cared for, excepting to the deaf and dumb asylum at Mystic, Conn., where there is but one New Hampshire child, and reports filed at this office. A member of the board also attended the meeting of the National Prison Association in Hartford, Conn., in 1899, and the National Conference of Charities and Correction in Kansas in May, 1900. The state prison of Connecticut has also been visited, and the Wayne County Asylum and Almshouse at Eloise, Mich.

Though the New Hampshire State Prison and State Asylum for the Insane are expressly excepted by statute from the institutions to be visited and inspected by the board, one member of the board has visited each institution this year,—the state prison by special request of the governor, and the state asylum for the insane by special request of the superintendent. After Governor Rollins passed his order forbidding the general public from visiting the state prison, he sent a special request to the Board of Charities to visit the institution in a body and report to him.

One of the most important duties of the Board of Charities is to collect statistics and information regarding pauperism in the state, and the administration of the state charities, to be printed in their biennial report, since it is only by the collection and tabulation of exact statistics that any satisfactory results of charitable endeavor can be demonstrated.

To this end it would respectfully recommend that section 1, chapter 27, Public Statutes, relating to county commissioners' reports, be amended to provide that the reports of

the ten counties in the state be prepared in a uniform manner in each county, in accordance with suggestions and tables herewith annexed.

Also provide that all town and city overseers of the poor shall keep an exact record of all paupers fully supported, all persons partially supported or relieved, all vagrant lodgers at their expense, together with the amount paid by them for such support or relief, and make an annual return of the number of such persons supported and relieved and the cost of such support and relief to the State Board of Charities on or before the 1st day of October in each year.

SUGGESTIONS FOR UNIFORMITY.

[The following suggestions for uniformity in county commissioners' reports are made, so that accurate and uniform statistics can be compiled therefrom.]

1. Give name and postoffice address of superintendent of county farm, and location of farm.

2. Names, ages, and particulars about all inmates, as specified in annexed blanks.

3. Number of births and deaths during year, with dates and names.

4. Number in almshouse at beginning of year.

Number received during year.

Number discharged during year.

Number remaining at close of year.

Total number of weeks' board given paupers.

Total number of weeks' board given prisoners.

Total expense of farm.

Total receipts of farm.

Net cost of farm.

Exact cost per capita per week, computed by subtracting total receipts from total expenditures, and dividing result by total number of weeks' board given paupers and prisoners alone—not working force of household.

Exact sums paid out for paupers off the farm, as follows:

Sums paid to state industrial school.

Sums paid to state insane asylum.

Sums paid for dependent children off the farm.

Sums paid for all other pauper relief off the farm.

Total.

GENERAL REPORT.

The board has had many difficulties to contend with in preparing this third biennial report, and is keenly alive to its many deficiencies. But it is the best that could be done in the limited time allotted, and with the limited means at its disposal. The chairman and secretary, upon whom the responsibility of the biennial report devolves, have held their offices but ten days. Moreover they are also the two most recently appointed members of the board (save the one so recent that he has not yet begun his work), and have therefore had no part whatever in the work of the entire first year covered by the report.

Previous to May 15, 1900, no records had been kept of visits to institutions, and no reports filed for reference, and there is no provision of law in this state requiring statistics of state or county or town institutions to be returned to the Board of Charities at stated dates. The reports of the counties and towns are all compiled by different methods, and even after the great labor involved of going through them all, adding up columns here and subtracting there, in the effort for accuracy, the results are far from satisfactory. It is earnestly hoped that the present legislature will pass a law providing for uniform reports from each county and town and for the returns of statistics to the State Board of Charities on or before the 1st day of October in each year.

Then the board has no salaried official, but is entirely dependent upon the voluntary labor of its members. Yet the time consumed in carrying on the office work of the board is very great. Since April 5, 1900, when the office was opened and the work of the card record committee began, until the present date, it has been necessary for one member of the board to give up almost her entire time to this work, and but

for the generosity of Governor Rollins and his council in appropriating two hundred dollars from the contingent fund for clerk hire, we must have paid our clerk from our own pockets. And but for the kindness of the board of public instruction in permitting us to use their typewriter, we could not have compiled our card record or conducted our large correspondence. There is ample work in the office of the State Board of Charities for a salaried secretary who shall give his entire time to the work, with an assistant stenographer for clerical work, who can also keep the office open during the necessary absences of the secretary, visiting institutions and the homes of placed-out children. It is earnestly hoped that the present legislature will recognize this fact, appropriate a sum of money sufficient to pay these expenses, and thus put the State Board of Charities upon the level of the other state departments, and relieve it from its present humiliating position of being itself an object of charity.

The board held eight meetings from December, 1898, to December, 1899, and nine meetings from December, 1899, to December, 1900. A table showing the dates of the meetings and attendance is prefixed.

Previous to September, 1899, the board met the first Wednesday in each month. Upon September 21, 1899, the present by-laws were adopted, providing, among other things, for meetings the third Wednesday of each alternate month, beginning with January.

Only one member is now upon the board who was serving when the last report was prepared. This member, Mr. O. J. M. Gilman of Alton, is also the only one of the original members of the board appointed July 9, 1895, who is still in office. Of the members serving in December, 1898, when the last report was prepared, Mrs. M. H. Varick and Mr. J. M. Whipple resigned March 21, 1899. Mrs. J. R. Carpenter's term expired August 29, 1899, and she declined a reappointment on account of failing health, and Mr. John Kivel resigned October 9, 1899. Mrs. Ella L. Follansby of Exeter was appointed March 31, 1899, to fill out Mrs. Varick's unexpired term. Mr. E. J. Burnham of Manchester was appointed

April 24, 1899, to fill out Mr. Whipple's term. Mr. James F. Brennan of Peterborough was appointed October 27, 1899, to fill out Mr. Kivel's term, and Mrs. Lilian C. Streeter was appointed the same day to succeed Mrs. Carpenter. On October 9, 1900, Mr. Burnham resigned, and Mr. Oliver E. Branch of Manchester was appointed November 22, 1900, in his place.

A table is prefixed showing the institutions visited by the board during the past two years, with dates of visits and names of visitors. From this it appears that the board paid twenty-four visits during the first year and fifty-eight during the second. But, as explained above, the record for the first year is not complete.

To make a study of the questions of pauperism and crime from a scientific standpoint, and educate a wise, enlightened public opinion thereupon, to hold up to the public the highest ideals in charitable and philanthropic work, to watch over the state's helpless dependents,—the little children,—and endeavor to help them to grow up into self-respecting, self-supporting, happy men and women, to visit all state or county charitable and correctional institutions and co-operate with their officials for their improvement,—these are among the chief duties of the State Board of Charities, and its work is constantly broadening and deepening as it goes on. That the board should be supported from an economic, as well as philanthropic, point of view is shown from the experience of states older in the work than New Hampshire, where, from statistics covering ten, twenty, or thirty years, it is proved that the number of paupers and the expense of their maintenance has decreased by reason of the work of the Board of Charities, and the reforms in the administration of state charities instituted by them. In Michigan alone, where all the dependent children have been cared for by the state since 1874, the number of children dependent upon public charity has decreased in ratio to the population 400 per cent. In 1874, there was one dependent child to each two thousand two hundred and twenty-four (2,224) of the population, and in 1900, only one

dependent child to each twelve thousand five hundred (12,500) of population. During these twenty-six years the population of the state increased 87 per cent.* These are facts which New Hampshire may well ponder. By the census of 1890, it was shown that she had forty-six children in almshouses to each one hundred thousand of her population, no other state coming anywhere near that number, Vermont being next with twenty-seven.†

And in Part I of the Census of 1890, Department of Crime, Pauperism, and Benevolence, p. 270, in the table of all the states, showing the ratio of paupers in almshouses to the population, New Hampshire heads the list.

The board has no hesitation in saying that until this law of 1895 was passed, New Hampshire had deliberately educated children to become paupers and criminals, and had deliberately encouraged the dependence of the thriftless upon public support. The rate at which pauperism, crime, and insanity continue to increase in the state is appalling, and unless something is done to check it, the burden upon the taxpayer will become too heavy to be borne. A table appended, compiled from the county reports of 1889 and 1899, shows the large relative increase during the last ten years in sums paid out for pauper relief. It cannot be claimed to be absolutely accurate, because it has sometimes been impossible to determine from the reports whether the sum given as county farm expenses was net or gross, and in the sums given for outdoor relief it has been impossible to find out always just what was included. For instance, some counties include sums paid out for dependent soldiers, industrial school, asylum for the insane, and board of dependent children, as well as all other outdoor pauper relief, all under one heading; others separate them all; still others apparently include the sums paid for dependent children in the county farm expenses.

Nor does the table show the whole amount of public poor relief given, because no statistics whatever of town or city relief were available, and no record could be obtained of the

* Report of the Michigan State Public School to the Paris Exposition. p. 8.

† See table, p. 519, Charities Review, January, 1900.

immense amounts expended in private charity. But it at least shows approximately the amount spent, and that the percentage of increase during the last ten years has been greater than the percentage of increase in population in every county in the state but two.

Two years from now, if a law is passed at this session of the legislature requiring the return of statistics to the board of charities, and if the work of the board is allowed to go on, complete and accurate statistics will be given of all the charities of the state.

REPORT OF FIRST YEAR OF BIENNIAL PERIOD. 1898-1899.

Taking up the records in order we find that in December, 1898, the board voted, upon motion of Mrs. Carpenter, to hold a State Conference of Charities in February, 1899, during the session of the legislature. This was a most important step and a full report of this meeting and of the permanent organization later of the New Hampshire Conference of Charities and Correction will be found appended in a special report. As there is no appropriation for the work of the Board of Charities, except for "necessary expenses," and as this conference could not be strictly construed as a "necessary expense," the board paid the expenses out of their own pockets. Some time afterward this fact came to the knowledge of the Concord Woman's Club, which immediately asked the privilege of assuming the entire expense of the meeting. Their request was granted, and the following resolutions passed by the board April 25, 1899:

WHEREAS, The Concord Woman's Club ask to pay all the expenses connected with the State Conference of Charities and Correction, held in Concord February 21, 1899; therefore, be it

Resolved, That in accepting the offer, the thanks of this board are hereby extended to the Concord Woman's Club, not only for its generosity but for the great interest taken in the work.

Resolved, That a copy of this resolution be forwarded to the club, and that it be also spread upon the records of this board.

On September 21 of this year, the by-laws were adopted under which the board is now working.

Upon October 11, 1899, Mrs. Julia R. Carpenter, one of the original members of the board and its first secretary, and always one of its most valued, earnest, and intelligent members, passed on to that other world to which she always seemed so near. During the four years of her connection with the board she gave it most faithful, devoted service, always far beyond her strength, and of her it can be most truly said, "Though she be dead yet her works do follow her."

Upon November 15, 1899, the first meeting of the board after her death, the following resolutions, offered by Mr. Gilman, were adopted:

Resolved, That in the death of Julia R. Carpenter, we mourn the loss of a dear and honored associate, one who was characterized by integrity, and faithful to every trust committed to her, her heart overflowing with sympathy for the poor and unfortunate classes.

In the discharge of her duties as a member of the State Board of Charities and Correction she was ever ready to take her full share of the responsibility and to perform her full share of the work.

Resolved, That the sympathies of the board are hereby tendered to the family of the deceased in their deep affliction, and that a copy of these resolutions be transmitted to them by the secretary and entered upon the records.

REPORT OF SECOND YEAR OF BIENNIAL PERIOD. 1899-1900.

DEPENDENT CHILDREN.

The first meeting of the present year, held January 17, 1900, marked a new era in the life of the board, and was in some respects the most important meeting ever held, for at this meeting it was decided, first, to ask each board of county commissioners in the state to send in the names of all the dependent and delinquent children under their charge, with the places where they were located, from which a complete list of the dependent children of the state should be compiled; and, second, that an accurate card record should be kept of every dependent child in the state, and that each child should be visited regularly by some one appointed for that purpose who should report regularly to the board. To this end a committee was appointed to study and investigate the best methods for carrying out the plan, and report to the board at their next meeting. Upon March 7, 1900, the chairman of this committee reported in part as follows:

“In accordance with the vote of January 17, whereby your committee was appointed to investigate methods of keeping records of dependent children and visiting them when placed in homes, the offices of the Children’s Aid Society in Boston, the Children’s Aid Society of Pennsylvania in Philadelphia, the State Board of Charities in Boston, and the trustees for the Children of Boston have been visited, and the State Board of Children’s Guardians in New Jersey (where they have within two years inaugurated a system similar to the one we desire), and the State Children’s Council of South Australia have been corresponded with. Printed matter, forms, blanks,

etc., have been obtained from all these places, as well as a great deal of advice. While these systems are all more elaborate and expensive than we could adopt—the State Board of Charities in Boston, for instance, besides a secretary in charge on a good salary, employs thirty-one clerks—we have evolved from them a plan which we think will answer our requirements and which can be carried out without undue expense. We realized, however, at the outset, that it would be utterly impossible to inaugurate this system without a central office for our board at the state capital, and some clerical assistance. Therefore, the chairman of the committee went before the governor and council at their meeting February 2, stated our case, showed them our list of dependent children, explained the card record, and asked for an office, either in the state house or state library building, and an appropriation to carry on our work. We had previously seen the attorney-general, who had signified his willingness to give up his former office in the northwest corner of the state library building to the State Board of Charities if the authorities in charge had no objection. In reply to our requests the office above mentioned was granted to us, with an appropriation of one hundred and fifty dollars for furnishing it, and, furthermore, two hundred dollars were appropriated for clerical assistance in preparing the card record.

“For our record the following plan is submitted: Upon a ruled card, 5x8 inches, like inclosed model, a full record of each dependent child shall be transcribed. Then have an envelope or folder labeled to correspond with each card. File these folders in another case, or filing cabinet, and put therein all subsequent matter pertaining to the child, letters received, visitors’ reports, etc.

“Then have the same questions which are answered on the card record printed on sheets of paper, 8x10 inches in size, made into pads of fifty sheets each, and provide each board of county commissioners, each county farm, and each orphans’ home where county charges are boarded, with a supply sufficient to cover the number of children in their charge.

"Request county commissioners and superintendents of county farms or orphans' homes to fill out a sheet from this pad immediately on taking charge of a child, and forward same at once to chairman card record committee, or clerk of the board, or whoever is in charge of the records at the office of the board in the state library building, Concord.

"In the beginning, these blanks will have to be filled out also for each child already a county charge.

"These records when received will be at once copied on to the cards for the permanent card record. The original sheet will also be filed in corresponding folder for reference.

"Immediately on receipt of sheet committing a new child a visitor should be appointed by the board to visit said child regularly, and send in a report at least once in three months to chairman card record committee or whoever the board may appoint to take charge of this work. Blanks should be issued to each visitor upon which to make these reports.

"In the beginning of our work of supervision and visitation visitors should be appointed by the board for each one of the five hundred children now under our care. These visitors must be recommended to the board by responsible citizens, such as the chairman of the board of education of a town, the clergyman, the doctor, or the president of the woman's club, and must be formally appointed by the board before entering upon their duties. A printed circular should be issued, defining these duties and explaining the aims of the board. For really efficient supervision, there should be one paid agent, with headquarters at central office in Concord, who should give his or her entire time to the work. Pending a legislative appropriation for this purpose, the board must do as well as it can by its own unaided efforts, with the co-operation of these volunteer visitors.

"In carrying out this plan, the first thing for the board to do is to send out blanks to all county commissioners, superintendents of county farms and orphan asylums, for complete information as to every dependent child in their charge; second, transcribe these reports on to the cards, and file in

card index drawers; third, make a list of all towns where dependent children are placed out, and write to some responsible person in each town, asking for suggestions of names of some one suitable to act as volunteer visitor; fourth, appoint these volunteer visitors, issue circulars defining their duties, and name the children of whom we wish them to take charge; fifth, receive and file their reports, answer their questions, and give necessary advice.

"After the work is well under way, the one in charge at the central office should make regular monthly reports to the full board of all that is done.

"(Signed) LILIAN C. STREETER,
"For Card Record Committee."

A report upon the office furniture and necessary outfit for the card record was also presented; both reports were accepted, and it was voted:

That Mrs. Streeter and Mr. Burnham serve as a committee to inaugurate the card system and employ such assistance as is necessary.

Thus finally the work was started whereby the dependent children of our state, hitherto unrecorded and unvisited, could be found out and befriended, an interest taken in their welfare and history, and exact records kept that would be of value as statistics.

At the next meeting, held April 5, 1900, some further details were settled, and it was voted to engage Miss Evans as stenographer and typewriter, from the governor's special appropriation for clerical assistance, she offering, from her interest in charities, to work for the board at a very low price, and that afternoon the work of compiling the card record began.

The first list compiled was full of errors. In many instances names were sent in of children who never existed; in many others names were given that had long since ceased to receive aid from the county. It is a fact that no exact records had ever been kept before in this state of its dependent children. One official said, "When the bills come in we know

whom we are supporting!" But many children are placed out by the county officers in homes where they are "no expense" to the county, though not adopted, and of these, after the board who places them goes out of office, nothing is known; for some counties change their entire board of county commissioners every two years, and the incoming board of course knows nothing about the children their predecessors have helped.

So the first duty was to sort out, correct, and tabulate this original list, and it proved a weary task, for the list, admirable as it was as a basis of operation, was a tissue of errors from beginning to end, an almost hopeless tangle, the best possible proof the board could have of the great need of the work it was undertaking. For instance, one county list as first sent in contained two hundred and seven names, and of this number only eighty-six were correct. Of the one hundred and twenty-one remaining, eleven had apparently never existed at all, for no record whatever could be discovered of them anywhere, thirty-eight names were given incorrectly, so that long study was necessary to identify the child intended, and seventy-two had passed entirely out of the care of the county. Then nineteen names which should have been included were not given. They were all county charges at different orphan asylums, and were reported later directly from the institutions.

Now that we have the first list corrected as a basis, it is comparatively easy to keep it up, for whenever a new child comes under the care of the county, a blank is filled out for him and forwarded to us at once, from which his card is transcribed for the record. And as soon as any child passes out from county care notice is sent to us, his card is taken from the main list and placed in the drawer where is kept the supplementary list of all children discharged from public support. Thus both card records are at all times up to date.

The new blanks for the original records were first sent out to the county commissioners on April 14, and Belknap county has the honor of being the first to respond, sending in her complete records almost immediately. Grafton came next—

early in May; Coös, Sullivan, Merrimack, Strafford, and Rockingham counties sent in theirs in the order named, before the middle of June, and then no more were received until October, when the Cheshire and Hillsborough records came, and finally on November 28, the Carroll county records arrived, and our card record was complete at last, more than seven months after the blanks were first sent out.

In carrying out the work twenty-five hundred blanks were prepared for the original records, two thousand blanks for visitors, one thousand special reports for visitors, one thousand suggestions to visitors, and countless letters were written. Specimens of all blanks used are appended to this report.

The complete record to December 1, 1900, contains 443 cards, and includes all the children within the state now dependent upon the public for support. The supplementary record, including all those children who have passed from public support since we began our work, now numbers 76.

In addition to this main card record, including all the children of the state arranged alphabetically, their respective counties being simply indicated upon each card, we also keep two county indexes showing at a glance all the dependent children of each county separately. One of these indexes includes the present list of dependents, the other the past. These four hundred and forty-three children are placed as follows:

Still in almshouses	67
Placed in orphans' homes	238
Placed out in families	113
In insane asylum	1
In Industrial School	24
<hr/>	
Total	443

The statistical table appended gives full particulars, showing exact numbers from each county in almshouses, orphans' homes, private families, or industrial school. The children still remaining in almshouses are mostly babies under three years or defective children. But where children are tem-

porarily thrown upon public support, either by illness of one or both parents, or while one or both parents are under sentence for crime, it is very difficult indeed to keep them from the county farms. Sometimes they go in for the sixty days, which the law allows, then go away for a few days, and return again for another sixty days.

In addition to the 443 children reported within the state there are, under the provisions of the law passed in 1879, 39 children supported outside the state as follows: 23 at institutions for the deaf and dumb, 13 at institutions for the blind, and 3 at the Waverly School for the Feeble-minded in Massachusetts, which, added to the 443 supported within the state, makes 482 children in all cared for by public funds. Then there are in the state of New Hampshire twelve private asylums, at present supporting 817 children, a statistical table of which is subjoined.

Deducting from this total of 817 children the 238 county charges included, and already recorded upon the other list, and we have a balance of 579 children supported by private charity, or a total for the whole state of public and private charges both, of 1,061 dependent children.

In addition to the 443 children supported within the state entirely at public expense, a large number are also partially supported at their own homes or with relatives. It has been impossible to get exact statistics of this outdoor relief, but the commissioners of Merrimack county tell us that there are approximately 535 children helped at their own homes, and Sullivan county thinks they have about 90.

Now the State Board of Charities hopes, through its system of volunteer visitors, to provide each one of these four hundred and forty-three children with a friend in the shape of a volunteer visitor, who will see the child regularly, take an interest in his or her home, clothes, school, and church, everything, in short, which is most important in his or her life, and send in quarterly reports to the Board of Charities, whereby the board can constantly keep in touch with each child. For it is to the children that we must devote ourselves if we

would lessen the ever-increasing number of those unfortunates who depend upon the state for subsistence, and so largely increase the burden of the taxpayer. Every pauper child that is trained away from his pauperism to become self-reliant, frugal, industrious, and self-supporting, adds to the general prosperity of the state in a double way,—he lessens the number of the helpless to be supported by the thrifty, he also adds to the number of the thrifty who help bear the burden of the helpless, and besides this he exercises a strong, positive influence towards thrift and self-reliance by his example of industry and energy. His children are likely to grow up to be good citizens, and in a general way a widespread influence for good is diffused. Whereas one needs to cite only the famous Jukes* family, or similar families in our own state, to show the great burden which even one neglected pauper family may bring to the state and taxpayer by its natural increase and fatal heritage to its descendants of thriftlessness, inborn tendencies to drunkenness and crime, and easy dependence upon the bounty of the state and county for support.

The first three volunteer visitors were appointed April 11, 1900, and since then, as fast as the records came in and children were specified, visitors have been appointed, until we have today a staff of sixty-three (63) volunteer visitors, covering every town in the state where children are placed out, except Unity and Hooksett, where visitors are still to be appointed.

Nine of these visitors have at present no children under their charge, they having been transferred to other places since the visitors' appointment. Of the fifty-four (54) remaining, forty (40) have already reported, and some have reported twice, an unusual showing, considering the very brief time in which the system has been in operation, and its experi-

* It has been calculated with scientific accuracy that the descendants of Ada Jukes—the one abandoned pauper—numbered twelve hundred persons, which in seventy-five years cost the state of New York over a million and a quarter of dollars, without reckoning the cash paid for whiskey, or taking into account the entailment of pauperism, crime, and disease of the survivors in succeeding generations.—The Jukes Family, by R. L. Dugdale, New York, 1895, page 70.

mental character. Not one of the visitors had ever had any experience in this work before, but many of them are, or have been, teachers, or are upon the school boards, and find their experience there very useful and valuable in this new undertaking.

The committee in charge of the work of visitation has been especially pleased by the responses of these visitors, with the earnest, practical way in which they have entered upon their work, and with the real value of the reports sent in.

It is of course too early yet to show any special results from this new system,—ten years from now will be time enough for that,—but already the good effect upon the children is apparent of feeling that they have a real friend who is interested in them and ready to help them in every possible way. We are glad to say that nearly all are reported in good comfortable homes; in only one or two instances have undesirable places been reported.

It is very seldom that these children are legally adopted, although they are very often taken and kept without any recompense from the county and treated like members of the family, but people seem afraid to legally adopt them.

There is also a great scarcity of good homes for the children in private families, three fourths of the children in the state dependent upon public charity being placed in institutions, as shown in the table appended. Yet if we include also the large number of children supported in institutions by private charity we find that of the total of ten hundred and sixty-one (1,061) children, nine hundred and forty-eight (948), or more than 90 per cent, are in institutions, and only one hundred and thirteen (113), or 10 per cent, in homes. This is all very wrong, for institution life, no matter how well conducted the place may be, tends to make the child dependent instead of self-reliant, and does not fit him so well to meet the world as the average healthy family life. This is a well recognized fact by all who have made a study of the subject. The growing tendency in our state to place children dependent upon public charity in institutions instead of fam-

ilies is alarming, and should be checked as far as possible. We may well profit by the example of New York and California, where the number of dependent children under this system has increased enormously. In New York City alone, from 1875 to 1894, while the population increased only 73 per cent, the number of children in institutions increased 133 per cent.*

The board takes pleasure here in publicly acknowledging the help which the county commissioners have uniformly given, so far as it lay in their power, in collecting the facts and data offered in this report about the dependent children. The chairman of the card record committee was allowed to appear before them at their convention held April 11, 1900, and was most courteously received and listened to. She stated the plan of the Board of Charities regarding the card record and proposed system of visitation, explained how it could not be carried out without their co-operation and interest, and asked their help, which has been most cheerfully and heartily given. The card record is open to their inspection at all times, and more than one board has already consulted it. The board aims to make it as useful to them as to us.

THE FEEBLE-MINDED.

The state of New Hampshire appropriates one thousand dollars annually for its feeble-minded, which sum is sufficient to pay for the education of three children only, while our table shows that there are two hundred and fifty-six feeble-minded inmates at our county farms alone, and we all know of many others in their own homes.

These three state beneficiaries, two girls and one boy, are supported at the Massachusetts School for the Feeble-minded in Waverly, Mass., one of the very best institutions of its kind in this country, and thoroughly well managed in every way.

Great pressure is brought to bear upon the board for appointments to this school, and the chosen three have to be decided upon with the greatest care. It has been thought best, since only three can be chosen from the numbers who apply, to select those who can best profit by the instruction and training given. The board has therefore been compelled during the past year to recommend the removal of two boys who were hopeless idiots, needing custodial care only, and have recommended in their places one boy and two girls who are each capable of improvement.

The institution is so crowded that the trustees object to receiving children from other states, and our two last beneficiaries had to wait some time for a vacancy. It would be absolutely impossible for the institution to receive any more New Hampshire children, even if the appropriation were large enough to pay for their maintenance.

Statistics of the feeble-minded in the state of New Hampshire have not been collected long enough as yet to serve as a basis for scientific conclusion, but facts are known about certain families which show that our almshouses are filled with their ever increasing number.

One county reports every one of its inmates as feeble-minded except the nine insane. In another county farm there are at present four generations of the same family, from the great-grandfather, seventy-one years old, to a baby

of five months. The great-grandfather has always been supported by town or county, is feeble-minded, and thievish. His daughter, the grandmother, has also spent most of her life in the county farm, is feeble-minded, has had seven children, all county charges, one of whom is the mother of the five-months baby of the fourth generation. The mother, the third generation, is nineteen, and has always been at the farm more or less—is “not exactly foolish but not quite bright.” She has two children, both now at the farm with her.

There are two feeble-minded boys at this same farm whose mother was feeble-minded and died at the farm. One of these boys, now about fourteen, seems like a criminal degenerate, can pick any lock in the house, climbs anywhere, is very sly, and never speaks. One of these days New Hampshire will have a costly criminal case on her hands through this boy, unless all signs fail.

In still another county are a father and mother, there as prisoners, with six little children, three of them babies. Twenty-five or thirty years ago this woman's father and mother were also at this same county farm as prisoners with six children, herself one of the number.

Instances similar to the above could be duplicated in almost every county in the state.

Other states have recognized the fact that it is cheaper to take care of and educate these unfortunate feeble-minded ones than to allow them to run at large and increase and multiply. Dr. Fernald has demonstrated at the Massachusetts School for the Feeble-minded that most of the feeble-minded can be made self-supporting, and that a large per cent are capable of great improvement by education.

If the state of New Hampshire can only afford one appropriation for its charities, after providing for the work of the State Board of Charities, a state home for the feeble-minded is without doubt its most pressing need, even more important than state care for the insane paupers. For there is no provision whatever in our state for the education of the feeble-

minded boy, or the education and protection of the feeble-minded girl.

The board earnestly hopes that this most urgent need may soon be gratified in response to the imperative public demand now coming from every part of the state.

THE BLIND.

As stated before, under chapter 86, section 1, Public Statutes of 1891, the state of New Hampshire appropriates four thousand dollars (\$4,000) annually for the support of the indigent blind.

There are at present thirteen (13) persons thus supported at the Massachusetts School for the Blind, seven at the South Boston school, and six at the Kindergarten at Jamaica Plain, at an annual expense for each child of three hundred dollars (\$300).

Three members of the board have visited the school at different times during the biennial period, and have presented reports to the governor and council covering each beneficiary in detail. These reports cannot, for manifest reasons, be printed here, but are on file at the office of the board.

The school and kindergarten are too well known as ideal institutions in every way, to need any special commendation from this board.

The blind children, who are enabled through the state's liberal provision to be educated here, are fortunate indeed.

THE DEAF AND DUMB.

The state appropriates five thousand dollars (\$5,000) annually for the support and education of the indigent deaf and dumb (Public Statutes of 1891, chapter 86, section 1), under which twenty-three persons are now being educated at an annual expense of two hundred dollars (\$200) each per annum, as follows:

American School for the Deaf, Hartford, Conn.	13
Maine School for the Deaf, Portland	2
Clarke School for the Deaf, Northampton, Mass.	7
Mystic Oral School, Mystic, Conn.	1

Each of these schools, except the Mystic school, has been visited the past year, and reports upon them giving details about each beneficiary, together with general information about the school, have been presented to the governor and council and filed at this office.

Speaking generally, the Clarke school at Northampton far outranks the others, but there is such a pressure there for admission that seven or eight is the limit to the number that can be received from New Hampshire. The school accommodates only about one hundred and fifty—fifty in each of the three departments, primary, intermediate, and grammar. The school is first class in every respect, and deserves more than the passing mention possible in this report. The methods of instruction are the most advanced, the oral method being taught exclusively. The more advanced pupils can scarcely be distinguished from the normal child. They articulate with distinctness and understand whatever is said to them, simply by reading the lips. The atmosphere of the whole place is that of a pleasant, refined home; good pictures are on the walls, growing plants are everywhere, and pupils and teachers form together one large and happy family, eating at the same tables, enjoying the same living rooms, and sleeping in their own separate rooms, just as in a private home, instead of the dreary dormitory common to most institutions. And yet with all this, the expense per annum is no more than at the Hartford school, where the entire family of one hundred and sixty pupils is crowded into one large four-story building, including schoolrooms, recitation rooms, dining rooms, and recreation rooms, where the pupils eat by themselves and sleep in big, cheerless dormitories.

At the Hartford school both the sign and oral methods are employed, and pupils are received who can be taught the sign language, whose mental capacity is not equal to the oral method. It thus meets a need which the Northampton school could not supply—often receiving pupils whom they have rejected, and doing a great deal for them. Several of the New Hampshire beneficiaries who are there and doing fairly well could not learn at all by the oral method.

The Maine School for the Deaf at Portland, where there are two New Hampshire beneficiaries, was established as a state institution in 1897. It employs the combined or American method of instruction, and is a pleasantly situated and well-conducted institution accommodating about seventy-five pupils, and is very much crowded.

The appropriation for the deaf and dumb is ample for present needs, one vacancy existing at present for which there was no application this year.

THE INSANE.

Nine of our ten counties support their chronic insane at the county almshouses; the tenth county did the same until the terrible fire of February, 1893, occurred, when forty-one of their forty-four insane paupers lost their lives, since when the Strafford county insane paupers are all cared for at the State Asylum for the Insane at Concord at county expense.

The proportion of insane in almshouses to other paupers is very large, varying from one half the entire number in Hillsborough county to one seventh in Belknap county, and averaging about one third of the entire almshouse population of the state.

They are classed with the other paupers, receiving exactly the same food and general treatment, and though generally kept in separate buildings, no separate expense account is maintained. The treatment is purely custodial; there is no resident physician and no trained nurse at any county farm in the state. No one could visit the ordinary insane departments of our county farms without being convinced that some radical change should be made at once in our methods of caring for the indigent insane. The same conditions prevail now in several county farms that prevailed in Strafford county before the fire, and the same terrible results might occur at any time.

This board believes that the county commissioners of the state and the county farm superintendents do the very best they can, with the means at their disposal, for these unfor-

tunate people. Were they to employ trained attendants and expert medical advice, public opinion in their counties would be overwhelmingly against them on account of the extra expense involved. The blame for the matter lies deeper than in any official board; it rests with the public who support and commend almshouse care for insane paupers. And until the public is educated to see for itself the evils of the present system, the county commissioners are helpless.

The report of the board of health to the legislature of 1893, relative to the burning of the Strafford county farm, is commended to your attention, and the State Board of Charities respectfully indorses at this time their recommendations, and recommends them to the legislature of 1901 for action.

STATE INDUSTRIAL SCHOOL.

The State Industrial School has been visited by four members of the board at different times during the past two years, and all agree in commending its management heartily in nearly every particular. The superintendent and matron are members of the National Conference of Charities and Correction, and are intelligent and sincere in their desire to do the best they can for their charges. They have a good corps of teachers, who have brought the school work of the institution to a high standard. The inmates all attend school each afternoon. In the morning the boys work in the hosiery mill or on the farm, and the girls are taught every branch of domestic work.

The situation of the school, on a high hill overlooking the river, is very fine, but the building itself, a large four-story one of brick, is old and behind the times, and there is no suitable provision in case of fire. There is no gymnasium and no library. The one hundred and twenty-four boys all sleep together in one immense dormitory where the beds are packed in as closely as it is possible to put them, and a balcony has been recently built in this same dormitory where the little boys' beds are to be placed. The ventilation of this room does not seem to be very good. New plumbing has recently been put in all over the building.

If this institution had new buildings on the cottage plan, a merit system, and classification of inmates according to conduct, it would rank among the first of its kind anywhere.

A table showing present number and division of inmates is appended. Each county pays \$1.50 per capita per week for its charges.

Total number of Inmates in the State Industrial School,
December 1, 1900,

Boys	124,	Girls	23,	Total	147
------	------	-------	-----	-------	-----

Of this number ninety-six are county charges, as follows:

Number of county charges fifteen years and under,

Boys	22,	Girls	2,		24
------	-----	-------	----	--	----

Number of county charges over fifteen years,

Boys	67,	Girls	5,		72
------	-----	-------	----	--	----

Total number of county charges,				96
---------------------------------	--	--	--	----

ALMSHOUSES.

A detailed account of each of the ten county farms in the state with a statistical table of the almshouse population follows this report.

Speaking generally, the board is happy to say that it considers them, as a rule, remarkably well managed. Their defects are chiefly those of arrangement and construction, for which the superintendents are in no wise responsible. There are several serious faults common to all, which, in the opinion of the board, should be remedied.

The evils in connection with the feeble-minded and insane in almshouses have already been pointed out in the special reports upon these classes.

The law making our county almshouses also houses of correction, and compelling the aged and respectable poor to associate with criminals, is wrong and should be repealed. There is a strong public sentiment to this effect all over the state. People from every quarter of the state have asked the board about it, and many of the superintendents of county farms feel it. The board has been especially pleased to note that the superintendents of county farms are, as a rule, humane,

sensible men, and the matrons kind, good women, with a real desire to do the best they can for the unfortunate people in their charge, though they work under conditions that must inevitably tend to harden their sympathies and ruin their confidence in human nature.

Every matron of the ten, with possibly one exception, is heartily in favor of the law removing children from the almshouses, recognizing the fact that association with the aged and often vicious paupers is most demoralizing and hurtful to a young child, and the majority of county farm superintendents and matrons think also that the feeble-minded should be cared for in a special institution where they can be made self-supporting, can receive some education, and where the feeble-minded girls can be protected. They see too much of the evils resulting from the present system not to believe this.

No two counties compute the cost of maintenance per capita per week in exactly the same way at present, but from the figures given in the reports of 1899, it varies from 94 cents to \$2.22.

The food, as a rule, is good, good bread being uniformly found. "Boiled dinner," beans, pork, and salt fish are staple articles of diet, and fresh fish is usually given once a week and fresh meat from once to three times weekly.

Every county farm in the state but one now has modern water-closets and bathrooms. Every one is heated by steam, and several are lighted by electricity,—a great improvement over kerosene and a great safeguard against fire. Each almshouse is supposed to be well protected against fire, with a coil of hose on every floor, and standpipes, but it would be a very serious thing if fire should break out in some of the big frame buildings.

All but two county farms employ a night watchman who makes his rounds once an hour. There is no doubt but what the paupers of New Hampshire are as a rule well cared for and kindly treated. The only trouble is that juvenile, insane, and feeble-minded paupers have no place in any almshouse, no matter how well conducted the institution may be.

TABLE VII.

Statistical table showing almshouse population in state December 1, 1900.

COUNTIES.	Children between 3 years and 15 years.		Children under 3 years.		Total number of Inmates.	Number of prison- ers in- cluded.		Number of insane included.		Number of feeble-minded included.			Number of epilep- tics.

ROCKINGHAM COUNTY ALMSHOUSE.

The Rockingham county almshouse is situated in Brentwood, three miles from the Epping station of the Boston & Maine Railroad.

The superintendent, Norman H. Bean, succeeded his father, who died in March, 1900, and the matron is his mother, Mrs. Margaret S. Bean, who has been there since April, 1897.

The physicians are Dr. Mitchell of Epping and Dr. Sawyer of Exeter.

Number of inmates, 216. Expense per capita per week (1899), \$1.67.

Religious services are held every fortnight by the Rev. Bernard Christopher of Brentwood Corner.

The main building is a large four-story wooden structure, very old, and quite out of repair. It is heated by steam and lighted by kerosene. The superintendent and family live in the central part of the building. The women's department is on the left hand side and the men's at the right; the dining room and men's smoking room are in the basement.

There are two buildings for the insane, one of brick where most of them are kept, and one of wood, called the "lower house," where the worst cases are confined. There is no plumbing whatever in the lower house, only old-fashioned privy vaults. A man and his wife are employed, who give their entire time to the care of the insane, of which there are seventy-four, forty-two men and thirty-two women. The house of correction is of brick in the rear of the main almshouse.

The supply of water is pure and abundant, from an artesian well furnishing twenty thousand gallons daily, pumped by a steam pump.

The dormitory doors are locked at night, and the night watchman makes his rounds once an hour.

The diet is good. Their diet list includes salt fish Monday, soup Tuesday, baked beans Wednesday, fresh meat Thursday, fresh fish Friday, hash and soup Saturday, baked beans Sun-

day. They have all the fresh milk they want every day, forty cans being used daily. The old people and the sick have butter every meal; the others have a half pound given them twice a week, which is usually enough to last them through the week.

The management of this institution is first-class in every respect, and very much improved during the last three years. Mrs. Bean, the matron, is an intelligent woman, very much interested in her work, and very much beloved by the inmates, who call her "mother." The superintendent is a young, progressive man, anxious to bring and keep the institution up to the highest possible mark. But it is impossible to keep so old a building free from odors, and no matter how much it is scrubbed and painted and whitewashed, it cannot be made to look as clean as a new building. There are a great many growing plants about this institution, which add very much to its attractiveness.

Two members of the board visited the institution in October, and afterwards addressed the following letter to the county commissioners:

"October 29, 1900.

"To the Honorable Board of County Commissioners of Rockingham County, Mr. L. L. DeRochemont, Clerk:

"GENTLEMEN,—Under section 8 of chapter 116, Public Statutes, defining the duties of the State Board of Charities, we have the honor to report to you that in our opinion a new modern building is absolutely necessary for the Rockingham county farm, as the present one is too old to be repaired. It is, moreover, a veritable fire-trap. We do not see how a terrible catastrophe could possibly be prevented if fire should break out.

"The plumbing also needs renewing throughout the building, and it should have electric lighting throughout. The building now used for the worst class of insane should also have modern plumbing and electric lights.

"We consider that you have a first-class superintendent and matron in Mr. Bean and his mother, and with modern build-

ings, well lighted, ventilated, and plumbed, would have an institution second to none in the state.

"We have the honor to be, gentlemen,

"Very respectfully yours,

"JAMES F. BRENNAN.

"LILIAN C. STREETER.

"O. J. M. GILMAN.

"ELLA FOLLANSBY."

STRAFFORD COUNTY ALMSHOUSE.

The Strafford county almshouse is situated in Dover, four miles from the Dover railroad station, one and one half miles from Cocheco station of the Boston & Maine Railroad, and six miles from Rochester.

The superintendent and matron, Mr. and Mrs. E. A. Wil-land, have been there since April, 1893.

The physician is Dr. T. J. Ward of Dover.

Number of inmates, 132. Expense per capita per week (1899), \$1.88.

Religious services are held every week by the Rev. Mr. Wilson, a Protestant clergyman, and the Catholic clergyman and sisters come twice a year from Dover, and also whenever sent for, for the dangerously sick.

The building is a large two-story one of brick with two wings; the superintendent's family live in the central part, with men's pauper department on the right and the women's on the left. It is heated by steam, and lighted by electricity generated from its own plant. The plumbing and sewerage are first-class. The night watchman makes his rounds once an hour and registers in the office. There is hose on every floor as a protection against fire, and it is frequently tested. The water supply is pure and abundant. The diet is good. Every child and old person has milk twice a day and butter three times. Fresh meat is given twice a week. The diet list varies, not being the same each day in each week, and includes corned and fricasseed beef, salt and fresh pork, fresh fish once a week, salt fish, baked and stewed beans, stewed peas, vegetable and beef soups, brown, white, and graham

bread, oatmeal every meal, tea and coffee every meal, butter once a day, with various extras for those ill in the hospital rooms. They have the best steam cooking apparatus, and a new oven which gives a great saving in fuel over the old-fashioned brick oven.

This almshouse on the whole is one of the best in the state. The farm of over three hundred acres is a very fine one. Fifty cows are kept and very large crops are raised. Even the barns are lighted by electricity, and are as clean as wax, with all the best appliances for the care of the stock.

The superintendent and matron are intelligent and humane, caring well for the unfortunate people in their charge, but firm in case of need. The fact that no insane are kept here is a great advantage to this farm, and they are also very particular to place out all children just as soon as possible after they are received.

BELKNAP COUNTY ALMSHOUSE.

The Belknap county almshouse is situated in Laconia about a mile from the railway station. The superintendent and matron, Mr. and Mrs. H. C. Weymouth, have been there three years. Religious services are held once in two weeks by the different clergymen of Laconia.

The physician is Dr. Henry C. Wells.

Number of inmates, 63. Cost per capita per week (1899), \$1.84.

The main buildings are of wood with jail adjoining, and the insane are kept in the upper story of a building near by. The buildings are heated by steam and lighted by kerosene. There is a double water supply, both from the city water-works and that supplied by windmills to a tank in the attic of main building. There are two hydrants and five hundred feet of hose, and a night watchman makes his rounds once an hour.

Fresh milk and butter are given them twice a day, fresh meat once a day. Breakfast consists of bread and butter, oatmeal, tea or coffee; dinner, of meat, potatoes, pie or pudding, tea or coffee; supper, of bread and butter, tea or coffee.

The place is neat and clean. The greatest need seems to be better quarters for the insane.

CARROLL COUNTY ALMSHOUSE.

The Carroll county farm is situated in Ossipee, one mile from the railway station. The superintendent and matron are Mr. and Mrs. Frank Meloon, who have been there since April, 1895.

The physician is Dr. Ezekiel B. Andrews of Ossipee.

Religious services are held once a month by the Rev. Alonzo Stillings, an Advent clergyman from Ossipee.

Number of inmates, 64. Cost per capita per week (1899), \$1.16.

The institution consists of one wooden building, four stories high in front, heated by steam and lighted by kerosene. The superintendent's rooms are in front, but open from the same corridor as the rooms of the paupers. There is no separation or classification of the inmates. The jail adjoins the main corridor downstairs, and the rooms for the insane are directly over it, opening from the main corridor upstairs. Men, women, and children, the insane and prisoners, are all together, nor can it be otherwise with the present building. The rooms for the insane are small, dark, and badly ventilated, but only a very few are confined all the time. At night the doors are locked only in the rooms for the insane, the jail, and the men's dormitory in the attic.

An ample supply of pure water comes from springs on the hills. There are standpipes filled with water and twelve hundred feet of hose attached ready for immediate use, and a night watchman makes his rounds once an hour.

The plumbing seems very good, and there was absolutely no odor whatever anywhere. It is one of the cleanest almshouses in the state, though one of the least modern, and the only one in the state where there is no separation of sexes or inmates.

Milk is given three times daily, butter twice; fish is given oftener than meat; no fresh meat used in summer. Bread

made with soda instead of yeast is preferred by inmates and usually given.

The kitchen arrangements and the laundry are very primitive, with no modern improvements anywhere.

The whole place is much improved since Mr. and Mrs. Meloon went there, and is kept as well as it possibly can be with the present buildings.

The following letter was addressed to the commissioners after a visit by two members of the board in October:

“October 29, 1900.

“To the Honorable Board of County Commissioners, Carroll County:

“Under section 8 of chapter 116, Public Statutes, defining the duties of the State Board of Charities, we have the honor to report to you that in our opinion radical changes are needed in your county farm, and they should be made immediately. Wings should be added to your present buildings,—providing separate quarters for men and women, and the insane, and absolute separation of the sexes should be maintained; a better jail should be provided, and rooms for the superintendent and family entirely separate from the pauper quarters.

“We consider that you have first-class managers in Mr. and Mrs. Meloon, and with modern, up-to-date buildings, you would have an institution fully equal to those in the other counties in the state.

“We have the honor to be,

“Very truly yours,

“JAMES F. BRENNAN.

“LILIAN C. STREETER.

“O. J. M. GILMAN.

“ELLA FOLLANSBY.”

MERRIMACK COUNTY ALMSHOUSE.

The Merrimack county almshouse is situated in North Boscawen, about half a mile from the railway station.

The superintendent and matron, Mr. and Mrs. Fred Eaton, have been there only since October 22, 1900.

The physician is Dr. H. C. Holbrook of Penacook.

Number of inmates, 172. Expense per capita per week (1899), \$2.14.

Religious services are held fortnightly by the Rev. Andrew Gibson of Boscawen.

The buildings of the Merrimack county farm are finely situated on a hill overlooking the river, and consist of one large brick building with two wings for the main almshouse, with superintendent's rooms in center, men's department at the right, and women's at the left. The building for the insane is opposite at the foot of the hill, and is also of brick. Then there is a small frame building, used for the worst cases. These buildings have all been thoroughly overhauled and repaired during the past two years, and are now in first-class condition. An addition has been built to the building for the insane to accommodate the chronic insane returned from the state asylum at Concord. The buildings are all heated by steam and lighted with kerosene.

The water supply is good and abundant. There are coils of hose on every floor in case of fire, and the night watchman makes his rounds once an hour.

The diet is very good. They all have milk three times a day and fresh meat two or three times a week. The regular diet list comprises: Monday, corned beef and cabbage; Tuesday, pot roast; Wednesday, roast pork; Thursday, corned beef; Friday, salt fish and cream; Saturday, fresh beef; Sunday, roast pork, or beefsteak, and sometimes salted shoulder and sausage. The children and sick have a special diet, whatever is ordered by the doctor,—eggs, milk, or steak. The bread is very good. The dining rooms are pleasant, tables clean, and food looks wholesome.

The superintendent and matron have not been here long enough to show what they can do, but the outlook is promising.

The insane in this county, fifty in number, have better quarters than the average, and are cared for as well as possible under the county system. The man and woman in charge of them seem kind and anxious to do their best for

those in their charge. Some are necessarily kept in close confinement, but seemed comfortable and tidy. The cells for the worst cases slope toward the center, where there is a small opening into the sewer protected by a coarse grating, and no other plumbing is provided in the cell. This arrangement must necessarily become offensive in time. Now it is all new, so no odors were apparent, and the ventilation seemed good.

The smaller frame building for the worst cases is in bad condition, and should be attended to.

HILLSBOROUGH COUNTY ALMSHOUSE.

The Hillsborough county farm is situated in Grasmere, very near the Grasmere station of the Boston & Maine Railroad. It can also be reached by electric cars from Manchester every hour.

The superintendent and matron, Mr. and Mrs. H. K. Libbey, have been in charge seven years, and the assistant superintendent, Mr. F. W. Russell, has been there eleven years.

The physician is Dr. Frank Blaisdell of Goffstown.

Number of inmates, 352. Expense per capita per week (in 1899), \$1.58 (calculated from average number of inmates).

Religious services are held fortnightly in the large chapel of the main building by Mr. Hill, secretary of the Young Men's Christian Association of Manchester, and the Rev. Father Fitzgerald of Hillsborough Bridge.

The buildings of Hillsborough county are far superior to any other county buildings in the state. They are the most recently built, the largest, and have the best and most modern appliances everywhere. They are built of brick, and consist of the superintendent's house, or administration building, the main almshouse building, two hundred and thirty feet in length, with two wings, the wing on the right being used for women, and the one on the left for men. A large building for the insane is at the left of main building, and large brick jail or house of correction at the right. In the rear is the laundry and power house.

All the buildings are heated by hot air, Sturtevant system, and steam from a central plant and lighted by electricity.

There is an abundance of pure water, and each building has standpipes with hose enough attached to reach to any part of the building. There is a night watchman who makes his rounds once every hour, and registers at twelve stations each hour. The dormitory doors are locked at night.

The diet is good, but the children should have milk at every meal. The bread here, both white and graham, is especially good. Old people who are feeble have a special diet. The regular diet list is as follows: Monday, fried pork, fried apples or onions; Tuesday, steamed beef with dressing; Wednesday, boiled dinner with greens; Thursday, stewed beans or peas or fresh beef; Friday, fish chowder and beef; Saturday, beef soup; Sunday, baked beans. One week's supplies include 2,000 pounds of fresh beef, 1,000 pounds of fresh pork, salt pork, hams, and fish, 30 bushels of potatoes, and 15 barrels of flour. Usually 1,500 dozen ears of corn are used through the summer, 7,000 to 8,000 heads of cabbage, and other vegetables in proportion. Eggs are used at different times for dinner or breakfast, and Tuesday and Friday mornings, doughnuts, cake, or pie are served. Meat is often served three times daily.

The conditions in this almshouse are more difficult to meet than in any other in the state. There is a much larger number of inmates, a greater proportion from cities. There are always a great many babies to be cared for, many suffering from serious or loathsome disease, and, taken altogether, the class of inmates is very different from that in the smaller almshouses more remote from the large cities.

Trained attendance in the hospital rooms, nursery, and insane department is more needed here than anywhere else in the state, yet aside from the heads of the different departments and household servants, paupers and prisoners do all the work,—chiefly the prisoners, because they are, as a rule, able-bodied. If this county can afford such fine buildings and appliances, can it not go a little farther and provide trained care for its sick, insane, and little children?

The board unanimously recommends to the county commissioners, that hereafter they do not allow any prisoners to take care of the insane, the sick, or the babies, and that they employ at least one trained nurse in each of these departments.

The business management of the institution is first-class, both superintendent and matron are very competent, and show great executive capacity and patience under very trying conditions.

CHESHIRE COUNTY ALMSHOUSE.

The Cheshire county almshouse is situated in Westmoreland, three miles from Westmoreland Depot, and thirteen miles from Keene, on the banks of a little stream that joins the Connecticut only a short distance beyond the farm. The postoffice address is Park Hill, N. H.

The superintendent and matron are Mr. and Mrs. Asa Whitman, who have been there in all eleven years, five years from 1884 to 1889, and again since 1894.

The physician is Dr. J. A. Craig of Westmoreland.

Religious services are held every three weeks by the Universalist minister of Westmoreland, Rev. H. E. Rouillard.

Number of inmates, 82. Cost per capita per week, \$1.83.

The situation is beautiful, and the farm one of the best in the state. The almshouse buildings are of brick, four in number, and consist of the main building, building for insane women, building for insane men, and jail. The superintendent's house is of wood, close to the main building, but entirely separate from it. The buildings are all heated by steam, and lighted by kerosene. Excellent boilers have recently been put in. One especially good thing is that no smoking is allowed in the main house, so there is no odor whatever of stale tobacco about the building, as is common in most of the other almshouses. The men here smoke in the basement of the men's building for the insane.

The water supply is excellent. It comes from a reservoir on the hill, and from the brook in case of emergency. The

plumbing and sewerage are excellent. There are six bathtubs and six water-closets.

The men and women are kept in separate sides of the house, and the dormitory doors are locked at night.

There are standpipes full of water in case of fire, but there is no night watchman.

The diet list is good. Fresh milk is given each meal, but nearly every meal, fresh meat once a day except Fridays. Monday the dinner is boiled meat, Tuesday fresh meat, Wednesday stew with dumplings, Thursday stewed peas, Friday salt fish, Saturday boiled dinner, Sunday beefsteak or roast beef or clam chowder.

This almshouse stands among the first in the state, both in construction and management. The building for insane women, where twenty-one are now kept, has been recently built, and is a model of its kind,—clean, bright, and sunny, finished in hard wood, with good plumbing. There are twelve rooms on each floor and four in the attic for the worst cases. There is also a pleasant chapel in the attic. The patients are classified, the attendance good, and the whole method of caring for the insane far superior to that in any other almshouse in the state. Both the superintendent and matron have had experience as attendants in asylums for the insane before coming here. They are unusually intelligent and humane, and the whole place shows their influence. The building for insane men is not equal to the women's. The worst cases of the feeble-minded are kept out of doors in summer, where they have air and sunlight, while yet under restraint.

After visiting the institution in October the following letter was addressed to the county commissioners:

“October 29, 1900.

“To the Honorable Board of County Commissioners, Cheshire County:

“Under section 8 of chapter 116, Public Statutes, defining the duties of the State Board of Charities, we have the honor to recommend that you employ a night watchman in your county farm at Westmoreland, and that you install an elec-

tric light plant. A sewing room for the matron would also be a great convenience if you could arrange it.

"Aside from these particulars, we consider your institution in first-class condition. Your building for insane women is a model institution, and the management of the county farm is especially good and intelligent.

"We have the honor to be,

"Very truly yours,

"JAMES F. BRENNAN.

"LILIAN C. STREETER.

"O. J. M. GILMAN.

"ELLA FOLLANSBY."

SULLIVAN COUNTY ALMSHOUSE.

The Sullivan county farm is situated in Unity, five miles from Claremont.

The superintendent and matron, Mr. and Mrs. Charles Willard, have been there since April, 1891.

The physician is Dr. A. L. Marden of Claremont.

Religious services are held once in two weeks by the Rev. J. P. Frye, Methodist minister of North Charlestown.

Number of inmates, 57. Cost per capita per week, \$2.22.

The buildings are of wood, a four-story main building, with superintendent's house connected, and two-story building of wood for the insane in the rear. There are good barns, hen houses, and farm buildings.

There is no modern plumbing or sewerage in the almshouse. The water supply is good. There is hose on every floor, and two Babcock fire extinguishers. There is no night watchman.

The sexes are completely separated, and the dormitory doors are locked at night. There are no lights allowed in the building for the insane after dark, which lessens danger from fire. The main building is also shut up at 8 o'clock in winter.

The diet is very good. The inmates have practically the same as the superintendent's family. They have milk three times a day, butter always twice, sometimes three times, coffee

every morning, tea twice a day, meat twice a day, good wheat, Indian, and graham bread, fresh and salt fish, including salmon, corned beef with good vegetables, split and green peas, cake, pie, pudding, apple sauce, etc. The matron does nearly all the cooking herself.

This almshouse is very well managed, though there is a great deal to contend with in lack of modern conveniences. The laundry is very inconvenient. There is no hospital room, no assembly room or chapel for the religious services, no sewing room and no sitting room for the women; but the place is very clean and there is an air of comfort about it.

We would especially commend the care given the insane women by Miss Willard, sister of the superintendent. The change wrought in their condition since she came there has been remarkable. Women who were then kept in close confinement, and who had indescribably filthy habits, are now clean and tidy, and have the freedom of the house and yard,—all brought about by her kind and skillful management.

The board would recommend to the county that it put in modern plumbing, a good laundry, and make some arrangement for a large room that could be used for a women's sitting room and for a chapel.

GRAFTON COUNTY ALMSHOUSE.

The Grafton county almshouse is situated in North Haverhill, on the banks of the Connecticut river, close to flag station of Boston & Maine Railroad, called "County Farm."

The superintendent and matron, Mr. and Mrs. H. C. Phillips, have been there since April 1, 1893.

The physician is Dr. H. C. Gibson.

Number of inmates, 98. Expense per capita per week (1899), \$1.33.

The buildings are frame, two in number, main building and insane department. The jail adjoining is of brick.

The buildings are heated by steam and lighted by kerosene. The water supply is obtained from springs and wells and is abundant. The night watchman makes his rounds once an

hour, and the dormitory doors are locked at night. Church services are held once a fortnight by Rev. C. E. Eaton.

The diet is good and abundant. Old people and children have all the milk they want; all have butter three times daily, tea or coffee three times daily, fresh beef twice a week, fresh fish once a fortnight, beans and brown bread once a week, pea soup and stewed peas once a week.

This county farm is unusual in having several aged couples living there who are allowed to live together and seem very happy and comfortable, although otherwise the departments for men and women are entirely separate. The whole place has a homelike atmosphere, and Mr. and Mrs. Phillips do everything in their power to make their charges happy and comfortable.

The insane department of this almshouse is an old frame building entirely separate from the main almshouse, without modern appliances. They have no trained service. The superintendent himself looks after them. A pauper carries food. Several of the insane inmates are in such a condition that they have to be kept confined to their rooms. The odors were bad, the place not very inviting; seven men and seventeen women are confined there, and while they are kept as comfortable as possible under the circumstances, no one realizes more strongly than the county officials themselves the need of some change. The sentiment of the county seems to be in favor of state care.

COOS COUNTY ALMSHOUSE.

The Coös county almshouse is situated in West Stewartstown on the banks of the Connecticut, a quarter of a mile from the railway station.

The superintendent and matron, Mr. and Mrs. Edward Fuller, have been there since January 1, 1897.

The physician is Dr. Fred Allen of Stewartstown.

Number of inmates, 67. Expense per capita per week (1899), \$0.94.

No religious services are held at the farm.

The buildings are of wood, all connected. The superintendent and family live at one end, and the main almshouse building stretches out beyond, with the building for the insane at the extreme further end, connected with main almshouse by a covered passageway. The buildings are heated by steam and lighted by electricity. There is an ample supply of pure water, largely increased during 1899, coming from springs high up on the hills near by. For protection against fire, there are coils of hose on every floor, and two hydrants outside with strong pressure. The night watchman makes his rounds every hour.

The diet is good. Fresh milk and butter are given three times daily, fresh meat three times a week, salt or fresh fish once a week, baked beans twice a week, good white and graham bread from the best flour, molasses gingerbread, pie, fresh vegetables in summer, tea or coffee every meal.

The superintendent and matron are kind and humane, yet maintain good discipline, and evidently take a real interest in their work. Only two women are hired to assist the matron in the housework for the whole establishment, and two men to help the superintendent, one to look after the prisoners, and one to help on the farm. These people, with the night watchman, constitute all the hired help. The almshouse is scrupulously clean, and is a homelike, pleasant place, with more of the respectable aged poor and fewer able-bodied tramps and vagrants as inmates than one finds in the almshouses further south. The prisoners here wear a convict dress, and work on the farm.

There is not enough help in the department for the insane, where there are seventeen people confined, nine men and eight women. One of the insane women, subject to periodical attacks of acute mania but perfectly sane in the intervals, generally has charge of the insane women.

In the men's department is an inmate who is at times very dangerous, sometimes taking an axe and threatening every one, while at other times he is perfectly harmless; but of

course he should be closely watched all the time in a way that is almost impossible to manage in a county institution.

The only hospital rooms at this county farm are in the department for the insane, or in the basement of the main building. A good many lumbermen are brought here suffering from accidents or fevers, and a good hospital room would be a great improvement. The board would also recommend that the plumbing be repaired, bathtubs be enameled, and the open water-closets in each dormitory either be removed or inclosed by partitions.

JAILS.

A detailed account of each jail is appended, from which it appears that only one jail in the state provides employment for its prisoners, and not one has any arrangement for separating young boys and girls from old offenders. Not a penal

institution in the state makes any attempt to reform its prisoners.

The board urges your most careful consideration of the able paper of Governor Rollins upon the Indeterminate Sentence, printed in the appendix to this report, and unanimously recommends legislative action upon its suggestions.

ROCKINGHAM COUNTY JAIL AT EXETER.

Brick building, containing eight large cells. It is heated by steam; has ample bathing facilities and water supply; also is well ventilated. When inspected, December 1, 1900, there were but five prisoners, all men.

Mr. John S. O'Brien is jailer.

ROCKINGHAM COUNTY JAIL AT PORTSMOUTH.

A brick building, heated by steam, and has twenty-four cells; has separate apartments for the sexes; well provided with bathtubs; amply supplied with city water, and the sanitary condition is excellent. At the time of the last inspection, October 16, 1900, there were twenty-six men and two women prisoners.

Mr. E. B. Prime is jailer.

STRAFFORD COUNTY JAIL AT DOVER.

Brick building, containing twenty rotary cells. The women's department has four cells and is entirely separate from the men's. It has good bathing facilities and water supply; heated by steam. Light and air are received from long windows in the outer walls, and each cell is further ventilated from the roof. All parts of the jail presented evidences of neatness, good order, and effective discipline. At the time of inspection there were fourteen prisoners, thirteen males and one female.

Mr. James E. Hayes is jailer.

BELKNAP COUNTY JAIL AT LACONIA.

The building joins the almshouse and is of brick, containing eighteen cells, two of which are for women prisoners and

separate from the others. It is heated by steam and is well ventilated. Sanitary condition good. At the time of last inspection, June 12, 1900, there were eight prisoners, all men.

Mr. Henry C. Weymouth is jailer.

CARROLL COUNTY JAIL AT OSSIPEE.

A small brick and stone building, adjoining the first floor of the almshouse, containing four cells, each cell having a ventilator, and a main one from jail; supplied with spring water and heated by steam. When visited October 10, 1900, there were no prisoners confined there.

Mr. Frank Meloon is jailer.

MERRIMACK COUNTY JAIL.

The Merrimack county jail is situated in Concord, about a mile from the railway station. It is a brick building, containing twelve cells, with separate apartments for females; has one bathtub, a good supply of water, and is heated by steam; ventilation poor. This jail has been visited three times since June, 1900, and at neither time has the visitor been admitted. During the jailer's absence the prisoners are locked up, and no one can get at them or see them. What would happen in case of fire is not difficult to imagine.

Eight prisoners, all men, were confined there December 1, the date of the last visit.

Mr. F. G. Edgerly is the jailer.

HILLSBOROUGH COUNTY JAIL AT MANCHESTER.

A building of brick walls, stone floors, and iron stairs; has forty-six cells, and each cell has two ventilators through the roof, together with six ventilators in the corridors. It is heated by steam and well supplied with water. At the time of inspection there were forty-two men and seven women prisoners. Under the discipline of the jail, which provides an abundance of wholesome, well cooked food, it is required that every prisoner shall perform a fair amount of labor. Few jails are as free from sickness as this; there is none here now (November 15, 1900), and during the past twenty-three years

there has been no instance in which a prisoner has broken down in health during his stay, and no deaths from sickness have occurred. Brooms are manufactured by the prisoners.

Capt. David Wadsworth is jailer.

CHESHIRE COUNTY JAIL AT KEENE.

Brick and granite building; heated by steam; has eighteen cells for men and six for women; well ventilated; has four bathtubs and a good supply of water. At the time of last inspection, November 16, 1900, there were three prisoners. This is a well constructed jail, and was built in 1884. It is much larger than is needed, larger indeed than is ever likely to be needed in this county. There have never been but a few prisoners here at any one time. The jail is located on the outskirts of the city, on dry soil, and is a very healthy, clean, and well conducted institution.

Mr. William S. Tuttle is jailer.

SULLIVAN COUNTY JAIL.

The Sullivan county jail, situated in Newport, is a brick building, heated by wood stoves and lighted by kerosene; ventilated by windows. There are six cells, and there is no arrangement for the separation of the sexes, or the separation of young boys from old and hardened offenders. There is no bathtub. The plumbing and ventilation are bad. There were four prisoners December 1, 1900.

Mr. F. P. Claggett is the jailer.

GRAFTON COUNTY JAIL AT NORTH HAVERHILL.

A brick building, heated by steam, containing seventeen cells; has separate apartments for the sexes; ample supply of water and well ventilated. The sanitary condition is excellent. The number of prisoners at time of inspection, June 11, 1900, was ten men and one woman. The jail is nearly new, having been built a little more than two years ago, and is one of the finest and best arranged jails in the state.

Mr. Henry C. Phillips is the jailer.

COOS COUNTY JAIL AT LANCASTER.

A wooden building, containing twelve cells; heated by steam and well supplied with water; ventilation and sewerage are good; no separate apartments for female prisoners. At the time of inspection, May 29, 1900, there were five prisoners, all men.

Mr. John Flanders is the jailer.

CATHOLIC CHARITIES IN NEW HAMPSHIRE.

The way the Catholic charities of the state are administered is especially to be commended. They are thoroughly organized, and cover almost the whole field of charitable endeavor. Their orphan asylums in Manchester are the largest in the state, and none are managed better. The method adopted by the Catholic institutions at Manchester is to find employment for the children, boys and girls, in various places in the city, allowing them to remain in the homes for a year or thereabouts after situations have been secured for them, and at the end of that time finding them suitable boarding houses and continuing a care and interest until they are securely settled in a respectable occupation. This is the Catholic policy of this state; and while a few children are put out on farms, it is only a comparatively few, and then not until the character and ability of the people assuming the charge have been investigated and found satisfactory, and information is afterwards had as to the care and progress of these children.

The agent of the Home for Destitute Catholic Children of Boston came into this state two or three years ago with children of that institution to seek homes for them among the farmers and others; he was sometimes aided by the local Catholic clergymen. Some fault was found with this mode of proceeding by parties at Laconia and elsewhere, and Bishop Bradley forbade the taking of these Catholic children into New Hampshire. It is understood that the agent has again been in the state during the past summer, but the same authority has again forbidden his coming in such a manner

that it is thought an end is put to the practice. Children of the Catholic orphans' homes in New Hampshire are not disposed of in this manner; one or two very unmanageable boys secured homes during the past year in New Brunswick, but practically all the children from the Catholic orphanages in this state find homes within the state.

CONCLUSION.

In October the board was much gratified to receive the announcement from the United States Commission to the Paris Exposition, Department of Education and Social Economy, that it had been awarded a silver medal for its exhibit in Class 112, Group 16. This exhibit consisted of an account of the origin and growth, scope and leading results of the work of the New Hampshire State Board of Charities, with details about its new method of caring for the dependent children, all written in French, and included also copies of the blanks and cards used, and a copy of the law under which the board works.

The board wishes to thank Governor Rollins most heartily for his constant interest and help in their work, as well as for his generous grant of the money which made this year's work possible.

To the court and the attorney-general also our thanks are due for the grant of the room for an office adjoining the supreme court room in the state library.

The board is also much indebted to the office of the superintendent of public instruction for the constant use of their typewriter and telephone, as well as for many other favors.

Respectfully submitted.

LILIAN C. STREETER, *Secretary.*

JAMES F. BRENNAN, *Chairman.*

BY-LAWS OF THE STATE BOARD OF CHARITIES AND CORRECTION.

SECTION 1. The board shall have a President and Secretary, who shall be elected by the board in September of each year, at a regular meeting or at a special meeting called for the purpose.

SECT. 2. It shall be the duty of the President to preside at all meetings of the board. In his absence from any meeting a President *pro tem.* shall be elected.

SECT. 3. It shall be the duty of the Secretary to keep a record of the proceedings of the board; to conduct its correspondence; to give notice of its regular meetings; and he shall with the President prepare the biennial report, and submit it to the whole board before being published. In his absence from any meeting a Secretary *pro tem.* shall be elected, who shall make the record of the proceedings at such meeting, and shall transmit the same to the Secretary within five days thereafter.

SECT. 4. The regular meetings of the board shall be held at its office in Concord (unless otherwise notified) on the third Wednesday of each alternate month beginning with January, and notices of said meetings shall be given to all members of the board by mail not less than four days in advance.

SECT. 5. Special meetings may be called by the President, the Secretary, or any three members of the board.

SECT. 6. Three members of the board shall constitute a quorum for business at its meetings.

The order of business shall be as follows:

1. Reading the minutes of the last meeting.
2. Secretary's report of his work since the last meeting.
3. Reports by members of their work since the last meeting.

4. Unfinished **business**.

5. New business.

SECT. 7. These By-Laws may be amended by a majority vote of members present at any meeting of the board, notice of such intended action having been previously given.

SUGGESTIONS TO VISITORS.

STATE OF NEW HAMPSHIRE.

OFFICE OF STATE BOARD OF CHARITIES AND CORRECTION,
 STATE LIBRARY BUILDING, CONCORD, N. H.

SUGGESTIONS TO VOLUNTEER VISITORS.

First. Blanks for reports will be furnished each visitor.
 Please fill out two for each visit. Retain one yourself for
 future reference, and send the other to us.

Second. Please send in your reports quarterly, the first of June, September, December, and March, but visit the child always as much oftener than this as the circumstances may require.

Third. If a child is discontented, or for any reason not well situated, or a change of place is desirable, please report the matter at once without delay, making such recommendation as you may choose upon a Special Report blank.

Fourth. There should be a separate report for each child, and all reports should be signed by the visitor, and dated upon the day the visit is made.

Fifth. Communications requiring an answer should *not* be made upon a report blank but by letter.

Sixth. Address all official communications to State Board of Charities and Correction, State Library Building, Concord, N. H.

Personal letters may be sent directly to the chairman of the committee. All communications will be considered as strictly confidential.

REPORT.

BY JOHN M. GILE, M. D., SECRETARY.

On April 25, 1899, an organization known as the New Hampshire Conference of Charities and Correction was established in the state. Though a purely voluntary and independent organization, its object is so in keeping with that of the State Board of Charities that mention of it seems not out of place in this report.

Indeed the conference had its origin in a meeting held in Concord in February, 1899, under the direction of the State Board of Charities. The board issued a call to the citizens of the state interested in the subject of charities to assemble at the state house and listen to papers, by experts in their various lines, on the subject of the care of the different indigent classes.

The desirability of a better general education along the lines of this important branch of the public service was so clearly shown that at the close of the meeting a committee was appointed to report measures for the organization of a permanent conference. On April 25, 1899, the organization was completed. Standing committees were appointed to study the condition of the indigent insane, the feeble-minded, dependent children, and penal and reformatory institutions.

The first regular meeting of the conference following the organization was held in Concord April 11, 1900. At this meeting exceedingly instructive reports were presented by the various committees above mentioned. Each report was followed by full and vigorous discussion. An address upon "The Care of Dependent Children" was given by Mr. W. H. Pear of

Boston, assistant secretary of the Children's Aid Society, and Governor Rollins's paper on the indeterminate sentence for prisoners was presented.

The conference proposes to hold annual meetings at which the needs of our indigent classes shall be pointed out to the citizens of the state at large, and particularly to the members of our legislature and officers of charitable and correctional institutions, dealing with these subjects both from the standpoint of humanity and economy.

CONSTITUTION AND BY-LAWS.

CONSTITUTION.

ARTICLE 1. This organization shall be known as the New Hampshire Conference of Charities and Correction.

ART. 2. The purposes of this organization shall be to unite the voluntary efforts of all those interested in the charitable and correctional work of the state, and to promote such work by agitation and discussion, the presentation of papers upon timely topics, and the collation and dissemination of such information as shall keep the people of our state, and more especially the members of our legislature and officers of our charitable and correctional institutions, in touch with the work done in the other states of our own country and in foreign lands.

BY-LAWS.

ARTICLE 1. The membership of this association shall consist of all persons who shall make application in writing to the secretary, deposit the membership fee of one dollar, receive notice of membership from the secretary, and pay such annual dues as may be determined upon by the association.

ART. 2. The stated meetings of this conference shall be holden annually at such time and place as the conference may determine, and special meetings may be held upon the call of the president or on application of five members to the secretary.

ART. 3. The officers of this association shall be a president, five vice-presidents, a secretary, a treasurer, and an executive committee of five members, of which the president and secretary shall be members *ex-officio*. These officers shall be elected at the annual meeting by ballot.

ART. 4. The duties of the president shall be to preside at all meetings at which he shall be present; to call special meetings, when, in his judgment, the interests of the association require it, to preside at meetings of the executive committee, and to act as executive officer of this corporation.

ART. 5. The duties of the vice-presidents shall be to preside, in order of election, in the absence of the president.

ART. 6. The secretary shall keep the records of all meetings, conduct the correspondence of the association, collect the fees and dues, giving receipt therefor, and discharge such other duties as may belong to his office.

ART. 7. The duties of the treasurer shall be to act as custodian of the funds and other property of the association, and submit an annual report of the same, approved by the executive committee.

ART. 8. The executive committee shall make the necessary arrangements for all meetings of the association, suggest topics for papers and discussion, publish an annual report of the proceedings of the conference, appoint standing committees immediately after the annual meeting, and discharge all duties pertaining to such a committee.

ART. 9. There shall be five standing committees as follows, on the

- a. Insane,
- b. Feeble-minded,
- c. Dependent Children,
- d. Penal and Reformatory Institutions and all Houses of Detention,
- e. Pauper Delinquents,

whose duty it shall be to secure such information concerning these dependent classes as may be of interest to the conference and report the same in such manner as the executive committee may direct.

ART. 10. These by-laws may be amended at any meeting, notice of the proposed amendment having been given by the secretary to each member at least five days before the meeting.

INDETERMINATE SENTENCE.

BY GOVERNOR FRANK WEST ROLLINS.

(Read before the New Hampshire Conference of Charities and Correction, at Concord, N. H., April 7, 1900.)

The subject of penology, or the care of prisoners, is attracting widespread attention in this country as well as abroad. Men of great ability are making it their life work. The subject has not been brought home to us very closely here in New Hampshire, and has therefore not received as much attention as it ought. After carefully studying what has been done abroad and in some of our own states, I have come to the conclusion that we must soon take a step in advance here. But this step must be one of statute. The legislature must act, and in order to get the subject before the people and have it discussed and digested before the next legislature meets, I have prepared this article, in the hope that it may lead at least to an intelligent discussion and examination of this very important question, and possibly to an advance movement along the right lines. I should be glad if the papers of the state would copy this article and discuss it.

Before taking up this subject I wish to say a word about our own state prison. I believe it to be one of the best managed prisons of its kind in the country. My examination leads me to the belief that the discipline is as nearly perfect as it is possible to have. The food is of good quality, well cooked, and sufficient in amount. Everything about the prison is very neat and cleanly, and it is one of the very few prisons in the country which is self-supporting.

The industrial school at Manchester is also an excellently managed institution, with good discipline, and everything

about it seems to be well cared for. I could wish that we had more buildings there, and greater facilities for gymnastics and better sleeping accommodations; but these will probably come in time.

I believe our prison to be one of the best prisons in the country of its kind. My criticism is that the system there is not conducive to reform, and this is true of all prisons run on these lines.

In this state, and, in fact, the world over, until recent times, prisons have been largely places for punishment for crimes committed, the idea of reformation being secondary—and as a matter of fact a reform was a rarity, speaking in a broad sense. Simply putting men and boys in jails and prisons does not reform them—quite the contrary—for herding hardened criminals with novices in crime, under influences which tend to educate them as criminals, would seem to make the state responsible to a certain extent. The criminal class in the United States is said to be under one hundred thousand, confined in our prisons and penitentiaries. This number is steadily increasing. How to prevent the increase is the question.

NOT REFORMED.

An increasing number each year of those arrested are discharged convicts, showing that as now conducted our prisons do not reform. Our taxes are steadily increasing in our efforts to repress this class, and worse than this, we live in terror of their felonies. Our present system does not reform the criminal nor protect society. In spite of all our laws the professional criminal goes on with his occupation, interrupted only by periods of seclusion, during which he is comfortably housed and fed. Statistics show that in large prisons 70 per cent of the prisoners when arrested were under thirty years of age,—they are younger in years and older in experience than is generally thought. Prisoners generally belong to an inferior grade of humanity. About one half of them have served time in some other institution. More than 60 per cent are practically illiterate, and as a whole are indolent, unstable, reck-

less. "They constitute a living semi-social mass not easily resolved and brought into accord with the orderly life of a good community." These last lines are the words of one of the greatest prison reformers in the country.

If our aim were simply to punish the criminal, you see at a glance how difficult it would be to make the punishment fit the crime. In order to do this, the court must foreknow and accurately predetermine what length of imprisonment shall exactly compensate the crime. Judges are fallible,—one is tender-hearted, one is stern and inflexible,—and we see men occupying adjoining cells, one for five years and one for seven, for exactly the same crime. The length of a man's term in prison may depend on whether the judge has dined or whether his liver is torpid, and in saying this, I mean no reflection upon the judiciary. It is simply poor, weak human nature.

Now, if we grant that our present system is a failure, which I think can be easily demonstrated, what shall we substitute for it, or how correct it? The new idea is the indeterminate sentence.

It strikes directly at the criminal class with a sledge hammer blow. It puts them beyond the power of continuing their depredations upon society. The criminal's career ends with his first arrest. So far it has never been tried in this country. Approaches to it, like "ticket-of-leave" and "parole," are in use, but not the absolute indeterminate sentence.

WHAT IT IS.

An indeterminate sentence is a commitment to prison without any limit. It is the same commitment as the court makes to an asylum of a man proved to be insane. This law would of course be a radical departure from present laws, but it will be in general use inside of ten years. At first this law sounds very harsh and cruel, but in reality it is more kind and more humane than our present laws, for under our present laws a man once imprisoned for a term of years must serve out his sentence (unless pardoned), no matter how much he may try to reform and improve; but with the indeterminate sentence the judge's office would be reduced to the task of determining

the guilt of the man on trial, and then the care of him would be turned over to expert treatment, exactly as in the case of insanity, and when experts believed him cured or reformed he would be liberated, it may be in a short time, it may be in a long time. In other words, the convict is given the key to his own prison. It is for him to choose whether he will become a decent man and go back into society, or whether he will remain in prison.

Of course the indeterminate sentence would radically change our criminal jurisprudence, and it will be opposed by the criminal class and all allied to it.

The criminal who is susceptible to good influences would shorten his term of imprisonment under the indeterminate sentence, while the incorrigible offender would be cut off at once and forever from his occupation, which under the present system is varied by periodic residence in the comfortable houses of detention belonging to the state.

ESCAPE BY REFORM.

The indeterminate sentence would make every prison a reformatory in the true sense. A man's reform would be his only means of escape. The great object of the indeterminate sentence is to diminish the number of criminals, and this will be done when it is seen that the first felony a man commits is likely to be his last. By his very first violation of the statute he walks into confinement to stay there until he has given up the purpose of such a career. He stays in the reformatory until, in the opinion of an expert or experts, he is fit to be trusted at large. If he is incapable of reform he stays the balance of his natural life, and it is where he ought to be, but he is a free agent. He can have his liberty when he wants it. It may seem at first glance that it is a difficult thing to tell when a man has reformed, and so it is; but tests have been devised which work very well in practice. As a matter of fact, it is very difficult for men to play the hypocrite and deceive their keepers under this new system.

The indeterminate sentence is in use to a certain extent in several states, and very successfully, but nowhere in its en-

tirety. New York has carried it farthest. Massachusetts, Pennsylvania, Minnesota, Illinois, Indiana, Ohio, Wisconsin, New Jersey, and California are all using some form of it. But in all these states, I believe there is a maximum and minimum limit, which is not a full indeterminate sentence. The indeterminate sentence must not be confounded with the conditional liberation we call the "parole law," or ticket-of-leave. The ticket-of-leave is only a part, an adjunct, of the indeterminate sentence.

Compare criminality to disease. The sick man is taken to a hospital and kept there until cured. In the same manner the prison will retain the condemned, and minister to his ailments, so long as there is danger of a relapse. No man should be imprisoned unless it is clear that his freedom is dangerous to others, and when once imprisoned no man should be freed until the danger has ceased. This is the principle of the indeterminate sentence, tersely stated.

The ordinary imprisonment treats men simply as we would treat a tiger or other wild beast; that is, we cage him, and when his term ends we turn him loose upon society. Such a sentence does not reconcile him to his fellows, and he is generally discharged more the foe of mankind than before.

CRIMINAL STUDIED.

The new, or reformatory, system of treatment studies the physical, intellectual, and moral defects of the criminal, and seeks to remove them by enforcing cleanliness, education, habits of truth, self-control, and industry. It teaches useful occupation, suggests motives to exertion, awakens the mind to a sense of social relations and duties, and holds ever before the prisoner the sweet prospect of self-earned freedom and self-asserted manhood. Prison life is unnatural at its best. Man is a social creature. Confinement tends to lower his consciousness of dignity and responsibility; to weaken the motives which govern his relations to his race; to impair the foundations of character and unfit him for independent life. To consign a man to prison is commonly to enroll him in the criminal class. This tendency is enforced and made irresistible by the condi-

tions, discipline, and associations of our common jails, and when for these are substituted the best methods of reformatory training, experience shows that the evil influences of imprisonment may be largely mitigated.

The best example of reformatory work with a partial indeterminate sentence is at the Elmira (N. Y.) reformatory. Perhaps a brief description of the methods there will be of use. In this institution the criminal can only be detained for the maximum term provided in the statute for his offense. When that is reached he is released whether reformed or not. This, you will see, is not the indeterminate sentence in its entirety.

The system at Elmira is scientific, and is administered by trained men and by specialists, just as trained men are put in charge of colleges or fitting schools or asylums. The discipline is equal to that of a military academy. The whole theory is to keep men long enough under a strict discipline to change their habits. This discipline is administered in three ways: They are placed in school; they are put at work; they are prescribed minute and severe rules of conduct, and in the latter training is included military drill. The school and the workshop are both primarily for discipline and the formation of new habits. Only incidentally are the school and the workshop intended to fit a man for an occupation outside the prison. The whole discipline is to put a man in possession of his faculties, give him self-respect, and get him in the way of leading a normal and natural life. But it is true that what he acquires by the discipline of study and the discipline of work will be available in earning an honest living. Keep a man long enough at this and he will form permanent habits of well doing. If he cannot his place is in confinement.

They study hard and are under constant supervision as to conduct, and their prospect of parole depends entirely upon the daily record they make and upon their radical change of intention. Three classes or grades are provided for: First, those convicts who are least vicious and give hopeful promise of reform; second, those of a lower moral order; third, the hopelessly incorrigible. These classes are liable to constant

readjustment, and a prisoner is liable to be transferred from one to the other according to his conduct and behavior. In other words, he is promoted or degraded according to his merit. The classes are designated by different uniforms, and there is a difference in quarters and diet. The character of each convict becomes intimately known; his power of self-control, his strength of purpose, the degree to which he can be trusted, the measure of progress he is making, can be computed and tested; and a reasonable estimate can be formed of his qualifications for freedom.

Great stress is laid upon building up the body, which is generally defective physically, and a fine gymnasium course is provided,—baths, massage, and rigid military drill and discipline,—all under competent instructors. On arrival a man is carefully examined mentally and physically, and a course of treatment, drill, exercise, and work is mapped out to suit his case. This course is changed or varied as circumstances and the opinion of the directors dictate. While in the reformatory many prisoners learn a trade by which they can support themselves when they get out.

When the prisoner has reached a certain percentage of excellence and maintained it for a certain time, he is released on parole, but has to report once in so often to the authorities and can be at once rearrested if he does not behave. The records show that over 80 per cent of those released this way, after having served a term of a year or more, became good, respectable citizens. The effect of this system is to reduce the cost to the state by shortening the terms of imprisonment. The average length of term at Elmira is 26 months; in the other prisons of New York five years.

The following quotation is from an article written by one of the convicts in the Elmira reformatory:

SENTENCE AS A MOTIVE.

“From the view-point of a ‘man up a tree’ I would say that the character of our sentence has everything to do with furnishing a motive which induces and stimulates us to a degree of activity we could never acquire under a fixed penalty.

"Where, under a definite sentence, we would spend most of our time crossing off days from the calendar and lie awake nights counting over and again the amount of time yet necessary for us to serve before the dawn of freedom, now every moment is utilized in taking advantage of all opportunities for improvement that are offered, well knowing that only by advancement in the trades-school and school of letters, together with strict compliance with the rules of the disciplinary department, can liberty be earned. And the word 'earn' is used advisedly, for a man to get along in this reformatory can be no sluggard, but must be alert, ever ready to advance and not drag behind.

"The ideal sentence, so far as an incentive to reformation goes, would be an absolutely indeterminate one, where a man must either reform or remain in prison for life, for where would the welfare of society be considered if a man be released prepared to prey upon it as he did before imprisonment? In the absolutely indeterminate sentence there is a motive that will quicken every energy and arouse the dullest to life and exertion for he would be fighting for liberty,—liberty that could never be his until he had shown by his conduct that ready compliance with all requirements here was intended, and willingness to discard the old and detrimental habits, taking on new and profitable ones. The fact that a man could get along in here would indicate his ability to live in accord with society in the outside world.

"Under such a system no one fit to be released would fail to gain it. Why? Because the motive is so strong as to force the most unwilling to willingness; because a man who would rather rot in prison than try to gain his freedom by legitimate means is better off where he is. He would only be a stumbling-block to society in general if he were set free, and would sooner or later land again in some penal institution or other, and thus his life would be wasted, and public funds squandered in arresting, discharging, and rearresting the useless drone, the balance of whose life would be passed in various prisons of the country."

My object in preparing this article is to bring the subject to the attention of the people of our state, and to encourage a discussion which seems to me may result in some change in our statutes regarding imprisonment. I claim no originality whatever for this article. It is taken largely from various articles on penology, and in many places I have quoted sentences bodily from other writers. It is simply a digest of the best thought I can find on the subject.

BIENNIAL REPORT

OF THE

ADJUTANT-GENERAL

OF THE

STATE OF NEW HAMPSHIRE,

OCTOBER 1, 1898, TO OCTOBER 1, 1900,

BEING

VOLUME IV, PART III.

AYLING'S REPORTS.

MANCHESTER, N. H.
ARTHUR E. CLARKE, PUBLIC PRINTER.
1900.

ADJUTANT-GENERAL'S REPORT.

STATE OF NEW HAMPSHIRE,

ADJUTANT-GENERAL'S OFFICE,

CONCORD, October 1, 1900.

His Excellency Frank W. Rollins, Governor and Commander-in-Chief, and the Honorable Council:

GENTLEMEN,—I have the honor to present herewith the biennial report of my department for the two years ending September 30, 1900. Since my last report the infantry of the New Hampshire National Guard has been reorganized, and now consists of two twelve-company regiments instead of three regiments of eight companies each, as heretofore. This reorganization, which took effect January 23, 1900, is in conformity to the infantry regiments of the United States army, and to the United States drill regulations, and renders the force in every way more efficient. The light battery and troop of cavalry remain as before, and during the past two years no company has been disbanded and no new company enlisted.

The strength of the brigade, as appears from the last quarterly returns received, is 126 commissioned officers and 1,290 enlisted men, a total of 1,416.

UNIFORMS AND EQUIPMENTS.

The dress uniforms, being no longer recognized as a part of the dress of the New Hampshire National Guard, have been turned in by the companies, and the entire force is fairly well supplied with caps, campaign hats, blouses, trousers, and leggins. Working suits of canvas or khaki suits, which can be drawn from the quartermaster's department, U. S. A.,

should be issued for use when drilling in armories, and for fatigue and police duty and drills in camp, to preserve the blouses and trousers clean and in good condition for dress occasions.

Many of the rifles are old and in very poor condition, and all are of an obsolete pattern and unfit for service, as compared with the modern magazine rifle of the regular army.

The recent act of congress, increasing the appropriation to provide arms and equipments for the militia, increases considerably the annual amount against which this state can draw ordnance or quartermaster's stores, but not enough to permit the re-arming of all the infantry companies in one year with the new rifle, even if the entire amount could be used for the purpose; this, however, cannot be done, as provision must be made each year for clothing, equipments, and ammunition, all of which are charged against the annual allotment.

The only way in which the state troops can be furnished with the magazine rifle, other than by purchase, which would require a large appropriation, is to draw from the United States as many as possible each year, and issue them first to the companies showing the greatest interest and improvement in rifle practice, and then to the other companies until all are supplied.

I am well aware that the battery should have new breech-loading guns and the infantry at least one machine gun, but I do not see how they can be furnished, neither the United States allotment nor the state appropriation being large enough to provide for them.

There should be a supply of blankets, ponchos, meat cans, ovens, and shelter tents, sufficient for at least one regiment, kept in store and ready for issue in case of emergency; but under present conditions this is not practicable.

ENCAMPMENTS.

The encampment for 1899 commenced June 19, that for 1900 June 18, each being for five days, which is the limit permitted by reason of the expense. The time is too short in

which to obtain the best results, there really being but three days for solid work. However, I am satisfied that some good was accomplished and some improvement made, as appears in the accompanying reports of Brig.-Gen. Elbert Wheeler, inspector-general, 1899, 1900, Bvt.-Maj.-Gen. Jason E. Tolles, commanding brigade, 1899, 1900, and Col. Edwin O. Upham, commanding Second Regiment, 1899.

Governor Rollins with his staff was present during both encampments, and his experience in, and knowledge of, military matters enabled him to make many valuable suggestions which, with his lively interest in everything pertaining to the camp, were appreciated by all.

At the encampment of this year Governor Rollins presented a cup to be awarded to the company excelling all others in drill, discipline, care of clothing and equipments, neatness of quarters, and general set-up and soldierly bearing.

The cup was awarded to Company A, First Regiment, Captain Trefflé Raiche, and honorable mention was made of Company B, First Regiment, Company E, Second Regiment, and Troop A, Cavalry.

The National Guard was particularly fortunate at the encampment of 1900 in having present First Lieut. (now Captain) Warren P. Newcomb, Fifth Artillery, U. S. A., detailed by the war department, as inspector and instructor. Captain Newcomb made many friends here by his patient courtesy as mustering officer, in 1898, when the First New Hampshire Volunteers were mustered out, and his instruction, suggestions, and kindly criticism at the encampment were as valuable as his presence was agreeable to all with whom he came in contact.

RIFLE PRACTICE.

The report of the season of 1900 cannot be given with this as the season does not close until November 30. Last year, at the request of Maj. Frank L. Kimball, inspector of rifle practice, he was permitted to organize a team to represent the state at the interstate match at Sea Girt, N. J. I inclose Major Kimball's report of the match, from which it appears the New Hampshire team made a very fair showing.

Unfortunately a lack of funds prevented a team being sent to Sea Girt this year.

I inclose the reports of the state competition for 1899 and 1900.

GENERAL REMARKS.

The camp ground is in excellent condition, as are also the buildings upon the grounds. The cook-houses, while quite old, have been newly shingled, and one, which was the poorest and had become superfluous, has been removed. The three buildings heretofore used as regimental stables, and which were old and unsafe, have been removed, and a new stable large enough for the horses of the two regiments was built last spring and occupied at the encampment in June.

The question as to how the troops shall be fed in camp has become quite important, the present system of company caterers being unsatisfactory. It has been suggested that the army rations be issued to each company in bulk and cooked by enlisted men detailed for the purpose. This might be well in an encampment of ten days or more, but I am not satisfied that it is practicable for the necessarily short time our men are in camp. I think it would be better to build mess halls for the two regiments, large enough for each command, including the officers' mess, and have regimental caterers, who would be under the supervision of the regimental commanders.

On the 19th of September last the entire New Hampshire National Guard was mobilized in Portsmouth to take part in the celebration connected with the presentation of testimonial tablets to the United States battleships Kearsarge and Alabama, and in honor of the secretary of the navy, Admiral Sampson, Governor Joseph Forney Johnston, of Alabama, and staff, and other guests, and paraded with the sailors and marines of the North Atlantic squadron and various local societies. This was the first time for many years that the brigade had paraded as a whole, aside from the regular tour of camp duty, and it was highly complimented upon its appearance by the distinguished visitors and by our own

citizens, many of whom had never seen all the state troops together.

The officers and men volunteered for this parade, transportation being furnished by the state. In this connection, I feel impelled to say I do not think it advisable to ask or to permit the National Guard to volunteer for such parades; the men feel that having given their services they should not be subjected to such restrictions and discipline as if under orders and pay. I believe that whenever troops are to parade upon any occasion of the kind, they should be properly ordered to appear and paid for their services, and there should be some fund or appropriation available against which the governor could draw his warrant for the expenses of such parades, which occur but very rarely.

After calling attention for several years to the unfitness of the cases containing the colors of New Hampshire regiments in the Civil War, and urgently recommending that new cases be provided, I am glad to state that at the last session of the legislature an appropriation was made for this purpose, and the cases are now being built. The lists of engagements of the several regiments, many of which were incomplete or incorrect as given on the old cases, have been corrected and completed, and will appear with the proper dates.

I congratulate the state and the surviving veterans upon the fact that the colors will at last be placed in handsome, dust-proof cases, where they will be, as far as possible, preserved from decay.

I respectfully recommend that a small appropriation be made for the preparation and publication of a register of New Hampshire men in the war with Spain, and suggest that it be printed in size and form uniform with the "Revised Register of the Soldiers and Sailors of New Hampshire in the War of the Rebellion."

In my last report, in referring to the eagerness of the infantry companies to respond to the call of the president, in 1898, no mention was made of the First Light Battery and Troop A, Cavalry. In justice to these, two of the best and most reliable organizations in the state, I desire now to place

on record the fact that both the battery and troop tendered their services to the governor and were eager to serve.

The following reports and papers are respectfully submitted for your information:

Reports of the Inspector-General:

Encampments, 1899, 1900.

Armory Inspections, 1899, 1900.

Reports of Encampment:

Brig.-Gen. Jason E. Tolles, commanding First Brigade, 1899, 1900.

Col. E. O. Upham, commanding First Regiment, 1899.

Report of State Rifle Competitions, 1899, 1900.

Report of State Team at Sea Girt, N. J., 1899.

Return of New Hampshire National Guard, showing strength and location of companies.

Register of commissioned officers, October 1, 1900.

Commissions issued since date of last report.

Resignations and discharges of commissioned officers since date of last report.

Deaths of commissioned officers.

Enlisted men dropped as deserters.

Permit me, in closing, to thank your Excellency and the gentlemen of your Council, for the courtesy and consideration I have uniformly received, and which, I assure you, I fully appreciate.

Very respectfully, your obedient servant,

AUGUSTUS D. AYLING,

Adjutant-General.

REPORTS OF INSPECTOR-GENERAL.

STATE OF NEW HAMPSHIRE,

INSPECTOR-GENERAL'S OFFICE,

NASHUA, July 24, 1899.

GENERAL A. D. AYLING,

Adjutant-General, Concord, N. H.:

SIR,—In compliance with paragraph 4, General Orders No. 6, A. G. O., dated Concord, April 13, 1899, I have the honor to report as follows concerning the annual encampment of the New Hampshire National Guard from June 19 to June 23, inclusive:

The brigade was under command of Gen. Jason E. Tolles, recently commissioned in succession to Gen. George M. L. Lane, whose term had expired by the limitation imposed by law.

Each organization reported its arrival in camp in due season, and was shortly well settled in quarters. Troop A, Cavalry, and the First Light Battery marched to camp as directed, arriving in excellent condition. The right of the line was held by the First Infantry, the Third occupying the center, and the Second the left, with the Battery and Troop A, Cavalry, on the extreme flank. His Excellency the Governor and staff were continuously in camp during the tour, occupying tents provided for them at brigade headquarters. The presence of His Excellency was manifestly pleasing and beneficial to the brigade. The routine of daily duty prescribed by General Orders No. 3, Brigade Headquarters, dated June 5, was inaugurated immediately upon arrival of organizations, and substantially observed thereafter. .

Tents were speedily and systematically pitched by each tent squad, directly after arrival, a method far preferable to the former system of sending details for the purpose, both on the score of economy and for purposes of general instruction.

The grounds were found in excellent condition and police, and so maintained. No sickness was reported during the tour of duty, excepting in the Third Infantry, in which there was an average of six men thus noted. The weather throughout was unusually favorable for work, making possible most effective results.

The disposition seemed generally manifest to realize the most possible from the few days' service. Officers and men were interested, discipline was in most directions well enforced and cheerfully observed; the work prescribed by routine was faithfully performed. There was some opportunity to criticise for noise between taps and reveille, making evident the lack of appreciation of the value of sleep. Such practice would cure itself by very exhaustion if camp were long continued, but commanding officers should realize, especially in hot weather, how the loss of sleep affects the ability of men to perform the full routine of duty. General Grant has said: "Two hours' sleep is worth heavy reinforcements." Some would seem to have interpreted this as fixing a maximum limit, beyond which they should not permit themselves or their comrades to enjoy it.

The attendance averaged 1,249 out of an aggregate of 1,430, or 87 per cent, which is deemed very satisfactory. The Brigade Field and Staff, also Signal and Hospital Corps, are credited with 100 per cent present; Troop A, Cavalry, 98 per cent; the First Light Battery, 92 per cent; First Infantry, 92 per cent; Third Infantry, 85 per cent; and Second Infantry, 82 per cent.

Commanding officers generally are commended for special efforts made to secure the largest possible attendance, resulting in higher percentages present than formerly obtained. These may, however, be made still more satisfactory, if some captains will keep in mind paragraph 276 of Regulations

relative to enlisting only such men as will probably be able to attend to camp duty.

TABLE OF STRENGTH AND ATTENDANCE.

*No encampment because of war with Spain.

Subsistence was mainly furnished by caterers, as in years past. Urgent recommendation is later on made for change in this matter.

Tents were supplied in good number, and are in excellent condition. Inspection of quarters revealed too many failures to conform to arrangement required by the printed Regulations posted in each tent, the chief of squad evidently not taking the trouble to inform himself thereon. The grounds immediately adjacent were usually clean, but with some exceptions. Several captains failed to require their men to take position at inspection of quarters, as prescribed by the Regulations.

In addition to the usual variety of drills, faithfully attended to, each infantry regiment went outside camp lines

during a drill period for outpost duty. I did not follow the latter, but am informed that it was well exemplified in each case. Work in camp was zealously performed. Another year it is proposed to resume use of the battalion drill-cards, with which it is presumed each field officer is familiar, and in which so much is dependent upon familiarity of the guides with their duties.

Both the Light Battery and Troop A, Cavalry, made diligent and profitable use of each drill period, with satisfying results. The new harnesses recently furnished the Battery proved their worth, and were much appreciated by Major Piper and his command.

Guard duty was fairly well performed, in many cases exceptionally so. Improvement was doubtless considerably due to the presence of many veterans of the war with Spain, who made their impress in other directions also. Service stripes indicating participation in the war with Spain were numerous, notably in Companies A and B, First Infantry, which were composed entirely of such veterans.

The details of instruction in the duties of sentinels having been much simplified by the present manual, it is considered that there should easily be more familiarity with it than obtains with many men, and this would certainly result if captains would be at a little effort to properly instruct them.

Courtesies were well observed, both by sentries and by men off duty, in which latter respect there was manifest improvement over former years. The individual compliments to the colors at headquarters were remarkably well observed, and the ceremony attending the lowering of the colors at retreat, as prescribed by paragraph 12 in Brigade Orders No. 3, c. s., were exceedingly impressive.

The ceremony of guard-mounting was possible of considerable criticism at first, errors being mostly chargeable to officers and non-commissioned officers of the guard, who, it would seem, might easily have avoided most of them by a few moments' study.

Regimental dress parades were highly creditable. There was individuality of method in details not specifically pre-

scribed by Regulations, preference for which might well be a matter of opinion.

No formal inspections were made of organizations (excepting of quarters), as armory inspections had been so recently completed. This made it possible for each to devote more time to drills, much to the satisfaction of commanding officers.

The music furnished by each of the regimental bands at ceremonies as well as at evening concerts was of a high order, and contributed much to the pleasure and interest of all.

Faithful work was done by the Signal Corps, which is now well organized and capable of effective service.

A hospital corps was improvised with good results, from which it is hoped may be developed a corps organized upon the regular army system.

The review on June 22 by His Excellency the Governor was highly satisfactory. Organizations looked business-like, distances were well maintained, the step and alignments well kept, salutes almost invariably rendered.

Brief but interesting and impressive religious services were held each morning before breakfast, under charge of the regimental chaplains, the effect of which could not be otherwise than salutary. Services were also held each evening under the auspices of the state executive committee of the Young Men's Christian Association, which had a large tent near the right flank of the brigade, with several secretaries and representatives of the association continually in charge. The usual practice of the association was observed, providing without charge daily papers and other interesting reading matter, writing material, games, etc.

I am of the opinion that steps should be taken to materially reduce the number of visitors frequenting encampments, which should not be regarded as pleasure resorts, or made use of largely for the entertainment of friends. If a suggestion by commanding officers that invitations be not so widely given shall not avail, then I would recommend the issuance of an order forbidding the admission of other than military visitors or ex-members of the National Guard, excepting

within certain limited areas, not including company streets and quarters, and during the afternoon of the day of review by His Excellency the Governor, when the above restrictions might properly be waived.

It is to be regretted that the annual appropriation is insufficient to provide for purchase of Buzzacott ovens, mess kits, haversacks, etc., so that field rations might be issued. These, with transportation, shelter tents, etc., would enable such portion of the brigade as might be detailed therefor to engage in cross-country practice marches or extended field movements, with the rudiments or essential principles of which both officers and men should be made familiar. They should not be ignorant, as now, of the primary details of knowing how to care for themselves on the march or in a night's camp, nor should staff and line officers lack knowledge of how to provide for and take care of the troops under their charge, many of the very foundation essentials of which are only obtainable in such cross-country service, and hardly ever even thought of in the routine of duty of the ordinary fixed encampment.

All-round efficiency for field service should unquestionably be the object in view by every officer and man in the National Guard, and the study and work of every member of the force, as well as the expenditure of every dollar of the appropriation, should be made with this idea dominant. If the war with Spain worked disorganization in some directions, yet it added appreciably to the sum of practical knowledge, and has greatly emphasized the relative superiority of present day efficiency resulting from the existing system of "get-there" drill regulations over the more ornamental fuss-and-feathers methods which have been displaced. But drill regulations are only a small part of the effective soldier's knowledge. He must know how to care for himself in actual campaign conditions, marching, camping, cooking; must understand sanitation, outpost duties, etc. Inattention to sanitary conditions and ignorance of cooking or things proper to be eaten are clearly shown to have been more dangerous than the enemy's bullets.

Perhaps the other greatest lack in the National Guardsman of today is in the mastery of his rifle for its intended use under service conditions. To overcome this, ammunition should be generously supplied, means devised to create an interest in marksmanship, and every member required to practice until reasonably proficient; it being always remembered that every bullet that fails to hit its mark is wasted, and every man ineffective through ignorance is an incubus. When we have a well-disciplined force, knowing how to march, camp, cook, police, scout, and shoot to kill, we have a National Guard properly so named, sure to command the respect and support of the people, and in which every man will deem it an honor to serve. We need somewhat to reform our ideals of the elements of a soldier, and this is believed not to be impracticable with such a number of officers and men now realizing the above facts, as we undoubtedly possess. If, in some cases, they cannot be attained, we would advise eliminating from the service those that fail, deeming a small force that is thoroughly effective of far greater value than one more numerous, yet cumbered with unprogressive parts.

We consider the above observations to be so paramount in importance that we were strongly disinclined to dignify even by mentioning in the way of criticism the merely minor matters of departure from the letter of drill regulations as they were daily observed. If the time which the militiaman can give the state is so limited, all the more should it be devoted to essentials. The constant need of the National Guard is intelligent direction, instruction in the most important matters. No deduction was so evident from the recent war with Spain as the value of intelligence as exemplified in the American soldier and sailor, when contrasted with the lack of it among their opponents. The present inspector-general of the United States army has most properly said: "Wars are half fought before they are formally declared." Militia service is pre-eminently a school, and its definite aim should be unmistakably towards the national defense.

Camp was broken at 1 o'clock P. M., June 23, in strict conformity with General Orders No. 4, c. s., from brigade head-

quarters. Property was disposed of and organizations moved as therein required. The aggregate results accomplished were happily disappointing, all things considered, and the definite conclusion reached that progress was sufficiently marked to compensate for efforts generally put forth. It was, however, impossible to avoid regret that the annual appropriation by the state and the allowance by the war department are not sufficient to fully provide equipment and means to permit favorable comparison in all ways with the militia of states thus more highly favored. If such lack could be overcome, it would beyond question give such encouragement to the National Guard as would result in an all-round efficiency decidedly superior to that now attained. Officers and men generally contribute much time and not a little money, in the aggregate, to state service, and would do far more if assured by such slight increase of financial support as would provide up-to-date equipment suitable for real service, not holiday parading, that their efforts were fairly well appreciated. Good men and organizations become better and do their best work in the National Guard, as everywhere else, when made to understand that they have the appreciative regard of those whom they serve.

Very respectfully, your obedient servant,

ELBERT WHEELER,

Inspector-General.

STATE OF NEW HAMPSHIRE,

INSPECTOR-GENERAL'S OFFICE,

NASHUA, N. H., July 22, 1900.

GENERAL A. D. AYLING,

Adjutant-General, Concord, N. H.:

SIR,—In compliance with paragraph 4, General Orders No. 9, A. G. O., dated Concord, April 23, 1900, I have the honor to report as follows concerning the annual encampment of the New Hampshire National Guard, from June 18 to June 22, inclusive:

The orders of the brigade commander, Gen. Jason E. Tolles, for transportation of the infantry by rail, and the battery and cavalry by marching, were carefully observed, each organization reporting its arrival in good order at the time expected. The First and Second Regiments of infantry, twelve companies each (consolidated from the three eight-company regiments of years past), were assigned,—the Second, Col. Edmund Tetley, to the right, the First, Col. Edwin O. Upham, to the left, with the First Light Battery, Capt. Silas R. Wallace, and Troop A, Cavalry, Capt. Charles B. Davis, on the left flank.

His Excellency Governor Frank W. Rollins was early in camp with his staff, being formally received on Tuesday, June 19, and remaining throughout the tour. His personal interest in the brigade, and his familiarity with military matters, combined to make his presence peculiarly pleasing and helpful toward best results.

Maj. Paul F. Babbidge, assistant inspector-general, reported to me immediately upon my arrival in camp, by order of the brigade commander, and was of the utmost assistance throughout the tour. Besides being charged generally to assist in observing the regular routine and conduct of camp, he gave special attention to care and arrangement of quarters, sinks, cook-houses, and stables. His tireless labors and intelligent comprehension of essentials combined to make his work peculiarly noteworthy.

It was a genuine satisfaction to the brigade that the war department was represented by Capt. Warren P. Newcomb, Fifth United States Artillery. His former service in the state in connection with the muster-out of the First New Hampshire Volunteers made him many friends, and, with this tour of duty, demonstrated his peculiar fitness for the work now assigned him. He was of marked assistance to each arm of the service.

The routine prescribed by the brigade commander was begun with guard mounting at 1.10 p. m., and thereafter, except for several delays incident to first calls by the brigade trumpeter not being heard down the line, was carefully

observed. Exceptions to this included several companies that were not exercised in settings-up drill for fifteen minutes after reveille roll-calls, and a generally loose observance at first of proper formations and correct reports of attendance at reveille and tattoo roll-calls. These doubtless resulted from lack of oversight in years past, but were speedily corrected when it was made known that this department was taking notes thereof. Two or three battalion commanders were also observed not promptly obeying recall at expiration of the two-hour drill period, caused, however, it is believed, by not hearing the call.

The grounds were in excellent condition, except for dust incident to lack of recent rainfall. The weather was generally favorable for work throughout the tour, rain interfering only with drill on the last afternoon. No sickness was reported in the Battery or Cavalry, only one man the last day in the First Infantry, and an average of but three men in the Second Infantry.

The attendance averaged 1,232 out of an aggregate of 1,399, or 88 per cent, which is 1 per cent better than that of the year previous. The Brigade Field and Staff, the Signal and Hospital Corps, the Field and Staff, Second Infantry, and Company A, First Infantry, are credited with 100 per cent present. Company B, First Infantry, and Troop A, Cavalry, would have had like records, except that one officer in the former and one man in the latter were absent each two days. The First Light Battery had 90 per cent present, the First Infantry $89\frac{1}{2}$ per cent, and the Second Infantry $84\frac{1}{2}$ per cent. The figures in detail are as follows:

TABLE OF STRENGTH AND ATTENDANCE.

ORGANIZATION.	PRESENT.						ABSENT.			Aggregate.	Percentage of attendance.	Percentage, 1899.
	Officers.			Enlisted men.								
	Field and Staff.	Line.	Total.	Non-com. officers, musicians, and privates.	Band.	Total.	Officers.	Men.	Total.

Totals	33	74	107	1,078	48	1,126	4	162	166	1,399	88	87

No encampment in 1898 because of war with Spain.

Discipline was deemed exceptionally good. Work was cheerfully and well performed, camp was generally quiet after taps, courtesies were well observed (there are always some exceptions with recruits), and compliments to the colors were rarely overlooked. In connection with the present significance of and attention to the playing by the bands of "The Star Spangled Banner," I would suggest the adoption of the practice of the army, by which this piece is no longer played in a medley, but maintained by itself in its own peculiar dignity, to teach its supreme lesson of patriotic regard for the emblem of "the land of the free and the home of the brave."

Subsistence was provided as in years past. I would repeat the urgent recommendations upon this matter made in my report upon the encampment of 1899.

Tents were generally in excellent condition, and regulations for arrangement and care better observed than in years past. Wide diversity of practice was noted in the amount of baggage brought to camp by different organizations, a

ridiculously excessive quantity of trunks, chests, etc., being found in the quarters of Company I, Second Infantry, in unfavorable contrast with Company E of same regiment, which, without a single trunk or chest, was found with the minimum amount, yet everything necessary, each member having brought his entire outfit upon his own person. I would suggest that further restrictions or directions other than limits of weight of baggage upon which the state will pay transportation, be promulgated, fixing the limit for individual use of enlisted men to the amount which can be carried upon their persons, and for officers to what might properly be called field baggage, in order that a nearer conformity to service conditions may be brought about. Of course, provision must also be made for necessary books, company outfits for cooking, lighting, etc.

It was a matter of regret that the program for drills included no outpost duty. Consequently the drill periods were devoted almost entirely to the schools of the battalion and company. This was explained by the statement that need of the latter work was so manifest, and as a preliminary to successful outpost duty, that there was no time for aught else. If this was the case, it seriously reflects upon the capability of officers and guides, upon whom proficiency in battalion drills almost entirely depends, and strongly suggests that they zealously extend the field of their study and practice before coming into camp, in order that so much time need not be lost or wasted in teaching them rudiments, with which, in good conscience, they should have already acquainted themselves. These details made familiar, as they must be, special attention should be given to scouting and skirmishing, to instructing how to take advantage of cover, how to handle the spade, etc., etc. In a word, the object is not parade-ground maneuvers, but to make officers and men know how to do such work as is incident to active service.

Each battalion commander was twice during the encampment asked to drill his battalion by card. Results were in some cases very gratifying, in others the contrary. One or two majors, several company commanders, and not a few

guides, should with much diligence acquaint themselves with their duties under the drill regulations. It is positively abusive of men in the ranks, as a rule naturally enthusiastic and interested, to require them to suffer the tedious and discouraging delays incident to necessary explanations to their superiors, or, worse, to perpetuate ignorance or erroneous practice because a battalion commander continually fails, ignorantly or carelessly, to correct errors frequently occurring. There should never be promotions to commissions or appointments to warrants, unless there is clearly ability and disposition to qualify for the duties pertaining thereto. It is perfectly apparent that these considerations are sometimes overlooked.

The foregoing remarks might have also been provoked by several exhibitions of incompetency of officers and guides at guard-mountings. Apparently without experience, they had made no effort to qualify themselves for their particular duties, consequently some ceremonies were characterized by gross errors. As these were often uncorrected, no staff officer calling attention to them, those making them not unlikely would think themselves warranted in repeating them on the next occasion, thus defeating, in large measure, the main purpose of instruction underlying the whole military system.

Guard duty appeared not to compare favorably with that of the previous year. While the system has been simplified under the present manual, and therefore can be more easily learned, yet it seemed not to result in the usual efficiency. Apparently, this was largely due to a practice quite general to detail recruits for guard duty, in order that older men might be available for regular duty. Of course there were exceptions to these general conclusions where sentinels were found thoroughly efficient. This was particularly true of men belonging to the Light Battery, where guard duty is systematically taught and practiced.

The dress parades of each regiment each evening were a pleasing feature, usually well carried out. Some intervals were possible of criticism, lines were not always well estab-

lished, and occasionally there was slight unsteadiness or inattention in ranks, but the ceremonies were generally very satisfactory.

The work of the Light Battery and of Troop A, Cavalry, was characterized by faithfulness and good results. When it is remembered that horses used are nearly all without that training which contributes so much in the regular service to correctness of execution in drills and ceremonies, it will be granted that attainments were worthy of commendation.

The Signal Corps made diligent use of the drill periods, practicing at both short and long distances with excellent results.

The Hospital Corps also was well organized, and demonstrated good understanding of its duties.

The two regimental bands are excellent organizations, and added materially to the good cheer and pleasure of the camp throughout the tour.

I would also highly commend the manner in which officers of the brigade staff performed their respective duties. The labor involved in some of them is hardly appreciated generally.

The review by His Excellency the Governor on Thursday, June 21, was very satisfactory. There was manifest purpose to observe requirements on distances, steadiness, alignments, and step. Criticism could properly be made of several officers, some for saluting too quickly, others not doing the courtesy to the reviewing party to turn the head and look directly at him in saluting, while three or four entirely failed to salute, due apparently to ignorance or carelessness. As this was the most noticeable error they were likely to make, it would seem as if sufficient soldierly pride might have been maintained to keep so simple yet important a duty in mind.

The usual beneficent and helpful work of the Young Men's Christian Association was maintained upon substantially the same plan as last year.

Conformably to paragraph 8, General Orders No. 9, A. G. O., dated Concord, April 23, 1900, announcing the offer of a cup by His Excellency Governor Rollins, "to that company

which shall appear in the report of the inspector-general as having excelled all others at the encampment of 1900 in drill, discipline, care of clothing and equipments, neatness of quarters, and general set-up and soldierly bearing," this department gave careful attention to determining where it should be bestowed. Credits were given the various details mentioned, according to what was deemed their relative importance. There was entire unanimity in reaching the conclusion that not alone on the points specified was Company A, First Infantry, Capt. Trefflé Raiche, entitled to the cup, but it had 100 per cent present during the entire tour, and every member scrupulously devoting himself to the most careful performance of his full duty. It was an invariable pleasure to observe the soldierly appearance of its members, both in and out of ranks, and it well earned the distinction bestowed upon it. The cup was presented by His Excellency in person on the afternoon of June 22, the brigade being massed for the purpose in front of brigade headquarters. Honorable mention was recommended by this department, and approved and made by His Excellency, of the record made by Company B, First Infantry, Capt. Daniel F. Shea, Company E, Second Infantry, Capt. Charles L. Mason, and Troop A, Cavalry, Capt. Charles B. Davis. It is believed that the competition contributed not a little to the improvement and record of the numerous companies entering into it.

It is recommended that letters and numbers be issued to each company for use on campaign hats, same as are used on fatigue caps, and for the same reason. Companies or individual members thereof are not otherwise now recognizable.

I cannot refrain from repeating my recommendations of last year for more complete and modern equipment of the brigade, in order that it may avoid the embarrassment sure to come to it in emergency, if equipped as it now is. We have the organization, officers and men interested, desirous above all else of doing things in a business way, but we permit the continued use of antiquated, inferior muskets, many of them unserviceable, instead of Krag's, for the infantry, and of smooth-bore, muzzle-loading Napoleon guns, instead

of rapid-fire field pieces, for the battery. We are without cooking outfits, haversacks, canteens, or shelter tents, all as indispensable as the men themselves, if readiness for active service is the aim to be kept in view. The National Guard should contain within itself the elements of really complete efficiency. This efficiency involves not alone the best equipment available, but the highest intelligence. We are deceiving ourselves, if we insist not upon both. Granted that such equipment involves greater expense, and that the desired intelligence imposes a tremendous task upon officers, they will make effective by intelligent use the better equipment, when supplied with it.

Another real necessity is instruction by the medical officers of the brigade in the primary details of sanitation and self-care. Lack of such knowledge cripples an army more rapidly than does fierce fighting. First aid to the injured should have like attention. If it be said that all these things are beyond National Guardsmen, the answer is that they have in some instances accomplished them, and we should not aim for a lesser attainment. They have ever been willing, but something besides willingness is necessary to readiness for winning battles.

My appreciative acknowledgments are sincerely given to every officer and man in the brigade with whom I have been brought into contact, by which the duty imposed upon me has been rendered exceedingly pleasant.

Very respectfully, your obedient servant,

ELBERT WHEELER,

Inspector-General.

STATE OF NEW HAMPSHIRE,

INSPECTOR-GENERAL'S OFFICE,

NASHUA, N. H., June 24, 1899.

GENERAL A. D. AYLING,

Adjutant-General, Concord, N. H.:

SIR,—In compliance with General Orders No. 5, A. G. O., dated Concord, April 4, 1899, I have the honor to report that

the annual inspection of the New Hampshire National Guard has been completed, with results as herein set forth:

Maj. Paul F. Babbidge, assistant inspector-general, and Maj. Frank W. Russell, Third Infantry, reported by letter for duty to assist as directed, and were able to render service particularly valuable to the organizations inspected, because of the enthusiastic purpose to impart to them of the practical teaching and experience secured by both as officers in the First New Hampshire Volunteers during the war with Spain.

It was anticipated that much allowance would need to be made in passing upon the condition and serviceability of the force as a whole, because of the changes in organization and equipment of those companies which saw service in the First New Hampshire Volunteers, and this necessarily proved to be the case. These facts, with others incident thereto, make it impracticable to tabulate the usual comparative standing of organizations, which is consequently omitted.

Results otherwise were generally happily disappointing to the inspectors, the advantage of training and discipline incident to service in the war with Spain being apparent in those organizations participating. Major Russell reports as follows:

"In some localities there is a feeling of indifference towards the state troops. This is largely the result of the gloomy reports of their service brought home by certain volunteers, that have been magnified by their friends, and circulated to the prejudice of the present National Guard. It is not probable, however, that this state of affairs will become serious, or will long continue. As new men enter the service and see for themselves what its conditions are, discouraging remarks from former members will have little weight with them."

The prescribed drills have not been held in some companies, due, generally, to delay in receiving arms, uniforms, and equipments since return from government service. In many organizations no records are kept of attendance at drills. It is earnestly recommended that first sergeants' roll-books for such records be issued to each organization, with the requirement that they be accurately kept, avoiding

the liability to error which now obtains wherever report of attendance is based upon estimate only.

In examination of books and records, four companies appear to have been given no instruction in guard duty, one has made no entry upon enlistment book of discharges during the past year, one has required no written excuses for absence. Twelve companies are reported with field ranges not equipped with regulation appliances for target practice, and the same number have no armory range. In one instance (Company G, Third Infantry) explanation for this lack is given that the owner of building occupied objects to such practice. If possible, such objection should be overcome, or armory accommodations secured elsewhere.

A like suggestion is applicable in the case of Company K, Third Infantry, which, it is reported, has access to its drill and property rooms only forty evenings in a year.

Company C, Second Infantry, and Company E, Third Infantry, were at date of inspection below the minimum of strength fixed by law, but as this was clearly due to the process of reorganization incident to service in the war with Spain, no recommendation is made thereon.

Five companies are reported as having had no regular target practice during the year, due, however, to interference with usual routine because of service in the war with Spain.

This disturbing cause is the explanation of incomplete records found in many of the companies thus serving. It is highly desirable that books and records, turned in when companies were mustered into the service of the United States, be reissued to them, if possible, in order that records be kept continuous as far as practicable, and explanation required to be made therein of cause of break in such continuity.

Major Babbidge recommends that all books and papers used by the National Guard be made to conform as far as possible to those used in the regular army, in which I am pleased to concur. There is not uniform practice in the method of filing orders or in keeping regimental rosters of officers and non-commissioned officers. It is recommended that separate files be furnished in which to keep the orders issued from

each superior headquarters, also that regimental rosters be prescribed and issued, patterned substantially after that used by the Second Infantry.

Ten companies report that no meetings of officers and non-commissioned officers have been held during the year for instruction. Captains should clearly appreciate the fact that without perfect familiarity with the numerous details of drill, guard duty, the militia law and regulations, their officers and non-commissioned officers will not be able to command that respect and attention which are essential to successful administration.

Several commands are reported poor in military bearing, discipline, and courtesy. Captains of these companies, who are generally responsible for these conditions, should seriously consider whether, if speedy improvement is not effected, the good of the service may not be better accomplished by a change in commanding officer. It certainly is not to the credit of a captain to retain command which he exercises only in name.

Knowledge of guard duty, as developed by questioning of individuals, is deemed fair in most cases, although it needs always to be borne in mind that practical familiarity with it can only be thoroughly gained by actual experience under well-informed officers and non-commissioned officers of the guard. This is a matter of exceeding importance, requiring constant attention.

Major Russell states that "those who served in the First New Hampshire Volunteer Infantry have a good knowledge of camp guard duty, or at least such a knowledge of it that it will quickly be made good by a brief renewal of its performance."

Two first sergeants are reported as having improperly formed their companies, two preceded their calling the roll by the command, "Attention to roll-call," three improperly reported to the captain the result of roll-call. One first sergeant called the names of the captain and lieutenants at roll-call,—an utterly improper procedure. It is deemed remarkable that six men occupying such responsible positions as first

sergeants should permit themselves to be ignorant on details plainly set forth in the drill regulations, especially upon those in which they have practice at every formation of their companies, and it is likewise remarkable that captains will permit such errors to be repeatedly made. Evidently, some commanding officers do not command, either because of inexcusable ignorance, or through carelessness still more blameworthy.

In one company, several men are reported as having been absent without leave from state duty, and no excuse required by the captain. The law is explicit upon this. If men failed to render excuses demanded of them, they should be fined or discharged for the good of the service; but they are not as blameworthy as the captain, if such excuses are not called for by him.

The inspectors report special need of study and hard work in four companies, by which alone can even an average condition be maintained. Major Babbidge reports that the file-closers in many companies fail to do their duty in correcting errors which should be seen by them, especially in the loadings and firings; also, that too frequently they permit talking and laughing in ranks while at attention. This criticism, of course, must likewise be chargeable to the captains of companies in which it is observed. Lack of distinction is also noted between the observance of the commands "at ease" and "rest." Major Russell reports that "very few officers or men can recognize the trumpet calls, either warning, formation, alarm, service, or drill." Not infrequently firings were carelessly executed. They should each have a distinct purpose, and be deliberately made, not hurriedly, but with definite object in view.

The military bearing of the force as a whole seems to have been harmfully influenced to an appreciable extent since the adoption of the present drill regulations, in that there has developed manifest carelessness in sundry minor details which enter into the precision and smartness which have always, even unto this day, characterized well-instructed and disciplined troops. While it is intended that utility and the

easiest methods of accomplishing desired results shall be paramount in the modern system, the cardinal principle of which is to "get there," yet it is nowhere inculcated that, at attention, infantry-men shall imitate cavalry-men by standing with heels apart; neither are they to deem it incumbent upon them—much less their privilege—while in ranks at inspection or close order drill, to exercise themselves in that watchfulness of everything that may transpire in their vicinity by gazing about in ranks, however desirable and necessary this practice is in guard duty, scouting, or reconnoissance. Major Russell expresses the opinion that "sighting the 'School of the Soldier' is the most noticeable fault in instruction."

It is manifestly to the credit of a few companies that in bringing pieces to the order, they were lowered *gently* to the ground, in refreshing contrast with others who seemed utterly to forget, if ever instructed, that such treatment of muskets could hardly fail to injure ejector springs or other mechanism.

Perfect attendance is credited to Companies B, H, and K of the First Infantry, the Field, Staff, Band, Companies G, H, and I of the Second, and the Band of the Third. The roll was called from memory by the first sergeant of Company I, Second Infantry.

Company B, First Infantry, is further deemed worthy of special commendation in that it regularly drills twice a week, has weekly meetings of officers and non-commissioned officers, and systematic, semi-monthly instruction in guard duty, all combining to result in a report of "excellent" acquaintance with the law and orders, and condition of books and property, personal appearance, military bearing, discipline and courtesy, knowledge of guard duty, also drills free from criticism under each of its three officers. It should further be adduced that service in the war with Spain cannot properly be said to demoralize companies participating, as every one of its three officers and fifty-one men is a veteran of that service. It is an unqualified pleasure to call attention to the long-continued and increasingly faithful service of this company.

Major Babbidge recommends that some distinctive badge or device be adopted by the state, to be worn by such officers as

served the national government in the recent war with Spain, and the same is submitted for such consideration as is proper.

I am pleased to commend as worthy of general adoption, what is termed the Directory of Squad Divisions, posted in the armory of Companies G and H, Second Infantry, at Keene. This consists of a list of the several non-commissioned officers, under each of which are the names of the men (and residences or places of employment) under their charge, or whom they are respectively to notify in cases of emergency, supplemented by a map with pins stuck in at said places of residence or employment, the flat-headed pins, which denote the locality of officers and non-commissioned officers, bearing their respective insignias of rank.

Attention is invited to the poor quality of many of the brass hooks in musket slings. They are frequently so brittle as to break whenever it is attempted to open them sufficiently to change the length of sling-straps.

Major Russell reports that the saddles in use by Troop A, Cavalry, "are old, and should be replaced whenever the expense can be permitted"; also, "if practicable, the two B-flat bugles carried by the trumpeters should be turned in, and G trumpets with F slides issued. (Par. 1202, A. R. 1895.)"

He commends both officers and men of the troop, stating that they appear proud of their organization, and that its maintenance under difficult conditions is creditable to them and to the towns represented in the command.

The First Light Battery was credited with maintenance of the excellent condition and most commendable *esprit de corps* which have been continuously recorded in its favor for so many years under its efficient commander, Major S. S. Piper, who is clearly entitled to special mention for most faithful service.

My acknowledgments are due to Major Babbidge and Major Russell for their most generous willingness to relieve me largely in the matter of armory inspections, of which, because of the press of personal business requirements, I have felt obliged to avail myself, with the sanction of His Excellency

the Governor and yourself, for all of which I desire to express my earnest appreciation.

Very respectfully, your obedient servant,

ELBERT WHEELER,

Inspector-General.

STATE OF NEW HAMPSHIRE,

INSPECTOR-GENERAL'S OFFICE,

NASHUA, N. H., June 16, 1900.

GENERAL A. D. AYLING,

Adjutant-General, Concord, N. H.:

SIR,—In compliance with General Orders No. 3, A. G. O., dated Concord, March 5, 1900, I have the honor to report the result of the annual inspection of the New Hampshire National Guard.

Maj. Paul F. Babbidge, assistant inspector-general, and Maj. Frank W. Russell, Second Infantry, reported to me as directed, to assist in making the inspection, the former giving attention to the entire Second Regiment, excepting Company K, which with Troop A, Cavalry, was inspected by Major Russell. I would express my appreciation of services thus rendered by these officers, which, as always in the past, were characterized by superior intelligence and exceeding faithfulness.

The re-organization of the infantry into two regiments of twelve companies each in conformity with General Orders No. 2, dated Adjutant-General's Office, Concord, January 20, 1900, was found to have been substantially accomplished, the necessary transfers, changes in company letters, etc., being completed. Beyond any doubt, it will result in both economy and increased efficiency of this arm of the service.

A careful analysis of the detailed reports of inspection shows a generally commendable condition of companies located in the larger cities of the state, but less satisfactory results elsewhere. Many of the city companies have armories inferior to those in smaller places, but the larger constituen-

cies from which to draw interested members, and, more potent still, the local rivalries inciting to such work as shall result in superior attainments, work greatly to the advantage of city organizations. This is not a necessary or inevitable result, as is evidenced by the most distinctly rural organization of the state, Troop A, Cavalry, which, with a membership widely scattered, is yet possessed of an unexcelled *esprit de corps*, and is consequently efficient and serviceable. Other exceptions to the rule have been found in companies commanded by captains of intelligence and conscience, determined by faithful work to produce and maintain organizations creditable to their localities, the state, and themselves, and in which it should be an honor to serve. No organization attains to superior position except by the single road of faithful work under intelligent direction, and with very rare exceptions, the lack of such work and direction is the direct and principal cause of unsatisfactory condition. Too many captains seem not to appreciate these dominant facts, endeavoring, rather, to satisfy themselves and others that unfavorable comparisons are due to local or other conditions for which they are not responsible. Lack of thoroughness in details perhaps best describes the condition of the poorer companies, which is literally impossible of remedy except by the application of conscience to persistent study and work. The command of a company, regiment, or brigade cannot possibly be a sinecure, if properly administered, and no one can gain honor and credit from either position, except by fulfilling the multitudinous requirements which they impose upon him.

The Table of Comparative Standing appended hereto gives in condensed form the condition of each organization. It is a positive satisfaction to call attention to those generally credited with excellence. It will be a pleasure to this department to explain to the commanding officer of any organization the particular facts upon which low ratings are based, in order that like criticisms may be avoided hereafter. Indeed, each captain was notified, previous to this year's inspection, just what criticisms were recorded against his command

a year ago, which notification was appreciatively acknowledged by some, and probably was of value to nearly all.

The rating on target practice is according to the standards prescribed in 1892 by Gen. Albert N. Dow, then inspector-general, this basis having the present approval of Maj. Frank L. Kimball, brigade inspector of rifle practice, data being mostly furnished by him.

Attention is called to points most frequently noted for correction, or which, if quite infrequent, it is desirable to correct, viz.:

In many cases the assembly was not sounded as the signal for formation of company, as required by paragraph 187, Infantry Drill Regulations.

Frequently, also, the courtesy due the inspector, as prescribed by paragraph 747, Infantry Drill Regulations, was not observed. The salute mentioned is interpreted to require only the personal salute of the captain or officer in command.

Several officers show ignorance of manual of the sword at inspection. This could easily be overcome by careful reading of the Drill Regulations, paragraphs 491 and 742.

Not infrequently, at drills following inspection, when command was assumed by the first lieutenant, the second lieutenant failed to take the position and duties of his immediate superior.

In several cases, first sergeants prefixed to their report to the captain of result of roll-call, the utterly unnecessary and gratuitous words, "The company is formed." This seems inexcusable, having been several times criticised in previous reports of inspections, and strongly suggests that reports of this department, promulgated from time to time in General Orders, are either not published by being read to each command on receipt, or are not so posted as to be read individually. Little comment would be made if some private soldiers failed to obtain the full significance of them, but it is almost inconceivable, from a military standpoint, that men holding so important and functional a position as that of first sergeant would permit themselves to be repeatedly criticised on such details. In one or two cases, also, they assumed at

roll-call to call the names of their superior officers, a highly improper proceeding, as the slightest reflection should suggest.

Two or three first sergeants, in forming their companies, besides properly announcing the division into platoons required by the Drill Regulations, improperly and needlessly assumed to announce, not alone the right and left guides, but the chiefs of each platoon and section; their zeal, if it had not been improperly directed, would have been most commendable. These criticisms primarily, of course, belong to their captains, who have permitted such practices.

Occasionally it was observed that there were worn white collars not of the pattern prescribed. They should be of the full, straight, standing pattern, not with points turned over, or open in front.

In two or three commands, the left hands were held rigidly against the breast at double time, instead of being allowed "a natural swinging motion." (See paragraph 35, I. D. R.)

In many cases at quick time, there is more swing of the arms than the "three inches in front and rear of the seam of the trousers," prescribed by paragraph 192 of Drill Regulations.

A few companies show lack of proper discipline by men talking in ranks, with little effort or success of officer in command to prevent it.

Commendation is due the following named officers for freedom from criticism at either inspection or the drill following, viz.: Capt. Trefflé Raiche and Second Lieut. Ubard Hebert, Company A, First Infantry; First Lieut. Herbert H. Rouse, Company C, First Infantry; Capt. Ernest S. Woods, Company E, First Infantry; First Lieut. Elbridge Z. Saunderson and Second Lieut. Evaton P. Lettenmeyer, Company G, First Infantry; Second Lieut. Henry G. Cram, Company H, First Infantry; Second Lieut. Harry S. Wilson, Company I, First Infantry; Capt. M. J. Healey, First Lieut. Thomas J. McDonald, and Second Lieut. Thomas H. Stewart, Company K, First Infantry; Capt. Frank H. Keenan and First Lieut. Lewis E. Tuttle, Company A, Second Infantry; Capt. Charles

L. Mason, Company E, Second Infantry; Capt. Herman J. Pike, Company F, Second Infantry; Capt. Silas R. Wallace, First Lieut. John A. Barker, First Lieut. Charles E. Chapman, and Second Lieut. Albin Gustafson, First Light Battery; Capt. Charles B. Davis and Second Lieut. Clifford Gowing, Troop A, Cavalry.

Credit is also gladly given the following first sergeants for calling the rolls of their respective companies from memory, viz.: H. E. Shaw, Company I, and J. J. Faughman, Company K, First Infantry; Lester C. Brock, Company I, and Charles F. Huntoon, Company M, Second Infantry.

It was very gratifying to observe the literal observance by Company K, First Infantry, Capt. M. J. Healey, of the requirement of Drill Regulations that in coming to the position of "Order arms," the piece shall be lowered "gently" to the ground. This was accomplished, too, without affecting the cadence, and was altogether in refreshing contrast to the noisy and violent manner observed in some companies.

Most commendable interest, resulting in 100 per cent attendance, was noted in the Brigade Field and Staff, Signal Corps, and Hospital Corps; the Field, Staff, and Band, and Companies A, C, and K, First Infantry; also the Band, Second Infantry.

Several captains were observed not to have rigidly and invariably required the consent of parents or guardian before enlisting minors. (Paragraph 61, Regulations N. H. N. G.) This is of the utmost importance. No officer should accept the promise of such an applicant that he will later obtain the consent necessary to make the enlistment legal. Even if the law left it optional with the captain thus to do (which it does not), it is, as a rule, never so easily obtainable as when the applicant is desirous of entering the service. I wish to commend, as worthy of imitation, the manner of enlisting men in Company E, Second Infantry, Capt. Charles L. Mason. The recruit having signed the enlistment book, the command is paraded, when the oath is administered to the new member in front of the company, thus adding materially to the impressiveness of the event.

Too frequent an error of captains is failure to require the written excuses for absence from state duty required by paragraphs 81 and 82, Regulations. These are readily obtainable, and no exception is taken thereto in companies well informed as to the law and systematically administered.

It has previously been observed that credits given attendance at drills for the six months previous to inspection, per paragraphs 242 and 243, Regulations, have been based upon estimates rather than actual record. This because hitherto no first sergeants' roll-book has been issued in which to permanently keep such record. These having now been issued by the state, no estimates of attendance will hereafter be accepted. Captains should therefore observe just what the law requires, and have the record duly made of duty performed by each member of their commands.

The list of non-commissioned officers, with the names and addresses of men in their respective squads, were in several instances not posted in armories, as required by paragraph 222 of Regulations N. H. N. G.

There should be issued to each organization the entire list of books, papers, etc., called for by the Militia Law and Regulations, and I am pleased to concur in the recommendation of Major Babbidge that all books and blanks for use of the National Guard shall, as a matter of instruction, conform as closely as practicable to those used in the regular army, and officers fully instructed in their use. The importance of this is doubtless difficult of realization by one who has not had occasion to use them under service conditions. Major Babbidge also recommends that an officers' school be held at least once a year, the instruction to be wholly in official correspondence, the use of books and blanks, also lectures on the care of men in the field, drawing and preparing rations, etc., in all of which I most heartily concur.

Companies F and L, First Infantry, and Troop A, Cavalry, are still using armories in which the owners forbid armory rifle practice, raising the question whether the state should not refuse to permit the use of such buildings, unless the restriction be removed.

Major Babbidge recommends that a different armory be secured for Company C, Second Infantry, because present one is so near an existing "Beer Club."

Previous criticisms and suggestions upon the armories in use in Manchester are still pertinent. They are as a whole the least suitable in the state. Such zeal and efficient work as characterize the Manchester companies should be met by accommodations which would encourage still higher attainments. No one thing would contribute so effectively towards this result as an armory building of adequate size, conveniently arranged for use by the battery and all the infantry companies. In my opinion, the state might well afford to bear a part of the cost thereof.

In two companies, G and H, First Infantry, also Troop A, Cavalry, attention was invited to paragraph 281, Regulations, prescribing that all state property shall habitually be kept in the armories.

The system of keeping records and of transacting business at brigade and regimental headquarters was found to be most excellent. Compliance with the law, however, involves such an amount of labor at each for which no allowance other than glory is made, that I recommend consideration of the question of allotting such a sum to each as shall somewhat commensurately reimburse the assistant adjutant-general and the regimental adjutants for the time devoted to this service.

There is manifest need of new muskets in exchange for the various patterns of Springfield, .45 calibre, now in use. They should be of the same model as is used by the army of the United States. Many of the present pieces are unserviceable, lacking essential parts, some of which it is impossible to obtain.

The ratings given in Table of Comparative Standing to the First Light Battery attest its maintenance of the excellent standing which has always characterized it, to which nothing need be added.

Major Russell accords not a little commendation to Troop A, Cavalry, yet in considerable detail calls attention to points which should have its attention. The troop is strongly ani-

mated by praiseworthy pride, and this is shared by the entire community, many citizens of which maintain interest in it through membership in times past.

Enlistments in the troop should be restricted to residents of Peterborough and adjoining towns, as required by section 47, Militia Law.

Fatigue caps should have been worn at inspection, instead of campaign hats. Major Russell advises that the troop should take up instruction in "Extended Order," and remarks that it would be benefited by increased practice in "The Riding School."

There are several companies which, for various reasons, are in a more or less unsatisfactory condition. In Company D, First Infantry, there has been lack of harmony, and consequently of united effort towards obtaining all-round efficiency. Too little work has been done, and even this little seems to have been characterized by lack of thoroughness in details. Men willing to learn appear not to have been met by superior officers entirely competent to properly instruct them. I was given reason to hope that improvement might be expected, otherwise I would deem it necessary to advise reorganization or disbandment.

Companies C and D, Second Infantry, were found lacking in efficiency, largely because of officers not now in command. Under present organization, marked improvement is confidently expected.

Company F, Second Infantry, even with excellent officers, is suffering from scarcity of local work for its members, by which many have been obliged to leave town. It is a question whether these adverse conditions may so long continue as to make it appear expedient to disband the company and locate it elsewhere, regrettable as such a course would be after so creditable a record as this company has maintained for many years.

Other suggestions and criticisms in my report of 1899 might still have application to some extent, and it is hoped the zealous and conscientious may be inclined to refer thereto from time to time, as well as to other available sources of

information, by which to make progress in the military art.

My acknowledgments are gladly extended to officers and men throughout the service for uniform courtesy and kindness, by which my duties have been rendered exceedingly pleasant.

Very respectfully, your obedient servant,

ELBERT WHEELER,

Inspector-General.

REPORTS OF ENCAMPMENTS.

HEADQUARTERS FIRST BRIGADE,

NEW HAMPSHIRE NATIONAL GUARD,

NASHUA, N. H., July 15, 1899.

MAJOR-GENERAL A. D. AYLING,

Adjutant-General:

SIR,—In accordance with section 481, Article XIII, Regulations N. H. N. G., I have the honor to submit the report of the tour of duty performed at the state camp ground, Concord, by the First Brigade, N. H. N. G., June 19 to 23, 1899.

In compliance with General Orders No. 6, A. G. O., dated April 13, 1899, the First Brigade, N. H. N. G., was ordered into camp at the state camp ground, Concord, June 19, for five days' duty.

The brigade commander established his headquarters, with his staff, upon the state grounds on Saturday, June 17. Commanding officers, with field and staff, came upon the ground during the day.

Capt. Charles B. Bodwell, brigade quartermaster, was charged with the laying out and pitching camp, assisted by the regimental quartermasters. The laying out of the camp was practically the same as former encampments. The headquarters of the different commands were pitched on Saturday by laborers; those of the line and companies were pitched after the arrival of the commands, each tent squad being required to pitch its own tent, which was done by signal, under charge of the regimental quartermasters, and the duty was well performed.

Transportation for the infantry was largely by special trains, and the organizations reported promptly. The cavalry

and battery marched to camp and arrived at 8.30 A. M. and 12 M., respectively.

The routine of daily duty began at 12 o'clock, noon, Monday, and was strictly observed through the tour of duty.

The weather was excellent, with the exception of Tuesday afternoon, when part of the routine of duty was dispensed with.

The regimental guard was mounted each day at the same hour as the brigade guard. The regimental guard was larger than in former years, as each commanding officer was charged with the establishing and instructing a guard for his entire ground. This reduced the number of the brigade guard. Guard duty was not performed as well as it should be, owing largely to the fact that the new men had not received instructions. Commanding officers should make guard duty a part of their armory instruction. Many of the sentinels posted had received no instruction, which made it very embarrassing for the men, and not at all complimentary to their commanding officers. I wish it understood that this does not apply to every sentinel, as some of them performed their duty excellently, and where this was noticed the men had either seen service or had received special instructions in their armory. Company commanders must give this part of the regulations more attention.

The details made from each company of infantry to act as a hospital corps were instructed by their regimental medical officers, and the work was very satisfactory.

The Signal Corps was made up entirely of new men, who were without any knowledge of the duties of that branch of the service, but with study and close attention to drill, they were able to send and receive messages very readily at the close of the tour of duty.

The camp was struck somewhat differently than at former encampments. Brigade headquarters were left standing, and were struck by laborers in charge of the brigade quartermaster after the troops had left. All tents were properly rolled and left, with poles and pins, upon the color line, and carried to the arsenal by teams. The brigade quartermaster reports this

as a great improvement over previous years, as the camp equipage was delivered at the arsenal in a much better condition than ever before.

His Excellency Governor and Commander-in-Chief Frank W. Rollins and staff came into camp officially on Tuesday, the 20th, and were received with the proper military salute, and remained in camp until it closed. The brigade was reviewed by His Excellency on Thursday, at 4 o'clock in the afternoon. The presence of the governor and staff throughout this tour of duty, and the great interest manifested in the work, added largely to the success of the encampment. I wish to acknowledge the many kind favors received at their hands.

I wish to extend my thanks to all officers and men of the brigade for their prompt and generous support, and to my personal staff for their efficient aid and counsel, thereby rendering my duties pleasant.

Attached to and made a part of this report is the report of Maj. Paul F. Babbidge, assistant inspector-general.

Very respectfully, your obedient servant,

J. E. TOLLES,

Brigadier-General, N. H. N. G.

KEENE, N. H., June 29, 1899.

BRIGADIER-GENERAL J. E. TOLLES,

Commanding First Brigade, N. H. N. G., Nashua, N. H.:

SIR,—In conformity with paragraph 7, G. O. No. 3, c. s., Headquarters First Brigade, N. H. N. G., dated Nashua, N. H., June 5, 1899, I have the honor to make the following report:

I made an inspection every day of the company quarters, cook-houses, sinks, stables, and everything belonging to the camp. The policing was well done except in a few cases. The tents were in fair condition.

In every case where the quarters were not properly arranged the company commander was to blame, in not insisting on the

regulations being conformed with, as it is his duty to personally inspect the quarters each morning. Several of them gave as an excuse that the men wanted their tents arranged in a different way than that prescribed by the regulations. I tried to impress on their minds that the regulations were made to be carried out, and must take precedence of the individual wish of the men.

The company cook-houses are in poor condition; the waste water from the sinks and other uses is thrown on the ground, and the men allowed to wash in rear of the houses, so that at all times there are pools of water under and around them.

I would recommend that a cesspool be built at least fifty feet from the houses, to be connected by a pipe with the kitchen sinks, with suitable traps, etc.; also, that a stand be built just outside the cesspool for the men to wash at.

The infantry stables are in very poor condition, and aside from their close proximity to the cook-houses I do not consider them safe. They should be moved to the rear of the grounds.

I would suggest that all mattresses and bedding be laid out in the sun for at least an hour each day.

In conclusion, I wish to thank the officers and men for the uniform courtesy extended to me throughout the entire tour of duty.

I am, sir, very respectfully,
PAUL F. BABIDGE,
Major and Assistant Inspector-General.

HEADQUARTERS FIRST BRIGADE,
NEW HAMPSHIRE NATIONAL GUARD,
NASHUA, N. H., July 20, 1900.

GENERAL A. D. AYLING,
Adjutant-General, State of New Hampshire:

SIR,—I have the honor to make the following report of the tour of camp duty performed by the First Brigade, New Hampshire National Guard, June 18 to 22, 1900:

In accordance with General Orders No. 9, dated Adjutant-General's Office, Concord, April 23, 1900, the First Brigade, N. H. N. G., went into camp at the state camp ground, Concord, June 18, for five days' camp duty.

Brigade headquarters were established on the grounds at 11 o'clock A. M., Saturday, June 16, the staff and non-commissioned staff reporting for duty at that time.

Regimental quartermasters and all quartermaster sergeants reported to Capt. George M. Follett, brigade quartermaster, for duty in making camp. It was necessary to make a new plan of the camp on account of the reorganization of the brigade from three regiments of eight companies into two regiments of twelve companies each; this was promptly and favorably done by Captain Follett.

Eighteen laborers were engaged by Captain Follett and reported for duty on Saturday. These laborers were divided into squads of six, and each quartermaster was assigned a squad to make camp for his respective regiment. This arrangement was found to be a great improvement over the method of previous years. The Brigade, First and Second Infantry Headquarters, Line Officers, Battery and Cavalry tents were all pitched on Saturday. The company tents were not pitched until Monday morning upon the arrival of the troops, and the work was quickly done under the charge of the regimental quartermasters.

Regimental commanders, field and staff, arrived in camp on Saturday.

One officer, one sergeant, two corporals, and fifteen privates of Company E, Second Regiment, reported at 1 o'clock P. M., June 16, and performed guard duty until the arrival of the troops.

The infantry was a little late in arriving at camp on account of the delay in trains. The cavalry arrived and reported at 9.36 A. M. The report of the First and Second Infantry was made at 10.30 o'clock A. M. The First Light Battery reported at 11.45 A. M. The Signal and Hospital Corps reported at 10 o'clock A. M. The routine of duty was taken up at 12 o'clock, noon.

The infantry was out promptly at 2.30 o'clock P. M. for the first drill. The battery and cavalry were excused from the Monday drill on account of their overland march to camp.

The first brigade guard mount, which was made up of forty-eight officers and men, took place at 1.10 o'clock P. M. After the ceremony eleven posts were established and maintained through the tour of camp duty. Commanding officers of infantry and unattached companies established, maintained, and instructed such guard as was necessary for their respective grounds, independent of the brigade guard.

His Excellency Governor and Commander-in-Chief Frank W. Rollins, accompanied by his staff, came upon the grounds at 11 o'clock A. M., Tuesday, under escort of Troop A, Cavalry, and the Second Regiment Band, the First Light Battery firing the governor's salute.

The governor and staff remained upon the ground through the encampment, and took great interest in the work of the camp, and His Excellency's presence, on account of his experience in military and camp life and his readiness at all times with counsel and advice, added greatly to the success of the encampment.

The state ground was never in better condition. Although the dust was decidedly objectionable, this condition could not be avoided, as during the whole tour of duty no rain fell until the last day,—a most remarkable occurrence, as this was the first encampment of the New Hampshire National Guard when rain has not interfered with the work, but from Saturday until 3 o'clock on Friday, the closing day, the most perfect weather prevailed, and not a period of the routine of duty was changed or omitted.

A change from former encampments was made in breaking camp. At previous encampments the tents have been struck at 1 o'clock P. M., obliging the troops to leave the grounds in the heat of the day. This year the time set for striking the tents was 4.40 o'clock P. M. On account of the rain, which began at about 3 o'clock Friday afternoon, the tents were not struck. Brigade line was formed and the troops marched from the ground at 5.15 o'clock P. M., and commands dis-

missed in Depot square, Concord, at 5.45 o'clock, where transportation was taken for their respective homes.

The camp ground was left in charge of Capt. George M. Follett, brigade quartermaster, with one officer and fifteen men from Company C, Second Regiment, to guard the state property, and with instructions to strike the tents and turn them over to Gen. A. D. Ayling, adjutant-general, at the arsenal, as soon as they were in condition, which was completed at 5 o'clock P. M., Saturday, June 23.

The First Light Battery and Troop A, Cavalry, left the camp ground at 3 o'clock P. M. Their report to the brigade commander, by letter, stated that the march to their respective stations was without accident, and that the men and horses were in good condition upon arrival.

The review of the brigade by His Excellency Governor Rollins, at 4 o'clock P. M., Thursday, was very satisfactory.

The new infantry stables, which have been constructed since our last encampment, are much appreciated, and supply a much-needed convenience. They are a credit to the state and to General Ayling, who superintended the designing and construction of the same. They could not be more complete.

It is not my purpose to report the brigade discipline, military courtesy, or drill; that I will leave to the inspecting officers. I desire to mention, however, the promptness with which the routine of duty was carried out, and can truthfully say that I have never witnessed a greater willingness and promptness on the part of officers and men to perform duty than at this encampment; there were no delays in formations and no evidence of a disposition on the part of any one to shirk duty; on the contrary, everybody seemed to work for the success of the camp.

In accordance with General Orders No. 9, Adjutant-General's Office, c. s., the Governor Rollins prize was awarded to Company A, First Regiment. At 2 o'clock P. M. on Friday the brigade was massed at brigade headquarters, and Governor Rollins presented to the company, through Capt. Trefflé Raiche, the cup which they had won as the company excelling all others in drill, discipline, care of clothing and equipments,

neatness of quarters, and general set-up and soldierly bearing.

We were very fortunate in having with us Capt. Warren P. Newcomb, U. S. A., who was constantly on duty for the good of the New Hampshire National Guard. His time was given to counseling with officers concerning methods of instruction, and during drill hours he was upon the field, always ready to advise, taking great interest in the daily improvement of the troops. We trust Captain Newcomb may be with us at our future encampments.

The health of the brigade was excellent, only few having been reported sick. I would respectfully refer you to the report of the medical officers for a complete record of their department.

It is now understood that the cook-houses are to be moved back about one hundred feet or more, bringing into use the land between where they now stand and the stables; this will be a great improvement. I would recommend that when this is done a large, permanent mess-shed be constructed for the use of each organization. This would do away with the large number of tents and other devices which are now used for messing. With such a building and cook-house attached, the rations could be controlled and made more uniform, as well as giving the inspecting officer an opportunity to see the stores before their preparation. I trust that this may be accomplished before the next camp.

I would recommend that haversacks and canteens be issued to the guard. When this is done more practical work can be accomplished at our encampments, as without the facilities for carrying rations men cannot be taken out of camp for any length of time, which is essential to accomplish the best results. I trust that the day is not far distant when our National Guard will be fully equipped for field service. I also recommend that company commanders give more attention to rations, and that they enlist men who have sufficient knowledge to prepare and serve the mess, and who could be depended upon in case of service.

I feel that mention should be made of the reorganization of the brigade from the three regiments of eight companies

each to the two regiments of twelve companies each. This has been a bone of contention for a long time, but now that it is fully accomplished I am sure that a feeling of general satisfaction exists throughout the entire Guard.

I desire to take this opportunity to express my appreciation to His Excellency Governor Rollins and staff for the many courtesies received at their hands.

To General Ayling, adjutant-general, I feel especially indebted for his aid and support.

To Gen. Elbert Wheeler, inspector-general, and to members of the brigade staff, I am obliged for the valuable service performed.

I desire to thank the commanding officers and the men of the brigade for the efficient manner in which they performed their duty.

Very respectfully, your obedient servant,

J. E. TOLLES,

Brigadier-General, First Brigade, N. H. N. G.

HEADQUARTERS SECOND REGIMENT,

NEW HAMPSHIRE NATIONAL GUARD,

KEENE, July 20, 1899.

GENERAL A. D. AYLING,

Adjutant-General, Concord:

SIR,—I have the honor to make the following report of the tour of duty performed by the Second Regiment, N. H. N. G., at the annual encampment June 19 to 23, 1899:

In accordance with General Orders the regiment was ordered into camp at the state camp grounds at Concord, June 19, 1899, for five days' duty.

Transportation from home stations was by special trains, as in previous years, due in Concord at 9 o'clock A. M., but the train bringing companies from Rochester and Farmington did not arrive till 9.50.

The regiment was formed at 9.50 and the march was at once taken for camp, and upon arrival the regiment was reported for duty to the brigade commander at 10.40 A. M.

With the exception of regimental headquarters, the tents were pitched by the troops after arrival in camp, the floors having been laid and a tent placed on each floor by laborers under the direction of the quartermaster. The tents were raised by trumpet signal in a very few minutes with no confusion.

Monday afternoon the regular routine of duty was taken up and strictly carried out for the whole tour of duty, with the exception of Tuesday afternoon, when all duty was dispensed with on account of the rain which fell steadily all the afternoon. The drills were both regimental and by battalions, but principally by battalions, in order that more detailed instruction could be given the many new officers who had been recently commissioned. Wednesday forenoon the regiment went outside the camp ground and devoted three hours to extended order drill. Thursday morning after the drill hour, an inspection of quarters was made by the inspector-general, accompanied by the brigade commander and assistant inspector-general.

It was necessary to devote more time to detailed instruction than should ordinarily be the case, due to the fact that all the field officers, 75 per cent of the staff officers, and 60 per cent of the captains had received their commissions within ninety days, and 35 per cent of the regiment had been enlisted since April 1. The regiment made a steady improvement as the week advanced, both in drill and soldierly bearing, and military courtesy was particularly well observed.

It is to be regretted that some employers should have felt obliged to refuse their employees permission to attend camp. This was most noticeable in one company, more than half the members of which were refused permission to leave their work by their employers. But for this fact the attendance would have been excellent.

Enlisted men were instructed to provide themselves with black or blue flannel shirts, and when the weather was suitable the blouses were not worn on drill, which added very much to the comfort of the men.

The surgeon reported no sickness during the entire tour of duty.

The new floors and mattresses recently furnished by the state were appreciated by all.

I feel under obligations to the brigade commander and staff for the many courtesies received and assistance rendered me during this tour of duty.

I wish to acknowledge my appreciation of the faithful and efficient manner in which the field and staff discharged their respective duties, and also my indebtedness to the officers and men of the regiment for the willingness and promptness with which all duty was performed.

Very respectfully, your obedient servant,

E. O. UPHAM,

Colonel Commanding Second Regiment.

REPORTS OF INSPECTOR OF RIFLE PRACTICE.

STATE OF NEW HAMPSHIRE,
OFFICE OF BRIGADE INSPECTOR OF SMALL ARMS PRACTICE,
NASHUA, August 26, 1899.

GENERAL A. D. AYLING,

Adjutant-General, State of New Hampshire:

SIR,—In conformity with General Orders No. 9, issued from General Headquarters, Concord, July 21, the state rifle competition was held on the state range at Concord, on Friday, August 18, and I have the honor to make the following report:

The range was put in the best condition it has ever been in under the direction of Lieut. H. B. Roby, inspector rifle practice, Third Regiment, and after getting arrangements completed at the firing point, firing commenced about 10 o'clock and continued without intermission until shortly after 4 in the afternoon.

It was a perfect day for rifle firing, being clear and without wind, the only objection being the extreme heat from the direct rays of the sun.

The state trophy was won by Company G, Second Regiment, Keene; total team score, 98.

The gold badge was won by Lieut. H. S. Wilson of Company I, Second Regiment, Nashua; score, 22.

One hundred and thirty-seven scores of five shots each were fired in competition.

The average team score was 63.9. The average individual score was 12.8.

The Brigade Staff, the Second Regiment Staff, the Third Regiment Staff, the Battery, and the Cavalry were represented by teams.

All the infantry companies were represented by teams, with the exception of Companies B and L, First Regiment, and Company D, Third Regiment.

While the competition was in progress the range was visited by the adjutant-general and Brig.-Gen. G. M. L. Lane, the former brigade commander. Brig.-Gen. Jason E. Tolles was present during the entire day.

Lieut. H. B. Roby, inspector rifle practice, Third Regiment, had charge of the targets. Lieut. F. O. Giddings, inspector rifle practice, Second Regiment, inspected and tested the trigger pull of the rifles of the competitors. Lieut. G. P. Elliott, acting inspector rifle practice, First Regiment, collected scores and supplied competitors with ammunition. Lieut.-Col. C. W. Howard, assistant adjutant-general, served as clerk. Sergt. Clerk J. B. Crowley registered the competitors as they arrived on the range. Capt. C. B. Bodwell, quartermaster, Capt. A. H. Knowlton, aid-de-camp, Lieut.-Col. F. H. Thompson, Second Regiment, Lieut. G. D. Waldron, adjutant, Third Regiment, Q. M. Sergt. G. M. Follett, and several others acted as scorekeepers.

The telephone was arranged and in charge of Sergeant Bennett of Company E, Third Regiment.

During the entire competition but one man shot upon the wrong target.

Altogether it was the most satisfactory rifle competition ever held by the N. H. N. G., and my thanks are gladly extended to all who in any way assisted in the event.

Very respectfully, your obedient servant,

FRANK L. KIMBALL,

Major and Brigade Inspector Rifle Practice.

GENERAL A. D. AYLING,

Adjutant-General, Concord, N. H.:

SIR,—In conformity with General Orders No. 13, issued from the adjutant-general's office, Concord, July 12, 1900, arrangements were made and the rifle competition for 1900 held upon the range at Concord, on Friday, August 24, under my direction, and I have the honor to submit the following report:

The team making the highest score was from Company G, First Regiment, whose total score was 200 out of a possible 250. They having won the state trophy twice before, it now becomes their property in accordance with the prescribed conditions.

The highest score during the day was made by Sergt. W. B. Hills of Company G, First Regiment, whose score was 45 out of a possible 50, and he will hold the gold badge for one year.

In previous state competitions the men have shot but five shots. This year it was arranged so that each competitor could shoot ten shots, which proved far more satisfactory to all.

One hundred and twenty-five scores were fired for record in this competition. The average team score was 157. The average individual score was 30.46.

The Brigade Staff, the First Regiment Staff, the Second Regiment Staff, and the Cavalry were represented by teams. The Battery sent no team, as they are now armed and practice with revolvers.

Companies A, B, C, E, and K, First Regiment, did not send a team. The only company not having a team in the Second Regiment was Company C.

Gen. Jason E. Tolles, brigade commander, Col. E. O. Upham, First Regiment, Col. Edmund Tetley, Second Regiment, Lieutenant-Colonel Thompson, First Regiment, Maj. A. G. Shattuck, First Regiment, and Majors F. W. Russell and G. D. Waldron, Second Regiment, were present during the competition.

The following officers rendered valuable assistance during the competition: Gen. Jason E. Tolles, Col. E. O. Upham, Lieut.-Col. F. H. Thompson, Maj. A. G. Shattuck, Capt. A. H. Knowlton, Capt. G. M. Follett, Lieut. J. P. Holbrook, and several others, as scorekeepers. Sergeant Clerk J. B. Crowley registered competitors on arrival. Lieut.-Col. C. W. Howard, assistant adjutant-general, kept the records as made. Capt. R. H. Dillon, assistant surgeon of the First Regiment, was present in case his services might be needed, but I am pleased to say no accident occurred. Lieut. F. O. Giddings,

inspector rifle practice, First Regiment, tested the trigger pull of the rifles and placed teams on the proper firing point. Lieut. H. B. Roby, adjutant, and Lieut. R. D. Judkins, inspector rifle practice, both of the Second Regiment, had charge of the targets, and the marking was satisfactory to all. Sergt. H. P. Bennett and assistant managed the telephone in an excellent manner.

The weather was excellent, being cloudy but very comfortable all day.

I consider this the best rifle competition ever held by the state, and I desire to thank all who assisted in making it such.

Very respectfully, your obedient servant,

FRANK L. KIMBALL,

Major and Inspector Rifle Practice.

STATE OF NEW HAMPSHIRE,

OFFICE OF INSPECTOR OF RIFLE PRACTICE,

FIRST BRIGADE, NEW HAMPSHIRE NATIONAL GUARD,

NASHUA, N. H., September 9, 1899.

GENERAL A. D. AYLING,

Adjutant-General, Concord, N. H.:

SIR,—In accordance with General Orders No. 6, issued from brigade headquarters, August 25, relating to the state rifle team, I have the honor to make the following report:

The detail, Lieut.-Col. E. H. Knight, First Regiment, Lieut. L. E. Tuttle, Company A, First Regiment, Capt. H. J. Pike, Second Regiment, Lieut. H. S. Wilson, Company I, Second Regiment, Lieut. J. P. Holbrook, Company K, Third Regiment, Sergt. W. B. Hills, Company G, Second Regiment, Sergt. I. Sadoques, Company G, Second Regiment, Sergt. R. L. Piper, Company K, Third Regiment, Sergt. J. H. Warburton, Company H, Third Regiment, Corp. W. C. Ellis, Company G, Second Regiment, Corp. H. Wingate, First Battery, Corp. C. L. Rich, Troop A, Cavalry, Private E. A. Rolfe, Company I, Second Regiment, and Private C. M. Jackson, Troop A, Cavalry, reported as ordered, and, accompanied by Brig.-Gen. J. E. Tolles, we left Nashua Junction at 5.25 p. m., September 4, arriving at Sea Girt at 2.40 p. m., September 5.

We were met at the station by Captain Walker, past adjutant, and Colonel Felton, quartermaster, and taken to the quarters provided for the New Hampshire team. Four new Sibley tents had been pitched at a convenient location on the camp ground. These were newly floored and furnished with new wire cots, mattresses, and blankets. As soon as the baggage was disposed of, all were anxious to commence practice, as the forty-eight targets in view, some of which were being used, were very attractive, and we went to work on the 200-yard range, making some very good scores.

On Wednesday morning we should have entered the "Hilton Trophy" match, but felt that the men were not well enough acquainted with the range to do themselves justice, so practice was continued at the 200-yard range in the forenoon and the 500-yard range in the afternoon, though we were detained, as some of the ranges were in use for the matches. In the evening General Tolles and I were invited and accepted an invitation to dinner, with others, at the governor's summer quarters, at one end of the camp ground. There we met General Stryker, adjutant-general of New Jersey, General Wingate (who invented the target now so much used and which bears his name), Colonel Conn, inspector rifle practice of Georgia, Brigadier-General Harries, commander of the District of Columbia National Guard, Major

Lauchhumer of the Marine Corps, Colonel Cooke, inspector rifle practice of Iowa, and several others.

Friday morning the interstate match opened shortly after 8 o'clock, our team being assigned target 35. About 10 o'clock we moved to target 8 on the 500-yard range, and the team finished firing at 1.30 P. M., just in season to get lunch and take the 2.18 train. We arrived at Nashua Junction at 9.30, September 9.

The following is the record made by the team in the interstate match.

Total.....		901

The members of the team cheerfully performed all duties required of them, and they came home with much more knowledge of rifle shooting than could be learned in any other way, it having been an excellent school of instruction in rifle practice. Had we taken twenty men from which to select

our team of twelve, and had a few more days' practice on the Sea Girt range, we should have been able to meet the other teams on a very fair footing.

We have the material in this state which can be developed into a team that in a reasonable time can make a record which will advance them to a leading position, and some of the prizes offered can be brought to this state.

It seems absolutely necessary that more attention should be paid to practice on the longer ranges. This tour of duty will be a great benefit to the N. H. N. G., and much more interest will be given rifle practice as the points these men have noted become distributed throughout the force.

In this connection I wish to say that the thanks of all are earnestly given General Spencer and his assistants for the very courteous treatment and attention given us during our stay in Sea Girt.

Very respectfully, your obedient servant,

FRANK L. KIMBALL,
Major and Inspector Rifle Practice.

REPORT OF THE BOARD OF VISITORS.

STATE OF NEW HAMPSHIRE.

EXECUTIVE DEPARTMENT.

CONCORD, November 22, 1900.

The governor and the council, the president of the senate, and the speaker of the house of representatives, as required by law, having visited the Asylum for the Insane, inspected the several departments, and examined into the condition of the patients, are satisfied that the design of the institution is carried into full effect by the existing management.

FRANK W. ROLLINS,

Governor.

SUMNER WALLACE,

STEPHEN H. GALE,

GEORGE F. HAMMOND,

HARRY M. CHENEY,

HENRY F. GREEN,

Councilors.

T. NELSON HASTINGS,

President of the Senate.

FRANK D. CURRIER,

Speaker of the House.

REPORT OF THE TRUSTEES.

To His Excellency the Governor and to the Honorable Council:

The Trustees of the New Hampshire Asylum for the Insane present this, their

FIFTY-FIFTH REPORT.

The number of patients in the asylum at the close of the last year was four hundred and twenty-five against four hundred and twenty-seven the year before. During the year ending September 30, 1900, one hundred and forty-three were received, and one hundred and fifty-one were discharged. In this time, one hundred and eighty-one have received pecuniary aid, in varying amounts, from the income of the permanent funds. But for this timely assistance, more or less of these could not have had the medical care of which they were in need.

When the number of our patients rises above four hundred, a compression begins which lessens the efficacy of the remedial agencies employed. This being the only curative asylum for the insane in the state, its trustees have always been solicitous to maintain it as such by every means at their command. Thus far it has retained the high rank which it long ago attained beside similar institutions in other states,—a fact which must be gratifying to every friend of this most unfortunate class of our people to whom it ministers. While the trustees do not recommend any immediate enlargement of the asylum structure, they feel constrained to say that, in their opinion, the constantly increasing number of applications for admission to its wards will render necessary greater accommodations at a time not far away, and that the experience of New Hampshire in caring for its insane will accord with that of its sister states.

The appropriation of fifty thousand dollars, made to the institution by the legislature of 1899, has secured long needed and important repairs of many of its buildings, and two additional structures to those already existing:

1. The warming plant has been made more efficient. The boiler house has been enlarged, and an additional boiler, eighteen feet long and six feet in diameter, has been introduced. No steam is now generated by the old boilers under the Kent and Bancroft buildings, the entire supply being taken from the consolidated stack in the boiler house. The furnace drafts have been increased by the erection of a new chimney having a height of one hundred and fifty feet and a diameter at the ground of seventeen feet. As a result of this draft improvement, buckwheat coal is now used, and an important lessening of the fuel account is secured.

2. Since our last report, a new laundry has been constructed, having a length of eighty feet, a width of forty feet, and a height of thirteen feet, furnished with a granolithic floor, upon which has been placed an adequate equipment of the best laundry machinery. This establishment is now adequate to meet all the laundry needs of the asylum. As these increase, its capacity can be enlarged at very inconsiderable expense.

3. A house in which female nurses may find rest and refreshment in their intervals of service has been constructed, and is proving of direct benefit to them, and, indirectly, an advantage to the asylum. This building is of two stories and affords ample accommodations to about twenty nurses.

4. Tile floors have been introduced to the lavatories of the Kent and Chandler buildings, together with other necessary furnishings. This work has not only contributed to the comfort of the patients, but has greatly improved the sanitary condition of these buildings.

5. The old engine, which, for twenty-two years, had furnished motive power to the workshops and laundry, and had become unserviceable, has been replaced by a new one, which is proving itself a worthy successor to its predecessor.

TWITCHELL HOUSE — EXTERIOR.

TWITCHELL HOUSE — INTERIOR.

This appropriation has sufficed to secure everything contemplated by the legislature, except a house for the use of the farm superintendent. Unforeseen expenses have arisen upon the removal of old work, which have increased somewhat the cost of that contemplated and accomplished. As a consequence, the amount required for the erection of such a building has been wanting. Inasmuch as the trustees have not felt at liberty to make any contract beyond this appropriation, its erection has been postponed.

For information in greater detail regarding the several expenditures made by the building committee, you are respectfully referred to the accompanying report of this committee.

For a particular statement of the financial condition of the asylum, reference is invited to the accompanying reports of the treasurer and of the financial agent. Since our last report, the debt incurred in finishing the Twitchell building and the introduction of fireproof ventilators to the attics of the others has been reduced from ten thousand five hundred dollars to seven thousand and five hundred.

On the 12th day of April last, Mr. Charles A. Dow, who, for nearly forty-eight years, had been a patient at the asylum, died at the age of eighty-nine, an event which relieves the Low fund of his support, and renders its income available for other purposes.

During the last year, the asylum has received from the executor of the will of the late Mrs. Susan E. W. Creighton of Newmarket a legacy of three thousand dollars, less a government tax of two hundred and twenty-five dollars, withheld by him at the time of its payment. Inasmuch as it has since been decided by the supreme court of the United States, that legacies of that amount are not subject to such a tax, it is expected that this amount will be refunded to the asylum, when it shall have been returned to the executors from the national treasury.

The water supply at our summer sanitarium, near Long pond, has been greatly improved, both as to quantity and quality, by a purchase of a spring and some three acres of

land surrounding the same. This is separated from the asylum's other grounds only by a highway, but for which it would make an uninterrupted extension thereof.

This spring stands at an elevation of some thirty feet above the roof of the asylum's highest building. Its water is of the purest quality. During the last two summers, when the rainfall was but about one half of the usual amount, the flow of water has been constant and abundant, sufficing not only for the occupants of the houses and barn, but for the free irrigation of the lawns and garden.

At the last session of the legislature, the state's ownership of the asylum was called in question. To obtain an authoritative decision of the matter in doubt, the house of representatives, on the 31st day of January, 1899, passed the following resolution, asking of the supreme court its opinion upon the points therein set forth:

HOUSE OF REPRESENTATIVES, January 31, 1899.

Resolved, That the opinion of the justices of the supreme court be requested upon the following questions :

Who owns the real estate in Concord occupied by the New Hampshire Asylum for the Insane, and is the title a fee simple or charged with a trust?

If the title is in the corporation created by chapter 10 of the Public Statutes, can the legislature direct said corporation to convey the land to the state, and would such conveyance alter in any way the interest of the state in the property?

Can the property, real or personal, of the said asylum be used for any other purposes than it is now used?

What control has the state over the corporation or over the real estate and personal property held by said corporation?

Resolved, That the clerk be directed, in transmitting the foregoing questions to the court, to send with them a copy of the report of the judiciary committee of the last legislature on the status of the property of the New Hampshire Asylum for the Insane, to aid the court in the investigation of the facts necessary for the determination of the questions submitted.

The foregoing is a true record and a true copy of the record.

HENRY E. BROCK,
Clerk, House of Representatives.

In answer thereto, on the 13th day of February, 1899, the court responded as follows:

To the House of Representatives of the State of New Hampshire:

We, the undersigned, justices of the supreme court, received on the eighth instant a copy of the resolutions adopted by your honorable body, January 31, requiring our opinion on the questions herein mentioned. To aid us "in the investigation of the facts necessary for the determination of the questions," a copy of the report of the judiciary committee of the last house of representatives was sent to us, accompanied with a copy of the brief laid before the committee by the counsel of the trustees of the asylum, and referred to in the report for a portion of the facts upon which the committee based their conclusions, but not with any of the papers referred to in the brief. We have assumed that you did not wish us to make an investigation for the purpose of finding what the facts are bearing upon the questions submitted (as the constitution does not authorize us to do so,—45 N. H. 607, 608, 614); but that you adopted the facts stated in the above mentioned report and brief as those upon which our answers to the questions were to be predicated. Accordingly, we respectfully answer the questions, so far as we are able, upon the facts submitted.

1. Who owns the real estate in Concord occupied by the New Hampshire Asylum for the Insane, and is the title a fee simple, or charged with a trust?

Answer. The nominal title to the property is in the corporation, known as the New Hampshire Asylum for the Insane, and the state, being the only member of the corporation, is the real owner. Whether the title is a fee simple, depends upon the terms of the deeds conveying the property to the corporation, and they are not before us. Whether the title is charged with a trust may depend upon the deeds, or upon the terms of the contracts or wills by which the property has been given to, and accepted by, the corporation. In the absence of provisions in the deeds creating a trust, the title is not charged with one unless the state, either directly or through the agency of the trustees, has dedicated the property to the uses of a trust by accepting gifts and bequests made upon conditions that require such dedication.

2. If the title is in the corporation created by chapter 10 of the Public Statutes, can the legislature direct said corporation to convey the land to the state, and would such con-

veyance alter in any way the interest of the state in the property?

Answer. Unless restrained by the terms of the deeds or a trust, as suggested in the last answer, the legislature can require the trustees to convey the land to the state; but such conveyance would not alter in any way the state's interest in the property. If third persons claim rights in the property by virtue of conditions in the deeds or of trusts, expressed or implied, that would interfere with such transfer of title, it is doubtful, to say the least, if we ought to attempt to advise your honorable body in respect to the state's rights, since, in that event, there would be questions that might come before the court for decision, and an opinion formed and expressed now would not bind the parties and might disqualify us from acting as members of the court; 62 N. H. 704; *In re School Law Manual*, 63 N. H. 574.

3. Can the property, real or personal, of the said asylum be used for any other purpose than it is now used?

Answer. As before suggested, the answer to this question depends upon facts that are not before us.

4. What control has the state over the corporation or over the real estate and personal property held by said corporation?

Answer. Complete and absolute control unless its power is limited by some conditions or trust, as above suggested.

ROBERT G. PIKE.
ROBERT J. PEASLEE.

February 13, 1899.

Ever since its opening, in 1842, the asylum has been self-supporting. Its current receipts have sufficed to meet its expenses, including the cost of its ordinary repairs. When, however, the erection of additional buildings has been required to accommodate an increased number of patients, or extraordinary repairs, amounting at times to renewals, have been necessary, the means requisite therefore have been provided by the state. Indeed, it would be manifestly unjust to burden the inmates, in residence at any particular time, with making good the wear and decay of a protracted period.

BANCROFT BUILDING — INTERIOR.

As an instance in point, showing this, the plumbing of the Chandler wing, which was put in more than twenty years ago, was recently found to be in an unsanitary condition and substantially worn out. It required an entire renewal at a considerable cost, and to that purpose the legislature very properly assigned a part of the appropriation which it made for the benefit of the asylum two years ago.

As before stated, this appropriation has sufficed to provide for all the work then contemplated, except the erection of a small house for the use of the farm manager and his family. Such a building should be erected, as soon as may be, at some convenient point near the asylum barns. This official should reside upon the asylum ground and near the work committed to his charge. The house contemplated would not only accommodate him, but increase the security of these structures and their contents.

Besides this urgent want, your consideration is respectfully invited to several others, set forth in detail in the accompanying report of the superintendent. (See page 15.)

We also forward for your consideration a detailed statement of the products of the asylum farm the past year. The severe drought, which has prevailed during the last two seasons, has materially affected its crops, particularly its hay crop. As the asylum produces its own milk, keeping a stock of some forty cows, besides other animals, this large shrinkage of its grass crop has been very sensibly felt.

During the growing periods (April 1 to August 31) of this year and the last, the amount of rainfall has been but about one half of the average of the corresponding seasons of the previous forty-two years. It measured 8.83 inches in 1899, and 9.55 inches in 1900, while its average amount during the period last mentioned was seventeen inches.

Since the last annual meeting of this board, Mr. John C. French of Manchester, who had been a valued member for nearly eight years, passed from life to immortality.

His interest in the asylum was ever constant and warm. Of the wisdom and mature judgment which had been so largely instrumental in his elevation to a lofty position among

the business men of his adopted city he gave freely and disinterestedly to this institution. By his death the asylum has lost an important officer and its board of trustees an associate whose departure they deplore and for whose memory they cherish a profound respect.

A few hours only before their names had been signed to this report, the hearts of the members of this board were saddened by the intelligence that their late associate, the Very Reverend John E. Barry, V. G., had lost his life by accident, in New York city, and that, at their annual meeting, to be held this day, his chair would be vacant.

Father Barry has rendered faithful service to the asylum as a trustee for nearly thirteen years, having received his first commission in March, 1888. In the order of settlement he was the oldest pastor in Concord, having come to St. John's church in 1865. The prosperity and enlargement of his parish were much due to his wise and unremitted efforts. No clergyman in the city was more widely known or heartily esteemed as a Christian gentleman of noblest character.

Respectfully submitted.

CONCORD, N. H., November 15, 1900.

REPORT OF SUPERINTENDENT.

The superintendent respectfully submits the fifty-eighth annual report of the New Hampshire Asylum, which covers the biennial period ending September 30, 1900.

The year beginning October 1, 1898, commenced with four hundred and nine patients, one hundred and ninety-four men and two hundred and fifteen women.

The year beginning October 1, 1899, commenced with four hundred and twenty-seven patients, one hundred and ninety-nine men and two hundred and twenty-eight women.

The daily average of patients for the year ending September 30, 1899, was 423.26, and for the year ending September 30, 1900, was 420.13.

The mortality rate for the first of the two years covered by this report was 6.7; for the year just closed, 8.6. There has been no serious epidemic illness during the two years, and the general health of the house has been very good. The increased mortality has been due to the death of a larger number than usual of several almost lifelong residents of the asylum, as well as a slightly increased number of serious organic diseases, the natural termination of which was death.

It is a singular fact that in each one of the years covered by this report there have been two deaths from suicide in persons who had been on parole for some years and who were not supposed to have any inclination toward self-destruction. Such cases illustrate the impulsiveness of the insane and the feeble resistance that such individuals possess to any fancy that may be suggested to their disordered minds.

There has been one case of typhoid fever in a parole patient. The individual was not exposed to infection as far as we could ascertain. He was promptly isolated and made a good recovery. No other case has occurred.

For the first time in the history of the asylum, the local water supply proved inadequate, and we were obliged to make use of the city water connection and call upon the Concord water-works to make up the deficiency. This shortage in the local supply was undoubtedly due to the prolonged dry weather, which has affected nearly all the wells and streams of New Hampshire. The average consumption of water for all purposes is about 60,000 gallons daily.

The absence of rain has been severely felt on the farm. The hay crop was a total failure, and it will be necessary to purchase hay during the ensuing winter. The vegetable crop was somewhat short for a similar reason.

Both Drs. Hills and Brownrigg have accomplished much interesting clinical and pathological work. Hydrotherapeutic measures have been used in many cases. The thyroid treatment has been faithfully tried with but indifferent results. The two latest hypnotics, dormiol and chloretone, have been and are still being tried on suitable cases. It is believed that in dormiol we possess a safe and valuable hypnotic that is not only easy of administration, but is efficacious without producing bad after-effects. As the medical work of the asylum is always interesting, I have thought best to have the physicians embody in the appendix an abstract of the more important clinical and pathological work of their respective wards.

In this connection, it is with pleasure that I refer to the adoption of the envelope system of taking histories and keeping records. The old cumbersome case books have been discarded. Now all histories of new admissions are taken on separate sheets, all records of physical and mental examinations, of sleep, body weight, and temperature, urinary and blood analysis, stenographic records of conversations, as well as anything of value psychically that the patient himself may write, is kept in the envelope assigned to the patient. Each patient has an individual envelope with an especial number. Instead of a history being carried through several volumes, it is now all contained in one envelope, and hence is much

WALKER SUMMER COTTAGE.

WALKER SUMMER COTTAGE AND LAKE PENACOOK.

more convenient for reference. As fast as is possible all the old records are being transferred from the case books to the envelopes.

At this time I desire to call the attention of the board of trustees to the name of this institution and to earnestly solicit a change in its corporate title. The name *asylum* is identified with the care of the chronic and incurable insane. This institution is and always will be devoted to the care of large numbers of this class. But its chief primary present and future mission has and always will be the care and treatment of the curable insane. The institution is therefore a hospital in the true sense of the word. Its construction, both in the past and present, the arrangement of its detached buildings, its medical and nursing equipment, all serve to identify this institution with the best remedial special hospitals throughout the country. In nearly all other states the word *asylum* has ceased to be applied to institutions that are remedial in character. In view, therefore, of the long and honorable record of the New Hampshire Asylum, of its present position as the only remedial institution in the state, the recognized place to which the state and the counties send their patients, offering any possibility whatever of relief, I respectfully submit that the title should be changed from *asylum* to *hospital*. Inasmuch as the supreme court and the legislature have both declared it to be a state institution, owned and operated solely by the state, through a board of trustees appointed by the governor and council, it would seem eminently fitting that this institution should be designated the New Hampshire State Hospital for the Insane.

THE SUMMER COTTAGES.

During the last two years, the summer cottages and their adjoining grounds have proved of inestimable benefit to many patients throughout the summer months. Under the energetic management of Mr. and Mrs. Tandy not only has this retreat been made more attractive, and hence more enjoyable and useful, but the productiveness of the land has been in-

creased as well. As many as seven hundred quarts of strawberries were raised during the month of June, furnishing an abundance for the families at the lake and quite a surplus for the patients at the asylum, as well as for preserving. Three hundred and fifty pounds of honey were raised in the apiary. Several fruit trees were planted. Under judicious management in the future there is no reason why this tract of fifty acres should not supply the institution with many apples and small fruits. The spring located on the new land that was purchased two years ago has furnished by gravity an unfailing supply of pure water for both houses; and the little brook, which flows through this tract, yielded water enough for irrigation of the strawberries, lawns, and vegetable garden during a season that was unusually dry.

TRAINING SCHOOL FOR NURSES.

The ninth class graduated in June, 1899. The graduation address was delivered by Rev. George H. Reed, pastor of the North Congregational church of Concord. The tenth class graduated in June, 1900, the address being delivered by Dr. E. O. Otis of Boston, Mass. It is gratifying at the close of this decennial period to record the good work that has been accomplished by the school. A majority of these graduates have won distinction in general nursing, which they have prosecuted with zeal after leaving the service of the institution. Some have taken positions of trust in other hospitals, others have assumed responsible positions in our own institution, and quite a number, at the breaking out of the Spanish war, entered the army hospitals as military nurses. Each graduation exercise witnesses an increased attendance of former graduates, who take this opportunity to return to their *alma mater*. Their presence is an inspiration to those already in the service of the institution, and tends to the development of a *corps d'esprit*, which cannot but be elevating to the nursing staff of the asylum. In the Appendix will be found the names of former graduates, the staff of instructors, and the address of Dr. Otis that was delivered to the last class.

NURSES' HOME.

NURSES' HOME — INTERIOR.

It is a pleasure in this connection to refer to the Nurses' Home, which has just been completed, and which will not only furnish much additional room for patients by the vacating of rooms previously occupied by nurses, but will give the nurses themselves a needed change. An opportunity to withdraw from the scene of their daily work, a quiet and pleasant environment during the hours of their relaxation, has thus been afforded.

PERMANENT IMPROVEMENTS.

The last biennial period has been one of extraordinary activity in the asylum. Under the report of the building committee will be found an account of the new construction provided by the legislative appropriation of two years ago, as well as an itemized abstract of the expenditure. At no period in the history of the asylum have so many needed and important additions and alterations been undertaken at the same time. The radical rearranging of the heating of the Bancroft and Kent buildings, the installation of a new boiler in the enlarged boiler house, the erection of a new chimney, laundry, and nurses' house, the renewal of tile floors in the kitchen and in nineteen ward toilet and bath rooms, with new plumbing for the same, has kept the interior and adjacent exterior of many of our wings in more or less confusion for two years. It is gratifying to note that all these changes have been accomplished without mishap, and the material prosperity of the asylum has been wonderfully improved.

Much of this new construction called for considerable unforeseen additional expenditure, which was not provided for by the appropriation, and of necessity had to be met out of the asylum treasury. When, for instance, the old wooden floors of the kitchen were torn up and replaced with the new substantial tile flooring, it was found as a result of the temporary moving of the cooking apparatus that all the steam and hot and cold water piping, the vent pipes to all the kettles and steamers, and the wooden sinks were practically useless, and it became positively necessary to replace them all with new and more modern construction and to provide two new

forty-gallon tea and coffee urns. At the same time the plastered ceiling was so far out of repair that the only proper thing to do was to replace it with steel ceiling. In the laying of such a solid permanent floor the only suitable opportunity was presented of making an opening in the tile and steel beams and locating a freight elevator between the kitchen and the cellar, where many of the supplies are stored. This was done at quite a little expense, but the improvement has markedly facilitated the work of this department.

Again, when the nurses' house was erected, it became necessary to take up all the hot and cold water mains as well as the electric light mains, which supplied the Bancroft building, and which were directly in the way of the new corridor and building. The piping was not large enough to meet the requirements of both the Bancroft building and the new Nurses' Home and much of it was worn out. It became imperative therefore to replace the old water-mains with new and larger piping.

In like manner the supply tanks for the laundry and the old water and steam mains were so far worn out that their removal and provision of a new water source became absolutely necessary.

In addition to these expensive alterations, necessitated by the new construction, the following permanent improvements have been made during the last two years, the expense of which has also been met out of the asylum treasury.

Twenty-five feet have been added to the ice house, materially increasing the storage capacity.

Sixty feet have been added to the greenhouse, and the old hot-water circulation which had become defective was discarded and replaced with new and more perfect apparatus.

In the first and second floors of the Bancroft building the old plumbing of the toilet rooms was taken out, new floors were laid, and new open plumbing put in.

A large addition to the horse stable has been made for the proper housing and cleaning of carriages. In this same stable a brick chimney has been built and the harness room provided with a stove.

In the tool house at the cow barn a brick chimney has also been placed and a large squash room with ample racks constructed in the attic and provided with a stove for the proper housing and keeping of squashes through the winter months. One winter's use of this room has fully demonstrated its value in the largely increased number of squashes that we were enabled to carry through to the spring months.

Adjoining the Peaslee building and connected with it by suitable corridor has been erected a recreation room for men patients. On rainy days and winter evenings patients are within certain hours permitted to use this room for card playing and recreation. In the corridor connecting the recreation room with the Peaslee building are ample accommodations for boots and shoes. All male patients now go out of doors through this exit.

When the old laundry was abandoned for the new structure, the large room on the second floor, which had formerly been used as an ironing room, was entirely reconstructed into six large rooms for the kitchen employees. This change will furnish a long-desired accommodation.

For a long time the flooring of the stalls for the cows has been undergoing decay. Last year it was discovered that these floors were becoming unsafe. After much investigation the method in use in the cow stables of the State Hospital for the Insane at Augusta, Me., at Danvers, Mass., and at the Tewksbury Almshouse, Massachusetts, was finally adopted as the most cleanly and practicable. This consists of a broad water-tight manure trench, inclining from either end of the mangers toward the center of the barn, and covered with iron gratings, which are practically self-cleaning and on which the hind feet of the cows stand. An endless chain, provided at suitable distances with wooden lags, and operated by a crank and gearing, thoroughly scoops out and cleans the trench of both its solid and liquid contents, which are precipitated into a water-tight cart, which is placed under the trench in the basement, near the center of the stalls. By this device one man in a few moments effectually clears out all the droppings of the cows. The sanitary condition of the

barn is thus greatly improved. New and substantial flooring has been laid on either side of this trench. A new water-tight manure cart was made by the Abbott-Downing Company for this particular work. It is believed that by these arrangements the sanitary conditions will be greatly improved and great saving effected, inasmuch as all the liquids will be prevented from running to waste and can be utilized on the land.

PRESENT NEEDS OF THE ASYLUM.

One of the most imperative needs of the asylum is a new baker's oven and a new oven for the cooking of meats. The old oven has been in continuous use for over thirty years and was designed for a population of about three hundred persons. This number is nearly doubled. In the meantime the oven has become much impaired through long use. The lining is beginning to give way and in a short while must be thoroughly renewed. In an oven of its defective condition, its antiquated method of heating, and the great expense of repair, it is wiser to remove the old oven entirely and in its place erect a new, modern, continuous baking oven for the cooking of meats, baking of potatoes, and such work as is necessarily done in the kitchen proper. The bakery should be removed from its present cramped and entirely unsuitable quarters in the kitchen and located in the first floor of the old laundry, where there is ample room and a location in every way desirable for a large, continuous baking oven and all the other appliances that belong to a well-appointed bakery. These alterations are vital, and it is difficult to see how the work of properly preparing the food for this large household can be accomplished without the equipment mentioned.

A brick shaft in connection with the kitchen and old laundry, extending up through the chapel attic and provided with iron stairway, should be built, which will serve as an entrance and exit for the kitchen and laundry employees as well as a fire escape from the chapel. The chapel has only one exit, and the safety of the patients as well as employees demands the erection of this stairway.

All the old elevator wells for the delivery of food to the wards are constructed of wood. These are old and much impaired through long years of use, and are dangerous in case of fire, as they serve as communications between the wards and attics. These shafts should be made of brick, should pass out through the roof instead of terminating in the attics, and should be provided with new and modern dumb-waiters. The safety of the patients and the economical distribution of food for the various wards will thereby be secured.

The floors in the three main wards of the Kent building are entirely out of repair, contain large, unsightly cracks, which afford ready lodgment for dirt, and are therefore very unsanitary. The health and the decent appearance of the wards require their removal. The plastered ceiling of the lower ward in the Kent building is beginning to become detached, and in some places has already fallen off. This should be replaced with a steel ceiling.

A careful estimate of these various repairs has been made and itemized as follows :

A new baker's oven	\$1,125.00
A new meat oven for the kitchen	875.00
A tile floor, steel ceiling, and windows, with necessary repairs of the walls of the old laundry room, which is to serve for the new bakery	1,986.00
Fireproof stairway for the chapel and employees' rooms in the old laundry	3,295.00
Five new brick elevator wells, dumb-waiters	3,355.00
New floors and new steel ceilings for the Kent building	1,002.00
New birch flooring for the sewing room, with plumbing	430.00
New plumbing for the fourth and fifth floors of the administration building	570.00
A farmer's house	2,375.00
	<hr/>
	\$15,013.00

These renewals are simply necessary for the preservation of the property of the state, for the safe care of the patients and employees, and for the economical and proper sanitary administration of the affairs of the asylum.

ACKNOWLEDGMENTS.

During the last two years no changes in the medical staff have occurred. It is a pleasure for me to testify to the able assistance rendered by Drs. Hills and Brownrigg.

Again it is a painful duty to record the death of one of the board of trustees, Hon. John C. French of Manchester. Mr. French, though not a trustee of the asylum for many years, was one who gave rare assistance in the councils of the executive board. He was quick to see the needs of the asylum and equally prompt and resourceful in action. His judgment and practical advice will be greatly missed from our meetings.

At the graduation of nurses Rev. Mr. Reed of Concord gave the address to the class of 1899, and Dr. Edward O. Otis of Boston delivered the address to the class of 1900. Mr. Reed's address, being extemporaneous, cannot be printed. The very practical and valuable address of Dr. Otis will be found in full in the Appendix.

In the work of the training school especial acknowledgment is due Dr. Julia Wallace Russell, Dr. Charles R. Walker, Dr. W. H. Varick, and Dr. Arthur Sumner, who have given practical lectures to the nurses.

The following newspapers have been gratuitously sent to the institution, and have been greatly appreciated by the patients: "Granite State News," "Manchester Weekly Union," "People and Patriot," "Nashua Gazette," "The Morning Star," "The New Hampshire Gazette," "The Mountaineer," "Sandwich Reporter," "The Belknap Republican," "Carroll County Pioneer," "Exeter Gazette," "The Derry News," "The States and Union." Dr. Chancy Adams and Rev. Mr. Himes have sent many papers and magazines to the institution. Miss Gurley and friends and Peabody's Band of West Concord have given a musical entertainment. Col. John C. Line-

han very kindly gave the patients an interesting illustrated lecture on Ireland.

The cordial support of the trustees in the varied work of the last two years has been of the greatest assistance to the superintendent.

CHARLES P. BANCROFT.

CONCORD, N. H., November 15, 1900.

STATISTICAL TABLES FOR YEAR ENDING SEPTEMBER 30, 1899.

TABLE I.

	Men.	Women.	Total.
Patients in the hospital October 1, 1898.....	194	215	409
Cases admitted during the year ..	94	85	179
Discharged within the year.....	89	72	161
Viz., as recovered from first attack	21	11	32
as recovered from other than first.....	5	11	16
as recovered from alcoholism	5	5
as much improved.....	10	9	19
as improved	4	4	8
as not improved	17	17	34
as not insane	2	1	3
Absconded.....	5	5
Deaths.....	20	19	39
Patients remaining October 1, 1899	199	228	427
Number of different persons treated during the year.	284	293	577
Number of different persons admitted	90	78	168
Number of different persons recovered.....	26	22	48
Daily average number of patients ..	202.88	220.88	423.26

TABLE II.

Showing the result in all under treatment during the year.

	Of those in the asylum at the beginning of the year.			Of those ad- mitted during the year.			Total of both classes.		
	Men.	Women.	Total.	Men.	Women.	Total.	Men.	Women.	Total.
Discharged recovered.....	8	9	17	18	13	31	26	22	48

Showing by what authority committed.

	Men.	Women.	Total.
By friends.....	46	55	101
By state commission of lunacy	3	2	5
By counties	17	19	36
By towns or cities	20	6	26
By courts	4	1	5
By governor.....	1	1
By self	3	2	5
Total.....	94	85	179

TABLE XVIII.

Showing by whom supported.

	Men.	Women.	Total.
Self or friends	52	51	103
Counties	8	7	15
Towns or cities.....	9	3	12
State, including cases sent by supreme court, by order of the governor, and by the commissioners of lunacy	25	24	49
Total	94	85	179

TABLE XIX.

Deaths during the year and their causes.

	Men.	Women.	Total.
Structural disease of the brain.....	5	2	7
Exhaustion from acute mania	1	1
“ from acute melancholia	2	2
“ from chronic mania	1	1
“ from chronic melancholia.....	2	2
“ from primary dementia	1	1
“ from senile dementia	3	3	6
“ from epileptic dementia	1	1
“ from status epilepticus	1	1
General paralysis	1	1
Shock from concussion of brain	1	1
Exhaustion from old age	1	1
Organic heart disease	1	1
Fatty infiltration of heart	1	2	3
Rupture of the heart	1	1
Rupture of the left coronary artery	1	1
Exhaustion from la grippe	1	1
Pulmonary tuberculosis.....	1	1
Lobar pneumonia	1	1
Broncho pneumonia.....	1	1
Congestion of the lungs.....	1	1
Emphysema	1	1
Chronic nephritis	1	1
Suicide by drowning.....	1	1
Total.....	20	19	39

TABLE XX.

Showing ages at time of death.

	Men.	Women.	Total.
Between twenty and thirty years old.....	2	2
“ thirty and forty years old	1	1	2
“ forty and fifty years old	6	2	8
“ fifty and sixty years old.....	2	2	4
“ sixty and seventy years old	5	6	11
“ seventy and eighty years old	4	3	7
Over eighty years old	2	3	5
Total.....	20	19	39

TABLE XXI.

Showing ages of those remaining at the end of the year.

	Men.	Women.	Total.
Under twenty years of age	1	3	4
Twenty to thirty years of age	34	18	52
Thirty to forty years of age	36	36	72
Forty to fifty years of age	33	50	83
Fifty to sixty years of age	47	57	104
Sixty to seventy years of age	32	39	71
Seventy to eighty years of age	10	16	26
Over eighty years of age	6	9	15
Total	199	228	427

TABLE XXII.

Showing duration of disease in those remaining at the end of the year.

	Men.	Women.	Total.
From one to three months	2	7	9
From three to six months	7	3	10
From six to nine months	7	10	17
From nine to twelve months	5	10	15
From twelve to eighteen months	9	12	21
From eighteen months to two years	13	10	23
From two to three years	5	14	19
From three to four years	8	7	15
From four to five years	10	16	26
From five to ten years	29	45	74
From ten to fifteen years	19	28	47
From fifteen to twenty years	25	19	44
From twenty to twenty-five years	7	14	21
From twenty-five to thirty years	7	11	18
From thirty to forty years	15	11	26
Over forty years	9	9	18
Unknown	22	2	24
Total	199	228	427

TABLE XXIII.

Showing prospects of recovery in those admitted during the year.

	Men.	Women.	Total.
Curable (apparently)	47	47	94
Incurable (apparently)	45	37	82
Not insane	2	1	3
Total	94	85	179

TABLE XXIV.

Prospect of those remaining at the end of the year.

	Men.	Women.	Total.
Curable (apparently).....	23	38	61
Incurable (apparently)	176	190	366
Total	199	228	427

TABLE XXV.

Statistics of admissions, discharges, and deaths from the opening of the asylum.

Year.	Admitted.	Discharged and died.	Recovered.	Improved.	Unimproved.	Died.	Whole number under treatment.	Remaining at end of hospital year.	Daily averages of the hospital.

TABLE XII.

Showing number with suicidal propensity under treatment during the year.

	Men.	Women.	Total.
Of those in the asylum at the beginning of the year.....	21	29	50
Of those admitted during the year.....	14	26	40
Total.....	35	55	90

TABLE XIII.

Showing civil condition of those admitted during the year.

	Men.	Women.	Total.
Married.....	32	38	70
Single.....	35	23	58
Widowed.....	8	10	18
Divorced.....	3	3
Total.....	75	74	149

TABLE XIV.

Showing occupation of those admitted during the year.

	Men.	Women.	Total.
Barber	1	1
Carriage dealer	1	1
Chair seater	1	1
Clerk	2	2
Cooking teacher	1	1
Druggist	1	1
Domestic	11	11
Farmer	12	12
Foreman	1	1
Housewife	45	45
Laborer	17	17
Mill operative	1	2	3
Moulder	1	1
Machinist	1	1
No occupation	5	9	14
Nailer	1	1
Nurse	1	1
Painter	2	2
Pattern cutter	2	2
Pay clerk	1	1
Physician	2	2
Printer	2	1	3
Lawyer	1	1
Salesman	2	2
Shoe operative	6	2	8
Stone cutter	2	2
Student	1	1	2
Teacher	1	1	2
Tramp	2	2
Traveling agent	1	1
Treasurer	1	1
Watchmaker	1	1
Weaver	2	1	3
Total	75	74	149

TABLE XV.

Showing nativity of those admitted during the year.

	Men.	Women.	Total.
New Hampshire	45	38	83
Maine	5	4	9
Massachusetts	6	5	11
Vermont	4	7	11
Minnesota	1	1
Canada	4	4	8

Deaths during the year and their causes.

	Men.	Women.	Total.
Exhaustion from organic brain disease	2	6	8
“ from typho-mania	1	1	1
“ from acute melancholia	1	1	1
“ from sub-acute melancholia	1	1	1
“ from chronic melancholia	1	1	1
“ from recurrent melancholia	1	1	1
“ from senile dementia	5	8	13
“ from chronic dementia	1	3	4
Paresis and lobar pneumonia	1	1	1
Paresis	2	1	3
Sarcoma of brain.	1	1	1
Apoplexy	3	1	3
Epilepsy	1	1	1
Myelitis	1	1	1
Pulmonary tuberculosis	1	1	1
Pneumonia	1	1	1
Congestion of lung	1	1	1
Valvular heart disease	1	1	1
Uræmia	1	1	1
Chronic nephritis	1	2	2
Exhaustion from acute diarrhea	1	1	1
Suicide by drowning	1	1	1
Total	18	31	49

TABLE XX.

Showing ages at time of death.

	Men.	Women.	Total.
Between twenty and thirty years old	1	1	1
“ thirty and forty years old	2	2	4
“ forty and fifty years old	3	3	6
“ fifty and sixty years old	2	8	10
“ sixty and seventy years old	4	4	8
“ seventy and eighty years old	4	6	10
“ eighty and ninety years old	3	6	9
Over ninety years old	1	1	1
Total	18	31	49

TABLE XXI.

Showing ages of those remaining at end of the year.

	Men.	Women.	Total.
Under twenty years of age	3	3	6
Twenty to thirty years of age	31	19	50
Thirty to forty years of age	35	31	66
Forty to fifty years of age	41	55	96
Fifty to sixty years of age	44	57	101
Sixty to seventy years of age	35	40	75
Seventy to eighty years of age	11	13	24
Over eighty years of age	3	4	7
Total	203	222	425

TABLE XXII.

Showing duration of disease in those remaining at end of the year.

	Men.	Women.	Total.
From one to three months	7	9	16
From three to six months	6	4	10
From six to nine months	4	5	9
From nine to twelve months	2	5	7
From twelve to eighteen months	7	9	16
From eighteen months to two years	12	13	25
From two to three years	14	17	31
From three to four years	5	11	16
From four to five years	8	8	16
From five to ten years	28	50	78
From ten to fifteen years	18	19	37
From fifteen to twenty years	21	20	41
From twenty to twenty-five years	13	20	33
From twenty-five to thirty years	8	11	19
From thirty to forty years	15	11	26
Over forty years	9	7	16
Unknown	26	3	29
Total	203	222	425

TABLE XXIII.

Showing prospect of recovery in those admitted during the year.

	Men.	Women.	Total.
Curable (apparently)	42	38	80
Incurable (apparently)	33	36	69
Total	75	74	149

TABLE XXIV.

Prospect of those remaining at the end of the year.

	Men.	Women.	Total.
Curable (apparently)	28	43	71
Incurable (apparently)	175	179	354
Total	203	222	425

TABLE XXV.

Statistics of admissions, discharges, and deaths from the opening of the asylum.

Year.	Admitted.	Discharged and died.	Recovered.	Improved.	Unimproved.	Died.	Whole number under treatment.	Remaining at end of hospital year.	Daily averages of the hospital.

	\$112,339.97

CHARLES P. BANCROFT,

Treasurer.

CONCORD, N. H., October 1, 1899.

This is to certify that I have examined the vouchers representing the payments made by Charles P. Bancroft, treasurer for the New Hampshire Asylum for the Insane, for the year ending September 30, 1899, and find the same properly entered upon the cash book, the footings to be correct, and the balance in the hands of the treasurer to be four thousand two hundred ninety-nine dollars and forty-five cents (\$4,299.45).

W. F. THAYER,

Auditor.

CONCORD, N. H., November 15, 1899.

TREASURER'S REPORT

FOR YEAR ENDING SEPTEMBER 30, 1900.

To the Trustees of the New Hampshire Asylum for the Insane:

The following statement of receipts and expenditures, from October 1, 1899, to September 30, 1900, inclusive, is respectfully submitted:

	<hr/>
	\$14,500.00

WILLIAMS FUND.

(Gift of John Williams of Hanover.)

2 shares Railroad National Bank stock . . .	\$200.00
---	----------

Besides the funds above mentioned, the financial agent holds in a contingent fund one five-hundred-dollar bond of the New Hampshire Trust Company, 30 per cent of whose principal has been paid, and forty-three shares of the old Shawmut National Bank stock, upon which 100 per cent has been received. This fund is not an established one, under the by-laws, but has been opened as a kind of suspense account. As fast as farther payments are made the several

amounts will be carried, in due time, to their proper destinations.

Upon the land purchased last winter of Mr. Saltmarsh, near our Long pond property, a spring has been excavated and substantially walled up and covered. It has a diameter of thirteen feet and a depth of nine. Although the past summer has been a dry one, it has yielded a daily amount of some two thousand gallons of pure water, which it can supply by gravity at any elevation that may hereafter be required.

The tract just mentioned lies opposite our other land, on the west side of the Long pond road, and has an area of about two and a half acres.

During the last year, a much larger amount than usual of our permanent securities has required reinvestment, and the premium paid upon the purchase of new ones has been considerable. Unusual expenses, too, amounting to nearly one thousand dollars (\$981.08) have been incurred. These charges have prevented as large a reduction of the asylum debt as was anticipated, whose present amount is ten thousand dollars.

The aggregate par value of our permanent funds, at which they stand upon the books of the financial agent, is three hundred and one thousand eight hundred and eighty-one dollars and ninety-two cents. Their market value at this time somewhat exceeds that amount.

J. B. WALKER,
Financial Agent.

CONCORD, N. H., October 1, 1899.

CONCORD, N. H., November 14, 1899.

I hereby certify that I have examined the accounts of the financial agent of the New Hampshire Asylum for the Insane, from October 1, 1898, to September 30, 1899, inclusive, and find the same correctly cast and properly vouched for.

I have also examined the securities of the said asylum in the Boston Safe Deposit & Trust Company, and find them all on hand and agreeing with the foregoing statement.

W. F. THAYER,
Auditor.

THIRTY-FOURTH ANNUAL REPORT OF THE FINANCIAL AGENT.

To the Trustees of the New Hampshire Asylum for the Insane:

The financial agent respectfully presents this report of his receipts and expenditures from October 1, 1899, to September 30, 1900, inclusive; and of the amounts and investments of the permanent funds of the asylum in his custody at the date last mentioned.

	\$14,500.00

WILLIAMS FUND.

(Gift of John Williams of Hanover.)

2 shares Railroad National Bank stock . . . \$200.00

At their par value, the securities in which these twenty-one funds are invested amount in the aggregate to three hundred and two thousand five hundred and six dollars and ninety-two cents (\$302,506.92). In addition to these, there are, in the hands of the financial agent, one bond of the New Hampshire Trust Company of five hundred dollars, and forty-three shares of the former Shawmut National Bank stock. These are in process of liquidation, 35 per cent having been paid upon the former and 112 per cent upon the latter. Inasmuch as these do not constitute a part of any permanent fund, and their value is not determined, they are not entered above.

A legacy of three thousand dollars, less a government tax of two hundred and twenty-five dollars, bequeathed to the asylum by Mrs. S. E. W. Creighton, has been received since my last report. Inasmuch as the supreme court of the United States has since decided that legacies of that amount are not subject to taxation, it is anticipated that this sum will be refunded to the asylum.

The debt of twelve thousand dollars (\$12,000), incurred for finishing and furnishing the Twitchell building and the introduction of fireproof ventilators to the attics of the asylum buildings, has been reduced to seven thousand five hundred dollars. As appears above, twenty-five thousand dollars of the principal has been discharged the past year.

Respectfully submitted.

J. B. WALKER,

Financial Agent.

CONCORD, N. H., October 1, 1900.

CONCORD, N. H., November 13, 1900.

I hereby certify that I have examined the foregoing report of the receipts and expenditures of J. B. Walker, financial agent of the New Hampshire Asylum for the Insane, from

October 1, 1899, to September 30, 1900, inclusive; and find the same correctly cast and satisfactorily vouched. I have also compared the foregoing schedule of the securities of the asylum with the securities in his hands, and find the same to agree in all particulars.

W. F. THAYER,
Auditor.

AUDIT OF ACCOUNTS

MADE BY THE BANK COMMISSIONERS DECEMBER 10, 1900.

STATE OF NEW HAMPSHIRE.

OFFICE OF BOARD OF BANK COMMISSIONERS,

CONCORD, December 17, 1900.

To His Excellency the Governor and the Honorable Council:

SIRS,—Upon receipt of a communication from the honorable the secretary of state, under date of November 23, 1900, notifying the bank commissioners that “the governor and council voted on November 22 that your commission be asked to audit the accounts of the Asylum for the Insane,” the board on December 10, 1900, proceeded to audit the accounts of the treasurer of the asylum and those of the financial agent for the two annual periods ending September 30, 1899, and September 30, 1900, comprising all the accounts of the trustees and the agents appointed by them that are required by chapter 86 of the Laws of 1897 to be audited by the bank commissioners; and they herewith submit the following report:

TREASURER'S ACCOUNT.

RECEIPTS.

Receipts from October 1, 1898, to September 30, 1899, as shown by the books of the treasurer:

Cash paid for miscellaneous expenses	\$267.49
Cash on hand	1,663.68
	<hr/>
	\$25,309.11

Proper vouchers were shown by the financial agent for all his expenditures.

There is an apparent discrepancy between the amounts shown to have been paid by the financial agent to the treasurer in each year and the statement of receipts made by him, growing out of a difference in time when the several accounts were closed. These accounts are reconciled by us by the omission from the account of the financial agent of the first three items of payments to the treasurer in October, 1898, amounting to \$2,819.50, having been included by him in his account the previous year; and by including in the treasurer's account items paid by the financial agent in October, 1900, amounting to \$2,079; and by the further omission of payments by the financial agent on account of C. A. Dow, then a patient at the asylum, which were included in the treasurer's account in his item of receipts from private patients. As stated in our report of a former examination of the financial affairs of the asylum in 1898, it is unavoidable that the treasurer's books be kept open at the end of each quarter until payments due are actually received, which payments may not in fact be made until the next quarter, or until a new year has commenced.

There is a further discrepancy between the amounts shown by the treasurer to have been received from the state and the published report of the state treasurer of payments to the asylum, owing to the fact that the financial year of the asylum is from October 1 to September 30, while that of the state treasurer ends on the last day of May.

It would seem desirable, if the published reports of the various state departments and state institutions are to agree with each other, that the financial year should cover the same period of time for all, otherwise the reports are confusing, if not misleading.

The commissioners also examined the securities in the hands of the financial agent, in which the several trust funds belong-

ing to the asylum are invested and found the same to correspond with the statement of the same funds published by the bank commissioners in 1898, after accounting for changes by reason of payment of certain securities and of new investments authorized by the governor and council.

SPECIAL APPROPRIATION OF 1899.

The legislature of 1899, see chapter 113, Laws of 1899, appropriated twenty-five thousand dollars for each of the years 1899 and 1900, in all fifty thousand dollars, to the New Hampshire Asylum for the Insane, to be expended for various purposes as named in said act.

We find that the treasurer of the asylum has received on this appropriation:

From the state treasurer	\$50,000.00
And he has shown us proper vouchers for payments made from this fund to the amount of .	49,380.38
<hr/>	
Leaving an unexpended balance in his hands, due for work contracted for .	\$619.62
To which has been added proceeds from the sale of old bricks	119.28
<hr/>	
Making balance of cash in hands of treasurer	\$738.90

Respectfully submitted.

ALPHEUS W. BAKER,
JOHN HATCH,
GEO. WAIT CUMMINGS,
Bank Commissioners.

REPORT OF THE BUILDING COMMITTEE.

The building committee respectfully submit to the trustees of the New Hampshire Asylum the following report covering the biennial period subsequent to the adjournment of the last legislature. As soon as was practicable advertisements were placed in various newspapers throughout the state for estimates on the following new construction: (1) Addition to the boiler house, (2) a new brick chimney 150 feet in height, (3) a new steel boiler, (4) a new laundry building with entire new laundry machinery, (5) new plumbing throughout the Peaslee and Chandler wings, (6) fireproof and water-proof tile flooring in the Peaslee, Chandler, Kent, Fisk, and Rumford wings as well as the kitchen, (7) a nurses' house, (8) new radiation with galvanized iron casings for the Kent building, (9) new plumbing throughout the Kent building, (10) new plumbing for six bathrooms of the Fisk and Rumford wings. The plans for the laundry, chimney, and nurses' house were prepared by W. M. Butterfield of Manchester.

On the second of May, 1899, the bids were formally opened by the committee, the architect, Mr. Butterfield, being present.

At a subsequent meeting the contract for the addition to the boiler house, the erection of the new chimney, the new laundry, the nurses' house, and all the fireproof tile flooring was awarded C. L. Fellows & Co. of Concord, their bid being the lowest of several that were presented. The plumbing of the Peaslee and Chandler wings was awarded the F. O. Ray Company of Nashua; the galvanized iron radiator casings for the Kent building indirect radiation to Albert B. Franklin of Boston; the direct and indirect radiation of the Kent building to the H. B. Smith Company of Westfield,

Mass.; steam and hot-water pipe insulation to the H. W. Johns Manufacturing Company; the new boiler, smoke flue, and connection with other boilers, and new chimney, to Scannell & Wholey of Lowell, Mass.; the laundry machinery to the Empire Laundry Machinery Company of Boston; the furniture of the nurses' home to J. M. Stewart Sons Company of Concord; the shades of the nurses' home to H. A. Macdonald of Concord. In every instance the accepted estimates were the lowest of several that were submitted.

The work has progressed steadily during the past two years and is nearly all completed. The plumbing and tile flooring of the Fisk and Rumford wings are still in progress, and will be completed soon after the commencement of the new year. The work was necessarily slow in many instances, for the routine duties of the various departments could not be interfered with. Particularly embarrassing was the removal of the old wooden floors in the kitchen and ward toilet rooms.

As is usually the case when new is adapted to old construction, many changes in original plans became necessary, and in many instances expenditure that was not anticipated was entailed. All serious difficulties have been overcome, however, and the general character of the additions and alterations is excellent. Particularly gratifying is the connection of the heating apparatus of the Bancroft and Kent buildings with the boiler house. This work was installed by our engineer, Mr. Booth, and one winter's demonstration has proven its superiority over the old method of heating with individual boilers in each building. The new chimney has rendered possible the use of buckwheat coal without forced draft. The construction of a one-story laundry, with every department on one floor, amply lighted, and ventilated through the ceiling, has proved most satisfactory.

It was the original intention to erect a farm cottage near the barns for the head farmer and the farm employees. As the work in other departments progressed, however, it was found it would be impossible to erect the farmhouse without slighting and impairing the standard of excellence in the im-

portant new construction already commenced. Much as the farmer's house was desired, therefore, its postponement was deemed wiser by your committee than the possible impairment of important work through an injudicious attempt to do too much.

Appended to this report is a summary of the expenditure of the appropriation.

JOHN A. SPALDING,
J. B. WALKER,
JAMES A. EDGERLY,
J. C. FRENCH,
C. P. BANCROFT,

Members of Building Committee.

CONCORD, N. H., November 15, 1900.

REPORT OF THE TREASURER OF THE BUILDING COMMITTEE.

The treasurer respectfully submits the following account of receipts and expenditures to date in account with the state legislative appropriation of 1899:

RECEIPTS.

Cash received of state treasurer . . .	\$50,000.00
received of C. L. Fellows & Co. from bricks on old chimney . . .	119.28
received from money borrowed . . .	7,280.00
	<hr/>
	\$57,399.28

EXPENDITURES.

Paid for advertising in newspapers throughout the state	\$83.25
freights	225.81
day labor on trenching and pipe work .	1,544.12
rental and erection of temporary smoke stack	53.00

connection with sewer	\$13,029.97
notes paid	7,280.00
interest on notes	150.42
contract on waterproof and fireproof	
floors for Kent building	352.00

Whole amount expended to date, November	
15, 1900	\$56,349.06
Balance of appropriation with which to complete	
plumbing of Kent, Rumford, and Fisk wings	1,050.22
	<hr/>
	\$57,399.28

C. P. BANCROFT,
Treasurer.

CONCORD, N. H., November 15, 1900.

I hereby certify that I have examined the vouchers representing payments made by Charles P. Bancroft, treasurer of the building committee for the New Hampshire Asylum for the Insane, for the year ending September 30, 1900. I find the same correctly entered on the cash book, and a balance in the hands of the treasurer of ten hundred fifty dollars and twenty-two cents (\$1,050.22).

W. F. THAYER,
Auditor.

APPENDIX.

APPENDIX.

DIRECTIONS CONCERNING ADMISSION.

Those wishing the admission of a person to the asylum should make application to the superintendent previously to bringing the patient, unless the urgency of the case precludes it.

On application, full information, as to terms, conditions, etc., and the necessary papers will be furnished.

With the application, a brief statement of the case should be given.

Some person should accompany the patient who can give a correct history of the case, if possible.

On no account should deception be practiced. The necessity of this step and the arrangements having first been settled, the patient should be honestly informed of what is to take place.

When possible, it is better that patients should arrive in day trains.

Patients should not bring valuable property when committed, and the asylum cannot become responsible for its keeping. Such articles should be left at home, unless the patient is fully responsible for their care.

The parties committing a patient, whether private individuals or town officers, are required to give a bond for the payment of expenses in the annexed form, signed by two responsible persons. The certificates of physicians should be filled and signed in all cases, except those committed by courts, and be written in the annexed form.

FORM OF BOND.

In consideration of the admission of _____, of the town of _____, in the county of _____, and state of _____, as a boarder at the New Hampshire Asylum for the Insane, in the city of Concord, we, of the town of _____, in the county of _____, and state of _____, and _____, of the town of _____, in the county of _____, and state of _____, jointly and severally promise to agree to and with said New Hampshire Asylum for the Insane, to pay its treasurer _____ dollars and _____ cents per week, or such other rate as may from time to time be established by said asylum therefor, while he shall remain at said asylum; together with such extra charge as may be occasioned by requiring more than the ordinary care and attention; to pay any reasonable charge for actual damage done by to buildings or furnishings; to assist in returning to said asylum in case of escape; to remove from said asylum when required to do so by the superintendent; to pay funeral charges in case of death; and not to hold said asylum responsible for any money, jewelry, watches, or other valuables in _____ possession on admission, or given to _____ afterwards.

Payments to be made quarterly, and interest on all sums not paid at the end of each quarter.

Witness our hands this _____ day of _____, 190 .

Attest :

Principal. [L. S.]

Surety. [L. S.]

NOTE.—Those committing patients are requested to notice the condition in regard to money, jewelry, etc.

FORM OF PETITION.

To be filled and signed by those desiring aid from the state appropriation, to be sent to the superintendent.

To His Excellency, the Governor of the State of New Hampshire:

Respectfully represents that _____, an insane person, resident of _____, in this state, is without sufficient property or relatives legally liable for _____ support at the New Hampshire Asylum for the Insane. Wherefore, the undersigned prays that the said _____ be aided by any funds appropriated by the state for the indigent insane.

Dated at _____, 190 .

We, the undersigned, selectmen of _____, hereby certify that the representations in the above petition are in our belief true, and that said _____ is an indigent insane person.

N. B.—Please write whether the insane person has any property, and if so, what amount, and any other facts you may think proper in relation to the ability of the insane person's near relatives.

NOTE.—The amount received by the applicant, it will be understood, is regulated entirely by the number who may apply for aid, and the comparative need of assistance.

ORDER FOR SUPPORT OF TOWN AND COUNTY PATIENTS.

We, _____, hereby order the committal of _____ to the New Hampshire Asylum for the Insane, at Concord, there to be supported at the expense of _____, in accordance with the statute, during _____ residence at said asylum.

_____ 190 .

NOTE.—To be signed by mayor, selectmen, or overseer of poor, in case of town charge; by county commissioner, in case of county charge.

N. B. Admission will be refused unless the requirements of the law are strictly complied with. See extract from the laws at the foot of this blank.

FORM OF CERTIFICATE OF INSANITY.

REQUIRED FOR ADMISSION OF PATIENTS.

After due inquiry and personal examination of _____, of _____, made within one week prior to date, we certify that _____ is insane, and a fit subject for treatment at the New Hampshire Asylum for the Insane.

_____, M. D.

_____, M. D.

_____, 190 .

Having personal acquaintance with the signers of the above certificate, I certify that the signatures are genuine, and the signers reputable physicians.

_____, 190 .

EXTRACT FROM THE LAWS OF NEW HAMPSHIRE.

SECTION 18. No person shall be committed to the asylum for the insane, except by the order of the court or the judge of probate, without the certificate of two reputable physicians that such person is insane, given after a personal examination made within one week of the committal: and such certificate shall be accompanied by a certificate from the judge of the supreme court, or court of probate, or mayor, or chairman of the selectmen, testifying to the signatures, and the respectability of the signers.

LAWS

RELATING TO THE NEW HAMPSHIRE ASYLUM FOR THE INSANE.

THE NEW HAMPSHIRE ASYLUM FOR THE INSANE.

SECTION

1. Corporate name.
 2. Trustees, how appointed.
 3. Tenure of office of trustees.
 4. Trustees to manage affairs of asylum.
 5. To appoint officers, etc.
 6. Trustees not to receive compensation.
 7. To make regulations.
 8. May hold property in trust.
 9. Shall make report annually.
 10. Board of visitors and their duties.
 11. Asylum's land taken for highways only by authority of legislature.
 12. Property of asylum exempt from taxation.
 13. Annual appropriation to library.
- #### COMMITMENT TO ASYLUM.
14. Parent, guardian, etc., may commit.
 15. Insane paupers, how committed by town.
 16. County paupers, how committed.
 17. Dangerous insane persons, how committed.
 18. Certificate of two physicians required to commit.
Regulations for commitments to the asylum to govern commitments to other institutions.

SUPPORT AT ASYLUM.

20. When county shall support insane person.

SECTION

21. When means of support fail, counties to support on notice.
22. What inmates of asylum for insane supported by state.
23. County may recover expense paid.
24. Concord not liable.
25. Certain insane persons to be supported by state.
26. Annual appropriations for indigent insane.

DISCHARGE FROM ASYLUM.

27. How discharged from asylum.
28. Trustees to visit asylum and hear statements of patients.
29. Superintendent to furnish stationery to patients, and transmit their letters to trustees.

CORONER'S INQUEST IN CASE OF SUDDEN DEATH.

30. Inquest on patient suddenly deceased.

COMMISSION OF LUNACY.

31. Insane persons wards of state.
32. Commission of lunacy.
33. Powers and duties of commission of lunacy.
34. Records and reports of commission of lunacy.
35. Superintendents to make reports to commission of lunacy.
36. Annual appropriation for expenses of commission.

SECTION 1. The asylum for the insane, at Concord, is a corporation under the name of the New Hampshire Asylum for the Insane.

SECT. 2. The government of the asylum is vested in twelve trustees appointed and commissioned by the governor, with advice of the council; and all vacancies shall be filled in the same manner.

SECT. 3. The trustees are classified and commissioned in such manner that the offices of three trustees become vacant annually.

SECT. 4. The trustees shall take charge of the property and concerns of the asylum; shall see that its affairs are conducted properly; may enter into and bind the asylum by such contracts relative to the support of patients and the affairs of the asylum as they may deem advantageous; and may receive, appropriate, control, convey, or invest any property given to or owned by the asylum in such manner as they may think expedient.

SECT. 5. The trustees shall appoint a secretary, who shall keep a full and fair record of their proceedings; a treasurer, who shall give bond for the faithful discharge of his duties; and such physicians, officers, and assistants, with such salaries and allowances, as may from time to time be found necessary.

SECT. 6. No trustee shall receive any compensation for his services as trustee; but expenses necessarily incurred by him shall be paid by the asylum.

SECT. 7. The trustees may make such regulations for their own government, for the management of the asylum and all persons connected therewith, and for the admission and care of patients, and the same from time to time alter, as convenience may require.

SECT. 8. The asylum may take and hold in trust any grant or devise of real estate, or any donation or bequest of personal property, and may apply the same, unless otherwise restricted, to lessen the expenses of the indigent insane.

SECT. 9. The trustees shall make to the governor and council, annually, a report, covering that of the superintendent to them, of the receipts and expenditures of the asylum, the number of patients admitted and discharged during the year, and all other matters connected with the general inter-

ests of the asylum. It shall be filed in the office of the secretary of state on or before the first day of December.

SECT. 10. The governor and council, president of the senate and speaker of the house, shall constitute a board of visitors of the asylum; shall visit and inspect the same when necessary, examine into the condition of the patients, and the regulations and general management of the asylum; see that the design thereof is carried into full effect; and make to the legislature, at each biennial session, a report which shall be furnished to the secretary of state on or before the first day of the December next preceding such session.

SECT. 11. No land connected with the asylum shall be taken for a highway or other public use, except by the express authority of the legislature, for that purpose first had and obtained.

SECT. 12. The property of the asylum is exempted from taxation.

SECT. 13. The sum of one hundred dollars is annually appropriated toward the support and increase of the library of the asylum.

COMMITMENT TO ASYLUMS.

SECT. 14. The parent, guardian, or friends of any insane person may cause him to be committed to the asylum, with the consent of the trustees, and there supported on such terms as they may agree upon.

SECT. 15. Any insane pauper supported by a town may be committed to the asylum by order of the overseers of the poor, and there supported at the expense of the town.

SECT. 16. If the overseers neglect to make such order in relation to any insane county pauper, the supreme court, or any judge thereof in vacation, may order such pauper to be committed to the asylum, and there supported at the expense of the county.

SECT. 17. If any insane person is in such condition as to render it dangerous that he should be at large, the judge of probate, upon petition by any person and such notice to the selectmen of the town in which such insane person is, or to

his guardian or any other person, as he may order, may commit such insane person to the asylum; and such petition may be filed, notice issued, and hearing had in vacation or otherwise.

SECT. 18. No person shall be committed to the asylum for the insane, except by an order of the court or the judge of probate, without the certificate of two reputable physicians that such person is insane, given after a personal examination made within one week of the committal. Such certificate shall be accompanied by a certificate of a judge of the supreme court or court of probate, mayor, or one of the selectmen, certifying to the genuineness of the signatures and the respectability of the signers.

SECT. 19. All laws relative to the commitment of insane persons to the New Hampshire Asylum for the Insane shall govern the commitment of insane persons to all other places in this state where insane persons are confined; but no insane person, other than a pauper, shall be admitted to any county asylum.

SUPPORT AT ASYLUM.

SECT. 20. Any insane person committed to the asylum by his parent, guardian, or friends, who has no means of support and no relatives of sufficient ability chargeable therewith, and no settlement in any town in this state, and who is in such condition that his discharge therefrom would be improper or unsafe, shall be supported by the county from which he was committed.

SECT. 21. When the means of support of any inmate of the asylum shall fail or be withdrawn, the superintendent shall immediately cause notice in writing of the fact to be given to one of the county commissioners of the county from which such inmate was committed; and such county shall pay to the asylum the expense of the support of such inmate from and after the service of such notice, and for ninety days next prior thereto.

SECT. 22. Any insane person charged with an offense, the punishment whereof is death or confinement in the state

prison, committed to the asylum by order of the supreme court, shall be supported at the expense of the state during his confinement there. Any other insane person committed to the asylum by the supreme court or a judge thereof, and any insane person committed by a judge of probate, shall be supported by the county from which he was committed.

SECT. 23. The county or town paying the expense of the support of an inmate of the asylum shall be entitled to recover the amount so paid of the inmate himself, if of sufficient ability to pay; otherwise of the town, county, or person by law liable for his support.

SECT. 24. The city of Concord shall not be liable for the support of any insane person committed to the asylum, unless he was committed from said city.

SECT. 25. Any insane person who has been an inmate of the asylum for twenty years, and been supported in whole or in part during that time by others than the town or county chargeable therewith, and who has no means of support and no relations chargeable therewith, and who cannot properly be discharged from the asylum, shall be supported there at the expense of the state.

SECT. 26. The sum of six thousand dollars (\$6,000) is annually appropriated for the support at the asylum of such indigent insane persons belonging to the state as the governor, from time to time, may designate; but two thirds at least of the sum shall be applied to the support of private patients who are not maintained at public charge.

DISCHARGE FROM ASYLUM.

SECT. 27. Any person committed to the asylum may be discharged by any three of the trustees, by the commission of lunacy, or by a justice of the supreme court, whenever a further retention at the asylum is, in their opinion, unnecessary; but any person so discharged who was under sentence of imprisonment at the time of his commitment, the period of which shall not have expired, shall be remanded to prison.

SECT. 28. Some one of the trustees, without previous notice, shall visit the asylum at least twice every month, and

give suitable opportunity to every inmate therein to make to him, in private, any statements such patient may wish to make; and, whenever he deems it proper, he shall call to his aid two other trustees, who shall, with him, make a further examination of such inmate and of the statements by him made. If, in their judgment, a further detention is unnecessary, it shall be their duty to discharge such inmate. They may order such immediate change in the treatment of any inmate as they deem judicious; and, in case of failure to secure it, they shall at once summon a meeting of the whole board, whose duty it shall be to take such measures as the exigency of the case demands.

SECT. 29. The superintendent shall furnish stationery to any inmate who desires it; and shall transmit promptly and without inspection, to the trustee whom the board may designate, all letters addressed to the board by inmates of the asylum.

CORONER'S INQUEST IN CASE OF SUDDEN DEATH.

SECT. 30. In event of the sudden death of any inmate, a coroner's inquest shall be held, as provided for by law in other cases.

COMMISSION OF LUNACY.

SECT. 31. All persons deprived of their liberty in this state by being committed to custody as insane persons, shall be wards of the state and subject to state supervision.

SECT. 32. The state board of health shall constitute a commission of lunacy.

SECT. 33. The commission, by one or more of their members, shall, without previous notice, visit and make thorough inspections of all asylums and other institutions for insane persons in the state, as often as once in four months. They shall examine into the care and treatment of the insane, the sanitary condition of each asylum or institution, and all other matters relating to the general welfare of the inmates. They may order the removal of any indigent insane person to the New Hampshire Asylum for the Insane for remedial treatment, and such person while under such treatment shall be supported at

the expense of the state. When the need of such treatment shall cease, the commission shall so notify the county, town, or relative liable for the support of such inmate, and if he is longer continued at the asylum it shall be at the expense of such county, town, or relative.

SECT. 34. The commission shall keep a correct record of the number of commitments, discharges, and deaths at each asylum, institution, or other place of detention, and of the age, sex and nationality of each person committed, discharged, or deceased, and shall report the same annually to the governor and council, with any other matters or recommendations which in their judgment are important.

SECT. 35. The superintendent of every asylum or other place in this state where insane persons are confined, shall, within three days after the commitment thereto of any person, notify the commission thereof, upon blanks furnished for that purpose; and the said superintendent shall at all times furnish to the board such information regarding the insane in his charge as they may request.

SECT. 36. To meet the expenses imposed upon the commission by the foregoing sections, the sum of twelve hundred dollars (\$1,200), or so much thereof as may be required, is annually appropriated; and the expenditures shall be audited by the governor and council.

—*Public Statutes of N. H., chapter 10.*

SECT. 4. The following persons are also exempted from military duty:

the attendants upon the insane, employed in the asylum for the insane;

the officers and keepers of the asylum for the insane.

—*Public Statutes, chapter 96.*

SECTION 1. Whenever the grand jury shall omit to find an indictment against a person, for the reason of insanity or mental derangement, or a person prosecuted for an offense shall be acquitted by the petit jury for the same reason. such jury shall certify the same to the court.

SECT. 2. Any person prosecuted for an offense may plead that he is not guilty by reason of insanity or mental derangement, and such plea may be accepted by the state's counsel, or may be found true by the verdict of the jury.

SECT. 3. In either of the cases aforesaid, the court, if they are of opinion that it will be dangerous that such person should go at large, may commit him to the prison or to the asylum for the insane, there to remain until he is discharged by due course of law.

SECT. 4. The governor and council or the supreme court may discharge any such person from prison, or may transfer any prisoner who is insane to the asylum for the insane, to be there kept at the expense of the state, whenever they are satisfied that such discharge or transfer will be conducive to the health and comfort of the person and the welfare of the public.

SECT. 5. If any insane person is confined in jail, or a house of correction, the supreme court may order him to be committed to the asylum, if they think it expedient.

—*Public Statutes, chapter 255.*

AN ACT in addition to chapter 10 of the Public Statutes, relating to insane persons.

SECTION 1. When application is made to the judge of probate, or the supreme court or any justice thereof, for the committal of any person to the asylum for the insane, said court or judge may appoint two reputable physicians to examine said person, with or without notice to him or her from said court or judge; said physicians shall immediately report the result to said court or judge, who may, upon such report, and such evidence as can be produced, order said person to be committed to said asylum when there is a sufficient reason for making such order.

SECT. 2. Said supreme court, or any justice thereof, shall at any time, with or without notice, upon application and due cause shown, investigate the question whether there is sufficient reason for the detention in said asylum of any person

who has been committed thereto, and shall order his or her discharge where said order ought to be made, with or without a writ.

[Approved February 26, 1845.]

JOINT RESOLUTION with reference to the title of the property of the New Hampshire Asylum for the Insane.

Resolved by the Senate and House of Representatives in General court convened:

WHEREAS, The entire property of the New Hampshire Asylum for the Insane is owned by the state of New Hampshire, either absolutely or in trust, but the legal title of the land, buildings, and other property stands in the name of the trustees of the asylum appointed by the state, and

WHEREAS, It is desirable that the legal title should conform to the actual title, therefore,

Be it enacted by the Senate and House of Representatives in General Court convened:

That the attorney-general be directed to examine the deeds and other conveyances of title to said property, and advise the trustees what conveyances, if any, should be made to perfect the legal title of the state to said property, and the trustees be directed to execute such conveyances as may be advised by the attorney-general, and deliver the same to the governor and council in behalf of the state, within sixty days from the passage of this resolution.

[Approved March 24, 1897.]

AN ACT in relation to the New Hampshire Asylum for the Insane.

Be it enacted by the Senate and House of Representatives in General Court convened:

SECTION 1. No change shall be made by the trustees of the New Hampshire Asylum for the Insane of its trust funds, except upon approval by the governor and council. In making any investments of its trust funds, the trustees shall submit their recommendations to the governor and council before

such investments are made. The governor and council may also direct in whose custody the bonds, notes, and other securities of the institution shall be kept.

SECT. 2. The auditing of the accounts of the trustees, or any agent appointed by them, shall be performed by the bank commissioners, under the direction of the governor and council, who shall have authority at any time to direct said commissioners to make an examination of the financial affairs of the institution.

SECT. 3. Before expending any money received from any source in the construction of new buildings, the trustees shall submit plans and estimates of all such buildings to the governor and council for their approval.

SECT. 4. This act shall take effect upon its passage.

[Approved March 25, 1897.]

AN ACT in amendment of section 33 of chapter 10 of the Public Statutes, relating to the commission of lunacy.

Be it enacted by the Senate and House of Representatives in General Court convened:

SECTION 1. Section 33 of chapter 10 of the Public Statutes is hereby amended by inserting after the word "state" in the eleventh line the words "such expense not to exceed in any one year the sum of sixteen thousand dollars (\$16,000) for all such persons," so that said section, as amended, shall read: "Sect. 33. The commission, by one or more of their members, shall, without previous notice, visit and make thorough inspections of all asylums and other institutions for insane persons in the state, as often as once in four months. They shall examine into the care and treatment of the insane, the sanitary condition of each asylum or institution, and all other matters relating to the general welfare of the inmates. They may order the removal of any indigent insane person to the New Hampshire Asylum for the Insane for remedial treatment, and such person, while under such treatment, shall be supported at the expense of the state, such expense not to exceed in any one year the sum of sixteen thousand dollars (\$16,000) for all such persons. When the need of treatment

shall cease, the commission shall so notify the county, town, or relative liable for the support of such inmate, and if he is longer continued at the asylum it shall be at the expense of such county, town, or relative."

SECT. 2. This act shall take effect and be in force from and after June 1, 1897.

[Approved March 26, 1897.]

BY-LAWS

OF THE NEW HAMPSHIRE ASYLUM FOR THE INSANE, ADOPTED
BY THE TRUSTEES AT A MEETING OF THEIR BOARD HOLDEN
OCTOBER 31, 1878, WITH SUBSEQUENT AMENDMENTS.

SECTION 1. The annual meeting of the board of trustees shall be holden at the asylum in Concord, on the third Thursday of November of each year, and a semi-annual meeting shall be held on the third Thursday of May of each year.

SECT. 2. The trustees shall, at the annual meeting, elect by ballot a president, secretary, and treasurer, who shall hold their respective offices one year, and until others are chosen in their stead. At times, when either of said offices is vacant, it may be filled at a special meeting of the trustees duly called for that purpose.

SECT. 3. Notice of the annual and semi-annual meetings shall be given by the secretary to each trustee, either verbally or by mail, at least fourteen days previous to the day of meeting; and any meeting may be continued by adjournment, from time to time, until the business thereof shall be completed. In case of omission to notify the annual meeting, the same shall not be lost, but shall be considered as adjourned for the transaction of business, until the required notice thereof shall be given, which the secretary shall forthwith proceed to give.

SECT. 4. The president, or any four of the trustees, may call a special meeting of the trustees whenever in the opinion of either it may be deemed expedient so to do; and the same notice shall be given of a special as of the annual meeting, which notice shall state specifically the business to be brought before such meeting. In case of a vacancy in the office of secretary, the president shall notify the annual meeting.

SECT. 5. A majority of the members of the board shall constitute a quorum for the transaction of any business; but any less number, at a meeting duly called, may adjourn from time to time, until a quorum be obtained.

SECT. 6. Two of the trustees shall visit the asylum each month; and notices of the months by him selected, or to him assigned, shall be sent to each member by the superintendent before the first day of such month.

SECT. 7. No trustee shall receive any compensation for his services as trustee; but expenses necessarily incurred in rendering the same shall be paid by the asylum.

SECT. 8. The trustees shall, at each annual meeting, appoint from their number an auditor, whose duty it shall be to examine the books and audit the accounts of the treasurer and of the financial agent for the ensuing year, and make a written report to the board, at their annual meeting.

SECT. 9. The treasurer shall give a bond, acceptable to the trustees, in the penal sum of fifteen thousand dollars (\$15,000), for the faithful performance of his duties for and during such time as he shall continue to hold the office of treasurer, which bond shall be deposited with the president of the board.

SECT. 10. The treasurer shall receive, hold, and disburse all moneys coming to the asylum, except the permanent funds and the income thereof. He shall make an exhibit of the state of his books, and of the property in his custody, when called for by the trustees. He shall make up his accounts to the thirtieth day of September, inclusive, in each year, which accounts, with his report thereon, shall be laid before the trustees at their annual meeting. His books shall at all times be open to the examination of the trustees.

SECT. 11. The treasurer shall pay all bills approved by the superintendent, and, in addition thereto, such orders as the superintendent may draw on him for the ordinary expenditures of the asylum, when said offices are held by different individuals.

SECT. 12. The treasurer shall receive such compensation for his services as the trustees may from time to time determine.

SECT. 13. The secretary shall attend all meetings of the board of trustees, and keep a record of their proceedings. He shall also prepare, or cause to be prepared, all documents, statements, and notices which may be ordered by the board, or by the president thereof.

SECT. 14. The secretary shall receive such compensation for his services as the trustees may from time to time determine.

SECT. 15. The board of trustees shall appoint a superintendent, who shall be a physician, and reside at the asylum. He shall have the entire control of the treatment and management of the patients; the power to appoint and discharge all persons employed in their care; and shall exercise a general supervision and direction of every department of the institution.

SECT. 16. The superintendent shall make a written report to the trustees, at their annual meeting, of the condition of the asylum, and embracing such other topics as may have been suggested by the progress of the institution and the experience of the year.

SECT. 17. The superintendent shall receive for his services, in addition to furnished apartments, board, lights, and fuel for himself and family, such a salary as the trustees may from time to time determine.

SECT. 18. The superintendent shall furnish, to the acceptance of the trustees, a bond for the faithful performance of his duties, in the penal sum of ten thousand dollars (\$10,000), which bond shall be kept by the president of the asylum.

SECT. 19. The superintendent shall appoint two assistant physicians, who shall reside at the asylum. They shall possess such characters and qualifications as will enable them to discharge the ordinary duties of the superintendent, and shall at all times perform such duties as he may assign them, and to his acceptance.

SECT. 20. The assistant physicians shall receive such compensation for their services as the trustees may from time to time determine, in addition to furnished apartments, lights, fuel, and board.

SECT. 21. All funds amounting to one hundred dollars (\$100) and upwards, which have heretofore been or which may hereafter be given to the New Hampshire Asylum for the Insane, shall, unless otherwise ordered by the donors, be entered upon the books of the financial agent as permanent funds, with the surnames of the donors attached to each, and be forever kept intact. The income of each shall be expended from time to time in accordance with the conditions upon which it was given, or, in the absence of conditions, in such manner as the trustees shall deem to be for the highest interest of the asylum and its patients.

SECT. 22. There shall be chosen, by ballot, a financial agent, who shall have charge of the permanent funds of the asylum, shall collect, and, under the advice of the finance committee, from time to time invest, manage, and disburse any moneys arising therefrom. He shall be, *ex officio*, a member of the finance committee, shall give a satisfactory bond for the faithful performance of his trust, in the sum of twenty-five thousand dollars (\$25,000), and continue in office until his successor is elected. He shall receive for his services such compensation as the trustees shall from time to time determine, and make up his accounts to the thirtieth day of September, inclusive, of each year.

SECT. 23. The trustees shall annually choose two from their board, who, with the financial agent, shall constitute a finance committee, and have general supervision and control of the permanent funds of the asylum, with power to sell and transfer any stocks, bonds, and other securities belonging to said funds, whenever, in their judgment, it may be expedient so to do.

SECT. 24. Besides attending the annual meeting, the trustees shall severally visit the asylum twice each year, in such months as they may select, or as may be assigned to them; make a thorough examination of the house and of the condition of the patients; and, before leaving, make a record of their respective visits in a book kept at the asylum for that purpose.

SECT. 25. These by-laws may be altered or amended at any annual meeting by a vote of two thirds of the trustees present, or at a special meeting called for that purpose.

NEW HAMPSHIRE ASYLUM TRAINING SCHOOL FOR NURSES.

INSTRUCTORS.

MILLIE C. GODFREY, *Superintendent of Nurses.*

C. P. BANCROFT, M. D.

F. L. HILLS, M. D.

A. E. BROWNRIGG, M. D.

JULIA WALLACE RUSSELL, M. D.

CHARLES R. WALKER, M. D.

FANNIE M. FARMER, *Instructor in Cooking.*

W. H. VARICK, M. D.

ARTHUR SUMNER, M. D.

The trustees of the New Hampshire Asylum, having established a training school for nurses at that institution, offer to give women desirous of becoming professional nurses, a two years' course of training in general nursing, with especial reference to the care of cases of nervous and mental disease.

Those wishing to receive such instruction must apply to Dr. C. P. Bancroft, superintendent of New Hampshire Asylum, Concord, N. H.

The most desirable age for candidates is from twenty to thirty-five years. They must be in sound health, and sufficiently interested in the subject of nursing, and free from all incumbrances, so that they can, in all reasonable probability, complete the prescribed course of two years.

The superintendent of nurses has the immediate charge of the training school, under the authority of the superintendent of the asylum, and the nurses are subject to the rules of the asylum. The right is reserved to terminate the connection of any nurse or pupil with the school for any reason which may be deemed sufficient.

All nurses are required to be intelligent, trustworthy, kind, and cheerful.

The instruction includes the general care of the sick, the making of beds, changing bed and body linen, managing of helpless patients in bed, etc., giving baths, keeping patients warm or cool, prevention and dressing of bed sores, and the proper management of patients under various conditions of disease; the making and applying of bandages; the dispensing of drugs; the management of patients in accidents and emergencies; the application of poultices, the dressing of burns, ulcers, and wounds; the administering of enemas, and the use of the female catheter.

A course in cooking for the sick will be given by a competent instructor from the Boston Cooking School. Instruction will be given by the superintendent of nurses, by the medical staff at the asylum, and by physicians and surgeons resident in the city.

Students in the training school act as nurses in the various wards of the asylum, during their term of service. During the first year they receive from \$3 to \$3.50 per week; during the second year, from \$3.50 to \$4 per week.

When the full term of two years is completed, the nurses receive, if they pass all the examinations and their service in the asylum has been satisfactory, a diploma, certifying to the completion of the regular training and practice. Nurses who have served the full course in this asylum have found ready engagement as head nurses in the asylum, with wages of \$20 to \$25 per month, or as private nurses outside, at from \$10 to \$15 per week.

Nurses are required to wear at all times while on duty in the wards, the training school uniform.

The school begins in the fall, but accepted candidates may enter at any time, as vacancies occur. They are, as a rule, received in the order of their application.

QUESTIONS TO BE ANSWERED BY CANDIDATES.

1. Name in full of candidate.
2. Are you married, single, or widow?
3. Your present occupation or employment.
4. Age at last birthday, date and place of birth.
5. Are you strong and healthy?
6. Height? Weight?
7. Are you free from domestic or other responsibility, so that you are not liable to be called away?
8. Name of any responsible person for reference.
9. Have you ever served in any other asylum or hospital, and if so, when and where?

Having read, and clearly understanding and agreeing to, the foregoing conditions and regulations, I declare the above statement to be correct.

(Signed)

Present address,

Date, 190 .

GRADUATES OF THE SCHOOL.

CLASS OF 1890.

Ellen H. Colton.	Addie J. Eastman.
Millie C. Godfrey.	Y. Farouhain.

COURSE OF INSTRUCTION FOR MALE ATTENDANTS AT THE NEW HAMPSHIRE ASYLUM.

1. Care of the ward and ward appliances.
2. Emergencies and accidents.
3. Insanity, its symptoms and forms, and rules for the management of the same.
4. The same concluded.
5. Suicide.
6. Poultices, rubifacients, and counter-irritants.
7. Bandages and slings, uses, etc.
8. Medicines,—administration, etc.
9. Regional anatomy, demonstration of important blood vessels and bones on the subject.
10. Practical demonstration in bed-making, changing sheets, making up sick-bed, etc.

GRADUATING ADDRESS TO CLASS OF 1900.

EDWARD O. OTIS, M. D., BOSTON.

Although it is not my purpose to preach you a sermon, for my training has been in the direction of practicing rather than preaching, I do desire to begin my remarks with a Biblical text, an injunction of St. Paul in one of his Epistles, where he enjoins upon those to whom he is writing to *adorn* the doctrine of the Lord Jesus Christ, and I desire to dwell upon the word "adorn" for a moment, for I am sure we can find it applicable not only to the religious life but to any honest undertaking or occupation, and I want to apply it now to the adorning of your occupation of nurses. In traveling through Germany one is struck with the dignity, martial bearing, and almost grandeur of the station masters of the small and quite insignificant places. As the train approaches or departs he stands erect on the platform in an attitude of attention, resplendent in his uniform, an altogether striking figure. One might think him an officer of distinguished rank, and yet he is only a station master, and frequently of only a little station. He is adorning to the most his humble position, and not only seems to get a great deal of satisfaction out of it himself but impresses the traveler with the importance of his office and the dignity of the German Empire, and I doubt not that he does his work better and extracts more happiness from it by the circumstance and show with which he surrounds it—magnifies his office and does it well.

This German station master illustrates what can be done in many another occupation. We can adorn and magnify it, but some occupations lend themselves more easily to the adorning than others from the dignity and high character which they have intrinsically, and such an one is the occupation which you have chosen, that of a trained nurse, a very worthy,

noble field of service, possessing ample opportunity for self-sacrifice, and the expression of so many of the finest traits of character. You have not to do with inanimate things,—dry goods, ledgers, dressmaking, or money counting,—but with human beings in distress and needing your services. You will see human nature as it really is, divested of its trappings and disguises, showing its true character,—the show man under suffering and the fear of death will throw off his mask and exhibit his true self in all its pitiful littleness; the genuine man will meet his suffering with the courage and brave endurance which have actuated him in all life's duties; not infrequently you will find a humorous element in the infinite variety of human nature. You will meet the well-groomed dowager as she appears before the world; she will confront you in the sick-room without hair, while, reposing upon her dressing table, lie her luxuriant tresses; or a family disagreement, to put it mildly, will occur in the sick-room, as I have seen happen between a mother-in-law and her esteemed son-in-law; the humorous aspect of it will so impress you that you will long to escape for a moment and have a hearty laugh. And here I would say, cultivate the sense of humor, for it will stand you in good stead in easing the strain upon your nerves,—we all know how Lincoln's story telling relieved the terrible strain he was enduring. Many a time will you silently stand by your patient or hold her hand while she crosses the threshold into the unseen world. In dealing with all this infinite variety of human nature—and often at its worst, for illness either sweetens or sours one's nature—you will need inexhaustible patience, tact, and endurance; you will have to listen to querulous complaints repeated over and over again, and remain silent while all sorts of disagreeable things are said to you, but you are not adorning your profession unless you school yourself to quietly endure all this.

You will be sorely tempted by the persistent and prying curiosity of one patient to reveal many things you have observed and learned about another, but, like the physician, you will consider any knowledge you may have obtained about a patient as an inviolable trust not to be betrayed. Do not gos-

sip about your patients or relate cases you have had or seen. If you have to converse with your patient, turn the conversation away from medical matters, and here comes in the value of any training you may have had in literature, art, or natural history. You have a repository of pleasing and agreeable subjects of conversation. While the adorning of your profession must come chiefly from within, from the spirit with which you pursue it and the high ideal I think you all have of this noble calling, yet, like the German station master's fine uniform, there are certain external additions which will greatly embellish the adorning. Always be scrupulously careful as to the neatness of your attire when in attendance upon the sick, remembering that an invalid is exceedingly sensitive to sight, sound, or odor. Step quietly as you go about your duties in the sick-room. I remember a trained nurse I had recently whose noisy step reverberated through the whole house. Cultivate the sweetest tones of your voice and even grace of motion. Be gentle in all things, deft and tender with your hands,—don't drop or spill things. I remember a gentleman in my office some time ago was extolling a physician who treated him at one of the southern health resorts, and on trying to discover what were his especial excellences, I found that what had impressed the gentleman was his manner of entrance into the sick-room and his neat attire. Little things like these often ingratiate us in the opinion of our patients.

Again, adorn your calling by your enthusiasm in it and your willingness to do more than is asked or required of you. It well pays to often be unsparing of ourselves. The patient is your patient while you are in attendance, and be eager to make the most out of this temporary possession of yours. Your success will be sweet to recall in after days. I remember another nurse of mine who was most devoted and unsparing of herself, and to whom a young patient became so attached that she wished she might always be sick if she could only have Miss A with her. I have known this same nurse while she was in charge of a hospital to which I was attached ever ready, day or night, to sit by the side of a dying patient,

a veritable angel to those poor sufferers, and everybody loved her. As Mrs. Browning has so sweetly said, "The charm of her presence was felt where she went."

Cultivate a pleasing, cheerful expression. This is no small matter in the adorning—applicable equally to the doctor and the nurse. You must bear in mind that the patient is restricted chiefly to your company, and, in consequence, scans very closely your every movement and expression. How grateful and hope inspiring it is to the sufferer to look upon a cheerful countenance. It is like a benediction. It is hard to do this often, I know, when one is overwrought, but it is worth the effort, and adds mightily to the adorning. Then there is what I might call the penumbra of the adorning—the atmosphere one diffuses about them. Some people by their very presence somehow excite a state of unrest and uneasiness—you have all experienced it—while others give us a delightful sense of repose. It rests us to have them about, and is "like the benediction that follows after prayer" even if they utter no word. Although this is partially a natural gift—and be very thankful if you possess it—yet we can gain much of it by assiduous cultivation. If you will strive to gain contentment of mind you will at the same time be weaving this web of a restful atmosphere, and when you have gained it you may be very sure that those who have had you will want you again.

In all this adorning you must not forget the care of yourself, of your health,—in fact, it is a very real and important part of the adorning. Sleep, out-of-door air, some quiet moments to one's self, proper meals, must all be duly regarded. No one can do his work well and keep his judgment keen who is not in good condition, and when, in the anxiety and distress of the sick-room, others forget this, you must insist, but in a way that will not seem harsh or disagreeable, upon proper care of yourself. Tell your patient and the friends that you cannot do them justice unless you take proper care of yourself.

Using the freedom of a layman, and perhaps this might be a happy suggestion to the clergy, I will proceed to a second

text. It is said that to be a good traveler one must possess three traits,—amiability, adaptability, and receptivity. And these, I think, are quite as necessary to the making of a good nurse as of a good traveler. Amiable, with sweetness of temper, lovable, easy to get along with, pleasant to have about, peaceable, ready to yield,—all these different phases of amiability are exactly what is vitally important for the nurse to exhibit in her ministrations upon the sick. When you find it a little difficult to be all these, just imagine you are traveling with rather a disagreeable or exacting companion, and make up your mind that you will be amiable, as the very nervous man said with regard to his first attempt at shaving: "I will be brave," he said, as he took the razor in his shaking hand. To be amiable is a fortune to one. Everybody likes you, everybody wants you, and nobody can for long be provoked with you. It is both a natural gift and an acquired condition. Acquire it, with however great effort it may be. It will be worth all you pay for it. Learn of those who have it. In my rather long experience with nurses, a truly amiable one was rather the exception than the rule, but I realize the difficulties of being both amiable and at the same time maintaining one's authority and firmness, our patients are so unreasonable at times, and even more so their friends. They have never learned to be obedient and to be considerate, and under such circumstances about the only person who could succeed in being continuously amiable would be an angel from heaven.

Adaptability is a trait you have to exhibit from the very beginning, and it is vitally essential to your success. How varied are the conditions, circumstances, dispositions, and the influence of the malady upon your various fits, and how varying the households you will enter, and, I might add, how different are the doctors with whom you will be associated!

You will often have to give up some of your personal routine of life, or at least adapt it to the conditions of the household you enter. You can no longer command yourself, but, like the soldier, are ruled by the exigencies of the case

in whose service you have enlisted. Some nurses from the moment they enter the household disturb and disarrange the established plan of life existing there. They antagonize the servants, irritate the anxious friends, and gain the general ill will of the whole establishment. They do not do this willfully but because they fail to comprehend the situation, and think they must do exactly in one place as they do in another, rather than adapt themselves to each varying set of conditions. I do not mean by this that you should not be perfectly faithful in your duties to the patient, and absolutely obedient to the orders of the physician, but there are many ways of accomplishing the same thing, and you are to seek that way which will cause the least friction and will gain the co-operation of those about you rather than their indifference or even opposition. Some nurses make unnecessary demands upon the servants. They go into the kitchen at the wrong time to do their invalid cooking, and disconcert the cook. They refuse to do certain things in one place because in another place with more servants these things have been done for them. I do not know of a better training a nurse could have in adaptability than in such district nursing at the home in Boston, when she goes about with the dispensary physician, visiting the wretched homes of the poor and serving the sick poor under all sorts of circumstances. Ingenuity is often required in adapting yourself to unusual and extraordinary conditions. You may have little to do with, and no means of obtaining what would seem at first absolutely essential requisites. Try to see how much you can make out of the meager material at hand. It is said of one of the most famous surgeons of Boston that it hardly mattered what instrument you gave him, he always seemed to be able to do the necessary operation with it. While waiting for cases, try to develop your ingenuity by the practice of doing much with little, and devising plans of performing many of the procedures of the sick-room with few and simple things.

Adaptability adds greatly to the power and ability to produce results of everybody, but it is of the highest importance to her who would be a successful nurse.

Receptivity. Whenever any of us cease to be receptive our usefulness is beginning to end. In no occupation can we long maintain position or standing without constantly achieving, and we can only achieve by being receptive. I hardly think that any physician who had learned nothing in the last ten years, for example, if that were possible, would be a proper and safe person to administer to the sick. There is an altitude of receptivity, and there is an altitude back to it. With the former one has a deep realization of how little he knows of that to which he puts his hand. He has an equally deep desire to know more, and is willing and eager to embrace every opportunity to learn. Moreover, he is keen to recognize the opportunity. On the other case, one thinks he knows it all, which is fatal to growth in the knowledge of his especial calling. You will learn the most from experience, always the best teacher, but after you have had the experience you must reflect upon, digest it, think it well over, and so make it available for future use.

Abraham Lincoln was a man who had little education, as we conventionally call education, and limited experience in his narrow life, but he so thoroughly imbibed the experience he did have, by profound reflection, that no man was better educated than he in the finest use of the word. A heterogeneous mass of undigested facts is, I believe, a source of weakness and hindrance. It is like a surgeon with an office full of instruments whose use he has not fully comprehended. He is a dangerous man where an operation is to be performed.

Think out, then, your experiences and be quick to learn. Every case will teach you something new and will, moreover, illumine previous experience. The sources from which you will learn will not only be numerous but oftentimes unexpected and unusual. The cook in the kitchen will teach you some new thing in invalid cooking, the housewife some useful point in preparing the sick-bed. Perchance the old-fashioned, untrained nurse—and many excellent ones still exist—will show you many a neat trick from her long experience. The patient will teach you, the doctor always, or

ought always to, and so at one time or another almost every one with whom you are brought in contact will be your teacher. But there are other things besides the detail of your nursing, and quite as important, which a receptive mind will learn,—patience, cheerfulness under suffering and adversity, faith in God, resignation, unselfishness, and all these beautiful and noble traits of character which the chastening of sickness so frequently brings to bloom.

As an aid to receptivity I would add self-reliance, good for the traveler and good for the nurse. Some are self-reliant by nature, and some achieve self-reliance, but get self-reliance somehow. In your calling you must acquire it if you would attain to the highest success. Various factors conduce to the development of this trait. Thorough and exact knowledge of what you profess to know, perfect control of one's self, which largely depends upon good physical condition, a fertility of resources,—a result of your receptivity,—deliberation in action, and, perhaps more than anything else, increasing experience and long service. What we think we can never do before we have attempted it becomes an easy matter after we have become familiar with it by doing it; so self-reliance grows as practice increases. There is a venturing perfectly warrantable in undertaking the responsibilities to which we have been trained, but it does seem a venture at first, but if persisted in it yields the fruit of self-reliance. Having to deal so constantly with distress, suffering, and sorrow as you do, and as we the physicians do, you must guard against the blunting of your sympathy. With the true nurse, as with the true physician, I believe this familiarity with suffering only deepens and broadens one's sympathy; only we grow, perhaps, more reserved than others in our expression of it, and sometimes, also, we make very blundering work of it when we do attempt to express our sympathy. As a recent writer has well said, "Every truly royal nature must carry its burden of sympathy for others. The expression of a divine pity redeems life from a pagan barbarity and relates it to the skies." If you ever feel that you are in any degree losing

your tenderness of heart, your sympathy and pity, take down your Testament and read the 13th chapter of I Corinthians.

Let me read you an exquisite incident of the present war in South Africa, which beautifully illustrates human pity and sympathy. In the campaign before Ladysmith a truce was declared, and the British were invited by the Boers to bury the subjects of the queen who had fallen in the fight just before. The Boers stood silently by, sympathetically. Then when the British major had finished reading the burial service, a Boer, of his own accord, advanced and said a short prayer in memory of the men who shortly before had been firing at him and his comrades. Then some manly Boer voice started the tune of a familiar hymn, which was sung in Dutch, while the stern British soldiers standing by were deeply moved. As an English medical officer put it: "Our fellows were very much cut up and could hardly speak for some time." Many would call this the one touch of nature which makes all the world akin. We should rather like to think of it as a touch of grace which had, temporarily at least, softened the hearts of foes into a tender pity for the victims of their cruel warring, the writer who quotes this goes on to say. You may think that in this portrayal of the traits which the nurse should possess I have set before you a life of strenuous exertion and lofty ideals which it will be very difficult for you to attain to, but that is the charm and fascination of your vocation, that it does demand high qualities of character and allows scope for their cultivation and expression.

Your vocation is worthy of all the adorning you can bring to it, and in striving to develop to the utmost your profession, remember that you are also at the same time growing in beauty of person and character. To you is permitted the greatest of earthly privileges. It ennobles and purifies life and brings one near to Him whose life and death was one perfect service to mankind.

"Abou Ben Adheim (may his tribe increase!)
Awoke one night from a deep dream of peace,
And saw, within the moonlight of his room,
Making it all white and like a lily in bloom,

An angel writing in a book of gold.
Exceeding peace had made Ben Adheim bold,
And to the Presence in his room he said,
‘What writest thou?’ The vision raised its head,
And, with a look made of all sweet accord,
Replied, ‘The names of those who love the Lord.’
‘And is mine one?’ cried Abou. ‘Nay, not so,’
Replied the angel. Abou spake more low,
But cheerly still, and said, ‘I pray thee, then,
Write me as one who loves his fellow-men.’
The vision wrote and vanished. The next night
It came again with a great wakening light,
And a scroll with names whom love of God had blest,
And, lo! Ben Adheim’s name led all the rest.”

SERVICE MANUAL.

A strict observance of the following rules is the established condition of all contracts for service with the New Hampshire Asylum for the Insane; and any applicant for a position not willing to observe them strictly, will do better to seek employment elsewhere.

1. Any employee wishing to leave the premises to go into the city or elsewhere must apply at the office, that such absence may be understood; and all must be at the asylum at 10 o'clock in the evening, unless away later by permission.

2. It is expected that all persons employed will consider that, on the condition of their respective contracts, they have engaged their time and best services to the asylum; that it is inconsistent with their duties to hold any political office; that they are under obligations to do every duty assigned them, promptly and faithfully; that they will feel personally interested in the good care, safety, and welfare of the patients, and that they will give their personal influence in support of good order and the established regulations of the institution. To this end it is most desirable that all should cultivate quiet, kind, and dignified manners and correct habits in all things, considering always that this is no less for the interest of the employee than for that of the employer.

3. Those proposing to discontinue their services will give at least thirty days' notice, that time may be given to supply their places.

4. That the house may be quiet, it is expected that all will be at their own rooms after 10 o'clock in the evening, at which time the house is closed for the night. After this time the quiet of the house must not be disturbed by passing and conversation. All must bear in mind that the repose of the patients is a thing of prime importance. All having duties

must rise at the morning bell, and proceed to the performance of the same.

5. No light must be carried about the building except in a lantern, and the greatest care must be taken in the use of matches, that none be left exposed. A little carelessness in this thing might be followed with the most serious consequences. No smoking will be allowed in the asylum buildings, except in the smoking-room provided for that purpose.

6. No one will invite visitors to stop in the house without permission to do so; but on application all reasonable privileges will be granted.

7. No one shall employ a patient to do private work for himself or herself without the consent of the superintendent, assistant superintendent, or other officer authorized to give such permission; and no one is allowed to trade or make bargains with patients.

8. Provision is made to afford each person employed a vacation of two weeks in the year, during which time the duties of the position will be done by a substitute; but the superintendent does not guarantee to retain the place of any one for a longer term of absence. On leaving for a vacation, or permanently, every one will deliver his or her keys at the office.

9. Whenever patients are encouraged to engage in any kind of labor, it is with a view to their own benefit; and hence no one will be taken from the halls for that purpose unless some order to that effect has been given in the case.

10. The person taking patients to labor will be held strictly responsible for their safety, kind care, and safe return to their respective halls.

11. All farmers or others to whom patients are intrusted for labor will remember that they are not to be treated as servants; they will avoid all appearance of commanding, and will exercise the greatest care that no willing one shall be made a drudge or work too long. It will be treated as a grave offense if any employee shall take advantage of the willingness or mental weakness of any patient, to impose on such one the

harder or more unpleasant parts of the work on which they are employed. The head farmer is required to see that this rule is obeyed in spirit and letter, and report promptly to the superintendent any violation of the same. As occupation is a thing of the greatest value to most patients, every employee is required to do all in his or her power to interest them in it in some form, and make it attractive.

As far as practicable, provision will be made to give each employee opportunity to be absent from duty for church services on Sunday a due proportion of the time; and any whose ordinary labor is wholly suspended on Sunday are liable to be called on to relieve others whose duties continue a portion of the time, and such must hold themselves in readiness to be so called on. It is expected that all employees, whose duties do not interfere, will be present at the regular Sunday service in the chapel.

STEWARD.

The steward will have the general oversight of the building, farm, stock, and premises. It will be his duty to attend to ordinary business transactions, and see that asylum property in every department is saved, kept in its proper place, protected from harm or waste, and properly used. He will see that everything about the premises is kept in good order, that the grounds near the house are kept clean, free from waste and rubbish, and will extend the same supervision to the basement and attics, and see that the person to whom it is assigned to care for these spaces discharges his duty faithfully. He will see that all animals are properly taken care of, and that carriages, tools, and implements are kept in repair, and stored in their places when not in use; and, generally, he will be responsible to the superintendent for the good condition of property and premises, and must properly notify him of anything adverse to the welfare of the asylum which comes to his knowledge. He will attend to procuring ordinary supplies for subsistence, except so far as otherwise provided for by the superintendent, and see that such goods are delivered and stored in their proper places. He will see that the house

is closed and the doors locked at the appointed hour at night, and hold himself ready to discharge any special duty required by the superintendent.

CLERK.

It will be the duty of the clerk to keep the books and accounts in a neat and accurate manner, take systematic care of all papers connected therewith, and perform any special clerical work required by the superintendent.

HOUSEKEEPER.

SECTION 1. The housekeeper will have the general management of the internal domestic affairs. The labor in the kitchen, laundry, and sewing department will be done under her direction; and those employed in these departments will hold themselves subject to her orders in the discharge of their duties. She will attend to the good condition of all apartments connected with the general housekeeping, will see that they are properly furnished, and kept in good order. She will see that all the work in her department is done in accordance with the general instructions of the superintendent.

SECT. 2. She will have the care of all goods and material used in her department, and will see that they are saved and economically used; all bedding and articles manufactured for housekeeping purposes will be under her care, and she must see that they are not wasted or given out needlessly. She will have the care of the making of any clothing furnished to female patients, and will be required to keep an accurate account of the cost of such clothing or other articles furnished to any one. The cost of any articles furnished for patients must be returned by her to the supervisor, to be entered in the accounts of such patients.

SECT. 3. It is the duty of the housekeeper to report to the superintendent any instance of misconduct, failure in the proper discharge of duty, or violation of the established regulations occurring in her department, and not promptly rectified by the delinquent. It will also be her duty to report to the person who keeps the time-book the times of commencing and leaving duty of all employed in her department.

SUPERVISORS.

SECTION 1. The supervisors in their respective departments will have the general oversight of the halls and the patients; and the prudence and tact with which their duties are performed will be an important factor in the condition of the house. It is expected that they will see that the rules of the house relating to the patients are observed in every particular; that all patients are treated with uniform respect and kindness; and it is their imperative duty to report immediately to the superintendent or assistant superintendent any instance of neglect, incivility, or ill usage of a patient, or any violation of the established rules.

SECT. 2. They will see that all medicines prescribed are faithfully and in a proper manner administered, and that all directions of the medical officers are strictly obeyed.

SECT. 3. They will be expected to pass as much time in the halls as the proper discharge of other duties will allow, will instruct new attendants in their duties, and as much as possible assist in efforts to interest and employ the patients.

SECT. 4. The supervisors must see that the dining-rooms are furnished with the necessary utensils, that the attendants take proper care of the dining-rooms, that the cupboards are sweet and in order, the tables neatly set, and the meals properly served.

SECT. 5. They will have the general charge of the clothing of the patients, and an oversight of the beds and bedding of the halls. The attendants must report to them any deficiency in either which may exist, and it is their duty to see that such wants are supplied.

SECT. 6. On the admission of patients, their clothing will be taken in charge by the supervisors, entered in the book provided for the purpose, and each article plainly marked. All articles afterwards furnished or received will be cared for in the same manner.

The clothing of patients leaving must be compared with the record, neatly packed, and delivered at the office by the appropriate supervisor.

Any knives, razors, or other dangerous articles in possession of a patient on admission must be brought to the office for safekeeping and record.

SECT. 7. They will pay special attention to the sick, report promptly at the office any change of symptoms, see that they have proper attention, and that any special diet prescribed is delicately prepared and served.

SECT. 8. After passing through the halls and learning the condition of the patients early in the morning, the supervisors will very briefly report to the physicians any sickness or other fact demanding attention before these morning visits.

SECT. 9. Before the Sunday chapel service, and other occasions of public gathering, the supervisors will see that the patients are properly dressed for the occasion, and accompanied to the chapel by their attendants.

SECT. 10. The supervisors will report to the clerk the times of commencing and leaving off work on the part of the attendants employed in their respective departments.

SECT. 11. In general, the supervisors are expected to hold themselves in readiness to carry into practical effect the instructions of the superintendent, and to use all their personal influence in support of the spirit and design of these regulations.

ATTENDANTS.

A strict observance of the following rules is the established condition of all contracts for service in the wards of the New Hampshire Asylum for the Insane. It is expected that any applicant for the position of attendant who is unwilling to observe them strictly will do better to seek employment elsewhere. Having accepted such a position, any violation of them will be considered a breach of contract and treated according to the nature of the offense.

1. Any attendant wishing to absent himself from the premises after 10 o'clock in the evening will leave word to that effect at the office, that such absence may be understood.

2. That the house may be quiet, it is expected that all will be at their own rooms after 10 o'clock in the evening, at

which hour the house is closed for the night. After this time the quiet of the house must not be disturbed by conversation or passing to and fro. It is expected that all lights will be extinguished at that hour; and it is the duty of the night-watch to extinguish any light burning unnecessarily during the night as well as to report the same at the office. It is expected that any employee on leaving his room during the evening shall extinguish the light.

3. No light shall be carried about the building except in a lantern. All employees will use, in the service of the institution, the safety matches provided by the management. Only one box at a time will be furnished. The old box must be returned before a new one will be issued. *Attendants must never give matches to patients.*

4. Smoking in any room or ward is strictly prohibited.

5. The use of liquor in any form is positively forbidden.

6. Any attendant wishing to leave the service honorably will be expected to give reasonable notice of his intention to leave, preferably from two to four weeks.

7. Attendants are not allowed to invite their friends, relatives, or strangers into the wards without permission from one of the physicians. No one will invite visitors to stop in the house without permission to do so; but on application, all reasonable privileges will be granted.

8. Attendants will never compel patients to work, but all patients who desire to assist may be allowed to take part in the housework, but under no circumstances must an attendant delegate one patient to take personal care of another patient. Personal care of patients, including feeding, bathing, dressing, and undressing, and the administration of medicines, must never be intrusted to other patients. Attendants will never allow other employees to take patients out of their ward, either for work or any other purpose, unless special permission has been allowed by one of the physicians.

9. In wards P 1 and P 2 both attendants must be present at mealtime and retiring time, unless one has special permission from the superintendent to be absent. In ward P 3 both

attendants must be present at mealtime, but they may alternate evenings off duty from immediately after the attendants' supper until retiring time. In wards with two attendants, both shall not leave their ward at the same time, but they may alternate with each other in the following way: One may have one hour off duty from 11 A. M. until 12 M.; the other may have one hour from 4 till 5 P. M. They may alternate with each other on Sunday from the time the morning dining-room work is completed until 3 P. M.

In wards with one attendant, the attendant will alternate hours off duty with the attendant in the adjoining ward from 11 A. M. until 12 M., and from 4 to 5 P. M., and on Sunday they may alternate with each other from the time the morning dining-room work is completed until 3 P. M. In wards with one attendant, the attendant may alternate evenings off duty with the attendant in the adjoining ward from immediately after the attendants' supper until retiring time. All attendants must be present at mealtime on Sundays as well as weekdays.

10. *Treatment of Patients.* In all their intercourse with the patients, the attendants are required to treat them with respect and civility, to be kind and gentle in manner, and avoid roughness of every kind. In the care of their patients, sympathy, kindness, and tact should take the place of force and display of authority. But if interference with violent and excited patients becomes necessary, sufficient aid must always be procured from the attendants of neighboring wards to avoid personal injury to either patients or attendants. Such aid should be summoned before attempting to deal with the case in hand. Personal conflicts are always to be avoided. Choking, kicking, or striking of patients by attendants is never allowed. Any violation of this rule will be considered a grave offense.

11. No patient shall be restrained or secluded except by order of the physician, save in an emergency; in which case it shall be at once reported at the office.

12. The peculiarities of patients must never be made a subject of sport or ridicule.

13. Attendants will abstain from the use of profane or vulgar language.

14. Attendants will bathe untidy patients as often as is necessary. And once every week each attendant will see that every patient in his ward has a warm bath, and change of underwear, hose, and linen. The attendant must be personally present at the bathing of the patients; especially important is this in the case of the feeble, epileptic, and suicidal. The attendant will see that the water of the bath has the proper temperature. Bathroom doors are always to be kept locked.

15. The attendants will always take care that the clothing worn by patients is adapted to the season and occasion. In case of sudden change from heat to cold, they must make at once the needed change of clothing.

16. It is particularly expected of attendants to see that every patient is cleanly in person; that the hair and nails are attended to; that any rent in clothing is promptly mended; that the garments worn are kept buttoned; and that any stains from carelessness in eating are promptly removed.

17. In suitable weather, the attendants are required to take such patients in their ward as are able, into the open air twice daily, either to ride or walk. Newly arrived patients, however, are not to be taken out of their ward until ordered by one of the physicians.

18. In case of sickness or an emergency at night, the attendant may be called by the night watch to render assistance. Such assistance must be cheerfully given.

19. At certain specified hours attendants will give to such patients as are designated by the physicians, medicines that may have been prescribed. This duty must always be performed by the attendant. After giving the medicine, they should wash and return the glasses to the proper place.

20. The keys of the ward are to be kept strictly in the hands of the attendants; they must never be left carelessly about, nor intrusted to patients.

21. At mealtime the attendants must serve the food to

the patients, see that each is properly provided for, and personally prepare and feed those who are sick or unable to feed themselves. The patients must not be hurried through their meals. Knives and forks must be accounted for and never carried from the table by patients.

22. *Care of the Ward.* In the morning the attendants will rise at 6 o'clock. They will unlock the doors of patients' rooms that have been locked; see that the beds are aired, the night vessels removed, and as soon as other duties will allow they will remove all soiled clothing, and see that the beds are made according to the prescribed method. Every room must be swept out every morning, as well as the ward and dining-room. Especial attention must be given to the water-closets, urinals, and bathroom. Absolute cleanliness must prevail. The attendants will sweep and wash the stairways leading to their respective wards every morning.

23. The care of the storeroom is extremely important. It is the duty of the attendant to keep each patient's clothing in its proper drawer, to transfer the same with the patient whenever he is moved to another ward by order of the physician or supervisor, and to see that every article of clothing is accounted for and corresponds with what has been furnished by the supervisor.

24. Once every week the attendant will make out a requisition for articles needed for ward use, properly accounting for those that are worn out or destroyed, and give the same to the supervisor.

25. The attendants must shave those patients designated by the physicians or supervisor. In shaving, great care must be taken to have the razor in good order, and to shave easily and neatly. No other patient should be present, and the razor must be kept under lock and key.

26. Patients who attend chapel or entertainments, who go out to walk or ride, or receive visits from friends or relatives, must be properly dressed, their hair brushed, and their general appearance made as presentable as their mental condition will allow.

27. The hours of meals, of closing the wards at night, and of duty, will be regulated by Eastern standard time. Clocks, regulated hourly by the clock in the office, will be located in the wards at accessible points, and it is expected that all attendants will use this time and no other, regulating their watches and clocks by these standard time clocks.

28. *Hours of Closing Wards.* Attendants in charge of wards 4, 7, P 1, and P 2 will close their wards at 7.30 o'clock P. M.

Attendants in charge of wards 5 and 8 will close their wards at 8 o'clock P. M.

Attendants in charge of wards 9 and P 3 will close their wards at 8.30 o'clock P. M.

Attendants in charge of ward 6 will close that ward at 9 o'clock P. M.

At the above-mentioned hours all lights in the wards indicated will be extinguished.

29. During hours of duty, attendants will remain on their own ward, not in their own room, but on the ward. Visiting from hall to hall during hours of duty, without special business, or going away to other parts of the premises out of one's field of service, is wholly improper, and not allowed.

30. The attendant will hold himself in readiness to accompany the physicians or superintendent when he makes his ward visit.

31. In taking patients out of doors, the attendants must see that no one strays from the party, and so regulate the speed of walking, or the character of other exercise, as to suit, as well as may be, the average of persons present. Preference should be given to walks within the asylum grounds, but when walks are taken into the city, it is not permitted to visit stores, hotels, railroad stations, or other public places, except by permission previously obtained.

32. All damages done to buildings or property by patients must be reported to the supervisor by the attendants.

33. *Duties of Attendants in Case of Fire.* Attendants will observe the following rules in case of fire:

I. Communicate with the office at once, either by speaking-tube or messenger, giving information as to location and extent of fire.

II. Unlock at once every room door, and get every patient who may be restrained or secluded out on the ward, no matter what their mental condition may be.

III. If the fire is in any ward, the attendant on duty will immediately uncoil the hose at the nearest house hydrant and turn on water. For this reason it is expected that every attendant will familiarize himself with the location of the various hydrants. In wards 4, 5, and 6, the hydrants are located on the stairway leading from office to those wards. In wards 7, 8, and 9, the hydrants are located in the west end of the ward in the closet marked "Hose Closet." In the Peaslee building the hydrants are located on the stairway leading from the wards of that building to the basement. On each of these hydrants there is hose attached sufficient to extend to the next line of hose. The water can be turned on by opening valve, which turns toward the right. Be sure and uncoil hose and get out all knots or twists before turning on water.

IV. If the fire is in any other part of the building, the attendants will remain on their own wards, first getting all of their patients out of the rooms. They will wait for further orders.

V. If ordered, or if necessary, they will move the patients out of the ward through the exit that is most remote from the fire. In moving patients at such a time, it is imperative that there should be as little confusion and excitement as possible. The attendant should have his patients file out in line, and be particularly careful to avoid confusion on the stairways.

VI. After patients are removed from the ward, the attendant must remain with them, keeping them together, and await orders from supervisor or physicians.

COOK.

Under the direction of the matron, the cook will have the supervision of the work in the kitchen, the care of utensils, and of supplies of provisions within the kitchen premises.

The cook must see that the kitchen and all utensils are kept clean and in perfect order, that good order is preserved in the kitchen, and that each employee performs all duties assigned in a proper manner.

The cook shall see that all food is prepared as directed, is made palatable and inviting, and sent to the halls hot. Special care must be taken in preparing messes for the sick, that they are nicely cooked, and sent to the patients in acceptable form.

The cook shall report to the matron any instance of failure in duty or violation of the rules occurring in the department.

Persons employed elsewhere in the institution will not be allowed to loiter about the kitchen premises or bakery.

If any meat, butter, or other articles of food, of poor quality, are furnished for use, the head cook must promptly report it to the steward or superintendent.

BAKER.

The baker will see that the baking-room, oven, and all utensils belonging to his department are kept scrupulously clean at all times, that the house is kept supplied with the various kinds of bread prescribed, and he must keep his stock of bread sufficiently in advance of the demand that it may not be eaten absolutely new. On the mornings designated, he will make warm rolls or biscuit in season for breakfast.

It is his duty to report at once to the superintendent or steward any defect he may discover in the quality of the flour or other material for food furnished to his department.

PORTER.

The porter will have the whole charge of the food car, and will keep it always clean and in good order; will, at the appointed times, take the prepared meals from the kitchen to the several dumb-waiters, and deliver them to the attendants, who shall be present at the call of the slide-bell, to assist the porter in running up the dumb-waiter, if necessary, and remove the meals carefully to the dining-rooms. In this, care must be taken by all that the food and utensils are han-

dled gently, and that the meals reach the tables in good order. In like manner must the dishes and slops be received from the attendants by the porter, and by him be properly disposed of.

The porter will be responsible for keeping the basement and attics swept, and everything in its place. It is also his duty to fill the underbeds for the female attendants, great care being taken that the sacks be not soiled in the process. He will also remove the discarded beds each morning to the place designated. At the appointed times the porter will attend to instructions of the superintendent. He will see that any object thrown from the windows during the night is removed promptly in the morning, and will hold himself ready to perform any item of duty required by the superintendent.

ENGINEER.

The engineer will be responsible for the good care of the boilers, engine, steam, and water pumps, and all parts of the machinery, which must be kept in repair and in good running order. He shall promptly attend to the repairs needed in steam or water apparatus or other repairs or alterations assigned to him. It will be his duty to see that the boilers are properly fired, and the fuel used in the most economical and efficient manner. He will see that the radiators, air-chambers, and flues are properly adjusted for heat and ventilation, and that the amount of steam generated is wisely adapted to the state of the weather. It will be his duty in summer to attend to all needed alterations and repairs in steam-heating apparatus, preparatory to the demands of winter.

He must at all times be so thoroughly familiar with the location and condition of all hydrants, hose, or water cocks provided for the extinguishing of fire, that he may put them in operation instantly, if needed. He will also be expected to hold himself in readiness to attend to any special duty required by the superintendent.

FARMER.

The head farmer will have the immediate supervision of the farm laborers, the laying out of the work, and the direc-

tion of the care and use of the stock and farming utensils; and all farm laborers will look to him for specific directions as to their duties.

It is his duty to see that all farm fences are kept in repair, and that everything on the farm and about the farm buildings is kept in perfect order, that the stock is well cared for, that every farmer performs his duty well, and that all material is properly and economically used. He will report to the clerk the time of service of each person in his department, and to the superintendent any fault or failure in duty on the part of any under his charge.

MEDICAL REPORT.

MEN'S DEPARTMENT.

To the Superintendent:

A review of the work done in this department in the last biennial period would include a summary of the work in the training school for nurses, of that in the clinical and pathological laboratories, and of that included in the medical and surgical service of the wards.

THE INSTRUCTION TO NURSES.

This included lectures on drugs and medicines, the anatomy, physiology, and hygiene of the skin, muscular system, and digestive organs, with others on diet and infant feeding. Practical instruction in bandaging, in what to do in emergency cases, and in other points of practical nursing was given throughout the winter terms by repeated demonstrations and practice hours. Each nurse spent three or four weeks in the drug room dispensing prescriptions under our immediate supervision and gaining a practical knowledge in handling medicines. During the past year about 75,000 prescriptions were thus put up by the pupil nurses, making about 6,250 prescriptions by each nurse. Sections of the class were given bedside talks concerning specially instructive cases, were invited to or assisted at the different surgical operations, and attended post-mortem examinations.

Besides this instruction to the training school classes, a series of talks and demonstrations on the care of sick and emergency cases was given to the male attendants in the winter months.

LABORATORY WORK.

In the short time each day that could be devoted to this department nothing elaborate could be attempted. The urine of every case was given a full chemical and microscopical examination on admission and at intervals subsequently as deemed necessary. A series of slides of normal and abnormal urinary sediments was permanently mounted for the pathological cabinet.

Chemical analysis of various calculi from the brain, gall-bladder, and kidneys was done as occasion offered. Numerous examinations of sputum for the germs of tuberculosis, analysis of pleural and peritoneal effusions, of the spinal fluid obtained by lumbar puncture, and the chemical and microscopical examination of the stomach contents should also be mentioned in this list. Complete examination of the blood was carried out in cases demanding it.

Autopsies were performed only when permission was granted by the friends of the deceased. It seems a pity that so large a portion of the public, through ignorance, a misconception of the motives of the physician, or superstition, should so often hinder the disclosure of medical facts which bear so directly upon the treatment of future patients. Pathological specimens from the surgical operations and autopsies were suitably preserved. Pressure of other duties and lack of facilities did not always permit the complete working up of this material. Photographs of interesting gross lesions were made when possible. A large neglected list of photographic plates, accumulated during the last fifteen or twenty years, was thoroughly overhauled and the good ones appropriately labeled and catalogued. In all this work it can be seen that no special "hobby" or line of research was followed to the neglect of the constant clinical demands upon the laboratories from the wards. The aim throughout has been to afford every patient needing it the advantages of a modern clinical laboratory for their physical ailments, such as is expected in every general hospital, but which has been so tardily granted by the public to their institutions for the insane. The

records of the various examinations have been carefully preserved, and when sufficiently accumulated may serve as the basis for interesting generalizations.

WARD SERVICE.

Here we have striven to maintain the standard of our predecessors. While the past year may have afforded an increased number of grave surgical and medical cases, these have not differed in kind from those usually seen in wards for the reception of the acute insane. We have tried to modify our methods with the progress of the times. This has led to increased stress being laid upon the mental examination of the patients at frequent intervals to determine, if possible, by comparison of many cases, what are the essential and underlying disease processes and the signs by which we can more surely predict the probable outcome. Besides the time-honored custom of photographing typical cases and preserving samples of their handwriting, an endeavor was made more clearly to preserve their peculiarities of speech. Reproductions by the phonograph were difficult to obtain and unsatisfactory for this purpose in the present stage of the machine. A verbatim shorthand report, however, of the patient's answers to leading questions has proved quite feasible and has added greatly to the value of the records.

The newer therapeutic measures have been tried as occasion demanded. *Cold packs* have sustained their reputation as general tonics and stimulants to the circulation. They have seemed of value, too, in some cases in helping to bring about a mental awakening in conditions of profound lethargy and stupor, but have not proven so invariably successful in this direction as we anticipated from the first reports of this measure as applied to the insane. The distinctly sedative effect of prolonged *hot baths* in acute maniacal conditions has been repeatedly verified.

In a case of attempted suicide with severe injury to the cord followed by unconsciousness, convulsions, and other symptoms of brain compression, as a last resort, *lumbar punc-*

ture was performed and several ounces of cerebro-spinal fluid withdrawn. This was followed by sudden amelioration of all the symptoms, which continued until the next day. The fluid was sterile and showed only a few leucocytes.

The cases in which an *analysis of the stomach contents* was made after test meals demonstrated such important therapeutic indications as to suggest a very wide field of usefulness for this test among the debilitated insane. Our cases, however, are as yet too few to warrant the making of generalizations. Suffice it to say that persistent refusal of food is oft-times associated with such marked change in the digestive secretions as would cause serious trouble even in the most robust. That the ultimate cause is the disordered nervous system is conceded; nevertheless, that considerable benefit may result from the artificial correction of the existing conditions seems to have been demonstrated.

Thyroid extract was used in a series of katatonia cases, but with indifferent success. Some cases seem to bear very large doses without noticeable effect, while in others a few grains will bring about marked reaction. Any curative influence in these cases, however, we consider very problematical.

Considerable study of the effects of the newer hypnotics has been made of late. Small doses of *apomorphine* will certainly cause lassitude, and may induce sleep in mild cases of insomnia, but in the aggravated cases with excitement or mental anguish with which we have most to deal it has invariably failed as a hypnotic. Vomiting is difficult to guard against, as individual susceptibility varies greatly. *Chloretone* will produce sleep without depressing the heart, but we have had to use large divided doses of thirty to fifty grains. It seems to act slowly, is very insoluble and disagreeable to take, and altogether not as reliable in our work as some others. *Hedonal* we have used in a few cases, but with very indifferent results.

Dormiol, on the other hand, has been very efficient both in states of exhilaration and depression. It is very soluble, easy to take, prompt in its action, and in a long series of cases we have not noticed any injurious effect on the circulation or

digestion, even though repeatedly given to the same patient for days. We have come to rely on it as one of the best drugs of its class. (See table preceding this report.)

Hyoscine hydrobromate, *Hyoscyamine*, and *Duboisine sulphate* are pretty well known as sedatives in motor excitement.

Hyoscyamine, however, we consider dangerous, having had marked depression of the circulation in a few instances in which it was used. The first is the best of the three and about twice as powerful as the last.

Others of the newer hypnotics are being systematically tested at present, and we will withhold any opinions of their relative value for further developments.

Respectfully submitted.

A. E. BROWNRIGG,

Assistant Physician Male Department.

MEDICAL REPORT.

WOMEN'S DEPARTMENT.

To the Superintendent:

I beg to present the following report of medical work upon the female wards of the New Hampshire Asylum:

During the biennial period ending September 30, 1900, 159 female patients were admitted. Ninety-seven of this number were acute cases, about one half of which were bed patients during the first few weeks of treatment. The daily average of patients under treatment was 221.29. The daily average of patients in bed was 14.55. Many senile cases have been under treatment, and the death rate has been higher than usual, 50 deaths having occurred within the last two years, 29 being of persons over sixty years of age. Forty-eight persons were discharged recovered and 28 improved.

The general health of the wards has been good. No infectious disease has appeared and but three undoubted cases of tuberculosis have been seen. One of these was admitted from a county farm in the last stages of pulmonary tuberculosis and was isolated until death. A patient with terminal dementia of many years standing died of the same disease. The third case has had the clinical history and physical signs of the disease, but the repeated examination of the sputum has failed to show the presence of tubercle bacilli, and the symptoms have subsided and the patient is gaining in weight.

The envelope system of case records introduced in 1897 has been remodeled and is now proving very satisfactory. In addition to the usual records, a stenographic report of the conversation of patients has been made whenever such a report could be of value. In many cases it affords a far more graphic picture than could be otherwise put upon record. In all cases of bodily illness clinical notes are kept by the head nurse in addition to her daily ward report.

The use of the nasal tube has been necessary in twenty-three cases. In several cases requiring feeding in this way, the stomach has been washed, either with plain water or a boric acid solution, large quantities of thick, stringy mucus being obtained. Examination of the stomach contents in a few cases has showed evidence of faulty secretion and delayed motility, and the lavage has been followed by beneficial results.

Examinations of the urine, sputum, and blood have been made when indicated. There was one case of pernicious anæmia under treatment and four or five cases showing a very severe secondary anæmia. Whenever symptoms pointing to disease of the female generative organs were present examinations were conducted by Dr. Julia Wallace Russell and the necessary treatment given. No operative procedures have been called for.

We are not provided with apparatus for elaborate hydrotherapeutic measures, but by the simple application of water by means of packs and baths have obtained quite satisfactory results. The hot bath and the hot pack are frequently used for a sedative effect. When insomnia is persistent, and especially when associated with motor restlessness, a full hot bath at a temperature of 105° to 110° F. for fifteen or twenty minutes will generally be followed by several hours of sleep. The cold wet pack was used for its tonic effect in fifteen acute cases,—five of mania, seven of stuporous melancholia, two of simple melancholia, and one of organic brain disease. The temperature of the water was graduated according to the condition of the patient, varying from 80° to 54° F., but generally beginning at 70° and being reduced 2° daily to 60° or below. The patient was in the pack from one to two hours, and upon removal of the sheets brisk friction of the skin was made with a coarse towel for one half hour. The patient quickly became accustomed to the pack and generally seemed to enjoy it, not unfrequently sleeping during the latter part of the time. With three or four exceptions it was used in cases showing weak heart action, cold and cyanotic

extremities, and a tendency to stuporous states. There was a general toning up of the circulation in all cases, stronger and less frequent pulse, and some mental brightening. Eight of these patients manifested the katatonic symptom—complex. Three of the eight have been discharged recovered; five are still under treatment. Three patients who had not menstruated for several months began menstruating soon after beginning the treatment. In the cases of acute mania the object sought was the abatement of the excitement, and the patient was in the pack two hours twice daily. It was continued for one month, a decided calmative effect being obtained at first, but this was not lasting.

The best results were seen from the use of the packs for ten days or two weeks at intervals of three or four weeks. If they are used daily for too long a time the desired reaction does not occur. Used in this way they are undoubtedly of much value as a vascular tonic, and are worthy of more extended trial.

The use of thyroid extract has been continued in the face of doubtful results in former years. Although no remedial effect can be claimed for it yet we occasionally see improvement coincident with its use, and as it has no permanent deleterious effects we have felt constrained to administer it to such acute cases as seemed to have reached a stationary period or to be upon the verge of dementia. The dose given is fifteen grains daily at first, increased to fifty or seventy-five grains at the end of a week. The treatment is continued for two weeks, and then the drug is omitted for three or four weeks. It produces a rise of temperature of from one half to two degrees, with rapid heart action, loss of flesh, and in a few cases slight digestive disturbance. In two cases very marked weakening of the heart was produced, in one case by a dose of forty-five grains and in the other by eighty grains daily, the largest dose given.

Hypnotics have been used regularly in but few cases. Frequent single doses of hypnotics have been called for. In cases whose insomnia was accompanied by motor activity, in

mania and agitated melancholia, the hydrobromate of hyoscine has generally given the most satisfactory results, and has been given both subcutaneously and by mouth in doses of from one one hundredth to one fiftieth grain. Paraldehyde has also been used in these cases, and with good results when not obnoxious to the patient. Sulfonal and trional have been serviceable only in a few cases of simple insomnia. Chloral hydrate and potassium bromide in combination have been used more than other hypnotics. Very recently chloretone and dormiol have been tried, but as yet not in a sufficient number of cases to warrant any conclusions as to their value compared with the older drugs.

Ten autopsies have been performed. In two cases of sudden death rupture of the wall of the left ventricle was found. In one case this was due to fatty degeneration following calcareous degeneration and occlusion of the left coronary artery. In the other case, the coronary arteries were atheromatous and the wall of the ventricle in the neighborhood of the rupture was infiltrated with leucocytes and was the seat of numerous minute abscesses. The patient, a chronic maniac, who appeared to be in good physical health, suddenly dropped dead while making a violent demonstration toward another patient. Another case of interest was one of sarcoma of the small spindle cell variety involving the right frontal lobe of the brain. The tumor was firmly adherent to the dura mater and replaced the anterior two thirds of the frontal lobe, compressed the remainder, and indented and compressed the left frontal lobe.

Several specimens have been sent to Dr. W. L. Worcester, pathologist at Danvers Lunatic Hospital, Massachusetts, for microscopical examination. No attempt has been made at pathological investigation of material obtained from autopsies.

Respectfully submitted.

LIBRARIAN.

ARTHUR H. CHASE.

Appointed January 1, 1895.

REPORT OF THE TRUSTEES.

OFFICE OF THE TRUSTEES OF THE STATE LIBRARY,
CONCORD, October 1, 1900.

To His Excellency the Governor:

We herewith respectfully submit our biennial report, together with the report of the state librarian.

There is nothing in the history of the state library during the last two years, as disclosed by its librarian's report, that is not properly praiseworthy. Economically administered, the library has shown results altogether gratifying, in our opinion. It has amply proven its *raison d'être*.

The making of the card catalogue necessitated a large augmentation of the library force. It will be noticed, however, that we have so managed the matter as not to lead to a corresponding increase of expense to the state. This has been possible only by abstaining from the expenditure of the entire amount biennially appropriated for books. A library of the size and character of the State Library of New Hampshire, properly to keep in step with the times, requires all that the legislature has heretofore appropriated for the accession of books. The fact that we have spent less than the annual \$5,000 does not signify that we have had no occasion for the use of the entire amount in this direction. Bearing in mind that the financial, as well as the educational, interests of the state demanded of us our most conscientious consideration, we, advisedly we trust, purchased fewer books than the healthy growth of the institution normally demands, to the end that the annual expense of maintenance would not be increased by our action in enlarging the cataloguing force. But the deficiency caused by the postponement of the purchase of in-

dispensable books for the more pressing need of the library (the catalogue), books, the permanent exclusion of which could not be excused, should be borne in mind by the legislature in making the appropriation for the purchase of books.

We proceeded on the dictum that a well-catalogued, albeit small, library is much more useful than a large uncatalogued one. The opening of our doors to all citizens, whether in the capital city or without, has not been attended heretofore with the results legitimately to be expected, for the simple reason that the contents of the library are unknown to those debarred from a personal inspection. Manifestly, we can make its contents known outside of Concord only by a printed index or catalogue. A necessary preliminary step was the completion of the card catalogue. From this will be made the printed volume which will go into every local free public library in the state, in effect to make our great collection of books an adjunct to its circulating department. The saving of expense to the local library (especially if the postal laws be so revised as to give to literature the advantage now enjoyed by printed trash) will be enormous in the end. It will save the smaller town the many dollars necessary to be expended for some standard technical book required by a few, although useless to the many: for the local library, finding such a work in the great central institution of our library system, may borrow it of the state library, thus saving its purchase price to be expended in directions more generally popular and useful.

In the many years of its existence, a state library though it has been, this institution has practically been more a club library for the legal profession. Our point of view as to the purposes of its existence is much broader. Owing a duty to the bench and bar, which is to be acknowledged, we also owe, and are attempting to perform, a duty to the citizens outside of the legal profession: to the farmer, to the student of history, to the medical man, to the ecclesiast, to the architect, to the mining, the mechanical, and the sanitary engineer, to the scientist, to the artist, and to the artisan. For it is the library of all, supported by the taxation of the whole state

rather than by a divisible portion thereof. The lawyer who may come to Concord must not enjoy privileges not possessed by the artisan or the farmer who must stay at home. If the latter is unable to come to the library, we must do our part in bringing the library to him. The printed catalogue will equalize all classes, giving to every one the advantages which he has a legal right to enjoy.

In fact, this duty which we recognize that we owe to the state at large logically suggests a further step in advance in matters pertaining to the administration of the library system of the state. The fact that the public library system, supplemental to the public school system, is now a necessary concomitant of the latter in the proper educational preparation of the citizen for the duties which he owes as such, is already *res adjudicata*. The progressive library laws of this state recognize and enforce this idea. In the efficient administration of our public school system, we have found it necessary to centralize, to establish a bureau having a general supervisory influence over the local schools. Analogously, this system should apply to the public library movement. In short, it is the conviction of the trustees that the state library should bear to the local public libraries the same relation that the state superintendent of public instruction does to the local schools. The sphere for good work is enormous. There should be an officer, a state superintendent of public libraries, connected with the state library and appointed as the state librarian is appointed, having in charge this important work. He could do a vast amount of good work, among the smaller libraries especially. Like the state superintendent of public instruction, he could go about the state holding library "institutes," counseling and advising the administrative officers of the rural libraries, furnishing information as to books, methods, classification, and other matters of library economy, possibly adjudicating disputes as to library sites,—making himself, in short, the guide, philosopher, and friend of every local library. He could edit a State Library Bulletin, which might take the place of the expensive technical periodicals devoted to library

economy, besides serving as a supplement of the printed catalogue, and being, as the latter will be, a model to be followed by the local libraries. Of course, the usefulness of such an officer to the large city libraries is somewhat questionable. They, however, are well qualified to take care of themselves, generally. But the overwhelming majority of our public libraries are small institutions, without the resources to employ the services of a professional librarian. These are the ones which now suffer from neglect. The flourishing city libraries, with the means at their disposal, can afford to send their librarians or trustees to a distant conference of a library association; the small country library may not because it cannot afford the expense. And it is this struggling rural library which must be content with a non-professional librarian—the very one who needs the benefits derived from the conferences. They do not possess those advantages and that knowledge of the best methods which their co-laborers, the school teachers, enjoy and obtain at their district “institutes.”

This recognition of the natural relation of the state library to the public library must come in time; we trust in New Hampshire first of all. For this grand old commonwealth has ever been a pioneer in the library movement. It is fitting and proper that the state which instituted the first state library, which granted the first act of incorporation for a State Library Association, which passed the earliest law permitting taxation for library purposes and the first law making such taxation compulsory, the home of the first free public library in the history of education,—in brief, the first state to recognize the proper functions and relation of the public library to public education, should be the first to put in operation a system soon to be universally adopted throughout the states, as we believe.

There is another recommendation which we deem it wise to make at this time, trusting it will be found expedient to adopt it, if not at present at least in the proximate future: the indexing of our newspaper files. Just as it is necessary to have a catalogue of a library in order to ascertain its contents, so it

is necessary to have an index of periodicals in order to know the contents thereof. This is especially true of newspapers. A speech by some prominent person, the contemporaneous newspaper accounts of great events, etc., is sought: the lack of an index means that the searcher must spend days in examining newspaper files; whereas, with an index, it would require a few minutes only. Law books and law periodicals are well indexed and digested. The library has ample facilities in this respect for the benefit of the legal fraternity; but the student of events, or the legislator, is hampered in not having the proper tools with which to work.

With the present library staff, it is impossible, of course, for us to undertake this work. It is a department by itself, requiring a special officer; one with an acute and accurate sense of what is "news" and what is worth while to index. It is not proposed that an experiment be tried. This has already been done in Massachusetts and has successfully passed beyond the experimental stage, to the credit of that Nestor of state librarians, the Hon. C. B. Tillinghast, librarian of the Massachusetts State Library.

In the development of our historical department, we have commenced the compilation of what, in time, will prove to be valuable historical data: classified newspaper clippings, covering what would otherwise be ephemeral, although valuable, items pertaining to the history (including genealogical and biographical matter) of New England. A news clipping bureau supplies us with clippings on these subjects at a small expense. These clippings are classified, mounted upon durable paper, and bound when the collection on a given subject is sufficient to warrant it. In time, we shall have acquired a very treasury of historical data, which otherwise would have escaped notice and preservation.

In conclusion, we earnestly request a careful consideration of the suggestions contained in the librarian's report, which fully covers those additional matters meeting with our entire approval and not specifically recommended in this report of

the trustees. Especially do we recommend that prompt action be taken in the direction of tinting the walls of the library.

GEORGE C. GILMORE,
WILLIAM D. CHANDLER,
C. EDWARD WRIGHT,

Trustees.

REPORT OF THE LIBRARIAN.

OFFICE OF THE STATE LIBRARIAN,

CONCORD, October 1, 1900.

To the Trustees:

The librarian presents the following report of the work of the state library for the two years ending May 31, 1900:

THE LIBRARY MOVEMENT AND THE STATE.

One of the important purposes of government is the development of intelligent citizenship. In all civilized governments we find at least two departments devoted to this end, the public school department and the library department. The former department aims to develop the mind of the child along certain well defined lines to the end that he may become a citizen, honest, upright, and intelligent, capable of caring for himself and those dependent upon him, and at all times a safe element in the community. The province of the library department is supplemental to that of the public school department. It offers to the citizen the opportunity for a higher development of the mind, a broadening of thought, a greater knowledge of events, a better understanding of all that goes to make the man.

There can be no question of the importance of the free public library movement to the state and its citizens. Already the results reached in the library field in New Hampshire demonstrate its value and compel the state government not only to continue the generous support which has been given in the past, but to press on toward the goal of perfection which lies in the ability of the library system of the state fully to serve the citizen. That ideal of perfection is as elusive as the dream of wealth; yet this fact must not discourage the state in its efforts. Its duty is clear. It must first establish

a policy that will be broad, generous, and productive of the best results; then it must support that policy freely, intelligently, and fairly at all times. No political manipulations, no personal enmities or desire of gain must enter into its acts; but it must rather be the free act of all its citizens.

Thus will steady growth be maintained through the coming years. The goal will not be reached in this generation, perhaps never, but the results from year to year will always repay the effort and the expense.

THE PROVINCE OF THE STATE LIBRARY.

In the policy established by the state for the development of its library system, the state library must always occupy an important position. It is the parent library. Its methods of administration should be examples to be followed by the other libraries. Its shelves should contain the books that other libraries do not have for one reason and another. Above all, it should stand ready to help the smaller libraries in their sphere of usefulness, giving to them advice, loaning to them its books, and, as far as possible, becoming the great central institution about which the public libraries of the cities and towns are grouped.

Especially should this be so in this state. Its area is not large. Its communities are, and probably always will be, small in population. Its citizens, while well to do, are not as a rule wealthy. Certainly, as far as now appears, the public library of no city or town can look forward to the time when it can do more than furnish to its patrons the standard works on each subject. For it ever to become a storehouse of all works upon all or even many subjects is impossible.

It is therefore the duty of this state to make its state library as far as possible a depository of all books which are not to be found in the public libraries. Take, for example, the subject of science. The officials of the library should carefully examine the books in this field and eliminate therefrom all works that would naturally find their way into the public

libraries and all others which they know to be inaccurate or but a repetition of other and better works. With this list so revised as a basis, they should set themselves to spend so much of the appropriation each year as may be devoted to science to the perfecting of the scientific department of the library. The same method should be followed in all the different departments, excluding only fiction, poetry, and general literature. When this has been done throughout the library, a firm foundation will have been laid for an institution of vast power and usefulness.

There is an additional and no less important duty, i. e., the making of these books accessible to our citizens. To be a depository or a reference library merely, serves a few people to a limited extent; the rest not at all. The state library is the library of our people. It is supported by them and for them. Each is entitled to enjoy its treasures in common with others as he enjoys the protection of our courts. The officials should therefore see to it that rules are made so broad and comprehensive that they will allow the widest use of the books, both in the library itself and at the homes of the people. Reasonable rules, necessary for the proper preservation of the books and their seasonable return to the shelves, should be adopted; but those rules, which we have to class as "red tape," serving no definite purpose except to make it more difficult to obtain a desired result, should be carefully avoided. Thus will the library be brought to our doors; at first urging, then tempting, and finally compelling all to take advantage of it.

WHAT OUR STATE IS DOING.

The state library of our state is already making rapid progress along the lines above laid down. A continuous effort is being made to strengthen each and every department by the addition from time to time of those books, old and new, that will be of permanent value. The officials are keeping in mind the needs of the future as well as of the present. They are, so far as the resources at their disposal make it

possible, laying the foundation of a great institution of learning, which will fully meet the need of the coming years.

By the plan of loaning books through the public libraries of the state, they have thrown open the doors of the library to all, and have invited them to avail themselves of its advantages. Already this action has been productive of good results. As the people come to know more fully the books that are here and the ease with which they may be obtained, there can be no doubt that the circulation of its books will become general throughout the state.

With this statement of the ideal to be reached in the future, I turn now to the practical work of the past two years.

ACCESSIONS.

The number of bound volumes in the library on June 1, 1898, as indicated by my last report, was 48,810. During the year ending May 31, 1899, 6,404 bound volumes, and during the year ending May 31, 1900, 6,845 bound volumes, were added, making the total number in the library June 1, 1900, 62,059 bound volumes. The number of unbound volumes, exclusive of periodicals, in the library at the same date was 31,794, and the number of unbound periodicals, 11,671.

By reference to the last report, it will be seen that the increase for the last biennial period exceeded that for the previous one by 524 volumes. This is especially gratifying when the fact is considered that less than seven thousand dollars was spent for books from June 1, 1898, to May 31, 1900, while nearly ten thousand dollars was spent for the same purpose during the previous biennial period.

At the time the library moved from the state house into its present building, it is estimated that the number of bound volumes therein, exclusive of duplicates, was not far from 32,000. Thus it will be seen that during the five years it has occupied its new quarters, the number of its bound volumes has been very nearly doubled.

Again, the average increase per year during the past four years has been 6,493. Assuming that the increase will not

lessen in the next ten years, we find that at the end of that period, or June 1, 1910, the present number of bound volumes will again be more than doubled.

It is true that these figures may mean much or little; but in this case, they certainly argue well for the future of the institution. Every book that has been placed in the library is there for a definite purpose. The officials have avoided to the greatest extent possible the accepting of books which appear to be of no use except to fill the shelves of the library. It may be truthfully said that the 62,000 volumes now upon the shelves represent value; that every volume is one likely to be called for and sure to furnish material aid to some one. With the present policy continued during the coming years, the growth of the library must be healthy and progressive and in the direction of a great literary institution for all our people.

LAW DEPARTMENT.

On June 1, 1900, the books classed as law books numbered a little over 18,000 volumes. The policy in this department is (1) to keep all sets of law reports and legal periodicals upon the shelves complete; (2) to buy all current legal textbooks that prove valuable; and (3) to buy such legal publications, published in the past, as will strengthen the whole collection and make it answerable to every call.

The principal purchase under the last clause during the last biennial period has been the law reports of Upper Canada. The library has needed these reports very much, but has never seen its way clear to purchase them at the prices at which they were held. During the spring of the present year, however, the opportunity was offered to purchase a set at about one third off the former price, and the officials gladly availed themselves of it.

One of the most valuable additions to the law department during the past two years has been a set of the statements of cases and briefs of counsel in those suits which have been carried to the law term of our court upon questions of law. This set consists of over two hundred volumes and is

practically complete from 1849 to date. A card index of the names of all cases has been made so that it is easy to turn quickly to the papers in any case during the above period.

This department continues fully to meet the demands upon it, and its use by the legal profession is constantly increasing. The simplicity of the arrangement of the books enables a lawyer to find what he wants for himself in most cases, and, as all are allowed free access to the shelves, the result is that the library officials are seldom called upon to aid people in finding books.

None of the books in this department are allowed to be taken from the library building, except by state officials. This rule has been found necessary on account of the constant use of the department by lawyers from all parts of the state.

HISTORICAL DEPARTMENT.

This department includes history, genealogy, biography, and travel. It contains at the present time nearly 8,000 bound volumes and 2,100 unbound volumes. Historical matter with reference to this state is very complete, careful attention having been given to the acquisition of all historical pamphlets as well as the larger volumes. The same method is gradually being extended to the other New England states. Our history has always been closely connected with theirs, and calls for their historical literature are nearly as frequent as for our own.

Doubtless, when the collection for the New England states becomes practically complete, a like attention will be given to the historical literature of the other states of the Union. At present, accessions in this direction are confined to general historical works, such as state histories and the publications of historical societies.

The use of this department has materially increased during the past two years. The interesting study of family history has led many to make an effort to find their line of descent from foreign ancestors in the books. Altogether, this

department proves of the greatest value to the people of our state after the law department.

MEDICAL DEPARTMENT.

As stated in my last report, this department contained nothing in 1895. Today, it contains over 4,000 bound volumes, 1,500 unbound volumes, and 4,300 numbers of unbound periodicals. The medical profession of the state, and especially the Medical Society, has taken a deep interest in its development and has contributed much toward its increase. Special attention is at present being given to medical periodicals and the publications of medical societies. This is being done upon the advice of prominent physicians who believe it to be a most valuable foundation for a medical library. As time goes on, the most important modern medical works will be added, thus bringing this department to a high state of efficiency.

RELIGIOUS DEPARTMENT.

The chief effort in this department during the past two years has been directed toward obtaining the manuals, anniversary celebrations, and other printed literature of New England churches. Such publications are valuable not only from a religious standpoint, but also as historical material. When, therefore, it is borne in mind that they soon become out of print and difficult to obtain, the importance of a determined present effort to get them is apparent.

OTHER MISCELLANEOUS DEPARTMENTS.

Details might be given of special efforts made in all the different departments of the miscellaneous library towards bringing them to a higher standard. Suffice it to say, however, that the needs of no department have been neglected so far as the funds at the disposal of the library officials have permitted. The fact is kept constantly in mind that all departments must grow together, to the end that all will fully meet the requirements of our people.

PERIODICALS.

The periodical list of the library has materially increased during the last biennial period. This is a matter of which there can be no backward step. Those periodicals of which we already have sets upon our shelves must be kept up or their value is greatly diminished, practically destroyed. To these must be added from time to time new periodicals, which for some important reason should be here.

Periodical literature is becoming every year of greater importance. It opens its pages to the discussion of questions upon all subjects. Much that afterwards appears in book form appears first in some periodical. It has been said, apparently with good foundation, that people are coming more and more to read periodicals to the exclusion of books. But as a rule, this class of literature is read and then thrown away. It therefore becomes of vital importance that libraries should use the greatest care in obtaining and preserving sets of all important publications of this character, and as in this state the small libraries must confine themselves to a very few of the periodicals in general literature, it becomes the duty of this institution to attempt to cover fairly all technical subjects. This is being done, and today it is possible to find in the library at least one periodical upon almost every subject.

BINDING.

The same policy has been followed with reference to binding during the past two years as during the previous biennial period, i. e., to bind everything worthy of preservation as soon as all the parts necessary to make the volume are received.

This is one of the most important administrative matters in connection with library work. The librarian who cannot from financial or other reasons keep the binding thoroughly up to date has much with which to contend. The proper disposition of unbound volumes, as well as the prevention of the loss, the misplacement, and the mutilation of them, require constant attention. It is very probable that the library

which neglects its books in this regard will in the end find that the failure to have them bound has been a source of actual loss.

CATALOGUING.

Since the last report, the subject-author card catalogue of the library has been completed. In March, 1899, it being evident that Mr. Denio alone would not be able more than to keep up with the accessions of the library, the trustees voted to increase the cataloguing force by the addition of three assistants and the transfer of one assistant from the regular library force, the additional expense thus incurred to be met by curtailing the expenses in other departments. This course has proven to be a wise one. The cataloguing force employed under this vote went to work with a will, and in a little more than a year from the beginning of their joint work, every book in the miscellaneous department was represented by cards in the catalogue.

This catalogue is admirably adapted to the uses it serves. It is made upon the dictionary plan, the subject and author cards being placed together in one alphabet. While no attempt has been made to go into all the bibliographical details, it contains all material information as to each book. With it as a guide, one will readily find any book he desires, if it is upon our shelves.

The catalogue at present occupies ninety card trays and about 87,000 cards have been used in making it.

Work is to be begun at once upon the manuscript for a printed catalogue. This will contain a classed subject list and dictionary author list. It is hoped that it may be ready for distribution in about a year. When issued, a copy will be sent to every public library in the state for use by their patrons in the drawing of books from this library through the local public library.

It is confidently expected that when this will have been accomplished, the loaning of our books will very largely increase, and that we shall thus be able to extend the usefulness of the institution more widely over the state.

SHELVING.

Two alcoves have been fitted during the past two years with a mezzo story and additional shelving. By the method employed the greatest shelf capacity of the alcove has been utilized, and we have been able to shelve all the books now in the library. The shelves are now once more becoming crowded, however, and it will be necessary within the next year to fit up more alcoves in the same way.

There has also been placed in the main study hall a new double newspaper stack containing one hundred and sixty roller shelves, which will take care of the bound volumes of newspapers for some time to come.

STATE NEWSPAPERS.

Valuable additions have been made to this department during the past two years both by purchase and gift. A complete file of the daily "Monitor," from its inception to date, preserved by the late P. B. Cogswell, a former trustee of this library, has been received through the generosity of Mrs. Cogswell. Arrangements are now under way which promise the completion of the file of the "New Hampshire Patriot" and "People and Patriot" from its beginning in 1809 to date.

The preservation of local newspapers is of great importance from their historical value; and the attention of the editors of our state is again called to the superior advantages offered by this library as a final resting place for their office files. There is absolute protection from destruction by fire or otherwise, together with the assurance that the files will be carefully arranged, completed if need be, and bound in most cases. Here, they become accessible to every one for all time. Their future usefulness is assured.

LIBRARY BUILDING.

No repairs of importance have been necessary upon the building during the past two years and its present excellent condition is an indication of the wise judgment of the building commission.

I desire again earnestly to urge that the attention of the legislature be called to the necessity of tinting the walls of the main library room. In their present condition, it is almost impossible for one to work in the room for any considerable length of time without serious injury to the eyes. Then, again, the fine dust that inevitably rises in buildings is gradually becoming grimed into the walls, causing an unsightly appearance. Altogether, I believe it would be a matter of good economy in the preservation of the building to attend to the tinting at once.

BIBLIOGRAPHY OF THE STATE.

In connection with the card catalogue, there has been prepared a classed subject list of all books in the library belonging bibliographically to New Hampshire. The idea in preparing this list has been to furnish a foundation for a complete printed bibliography of the state, which I brought to the attention of the trustees in my last report.

This is, I believe, a very important matter, and again I suggest the desirability of bringing it to the attention of the legislature and asking for a small appropriation with which to make a beginning.

TOWN RECORDS.

Nothing has as yet been accomplished towards saving from destruction the records of our towns. Even now it is probable that much of this valuable material has been lost or destroyed. Unless some determined action is taken at once for preserving these records, a vast amount of valuable historical material will disappear.

I earnestly recommend that the legislature be urged to take action either as to the deposit of the original records in this library or as to the making of certified copies of them for preservation herein.

CHEAP LIBRARY POSTAGE.

A movement is on foot to give to libraries the privilege of sending books through the mail at the same rates that

newspapers and periodicals are now sent, i. e., one cent a pound. A bill was presented to congress at the session of 1899-1900 providing for this privilege; but it failed of passage on account of the feeling that some of the present abuses of this rate should be eliminated before new things were added. There seems to be a fair prospect that such a bill will eventually be enacted. If this happens, it will prove of great value to this library in its efforts to send its books to the doors of the people of the state. It now costs an average of forty cents for sending books from and to the library. Under this bill, we should be able to furnish any book in the library to any one in the state at from two to ten cents actual expense. With such a low rate of expense, it would be possible for all citizens to avail themselves of the opportunity which we offer.

Respectfully submitted.

•ARTHUR H. CHASE,
State Librarian.

REPORT OF PRISON COMMITTEE.

The prison committee of the executive council, in accordance with the practice of its predecessors, herewith makes a brief statement of the condition of the state prison.

During the past two years the members of the committee have frequently visited the institution, and the warden and his officers have always most courteously received us, affording every possible opportunity to investigate its needs and actual condition. We have paid special attention to the food supply and its preparation for the prisoners; also to the general cleanliness of the institution. We have invariably found that the food served was of excellent quality, and that clothing and bedding were clean and wholesome.

The usual discipline of the institution has been maintained, with the usual good result. While to some thoughtless persons the New Hampshire methods may seem over-rigid, the results, year after year, are such that your committee more fully appreciate the necessity of their continuance if this institution is to continue to enjoy its present enviable reputation.

One of the first duties confronting the governor and his executive council, in connection with the prison, was the renewal of the contract for the employment of the prisoners. Our first visit to the institution impressed us with the necessity of certain changes in the shop buildings, for the protection of life and property from fire. These changes were obtained through concessions on the part of the former employer of the men, to whom was given the new contract. The per diem under the new contract was made the same as under the expiring contract. The latter was for a term of five years, but the new contract was made for a term of seven years. Under its

provisions the old two-story frame shop building, a veritable fire trap, was removed, and a new and commodious brick building, a duplicate of the old brick shop building, was erected at the expense of the contractor, and at the expiration of the present contract the new building becomes the property of the state. By this indirect method the state secured what seemed an absolute requirement, without an appeal to the general court for an appropriation of a very substantial sum of money to meet the expense.

An appropriation made by the general court for putting into the guard room of the prison certain grill-work was opportune, and the work has been done in such a way as very materially to increase the general safety of the institution.

The future needs of the prison seem to require a comparatively inexpensive porch over the door entering the north wing from the prison yard, to protect the men from falling snow and ice during the winter months; the painting of the prison halls; the repairing of many steam pipes, which have now been in use for a period of about twenty years; and the overhauling of the plumbing in the prison tenement block. In these particular matters we bespeak careful investigation, believing that our views thereon will quickly be approved.

The fact that the prison has not been wholly self-sustaining during the past year is readily accounted for by the large decrease in the number of prisoners, which of itself does not permit any relative decrease in the monthly expense of maintaining the institution.

The reports of the warden, chaplain, treasurer, and physician present in detail the existing condition of the prison, and an examination will disclose complete information pertaining to the several departments.

During our term of office the warden, Mr. Charles E. Cox, has twice been reappointed. Without reservation of any kind or in any degree we commend his official acts. We believe him to be a model official, whose services the state is most fortunate in retaining. He easily maintains discipline, but tempers it with a natural kindness of heart that should prop-

erly characterize a person in his official position. He is supported by competent minor officials, whose loyal assistance essentially aids him in the work to which the warden is appointed.

Every suggestion to the warden, officially made on our part, or by his excellency the governor, has been pleasantly received and carried out.

Early in our connection with the management of the prison affairs we individually condemned the continuance of the old-time custom of admitting general visitors to the prison, at a fixed price per head. For the good of the prisoners, who had frequently appealed to the warden to be relieved from temptations arising from their being exhibited as human curiosities, the governor and executive council have adopted a rule forbidding visits of a general nature, though the new rule in no way affects the visits and interviews by relatives and immediate friends of prisoners, as heretofore permitted under the rules. This change seemed to be in accordance with good sense, as it is also in accordance with the rules of similar institutions in other states.

Warden Cox, in his report, makes known the changes in officials in his employ, which calls for no comment from us.

We indorse the recommendation of Warden Cox in the matter of commutation of time because of good behavior, and we hope that the legislature of 1901 will give the matter proper consideration.

HENRY F. GREEN,
HARRY M. CHENEY,
GEORGE F. HAMMOND,

Committee.

REPORT OF WARDEN.

To His Excellency the Governor and the Honorable Council:

GENTLEMEN,—I respectfully submit the following report of the affairs of the state prison for the two years ending November 30, 1900.

Statistical tables relating to the history and crimes of the convicts, and showing the number received, pardoned, discharged, and removed to other institutions, are hereto appended. The interesting fact shown by these tables is that the average daily population for the last year was one hundred and forty. In the year 1896 the average daily population was one hundred and eighty-one; in the year 1897, one hundred and seventy-six; in the year 1898, one hundred and sixty-six. This decrease in population probably results from the increasing tendency of the courts to commit convicts to the county institutions rather than from any decrease in the number of crimes committed, or from any change in the character of the crimes. Without comment I wish simply to call attention to the fact that the effect of this decrease in population upon the state prison affairs is wholly economic; the earning capacity of the institution is substantially impaired, while the expense of maintenance is not lessened to any appreciable amount.

Your order abolishing visiting days and visitors' fees decreases the income of the institution a few hundred dollars each year, but is clearly a wise regulation. It facilitates the preservation of discipline and restrains idle and vulgar curiosity. Above all, it is thankfully appreciated by the convicts.

In my last report I called attention to the great danger from fire on account of the wooden shop within the prison walls and the insufficient water supply for fire purposes. During the two years covered by this report one of those elements of

danger has been eliminated. All of the wooden buildings have been removed from the prison yard. In their place a brick building, two stories in height, one hundred and forty-six feet in length, and varying from forty to fifty-six feet in width, has been erected. A large wooden storehouse has been built outside the prison walls.

The danger arising from the insufficient water supply still remains. The Concord water-works has laid new pipes suitable for high pressure service in the highway leading by the prison, and it was thought that suitable service would be furnished, but for some reason this is still refused. If the Concord water-works will not furnish proper service, arrangements should be made to secure an independent and adequate water supply.

Probably the most effective inducement to the convicts to submit bravely and patiently to their duties during imprisonment is the provision for commuting sentences for good behavior, found in Public Statutes, chapter 284, section 14. The construction of this section has been doubtful in cases where the convict is sent here under more than one mittimus. For example: Under this section 819 days may be commuted on a sentence of twelve years; 365 days on a sentence of seven years; 208 days on a sentence of five years. The question arose whether a convict sent here for a five-year sentence and a seven-year sentence should be allowed 819 days, as if he had been sentenced for twelve years, or should be allowed only 573 (365 plus 208) days.

Again, the commutation on a four-year sentence is 129 days, consequently for three such terms it is 387 days. Therefore the difference of commutations based upon a total sentence and upon each part of a sentence is very material.

It was the practice of the prison officials to allow commutation based upon the total sentence. However, over-zealous attorneys of a recent convict, taking the question directly to the attorney-general, obtained the ruling that commutation must be based upon each part of a total sentence, and this ruling is now considered to be final.

I believe that each convict should be allowed deductions for good behavior based upon the total time he must remain here. Since the above ruling of the attorney-general, the governor, by the judicious use of his executive power, has enabled convicts to be allowed deductions based upon their total sentence. It seems that this matter should be submitted to the legislature for proper action.

After long and efficient service Samuel D. Robinson has retired from the office of deputy warden, and his place has been taken by Frank J. Sanborn, who has been an officer of the prison continuously for the last twenty-eight years.

The high standard of discipline in force at the time I assumed the duties of warden has been substantially maintained.

I invite your attention to the reports of the treasurer, chaplain, and physician for the details of the financial condition of the institution, and of the moral and physical welfare of the convicts.

I take this opportunity to publicly express my appreciation of the high degree of care and efficiency displayed by the various officials in the performance of their several duties.

To his excellency the governor and the honorable council, my thanks are due for your confidence and support. You have given an unusual amount of thought and attention to the needs of the prison, and good results therefrom are apparent.

CHARLES E. COX,
Warden.

REPORT OF CHAPLAIN.

To His Excellency and the Honorable Council:

GENTLEMEN,—In compliance with the laws of the state I herewith submit my report as chaplain of the state prison.

The good order and universal obedience to the rules and regulations of our institution has never been more perfect and satisfactory than at the present time, attributable to the kind yet firm administration of the rules by which the institution is governed.

The chapel services are seasons of interest and enjoyment. The hearty and excellent singing, and the frequent discussion of the subjects presented for instruction and help in discourse as I visit them in their cells gives me hope for their betterment.

The library is a source of great blessing, if for no other reason than the attention which draws their thoughts from personal consideration of their surroundings. But many are profiting by reading and study. There have been added over two hundred volumes of books with a large number of magazines. The latter are sought for by all classes whether they read or not.

The holiday entertainments, which have been growing in interest, have assumed such a character in later years that more or less financial expense is attached to them. For the last two years the governor has very generously provided on Thanksgiving day elaborate entertainments, to the great enjoyment of the inmates. I would suggest that some financial appropriation be made to meet the expense incident to the observance of the holidays of the year.

The arrest and imprisonment of a person under the charge of crime, whether justly or unjustly, mark a serious crisis in his life. It is an event which must exert some determinative

influence for good or evil on his whole future career. It is a time for retrospection, for self-examination, when the better impulses of his nature plead for the supremacy. This is the most hopeful period to reach and help him into a better life. The criminal is a man; save for a comparatively small number, he is much like other men. He is no worse than thousands whose violations of law have not been discovered and punished. He still has a conscience that may be appealed to, and a will that may be aroused and strengthened. This classifying criminals by head measurements, and speculative theories as to inherited tendencies of which we know but little, is unscientific, unphilosophical, and unchristian, and lacking in common sense. However unpromising his material, the chaplain of the prison believes and has faith in the grace of God and power of the Spirit, conjoined to right methods, to make law-abiding men and citizens out of the degraded and lawless classes.

E. R. WILKINS,

Chaplain.

REPORT OF PHYSICIAN.

To His Excellency the Governor and the Honorable Council:

GENTLEMEN,—I herewith submit my report for the past two years. With the exception of the winter months last year, when “the grip” swept through the prison, the health of the inmates has been very good, and in no cases have diseases been contracted which could be traced to lack of proper sanitation.

I wish to extend my thanks to the officers of the prison for their kindness and aid.

I have five deaths to report:

Hiram F. Gerrish, la grippe, January 24, 1899.

Joseph Little, pneumonia, March 15, 1899.

Herbert Clough, suicide, April 10, 1899. (Throat cut with knife from ear to ear.)

Frederick E. Hunt, pneumonia, August 12, 1900.

Henry E. B. Martindale, suicide, August 19, 1900.
(Jumped from corridor to pavement and fractured skull.)

RALPH E. GALLINGER,

Prison Physician.

November 30, 1900.

TREASURER'S REPORT.

To His Excellency the Governor and the Honorable Council:

GENTLEMEN,—I have the honor respectfully to submit the following report of the financial transactions on account of the New Hampshire State Prison for the fiscal year ending November 30, 1899:

ANNUAL REPORT
OF
THE TRUSTEES
OF THE
NEW HAMPSHIRE
STATE NORMAL SCHOOL
AT PLYMOUTH
FOR THE
YEAR ENDING SEPTEMBER 1, 1900.

MANCHESTER, N. H.
ARTHUR E. CLARKE, PUBLIC PRINTER
1901

CONCORD, N. H., October 1, 1900.

To the Honorable Senate and House of Representatives:

By direction of the Board of Trustees of the State Normal School I have the honor to communicate to you the annual report of the board for the year ending September 1, 1900, of which report the reports of the treasurer for the years ending September 1, 1899, and September 1, 1900, and the report of the principal for the two years ending June 30, 1900, also herewith presented, were made a part by vote of the board.

JAMES C. SIMPSON,

Secretary.

REPORT OF THE TRUSTEES OF THE NORMAL SCHOOL.

To the Senate and House of Representatives:

The Trustees of the State Normal School respectfully submit the following report for the year closing August 31, 1900:

New Hampshire looks to the State Normal School for its teachers,—teachers not simply to conduct its schools, but to be representative of what is best in education to all those who have schools in charge. The work of the graduates of our Normal School should be a constant object lesson to those who are interested in school matters.

In order to justify its existence the Normal School must make its influence felt for the betterment of the teaching in the common schools. In other words, we should look first of all to the quality of the graduates rather than to the quantity. "A little leaven leaveneth the whole lump," but it is of importance that that little should be of the best.

To establish and maintain an excellent standard of scholarship and efficiency requires that the personnel of the instructors shall be of the highest order. A teacher who is to instruct teachers must, from the very nature of his position, be of the first rank. While this fact would appear to be self-evident the principle underlying the statement is not so clearly understood, namely, that if we are to have good instructors and retain them they must be paid in proportion to the services performed. Skilled labor is always expensive, and in no field of labor is this truer than in educational work.

New Hampshire has but one normal school. She has innumerable country towns which ought to be benefited by the influence of her normal graduates. That this influence may

be most efficient the instruction rendered at the Normal School must be of the highest order. To obtain the best instructors adequate compensation must be offered. As the Normal School is at present conducted the trustees are able, through careful management and good judgment in the selection, to employ strong teachers; but after these teachers have served a year or more, and when their services have become of most value to the institution, they resign to take similar positions elsewhere for larger salaries. The trustees are powerless to help themselves, owing to lack of money. The trustees would strongly urge that greater liberality be shown in your appropriation for the State Normal School.

During the past year Mr. A. H. Campbell has severed his connection with the Normal School, and Mr. James E. Klock, who was superintendent of the schools in Helena, Montana, was made his successor.

In electing a new principal to take charge of the State Normal School the trustees made every effort to have the selection a wise one. A large number of candidates presented themselves, and their qualifications were in each instance carefully examined by the committee on teachers. Mr. Klock has a long and honorable career in educational work to his credit. His first teaching was as principal of a village school in Lyon county, Kansas. Having served in this position four years, he was elected, in 1880, principal of the high school at Emporia, Kansas. Two years later he was made superintendent of public instruction in Lyon county, Kansas. In 1884, at the urgent request of the board of education, Mr. Klock returned to Emporia to act as superintendent of the city schools, which position he held until 1890. At this time he was elected city superintendent at Leavenworth, Kansas. In 1896, he resigned the superintendency of Leavenworth to accept a similar position in Helena, Montana. He was acting as superintendent of schools at Helena when he resigned to take charge of the New Hampshire State Normal School.

The trustees are confident that under Mr. Klock's management the school will be able to maintain an excellent stand-

ing, and will offer to the young men and women of the state, who wish to become teachers, exceptional opportunities to perfect themselves in their profession.

The new heating and ventilating plant seems to perform its work efficiently and well, but at a much greater expense for janitor service and coal than under the old system. Judging from the coal consumed last winter, it will necessitate a supply from one third to one half greater than formerly.

A more extended account of the present heating system and of other matters pertaining to the schools will be found in the reports of the treasurer and principal.

JAMES H. FASSETT,
For the Trustees.

REPORTS OF THE TREASURER OF THE NORMAL SCHOOL.

To the Trustees of the New Hampshire State Normal School:

GENTLEMEN,—I herewith submit my report as treasurer for the year ending August 31, 1899:

JAMES C. SIMPSON,
Auditor.

REPORT OF THE PRINCIPAL OF THE NORMAL
SCHOOL.

PLYMOUTH, N. H., June 30, 1900.

To the Trustees of the New Hampshire Normal School:

GENTLEMEN,—I herewith transmit to you my second biennial report as principal of the Normal School.

The past two years have been a period of continued prosperity and progress in the school. Advance has been made along every line. The students have been more mature and of higher scholarship at entrance, a larger proportion of them being high school or academy graduates, and nearly all having had experience in teaching. Several college graduates have entered the school and completed the course. These conditions have been utilized by raising the standard of scholarship for graduation. The amount of professional instruction and practice in the training schools has also been increased, so that graduates have gone out fully equipped for successful work in the public schools. The satisfactory results reported by the many school boards employing the graduates show the advantage of this thorough preparation.

There have been some changes in the personnel of the faculty during the period covered by this report. A. J. Grout, Ph. D. (Columbia University), teacher of science, was elected to a like position in the Brooklyn, N. Y., high school at a much larger salary, and resigned his position in the Normal School in January, 1899. Thomas H. Clark, Ph. D. (Clark University), was chosen to succeed Dr. Grout. Miss Viola G. Burr, in charge of first primary room in training department, resigned her position in June, 1899, to accept a much more lucrative position in the training department of the Lowell Normal School. Miss Martha Smith, a graduate of the Lowell Normal School and a teacher of several years' experience in primary work, succeeded her. Miss Emma L. Hacker, A. B. (Bryn Mawr), teacher of biology, resigned in June, 1899, and was succeeded by Miss Annah P. Hazen, A. B. (Smith College).

Miss Mary F. Goddard, A. B. (Tufts College), teacher of music and high school mathematics, was succeeded by Miss Ella P. Merrill, A. B. (Smith College), in the fall of 1899. At the same time Miss Oriola E. Martin, A. B. (Wellesley College), was added to the faculty as teacher of classics in high school department and instructor of reading and physical culture in the Normal.

The work of the high school has been advanced so that certificates of graduation have been accepted for entrance alike in the classical, literary, and scientific departments by all colleges for which there were candidates, and students have thus entered Dartmouth, Wesleyan, and Mount Holyoke colleges.

The Normal School now works in harmony with all other educational forces of the state. The principals of secondary schools and superintendents recommend it to such of their graduates as design to become teachers. The school boards of many towns will not consider other applicants so long as our Normal School graduates can be secured.

Students are attracted to the school from all parts of the state, every county at present being represented. The largest county, Hillsborough, sends the largest number, twenty-one; then in order, Merrimack, Belknap, Grafton, and Coös, the central counties naturally sending more than those on the border, to which normal schools in other states are more accessible. Sixty-two towns and cities of New Hampshire have students in the school, while twelve come from towns outside our state.

The increase of attendance is as follows: In 1897-98, the first full year of my administration, there were enrolled the first term less than sixty students, and during the year only seventy-seven, with an average for each term of sixty-one. Twenty were graduated. The next year registered one hundred and three, with an average of eighty-two. Twenty-one were graduated. During the present year there have been enrolled one hundred and eighteen, with an average for each term of ninety-four, the largest number doing regular normal

work recorded for the school. A class of thirteen graduated in January, a number exceeding all previous winter classes, while twenty-four graduated in June, making thirty-seven for the year.

I found the chemical laboratory equipped for individual work. As early as possible the physical laboratory was fitted up in like manner for work in physics. In the fall of 1899 the natural history room was supplied with material for a like purpose in the study of biology. Many zoölogical and geological specimens have been provided. These improvements have to a large extent increased the interest and rendered the work much more effective in all branches of science.

By means of a special appropriation of \$8,000 from the state steam heat was provided in the fall of 1899 for the school building and ladies' hall, which has given good satisfaction. For the convenience and comfort resulting from this favor the thanks of the school are extended to the legislative body last convened in New Hampshire.

A. H. CAMPBELL,
Principal.

CALENDAR.

SCHOOL YEAR, 1900-1901.

SUMMER VACATION.

First term begins . . . Tuesday, September 4, 1900.

Recess . . . Nov. 24 to Dec. 3.

First term ends . . . Friday, January 18, 1901.

VACATION TWO WEEKS.

Second term begins . . . Tuesday, February 5, 1901.

Recess . . . April 13 to April 22.

Second term ends . . . Friday, June 21, 1901.

REPORT.

STATE OF NEW HAMPSHIRE.

SOLDIERS' HOME,

TILTON, N. H., December, 1900.

To the Honorable Senate and House of Representatives:

In compliance with the provisions of law, the Board of Managers of the New Hampshire Soldiers' Home present to the legislature this their sixth report.

Ten years have elapsed since the Home was opened for the reception of members. During that time we have had occasion to meet and settle many questions touching its management, which have furnished topics of information and discussion in our previous reports. The managers have sought to administer their trust in a manner conducive to the comfort, happiness, and well-being of the veteran soldiers under their charge, and think it not too much to claim that their dealings with the various questions of administration have brought satisfactory results. That is to say, the Home has been healthy, free from epidemic disease, under well nigh perfect discipline, and conducted with reasonable economy to the state. Any present discussion of the subjects which have mainly called for comment in our former reports seems, therefore, to be superfluous, beyond suggesting that our methods of administration seem to have been well chosen from the outset, and have called for no important changes.

We are not aware of any serious complaints of the management of the Home in any quarter, and we believe it holds a very high rank among institutions of its kind throughout the country. We would respectfully invoke a comparison of it in all essential features with any other state or national home.

Up to January 1, 1899, 369 men in the aggregate had been received into the Home.

During the years 1899 and 1900, 47 others have been admitted, and of these 416, a considerable number have been discharged, generally at their own request, and subsequently readmitted.

Number now in actual attendance	86
Average number in attendance in 1899	85
Average number in attendance in 1900	78
Smallest number in attendance in 1899	72
Largest number in attendance in 1899	93
Smallest number in attendance in 1900	59
Largest number in attendance in 1900	92
Average age of members when admitted in 1899 and 1900	64+
Average age of present members	63+
Age of oldest man in Home	87
Age of youngest man in Home	52
Average annual cost per capita of maintenance from 1891 to 1898, inclusive	\$203.14
Average cost per capita of maintenance in 1899	208.87
Average cost per capita of maintenance in 1900	221.43
Average cost of ration from 1891 to 1898, inclusive	22.17 cts.
Average cost of ration in 1890	23.07 "
Average cost of ration in 1900	23.90 "

Our fourth and fifth reports exhibit descriptive lists of all the members of the Home up to January 1, 1899.

To save repeating the names of those who have had no connection with the Home during the last two years, we append a descriptive list of those only who were members on January 1, 1899, and of those who have been readmitted or admitted since that time, those who are now members being indicated by an asterisk.

DEATHS FROM JANUARY 1, 1899, TO JANUARY 1, 1901.

1. SAMUEL E. DUDLEY, age 66. Co. C, 13th N. H. Entered the Home February 8, 1892. Discharged July 30, 1892, by his request. Readmitted September 24, 1892. Died March 13, 1899, of heart disease. Buried in Home lot.
2. ALEXANDER W. KIDDER, age 58. Co. B, 4th N. H. Entered the Home July 1, 1899. Died August 12, 1899, of consumption. Buried at Somersworth.
3. SAMUEL MARSH, age 84. Co. E, 15th N. H. Entered the Home October 21, 1897. Died August 15, 1899, of cancer. Buried in Home lot.
4. LEVI M. RYAN, age 61. Co. G, 137th N. Y. Entered the Home June 15, 1898. Discharged March 4, 1899, at his request. Readmitted July 13, 1899. Died September 8, 1899, of paralysis. Buried in Home lot.
5. ROBERT H. CROFFORD, age 65. Co. F, 6th N. H. Entered the Home June 28, 1899. Died September 16, 1899, of heart trouble. Buried in Home lot.
6. JOB C. JENNE, age 66. Co. E, 12th N. H. Entered the Home January 19, 1895. Discharged May 9, 1895, by his request. Readmitted August 5, 1899. Died September 22, 1899, of paralysis. Buried at Gilmanton.
7. WILLARD O. HURD, age 61. Assistant Surgeon in 83d and 97th N. Y. Entered the Home December 8, 1894. Died January 11, 1900, of heart disease. Buried in Home lot.
8. URIAH ROBERTSON, age 64. Second Lieutenant Co. C, 17th Mass. Entered the Home August 22, 1899. Died January 17, 1900, of paralysis. Buried at Conway.
9. SAMUEL COLBY, age 67. Co. E, 41st Ohio. Co. E, 5th U. S. V. V. Entered the Home December 15, 1893. Died January 20, 1900, of apoplexy. Buried in Home lot.
10. DANIEL MCKENZIE, age 60. Co. A, 9th Me. Co. D, 1st N. H. Entered the Home January 26, 1900. Died January 29, 1900, of heart failure. Buried at Wilmot.

11. HANAN PIPER, age 77. Co. D, 8th N. H. Entered the Home October 13, 1893. Discharged March 30, 1894, by his request. Readmitted October 11, 1899. Died January 31, 1900, of gangrene. Buried at Laconia.
12. CHARLES P. HILL, age 58. Co. I, 3d N. H. Entered the Home January 6, 1896. Discharged January 21, 1896, by his request. Readmitted March 24, 1896. Died March 16, 1900, of general paresis. Buried in Home lot.
13. CHARLES F. WENTWORTH, age 61. Co. L, 1st N. H. Cavalry. Entered the Home January 17, 1895. Discharged August 22, 1896, by his request. Readmitted July 27, 1897. Died July 22, 1900, of brain disease. Buried in Home lot.
14. ISAAC DONAGHIE, age 37. Co. G, 1st N. H. Vols. Spanish War. Entered the Home August 12, 1900. Died August 17, 1900, of asthma. Buried in Home lot.
15. GEORGE FOX GUPPY, age 59. Captain 5th N. H. Entered the Home October 13, 1898. Died August 27, 1900, of brain trouble. Buried at Rochester.
16. ASA KENISTON, age 84. Co. I, 12th N. H. Entered the Home December 22, 1890. Discharged September 25, 1891, by his request. Readmitted January 14, 1896. Died September 14, 1900, of heart disease. Buried in Home lot.
17. DANIEL HARRINGTON, age 56. Co. K, 5th N. H. and V. R. C. Entered the Home April 10, 1891. Discharged August 4, 1891, V. P. R. Readmitted September 12, 1891. Discharged December 12, 1891, dropped. Readmitted March 12, 1892. Discharged March 22, 1893, by his request. Readmitted December 13, 1893. Discharged June 3, 1894, V. P. R. Readmitted August 16, 1894. Discharged March 27, 1895, dishonorable. Readmitted July 13, 1896. Died September 15, 1900, of heart disease. Buried in Home lot.
18. GEORGE H. DREW, age 69. Second Lieutenant Co. A, 9th N. H. Entered the Home August 29, 1900. Died September 17, 1900, of pulmonary tuberculosis. Buried in Home lot.

19. JOHN F. GUILD, age 73. Co. C, 13th N. H. Entered the Home December 6, 1890. Discharged May 29, 1891, by his request. Readmitted October 11, 1891. Discharged November 14, 1891, by his request. Readmitted November 23, 1893. Discharged September 29, 1894, dropped. Readmitted January 5, 1895. Discharged May 11, 1895, by his request. Readmitted January 11, 1900. Died in Bow, September 18, 1900, of erysipelas, while away on furlough. Buried at Concord.
20. ALFRED DEARBORN, age 84. Co. F, 12th N. H. Entered the Home July 21, 1899. Died October 22, 1900, of brain disease. Buried in Home lot.
21. MOSES C. BERRY, age 76. Co. H, 33d Mass. Entered the Home November 14, 1892. Died November 13, 1900, of paralysis. Buried in Woodlawn cemetery, Everett, Mass.

We submit the following report of the commandant, and call particular attention to his statements in regard to the hospital, the laundry, the electric light plant, and other improvements to the buildings and the farm. We are of opinion that the changes made in these accommodations of the Home have been wise and timely; and we are especially gratified by the demonstration that they have been made not only greatly to the convenience, comfort, and safety of the establishment, but also without any real pecuniary cost, the saving in the expense of laundry work fully compensating the entire outlay for lighting the buildings and grounds brilliantly and keeping up easy and valuable communication by telephone with all parts of the premises.

REPORT OF THE COMMANDANT.

NEW HAMPSHIRE SOLDIERS' HOME,

TILTON, N. H., January 1, 1901.

Col. Daniel Hall, Secretary Board of Managers, New Hampshire Soldiers' Home:

SIR,—I have the honor to submit the sixth report of this Home, from January 1, 1899, to January 1, 1901.

Number present January 1, 1899	85
Number absent with leave	1
Number admitted during two years	47
Number readmitted	53
Number present January 1, 1901	86
Number discharged at their own request	46
Number discharged after violating the pension rules and leaving the Home	13
Number dishonorably discharged	5
Number dropped,—away over sixty days	11
Number died	21
Average number in attendance, 1899	85
Average number in attendance, 1900	78
Age of oldest man in the Home	87
Age of youngest man in the Home	52
Average cost per capita of maintenance, in 1899	\$208.87
Average cost per capita of maintenance, in 1900	221.43
Average cost of ration in 18992307
Average cost of ration in 19002390

The average cost of ration includes replacing of crockery and cooking utensils, payment of all kitchen and dining room help, and tobacco furnished to all members. This includes all officers, help, and company, as the estimate is only for the members actually present. If the cost of subsistence should be computed on all who partake of the hospitality of the Home it would materially decrease the expense per ration.

Whole number cared for since the Home was opened, December 6, 1890, 416, of whom 3 served in the Mexican War, 2 in both Mexican and Civil Wars, 410 in Civil War, 5 in Spanish-American War, and 1 who served in both Civil and Spanish Wars.

Whole number of deaths, 78.

EMPLOYED AT THE HOME.

Nurses detailed as required.

BILL OF FARE FOR WEEK ENDING NOVEMBER 24, 1900.

(GENERAL DINING HALL.)

SUNDAY.

Breakfast.—Oyster stew, cold meat, doughnuts, bread, butter, crackers, pickles, tea, coffee, milk.

Dinner.—Baked beans, cold meat, brown and white bread, butter, chili sauce, meat pie, crackers, pickles, tea, coffee, milk.

Supper.—Bread, butter, crackers, cheese, cookies, tea, milk.

MONDAY.

Breakfast.—Baked potatoes, cold meat, graham gems, doughnuts, bread, butter, crackers, tea, coffee, milk.

Dinner.—Vegetable soup, bread, butter, apple pie, crackers, pickles, tea, coffee, milk.

Supper.—Bread, butter, apple sauce, gingerbread, tea, milk.

TUESDAY.

Breakfast.—Baked potatoes, soup, doughnuts, bread, butter, crackers, tea, coffee, milk.

Dinner.—Boiled potatoes, New England boiled dinner, bread, butter, apple dumpling, crackers, pickles, tea, coffee, milk.

Supper.—Bread, butter, cranberry sauce, sponge cake, crackers, tea, milk.

WEDNESDAY.

Breakfast.—Baked potatoes, cold mutton, corn cake, bread, butter, doughnuts, crackers, tea, coffee, milk.

Dinner.—Boiled potatoes, roast pork, onions, apple pie, bread, butter, crackers, tea, coffee, milk.

Supper.—Bread, butter, cabbage warmed, cheese, cake, crackers, tea, milk.

THURSDAY.

Breakfast.—Vegetable hash, doughnuts, bread, butter, tea, coffee, milk.

Dinner.—Baked beans, chili sauce, bread, butter, cracker pudding, crackers, tea, coffee, milk.

Supper.—Bread, butter, apple sauce, hash warmed, marble cake, crackers, tea, coffee, milk.

FRIDAY.

Breakfast.—Baked potatoes, codfish and cream, biscuit, bread, butter, crackers, tea, coffee, milk.

Dinner.—Fish chowder, bread, butter, pumpkin pie, crackers, tea, coffee, milk.

Supper.—Bread, butter, chowder warmed, boiled cider apple sauce, crackers, tea, milk.

SATURDAY.

Breakfast.—Baked potatoes, cold meat, bread, butter, crackers, tea, coffee, milk.

Dinner.—Boiled potatoes, roast beef, squash, bread, butter, cornstarch pudding, crackers, tea, coffee, milk.

Supper.—Bread, butter, cranberry sauce, sponge cake, crackers, tea, milk.

The bill of fare is changed to conform to the season of the year, fresh berries being served freely when obtainable. Apples are placed in convenient locations where the members and employees have access to them at all times. The hospital bill of fare is regulated by the commandant as occasion requires.

The same general system has prevailed as heretofore in purchasing food supplies of excellent quality and placing them before the men in an inviting manner.

HOSPITAL.

Nearly all the time for the past two years every room in the hospital has been occupied. As heretofore, fairly well men are detailed to take care of the sick, one nurse having charge of but one sick man except in very mild cases, when he has the care of two, but in no instance more than two. This method has proved satisfactory, as by it the sick men have constant attention from one who cheerfully and sympathetically looks after their every want. The detailed nurses receive a small compensation, according to their work.

Dr. Lamb has responded to all calls, day or night, and given excellent satisfaction, not only by his medical and surgical treatment, but also by his uniform kindness and patience. The consulting surgeons, Drs. J. M. Cheney and G. P. Conn, whenever their presence has been required, have spared no pains or inconvenience to themselves to render all the professional skill possible in each case.

LAUNDRY PLANT.

It was with great satisfaction that I received instructions from the board of managers to procure machinery and establish a laundry plant suitable for the needs of the Home, and after careful investigation, in connection with the secretary of the board, a contract was closed, in June, 1899, with the Poland Laundry Machinery Company of Boston, Mass., for

the necessary machinery, and work was at once commenced to lay pipes for steam, hot and cold water, put down floors and build partitions in the basement of the west wing, where the laundry machinery was to be located. The work was completed about the first of October, and has been in operation since that time, giving entire satisfaction in all respects.

The detailed expense of the plant follows:

Machinery	\$708.15
10-horse power electric motor with wires complete	364.56
Steam and water pipes and laying same . .	315.31
Mason work in connection with piping . .	133.47
Partitions and floors	78.10
Labor in digging ditch	68.25
Asbestos covering for steam pipes	58.77
Belting	18.40
2 electric sad irons	15.71
1 electric fan	13.50
Freight on machinery	11.25
Paint stock and nails	6.00
Trucking from depot	4.00
Express charges	2.00
Total	<hr/> \$1,797.47

ELECTRIC LIGHT PLANT.

Another improvement which has added materially to the safety, convenience, and comfort of the Home was the placing, in the summer of 1899, of electricity in the buildings and grounds, for lighting purposes. After the matter was thoroughly investigated by the board of managers and the commandant, it was found advisable to make a five years' contract with the Tilton Electric Company for an all-night service, they to run wires to the Home and supply transformers. The wiring of the buildings was done in a very thorough manner by M. C. Allen of Tilton and Wilfred Smith of Campton, being day work personally superintended by the commandant.

The aggregate expense was as follows:

Wire and other supplies	\$548.00
Labor	275.81
Electroliers	72.64
Brackets	3.70
	<hr/>
	\$900.15

In addition to this, John G. Foster W. R. C. of Nashua, E. E. Sturtevant W. R. C. of Concord, and Sawyer W. R. C. of Dover furnished electroliers for reception room and office, library, chapel, and reception room in hospital, respectively.

Cost of electricity per year:

Lights	\$500.00
Power for motor	100.00
Heat for hand sad irons	24.00
	<hr/>
	\$624.00

In order to show the difference between the expense of laundry work while done away from the Home and lighting with oil, and the same work done by machinery here and lighting by electricity, this report includes expense for these two items for the year 1898, which was the last full year under the former method, and 1900, the first full year under the present one. Every item of expense is included for each year, except no account has been made of trucking the washing two miles twice a week, and labor of mending a large share of the wearing apparel by the matron, for 1898, and interest on laundry and electric plants for 1900.

Expense of laundry work for year 1898:

Mrs. Blackey for washing and ironing .	\$799.64
Concord Steam Laundry	202.77
Express	31.20
Mrs. Peters, washing blankets	27.43
Mrs. Powers, mending	5.65
Mrs. Teague, mending	88.57
	<hr/>
	\$1,155.26

Expense of lighting buildings for year 1898:

Oil, burners, and wicks	\$202.04
-----------------------------------	----------

Total	\$1,357.30
-----------------	------------

Expense of running electric plant for year 1900:

Electricity	\$500.00
-----------------------	----------

Burners and other supplies	118.97
--------------------------------------	--------

Aggregate	\$618.97
---------------------	----------

Expense of running laundry for year 1900:

Labor	\$380.00
-----------------	----------

Board of laundress	83.72
------------------------------	-------

Coal for steam	100.00
--------------------------	--------

Soap, starch, covers for mangle, oil, and other supplies	172.72
---	--------

Aggregate	736.44
---------------------	--------

Total	\$1,355.41
-----------------	------------

OTHER IMPROVEMENTS.

A hog house costing \$128.32, located some distance from the buildings, was constructed in June of the present year.

A 5x5 foot ditch extending from the south line in the hollow east of the buildings, to the wall dividing the mowing and pasture. A stone drain was laid in this ditch and the ditch filled with stone to within eighteen inches of the surface, redeeming about two acres of what was waste land and making it the most productive garden spot on the farm. Besides labor of members the expense was \$87.05.

Removing stone, and grading field north of old house to highway, and setting a row of elm trees parallel with road, at an expense of \$106.05.

PRODUCE OF FARM.

1899.

2,578 pounds pork	5 and 5½ c.	\$131.87
103 barrels apples	\$2.00	206.00

REPORT OF NEW HAMPSHIRE SOLDIERS' HOME. 17

20 bushels beets	\$0.50	\$10.00

300 bunches asparagus10	30.00
Beans, cucumbers, lettuce, sweet corn, peas, rhubarb, radish, and tomatoes, estimated		100.00
		<hr/> \$1,057.62

RELIGIOUS SERVICES.

Students from the New Hampshire Conference Seminary have continued to hold services Sunday evenings during each school year, as heretofore, in our Home chapel. Rev. Roscoe Sanderson, Rev. C. C. Sampson, and Rev. Father Finan of Tilton, and Rev. Mr. Bradeen of Franklin have conducted

funeral services during the two years, which service, without compensation, has been highly appreciated.

On Memorial Sundays, during the two years, services have been held under the auspices of the G. A. R. connected with the Home, Rev. E. S. Moulton of Belmont preaching interesting sermons and a quartet from the seminary furnishing music.

Rev. Mr. Gould of Tilton preached in the chapel on the afternoon of November 30, 1899. On January 21, 1900, the Rev. John L. Clark, assisted by Isaac B. Vail, both of Manchester, held a service, as did the Rev. Mr. McDougall in the spring of 1900.

LIBRARY.

We have 1,400 bound volumes besides a large number of periodicals. The following named papers have been furnished gratuitously by the publishers, for which they have the thanks of all connected with the Home:

"Concord Monitor" (daily), "Independent Statesman," "Veterans' Advocate," "Concord Tribune," Concord.

"Mirror and American" (daily), "Mirror and Farmer," Manchester.

"Evening Times" (daily), "Portsmouth Journal," "Portsmouth Herald," "Portsmouth Daily Republican," "Portsmouth Daily Chronicle," "N. H. Gazette," Portsmouth.

"Foster's Weekly Democrat," Dover.

"Laconia Democrat," "The News and Critic," "The Belknap Republican," Laconia.

"The Journal-Transcript," Franklin.

"Nashua Telegraph" (daily), Nashua.

"Cheshire Republican," Keene.

"Rochester Courier," "The Rochester Leader," Rochester.

"Exeter Gazette," "The Exeter News Letter," Exeter.

"Boston Globe," "The Morning Star," "The Pilot," "Christian Science," Boston, Mass.

"The Lowell Sun," Lowell, Mass.

"The Independent," Salmon Falls.

"The Peterborough Transcript," Peterborough.

"Canaan Reporter," Canaan.
 "Weekly Enterprise," Bristol.
 "Ashland Item," Ashland.
 "Plymouth Record," Plymouth.
 "Union Signal," Chicago, Ill.
 "Congressional Record," Washington, D. C.
 "Lancaster Gazette," Lancaster.
 "Littleton Courier," "The Republic," Littleton.
 "Somersworth Free Press," Somersworth.

ENTERTAINMENTS.

1899.

January.—A graphophone entertainment given by G. K. Burleigh, Tilton.

1900.

January.—Horrigan & Stone's Aggregation Company gave an entertainment.

February.—Graphophone entertainment by Mr. Harvey of Franklin Falls.

September.—The Concord W. R. C. entertained the members in the chapel for an hour.

VISITORS.

1899.

Delegates from different New Hampshire Posts attended the installation exercises of the Home Post.

February.—One hundred and fifty members of the legislature inspected and dined at the Home.

July.—A party of ladies from W. R. C. No. 76 spent the day here.

1900.

September.—A delegation from W. R. C. No. 25 spent the day here.

We were officially inspected by Gen. N. M. Curtis, A. I. G., N. H. D. V. S., on June 11 and October 18, 1899, and April 10 and October 24, 1900.

CONTRIBUTIONS.

1899.

January.—"Harper's Weekly" and "The Army and Navy Magazine," Arthur T. Cass, Tilton; Magic Cover, Mrs. Jennie L. Sanger, Franklin Falls.

February.—Valentine box, W. R. C. No. 57, Somersworth; one volume "Official Records of the Union and Confederate Navies," Senator Gallinger.

March.—Box of books, Mrs. James Osgood, Suncook.

April.—Papers, etc., George B. Farley, Concord.

May.—Fourteen volumes "Harper's Monthly," Mrs. L. A. Farley, Concord.

June.—Lot of hammocks from Massachusetts Aid Society.

August.—Two boxes of magazines, etc., W. R. C. No. 57, Somersworth.

October.—Box from W. R. C. No. 76, Center Barnstead.

November.—One barrel books and magazines, H. B. Humphrey, Derry.

December.—Two Christmas boxes, W. R. C. No. 62, Lebanon; Christmas box, W. R. C. No. 14, Lakeport; Christmas box, W. R. C. No. 11, North Haverhill; Christmas box, W. R. C. No. 9, Plymouth; Christmas box, W. R. C. No. 5, Milford.

Plants from Hon. C. E. Tilton, Mrs. F. J. Moulton, Benjamin Swett, Mrs. Abbie Hoyt, Mrs. Nat Fifield, Mrs. Jasper, Miss Sara Comerford, Mrs. Abbie Durgin, and Mrs. Charles Smith.

1900.

January.—Two boxes, W. R. C. No. 57, Somersworth; box of books, Mrs. York and Mrs. Beckford, Dover; box of books, D. H. Reed, Fitzwilliam.

March.—Box of books, W. R. C. No. 57, Somersworth; case for Memorial Volume, Albert E. Hughes & Co., Mrs. Addie S. Hughes, and Mrs. Annie D. C. Hardy.

October.—Framed picture of James Minot, Concord.

November.—Package of reading matter, Mrs. Grace Darling, Keene; one dozen pairs wristlets, Mrs. C. K. Ide, Laconia.

The W. R. C. have supplied furnishings for the various rooms, when needed, and also rubber tracking for the four wings of the hospital.

PENSIONS.

There has been no change in the pension rules since the last report, and except in a few cases no dissatisfaction is shown among the men.

LIGHTNING.

On July 21, 1899, lightning struck the hospital roof in two places, and damaged the interior to the extent of fifty dollars (\$50), which was adjusted by insurance companies; no one was injured.

During a severe shower on the night of November 7, 1900, the flag pole in front of the main house was struck and slightly damaged; no further result was observed.

The entire charge of all rooms and furnishing is under the supervision of the matron, and whatever of cleanliness and good order is noticeable is due to her systematic management.

We have been especially fortunate in securing and retaining good help. Mr. and Mrs. F. E. Trow have been with us nearly six years, he superintending all farm work and she doing the cooking for the main house. During the annual vacations of the commandant and family they have charge of the Home. For the past five years Mrs. Ladd has done the cooking at the hospital. The board of managers and other visitors can attest to the culinary skill of the cooks. Other help has been employed as occasion demanded, and are with us at the present time. Valuable assistance has been rendered the commandant and the Home in securing a clerk to do the office work.

RECOMMENDATIONS.

I would respectfully recommend that during the coming spring the barn be raised seven feet, extended twenty-four feet to the east, and thoroughly repaired, at an expense not to exceed twelve hundred dollars.

That the old house be repaired or torn down; if the latter, a fruit and vegetable house, frost proof, with no artificial heat, be constructed at a cost of not over eight hundred dollars. Should it be decided to repair the old house, it would be necessary to put on a new roof and expend quite a sum to make the cellar frost tight. On account of steam pipes in all the other basements the cellar to the old house is the only place for storing fruit and vegetables, and we are obliged to keep a coal fire burning whenever the mercury is ten degrees, or less, above zero; which requires two tons of coal each winter and spoils the keeping quality of the contents of the cellar.

That the two lines of steam pipe be taken out of both wings of the brick house and one line of larger size laid, the old pipe to be used to change the system of return pipe under the hospital, by placing the return pipes against the cellar wall, instead of allowing it to remain on cellar bottom in the moist earth where it is in the way, besides rusting out in a short time. This change of the system would lessen the quantity of coal consumed, by giving direct heat from one half the length of pipe now used.

That the board of managers request a state appropriation of twenty thousand dollars, for maintenance for two years, and to make necessary improvements and repairs.

In behalf of Mrs. Smith and myself I extend to you and to your associates on the board of managers my sincere thanks for your many thoughtful acts of kindness to us, and for the unswerving support always freely and earnestly bestowed.

Respectfully submitted.

E. H. SMITH,
Commandant.

DISCIPLINE.

Good order has been maintained without difficulty at all times in and about the Home. Only one cause of disorder or insubordination has ever been encountered, and that probably in a less degree than at almost any other Home in the country. The skillful methods of the commandant in dealing with the occasional indulgence of a few in intoxicants, supported as

he always has been by the managers, have sufficed to reduce this evil to small proportions, and keep it within narrow bounds.

PENSIONS.

During the two years covered by this report, pension money to the amount of \$6,978.65 has been paid to pensioners and their families, and \$4,936.35 has been retained by the managers and turned into the funds of the Home.

We are satisfied of the justice and wisdom of our system of managing the matter of pensions, and that under it the pension bounty of the government has been made more useful than it could be by any other method which we have as yet known how to devise.

Since the Home was organized about \$27,000 has been paid to pensioners and their families, and \$17,584.25 retained by the management and paid over to the state for maintenance.

Number of pensioners now in the Home, 56; monthly aggregate of pensions, \$500.

FINANCIAL STATEMENT.

The following is a statement of the receipts and expenditures of the Home for the two years since our last report, viz., from January 1, 1899, to January 1, 1901:

AVAILABLE FUNDS.

Unexpended balance at the disposal of the board of managers, January 1, 1899	\$2,158.72
Appropriation made March, 1899	20,000.00
Amount received by the state from the United States, in aid of the support of disabled soldiers and sailors, since January 1, 1899	13,935.87
Insurance received for damage by lightning	50.00
Pensions turned over to the use of the Home, from January 1, 1899, to January 1, 1901	4,936.35
Total	<hr/> \$41,080.94

DISBURSEMENTS.

Paid out on all accounts, in and for the year 1899	\$20,822.59	
Paid out on all accounts, in and for the year 1900	18,575.46	
Total		\$39,398.05
Balance unexpended and subject to call of the board		\$1,682.89
The entire cost of maintenance, therefore, includ- ing extraordinary as well as ordinary improve- ments and additions to plant for two years past, is		\$39,398.05
Of this sum there has been re- ceived from the United States government	\$13,935.87	
From pensions	4,936.35	
		18,872.22

Showing that the entire cost to the state of the maintenance of the Home, from January 1, 1899, to January 1, 1901, has been, including all improvements and additions \$20,525.83

Excluding permanent improvements and additions the cost has been \$17,506.79, or \$107.40 per annum for each man supported.

The average cost from 1891 to 1900, inclusive, was \$108.93 per capita.

ESTIMATES.

We refer again to the extraordinary expenditures for laundry purposes and electric lighting recommended in our last report, and point with gratification to the very favorable results of these outlays which the legislature authorized us to make; and we shall in future use any authority intrusted to us by the good judgment of the legislature with the same caution, prudence, and economy.

We indorse the general tenor of the recommendations made by the commandant of some expenditures to be made upon the barn and the old farmhouse, the exact nature and extent of which will be carefully studied and determined upon. Beyond this outlay, and the ordinary repairs, which cannot be large, we anticipate no need for extraordinary expenses during the ensuing two years, except for a more abundant

WATER SUPPLY.

We have always been aware that we have not an adequate supply of water for the Home for fire and domestic purposes. Our water comes from the hills in Northfield, and is brought across the river and furnished to us by the Tilton & Northfield Aqueduct Company. It is conducted through a small pipe from the main in Tilton village to the Home, and delivered in a tank in the upper part of our main building. Thence it is drawn down by gravity to the different places about the premises where it is needed. The head is low and the pipe is small, and will not deliver water in sufficient quantities or at an adequate rate for domestic purposes even, and, as we have no hydrants, we fear that the supply in case of a fire would prove miserably inadequate, and lead to losses and calamities that ought to be avoided. These needs have become greater and more exigent recently by the establishment of a laundry in the house, calling for a larger quantity of water than before.

Therefore the subject of obtaining a larger and more convenient supply has recently engaged our attention more than before, and some investigations have been made as to the proper methods to be adopted to meet our needs. The construction of an aqueduct of our own, bringing water down from the hills north of the Home; of a reservoir for collecting and storing water from the roofs for fire purposes; and the putting in of a larger pipe from the town, and some hydrants; all these have been considered. We have not yet come to any conclusion as to which method may be the most feasible and economical. But we are of opinion that something should be

done at an early day to remedy our deficiencies in this respect; and we trust the legislature will be disposed to give us an appropriation sufficient to meet the quite considerable expense of undertaking and completing this work as soon as the spring weather will permit.

Including our small balance in the treasury and the payments we expect from the general government, we estimate that the sum of \$20,000 will be required to meet the various demands of the Home for maintenance and ordinary expenses of buildings and grounds for the next two years, and we, therefore, recommend the appropriation of that sum.

COMMANDANT AND MATRON.

Captain and Mrs. E. H. Smith have served us during the last two years with their usual fidelity and ability, and their continuance in the same capacity for now upwards of ten years, and ever since the Home was opened, is a sufficient proof of our high estimate of their administration of these important duties.

SURGEONS.

Dr. F. W. Lamb has continued in the responsible office of surgeon of the Home and performed the duties very satisfactorily since our last report.

The consulting surgeons also have rendered acceptable service whenever called in, and we have reason to gratefully acknowledge their skill, public spirit, and sympathetic interest in the veterans of the Home.

BOARD OF MANAGERS.

The following changes have occurred in the board of managers:

On January 3, 1899, Gov. Frank W. Rollins became a member of the board *ex-officio*, and has since rendered important service.

In April, 1899, Col. Horace L. Worcester, by virtue of his office as commander of the Grand Army of the Republic, succeeded Gen. A. S. Twitchell *ex-officio*, and served on the board up to April, 1900.

In October, 1899, at the expiration of his term, Hon. Charles E. Tilton was reappointed for a term of five years.

In April, 1900, Maj. David E. Proctor succeeded Col. H. L. Worcester as department commander of the Grand Army of the Republic, and became and is now *ex-officio* a member of the board.

In October, 1900, the term of Col. Thomas P. Cheney expired, and Capt. M. L. Morrison was appointed for a term of five years.

CONCLUSION.

We invite a thorough examination of the Home, with a view to a complete understanding of its condition and management on the part of the legislature, and a visit to the Home during your session by the entire legislature, or any of its committees, or individual members, will afford great pleasure to the managers and officers of the Home.

Respectfully submitted.

FRANK W. ROLLINS, *ex-officio*, Chairman,

DANIEL HALL, Secretary,

CHARLES E. TILTON,

CHARLES W. STEVENS,

M. M. COLLIS,

D. E. PROCTOR,

M. L. MORRISON,

Board of Managers, N. H. Soldiers' Home.

SOLDIERS' HOMES.

NATIONAL HOMES.

- Central.—Col. J. B. Thomas, governor. Montgomery county, Ohio.
- Northwestern.—Capt. C. Wheeler, governor. Milwaukee county, Wisconsin.
- Eastern.—Col. S. H. Allen, governor. Togus, Maine.
- Southern.—Capt. P. T. Woodfin, governor. Elizabeth City county, Virginia.
- Western.—Maj. J. G. Rowland, governor. Leavenworth county, Kansas.
- Pacific.—Col. O. H. Lagrange, governor. Los Angeles county, California.
- Marion.—Capt. J. H. Chapman, governor. Grant county, Indiana.
- Danville.—Col. Isaac Clements, governor. Danville, Ill.
- United States Soldiers' Home (for Regulars).—Brig.-Gen. D. S. Stanley, governor. Washington, D. C.

STATE HOMES.

- California.—George W. Watts, commandant. Napa county.
- Colorado.—Capt. John H. Shaw, commandant. Monte Vista.
